FEDERAL REGISTER

Vol. 81 Monday,

No. 219 November 14, 2016

Pages 79381–79990

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.ofr.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.fdsys.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, 1 (January 2, 1994) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $749 plus postage, or $808, plus postage, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 81 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2016–5593; Directorate Identifier 2015–NM–184–AD; Amendment 39–18687; AD 2016–21–06]

RIN 2120–AA64

Airworthiness Directives; Bombardier, Inc. Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are superseding Airworthiness Directive (AD) 2015–02–23, for certain Bombardier, Inc. Model CL–600–1A11 (CL–600), CL–600–2A12 (CL–601), and CL–600–2B16 (CL–601–3A and CL–601–3R Variants) airplanes. AD 2015–02–23 required repetitive inspections for fractured or incorrectly oriented fasteners on the inboard flap hinge-box forward fittings on both wings, and replacement of all fasteners if necessary. This new AD also requires replacement of the fasteners, which terminates the requirements of this AD. This AD was prompted by reports of incorrectly oriented fasteners. We are issuing this AD to prevent incorrectly oriented or fractured fasteners, which could result in detachment of the flap hinge-box and the flap surface, and consequent reduced controllability of the airplane.

DATES: This AD is effective December 19, 2016.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of February 18, 2015 (80 FR 5670, February 3, 2015).

ADDRESSES: For service information identified in this final rule, contact Bombardier, Inc., 400 Côte-Vertu Road West, Dorval, Québec H4S 1Y9, Canada; Widebody Customer Response Center North America toll-free telephone: 1–866–538–1247 or direct-dial telephone: 1–514–855–2999; fax 514–855–7401; email: *ac.yul@aero.bombardier.com;* Internet: *http://www.bombardier.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221. It is also available on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–5593.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–5593; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The address for the Docket Office (telephone: 800–647–5527) is Docket Management Facility, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Aziz Ahmed, Aerospace Engineer, Airframe and Mechanical Systems Branch, ANE–171, FAA, New York Aircraft Certification Office (ACO), 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone: 516–228–7329; fax: 516–794–5531.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 2015–02–23, Amendment 39–18092 (80 FR 5670, February 3, 2015) (''AD 2015–02–23''). AD 2015–02–23 applied to certain Bombardier, Inc. Model CL–600–1A11 (CL–600), CL–600–2A12 (CL–601), and CL–600–2B16 (CL–601–3A and CL–601–3R Variants) airplanes. AD 2015–02–23 corresponded to Canadian Emergency AD CF–2013–39R2, dated December 12, 2014 (referred to after this as the Mandatory Continuing Airworthiness Information, or ''the MCAI''). The MCAI was issued by Transport Canada Civil Aviation (TCCA), which is the aviation authority for Canada.

The preamble to AD 2015–02–23 explained that we considered the requirements interim action and were considering further rulemaking. We have now determined that further rulemaking is indeed necessary and that, instead of continuing repetitive inspections, for airplanes which have any incorrectly oriented fastener, and no fractured or missing fastener, replacement of all forward and aft fasteners, regardless of condition or orientation, is necessary. This AD follows from that determination.

The NPRM published in the **Federal Register** on April 20, 2016 (81 FR 23202). The NPRM was prompted by reports of incorrectly oriented fasteners. The NPRM proposed to continue to require repetitive inspections for fractured or incorrectly oriented fasteners on the inboard flap hinge-box forward fittings on both wings, and replacement of all fasteners if necessary. The NPRM also proposed to require replacement of the fasteners, which would terminate the requirements of this AD. We are issuing this AD to prevent incorrectly oriented or fractured fasteners, which could result in detachment of the flap hinge-box and the flap surface, and consequent reduced controllability of the airplane.

Comments

We gave the public the opportunity to participate in developing this AD. We received no comments on the NPRM or on the determination of the cost to the public.

Conclusion

We reviewed the available data and determined that air safety and the public interest require adopting this AD as proposed except for minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM.

Related Service Information Under 1 CFR Part 51

Bombardier has issued Alert Service Bulletins A600–0763, Revision 02, dated December 9, 2014, including Appendixes 1 and 2, dated September 26, 2013; and A601–0627, Revision 02, dated December 9, 2014, including Appendixes 1 and 2, dated September 26, 2013. The service information describes procedures for repetitive inspections of the fasteners on the inboard flap hinge-box forward fittings on both wings, and replacement of fasteners. These documents are distinct since they apply to different airplane models. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

We estimate that this AD affects 120 airplanes of U.S. registry.

The actions required by AD 2015–02–23, and retained in this AD, take about 1 work-hour per product, at an average labor rate of $85 per work-hour. Based on these figures, the estimated cost of the actions that are required by AD 2015–02–23 is $85 per product.

We also estimate that it would take about 59 work-hours per product to comply with the basic requirements of this AD. The average labor rate is $85 per work-hour. We have received no definitive data that would enable us to provide cost estimates for the parts cost. Based on these figures, we estimate the cost of this AD on U.S. operators to be $601,800, or $5,015 per product.

In addition, we estimate that any necessary follow-on actions will take about 58 work-hours and require parts costing $753, for a cost of $5,683 per product. We have no way of determining the number of aircraft that might need this action.

According to the manufacturer, some of the costs of this AD may be covered under warranty, thereby reducing the cost impact on affected individuals. We do not control warranty coverage for affected individuals. As a result, we have included all available costs in our cost estimate.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, Section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

1. Is not a ''significant regulatory action'' under Executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);

3. Will not affect intrastate aviation in Alaska; and

4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by removing Airworthiness Directive (AD) 2015–02–23, Amendment 39–18092 (80 FR 5670, February 3, 2015), and adding the following new AD:

2016–21–06 Bombardier, Inc.: Amendment 39–18687; Docket No. FAA–2016–5593; Directorate Identifier 2015–NM–184–AD.

(a) Effective Date

This AD is effective December 19, 2016.

(b) Affected ADs

This AD replaces AD 2015–02–23, Amendment 39–18092 (80 FR 5670, February 3, 2015) (''AD 2015–02–23''). This AD affects AD 2014–03–17, Amendment 39–17754 (79 FR 9389, February 19, 2014) (''AD 2014–03–17'').

(c) Applicability

This AD applies to the Bombardier, Inc. airplanes identified in paragraphs (c)(1), (c)(2), and (c)(3) of this AD, certificated in any category.

(1) Bombardier, Inc. Model CL–600–1A11 (CL–600) airplanes, having serial numbers (S/Ns) 1004 through 1085 inclusive.

(2) Bombardier, Inc. Model CL–600–2A12 (CL–601) airplanes, having S/Ns 3001 through 3066 inclusive.

(3) Bombardier, Inc. Model CL–600–2B16 (CL–601–3A and CL–601–3R Variants) airplanes, having S/Ns 5001 through 5194 inclusive.

(d) Subject

Air Transport Association (ATA) of America Code 57, Wings.

(e) Reason

This AD was prompted by reports of incorrectly oriented fasteners. We are issuing this AD to prevent incorrectly oriented or fractured fasteners, which could result in detachment of the flap hinge-box and the flap surface, and consequent reduced controllability of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Retained Inspection on Airplanes Not Previously Inspected, With No Changes

This paragraph restates the requirements of paragraph (g) of AD 2015–02–23, with no changes. For airplanes that have not been inspected as required by paragraph (g) of AD 2014–03–17, as of February 18, 2015 (the effective date of AD 2015–02–23): Within 10 flight cycles after February 18, 2015, or 100 flight cycles after March 6, 2014 (the effective date of AD 2014–03–17), whichever occurs first, do a detailed visual inspection for incorrect orientation and any fractured or missing fastener heads of each inboard flap fastener of the hinge-box forward fitting at wing station (WS) 76.50 and WS 127.25, on both wings, in accordance with the Accomplishment Instructions of the applicable service information specified in paragraphs (g)(1) and (g)(2) of this AD. Accomplishing the inspection required by this paragraph terminates the requirements of paragraph (g) of AD 2014–03–17 for the inspected airplane only.

(1) For Model CL–600–1A11 (CL–600) airplanes having S/Ns 1004 through 1085 inclusive: Bombardier Alert Service Bulletin A600–0763, Revision 02, dated December 9, 2014, including Appendixes 1 and 2, dated September 26, 2013.

(2) For Model CL–600–2A12 (CL–601) airplanes having S/Ns 3001 through 3066

inclusive, and Model CL–600–2B16 (CL–601–3A and CL–601–3R Variants) airplanes having S/Ns 5001 through 5194 inclusive: Bombardier Alert Service Bulletin A601–0627, Revision 02, dated December 9, 2014, including Appendixes 1 and 2, dated September 26, 2013.

(h) Retained Corrective Actions for Paragraph (g) of This AD, With Revised Paragraph (h)(2) of This AD

(1) This paragraph restates the requirements of paragraph (h)(1) of AD 2015–02–23, with no changes. If, during any inspection required by paragraph (g) of this AD, all fasteners are found correctly oriented and not fractured, and no fastener heads are missing (fasteners found intact): No further action is required by this AD.

(2) This paragraph restates the requirements of paragraph (h)(2) of AD 2015–02–23, with revised references to replacement paragraphs. If, during any inspection required by paragraph (g) of this AD, any fastener is found incorrectly oriented but no fasteners are fractured or are missing a fastener head (fasteners found intact), repeat the inspection required by paragraph (g) of this AD thereafter at intervals not to exceed 10 flight cycles until the replacements specified in paragraphs (h)(3), (k), or (n) of this AD are accomplished.

(3) This paragraph restates the requirements of paragraph (h)(3) of AD 2015–02–23, with no changes. If, during any inspection required by paragraph (g) of this AD, any fastener is found fractured or has a missing fastener head: Before further flight, remove and replace all forward and aft fasteners (regardless of orientation or condition) at WS 76.50 and WS 127.25, on both wings, in accordance with the Accomplishment Instructions of the applicable service information specified in paragraphs (h)(3)(i) and (h)(3)(ii) of this AD, except as required by paragraph (m) of this AD. After accomplishing the replacements required by this paragraph, no further action is required by this AD.

(i) For Model CL–600–1A11 (CL–600) airplanes having S/Ns 1004 through 1085 inclusive: Bombardier Alert Service Bulletin A600–0763, Revision 02, dated December 9, 2014, including Appendixes 1 and 2, dated September 26, 2013.

(ii) For Model CL–600–2A12 (CL–601) airplanes having S/Ns 3001 through 3066 inclusive, and Model CL–600–2B16 (CL–601–3A and CL–601–3R Variants) airplanes having S/Ns 5001 through 5194 inclusive: Bombardier Alert Service Bulletin A601–0627, Revision 02, dated December 9, 2014, including Appendixes 1 and 2, dated September 26, 2013.

(i) Retained Inspection for Airplanes Previously Inspected and Found To Have Incorrectly Oriented Fastener(s), With No Changes

This paragraph restates the requirements of paragraph (i) of AD 2015–02–23, with no changes. For airplanes on which an inspection required by paragraph (g) or (j) of AD 2014–03–17, has been done as of the effective date of this AD, and on which any incorrectly oriented fastener was found but no fasteners were fractured (fasteners found intact): Except as provided by paragraph (l) of this AD, within 10 flight cycles after February 18, 2015 (the effective date of AD 2015–02–23), or within 100 flight cycles after accomplishing the most recent inspection required by AD 2014–03–17, whichever occurs first, do a detailed visual inspection for any fractured or missing fastener heads of each inboard flap fastener of the hinge-box forward fitting at WS 76.50 and WS 127.25, on both wings. Do the inspection in accordance with the Accomplishment Instructions of the applicable service information specified in paragraphs (i)(1) and (i)(2) of this AD. Accomplishing the inspection required by this paragraph terminates the requirements of paragraphs (g) and (j) of AD 2014–03–17 for the inspected airplane only.

(1) For Model CL–600–1A11 (CL–600) airplanes having S/Ns 1004 through 1085 inclusive: Bombardier Alert Service Bulletin A600–0763, Revision 02, dated December 9, 2014, including Appendixes 1 and 2, dated September 26, 2013.

(2) For Model CL–600–2A12 (CL–601) airplanes having S/Ns 3001 through 3066 inclusive, and Model CL–600–2B16 (CL–601–3A and CL–601–3R Variants) airplanes having S/Ns 5001 through 5194 inclusive: Bombardier Alert Service Bulletin A601–0627, Revision 02, dated December 9, 2014, including Appendixes 1 and 2, dated September 26, 2013.

(j) Retained Corrective Actions for Paragraph (i) of This AD, With Revised Reference to Additional, New Requirements

(1) This paragraph restates the requirements of paragraph (j)(1) of AD 2015–02–23, with revised reference to additional, new requirements. If, during any inspection required by paragraph (i) of this AD, no fasteners are found fractured or have missing fastener heads (fasteners are intact), repeat the inspection required by paragraph (i) of this AD thereafter at intervals not to exceed 10 flight cycles until the replacement specified in paragraph (j)(2), (k), or (n) of this AD is accomplished.

(2) This paragraph restates the requirements of paragraph (j)(2) of AD 2015–02–23, with no changes. If, during any inspection required by paragraph (i) of this AD, any fastener is found fractured or has a missing fastener head: Before further flight, remove and replace all forward and aft fasteners (regardless of orientation or condition) at WS 76.50 and WS 127.25, on both wings, in accordance with the Accomplishment Instructions of the applicable service information specified in paragraphs (j)(2)(i) and (j)(2)(ii) of this AD, except as required by paragraph (m) of this AD. After accomplishing the replacements required by this paragraph, no further action is required by this AD.

(i) For Model CL–600–1A11 (CL–600) airplanes having S/Ns 1004 through 1085 inclusive: Bombardier Alert Service Bulletin A600–0763, Revision 02, dated December 9, 2014, including Appendixes 1 and 2, dated September 26, 2013.

(ii) For Model CL–600–2A12 (CL–601) airplanes having S/Ns 3001 through 3066 inclusive, and Model CL–600–2B16 (CL–601–3A and CL–601–3R Variants) airplanes having S/Ns 5001 through 5194 inclusive: Bombardier Alert Service Bulletin A601–0627, Revision 02, dated December 9, 2014, including Appendixes 1 and 2, dated September 26, 2013.

(k) Retained Optional Terminating Action for Incorrectly Oriented Fasteners, With No Changes

This paragraph restates the provisions of paragraph (k) of AD 2015–02–23, with no changes. Replacement of all forward and aft fasteners (regardless of orientation or condition) at WS 76.50 and WS 127.25, on both wings, terminates the requirements of this AD. The replacement must be done in accordance with the Accomplishment Instructions of the applicable service information specified in paragraphs (k)(1) and (k)(2) of this AD, except as provided by paragraph (m) of this AD. Doing the replacements specified in this paragraph terminates the requirements of paragraphs (g) and (j) of AD 2014–03–17, only for the airplane on which the replacement was done.

(1) For Model CL–600–1A11 (CL–600) airplanes having S/Ns 1004 through 1085 inclusive: Bombardier Alert Service Bulletin A600–0763, Revision 02, dated December 9, 2014, including Appendixes 1 and 2, dated September 26, 2013.

(2) For Model CL–600–2A12 (CL–601) airplanes having S/Ns 3001 through 3066 inclusive, and Model CL–600–2B16 (CL–601–3A and CL–601–3R Variants) airplanes having S/Ns 5001 through 5194 inclusive: Bombardier Alert Service Bulletin A601–0627, Revision 02, dated December 9, 2014, including Appendixes 1 and 2, dated September 26, 2013.

(l) Retained Exception for Previously Replaced Fasteners, With No Changes

This paragraph restates the provisions of paragraph (l) of AD 2015–02–23, with no changes. Replacement of all fractured and incorrectly oriented forward and aft fasteners, as specified in paragraph (i) or (k) of AD 2014–03–17, if done before the effective date of this AD, is considered acceptable for compliance with the requirements of this AD.

(m) Retained Exception to the Service Information, With No Changes

This paragraph restates the requirements of paragraph (m) of AD 2015–02–23, with no changes. Where Bombardier Alert Service Bulletin A600–0763, Revision 02, dated December 9, 2014, including Appendixes 1 and 2, dated September 26, 2013; and Bombardier Alert Service Bulletin A601–0627, Revision 02, dated December 9, 2014, including Appendixes 1 and 2, dated September 26, 2013; specify to contact Bombardier for repair instructions, before further flight, repair using a method approved by the Manager, New York Aircraft Certification Office (ACO), FAA; or Transport Canada Civil Aviation (TCCA); or Bombardier's TCCA Design Approval Organization (DAO).

(n) New Requirement of This AD: Terminating Action

For airplanes on which any incorrectly oriented fastener, and no fractured or missing fastener, was detected during any inspection required by paragraph (g), (h)(2), (i), and (j)(1) of this AD: Within 24 months after the effective date of this AD, replace all forward and aft fasteners, regardless of condition or orientation, at WS 76.50 and WS 127.25, on affected wings, in accordance with the Accomplishment Instructions of the applicable service information specified in paragraphs (k)(1) and (k)(2) of this AD, except as provided by paragraph (m) of this AD. Doing the replacements specified in this paragraph terminates the requirements of this AD. Doing the replacements specified in this paragraph terminates the requirements of paragraphs (g) and (j) of AD 2014–03–17, only for the airplane on which the replacement was done.

(o) Credit for Previous Actions

This paragraph restates the provisions of paragraph (n) of AD 2015–02–23, with new credit for paragraph (n) of this AD. This paragraph provides credit for actions required by paragraphs (g), (h), (i), and (n) of this AD, if those actions were performed before the effective date of this AD using the applicable service information identified in paragraphs (o)(1) through (o)(4) of this AD.

(1) Bombardier Alert Service Bulletin A600–0763, including Appendixes 1 and 2, dated September 26, 2013, which was previously incorporated by reference on March 6, 2014 (79 FR 9389, February 19, 2014).

(2) Bombardier Alert Service Bulletin A600–0763, Revision 01, dated February 26, 2014, including Appendixes 1 and 2, dated September 26, 2013, which is not incorporated by reference in this AD.

(3) Bombardier Alert Service Bulletin A601–0627, including Appendixes 1 and 2, dated September 26, 2013, which was previously incorporated by reference on March 6, 2014 (79 FR 9389, February 19, 2014).

(4) Bombardier Alert Service Bulletin A601–0627, Revision 01, dated February 26, 2014, including Appendixes 1 and 2, dated September 26, 2013, which is not incorporated by reference in this AD.

(p) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, New York ACO, ANE–170, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the ACO, send it to ATTN: Program Manager, Continuing Operational Safety, FAA, New York ACO, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone: 516–228–7300; fax: 516–794–5531. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, New York ACO, ANE–170, FAA; or TCCA; or Bombardier, Inc.'s TCCA DAO. If approved by the DAO, the approval must include the DAO-authorized signature.

(q) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) Canadian Emergency AD CF–2013–39R2, dated December 12, 2014, for related information. This MCAI may be found in the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–5593.

(2) Service information identified in this AD that is not incorporated by reference is available at the addresses specified in paragraphs (r)(4) and (r)(5) of this AD.

(r) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(3) The following service information was approved for IBR on February 18, 2015 (80 FR 5670, February 3, 2015).

(i) Bombardier Alert Service Bulletin A600–0763, Revision 02, dated December 9, 2014, including Appendixes 1 and 2, dated September 26, 2013.

(ii) Bombardier Alert Service Bulletin A601–0627, Revision 02, dated December 9, 2014, including Appendixes 1 and 2, dated September 26, 2013.

(4) For service information identified in this AD, contact Bombardier, Inc., 400 Côte-Vertu Road West, Dorval, Québec H4S 1Y9, Canada; Widebody Customer Response Center North America toll-free telephone: 1–866–538–1247 or direct-dial telephone: 1–514–855–2999; fax 514–855–7401; email: *ac.yul@aero.bombardier.com;* Internet: *http://www.bombardier.com.*

(5) You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

(6) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued in Renton, Washington, on October 7, 2016.

Michael Kaszycki,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2015–7527; Directorate Identifier 2015–NM–094–AD; Amendment 39–18686; AD 2016–21–05]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for certain The Boeing Company Model 777–200, –200LR, –300, and –300ER series airplanes. This AD was prompted by a report indicating that the manufacturer discovered locations where the control components and wiring of the left and right engine fuel spar valves do not have adequate physical separation to meet the redundant system separation requirements. This AD requires modifying the wiring, and installing a new relay bracket and new location for the relay on the left and right engine fuel spar valves. This AD also requires an inspection to identify the part number of the motor operated valve (MOV) actuators for the left and right engine fuel spar valves; replacement of specified MOV actuators with new MOV actuators; certain bonding resistance measurements; and applicable corrective actions. We are issuing this AD to prevent loss of control of both the left and right engine fuel spar valves during a single event, such as local wire bundle damage or a wire bundle fire, which could cause both engines to shut down or result in the inability to control an engine fire.

DATES: This AD is effective December 19, 2016.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of December 19, 2016.

ADDRESSES: For service information identified in this final rule, contact Boeing Commercial Airplanes, Attention: Data & Services Management, P.O. Box 3707, MC 2H–65, Seattle, WA 98124–2207; telephone 206–544–5000, extension 1; fax 206–766–5680; Internet *https://www.myboeingfleet.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221. It is also

available on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2015–7527.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2015–7527; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The address for the Docket Office (phone: 800–647–5527) is Docket Management Facility, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Brendan Shanley, Aerospace Engineer, Systems and Equipment Branch, ANM–130S, FAA, Seattle Aircraft Certification Office, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone: 425–917–6492; fax: 425–917–6590; email: *brendan.shanley@faa.gov.*

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to certain The Boeing Company Model 777–200, –200LR, –300, and –300ER series airplanes. The NPRM published in the **Federal Register** on December 23, 2015 (80 FR 79754) (''the NPRM''). The NPRM was prompted by a report indicating that the manufacturer discovered locations where the control components and wiring of the left and right engine fuel spar valves do not have adequate physical separation to meet the redundant system separation requirements. The NPRM proposed to require modifying the wiring, and installing a new relay bracket and new location for the relay on the left and right engine fuel spar valves. The NPRM also proposed to require an inspection to identify the part number of the MOV actuators for the left and right engine fuel spar valves; replacement of specified MOV actuators with new MOV actuators; certain bonding resistance measurements; and applicable corrective actions. We are issuing this AD to prevent loss of control of both the left and right engine fuel spar valves during a single event, such as local wire bundle damage or a wire bundle fire, which could cause both engines to shut down or result in the inability to control an engine fire.

Comments

We gave the public the opportunity to participate in developing this AD. The following presents the comments received on the NPRM and the FAA's response to each comment. Boeing stated that it has reviewed the NPRM and concurs with the contents of the NPRM.

Request To Reduce the Compliance Time

One commenter, Geoffrey Barrance, requested that we reduce the compliance time in paragraph (g) of the proposed AD. Mr. Barrance stated he is concerned that the timescale proposed for implementing the required modification, 60 months after the effective date of the AD, is too long. Mr. Barrance commented that the unsafe condition is a common failure affecting the continued operation of both engines, and therefore is critical to the safe flight and landing of any airplane.

We disagree with the commenter's request. It is important to note that while the commenter has indicated there is currently a common mode failure affecting the continued operation of both engines, it is more accurate to say that certain airplanes are currently in a configuration that makes them vulnerable to a single event causing a common mode failure. However, there have been no reports of any events causing this condition. This AD is intended to eliminate that condition.

The compliance time is determined to be appropriate in consideration of the risk and the safety implications, the average utilization rate of the affected fleet, the practical aspects of an orderly modification of the fleet during regular maintenance periods, and the availability of required modification parts. In addition to our own criteria, we have also considered the manufacturer's safety assessment and recommendation for the compliance time. The compliance time accounts for the risk to the fleet, availability of parts, and other factors. Therefore, we have determined that the compliance time is acceptable. We have not changed this AD in this regard.

Request To Remove the Concurrent Requirements

All Nippon Airways (ANA), Japan Airlines (JAL), and United Airlines (UAL) requested that we remove the concurrent requirement for accomplishing Boeing Service Bulletin 777–28A0034, Revision 3, dated September 25, 2015. JAL and ANA stated that there was no relationship between the wiring change and the actuator replacement. ANA, JAL, and UAL commented that Boeing Service Bulletin 777–28A0034, Revision 3, dated September 25, 2015, is already mandated by AD 2013–05–03, Amendment 39–17375 (78 FR 17290, March 21, 2013) (''AD 2013–05–03''), and it addressed MOV actuator part number (P/N) MA20A1001–1; therefore, it should not be a concurrent requirement. ANA also added that because the MOV actuator has been addressed, paragraphs (i)(2) and (i)(3) of the proposed AD should not be included.

We partially agree with the commenters. We agree that the actions in Boeing Service Bulletin 777–28A0034, Revision 3, dated September 25, 2015, are the same actions that are required by AD 2013–05–03 in accordance with Boeing Service Bulletin 777–28A0034, Revision 2, dated September 20, 2010, with a compliance date of April 25, 2018. Because of the overlap in compliance times, the action required by AD 2013–05–03 may not be fully completed by the time the requirements of this AD become effective. To ensure that the actuator change, in accordance with Boeing Service Bulletin 777–28A0034, Revision 3, dated September 25, 2015, is done prior to the wiring change in accordance with Boeing Special Attention Service Bulletin 777–28–0061, Revision 2, dated May 4, 2015, we have required Boeing Service Bulletin 777–28A0034, Revision 3, dated September 25, 2015, as a concurrent requirement in this AD. Without this concurrent requirement, it is possible that this AD could approve certain configurations that are not compliant and safe. The concurrent requirement eliminates this possibility. The requirements of Boeing Service Bulletin 777–28A0034, Revision 3, dated September 25, 2015, and related credit for previous actions, will remain as stated. We have not changed this AD in this regard.

Request To Use Boeing Information Notice for Completing the Requirements in the AD

ANA requested that we include Boeing Service Bulletin Information Notice 777–28–0061, IN 03, dated November 16, 2015, to this AD to allow the operators to complete the proposed requirements of the NPRM.

We partially agree with the commenter's request. We cannot include Boeing Service Bulletin Information Notice 777–28–0061, IN 03, dated November 16, 2015, as an

appropriate source of service information in this AD because it is not an FAA-approved document. However, we acknowledge that for certain airplanes, Figure 22, Sheet 9, of Boeing Special Attention Service Bulletin 777–28–0061, Revision 2, dated May 4, 2015, includes an editorial error, which shows incorrect wire routing. Boeing Service Bulletin Information Notice 777–28–0061, IN 03, dated November 16, 2015, allows for a modification of Group 2 airplanes that meets the requirements of the AD without an additional burden to operators. We have included a corrected figure in paragraph (h) of this AD to address this issue.

In addition, Figure 11, Sheet 1, of Boeing Special Attention Service Bulletin 777–28–0061, Revision 2, dated May 4, 2015, is incorrect in that it shows the cap and stow of an existing wire, W4255–1002–20, which is terminated at splice SP41201. The correct wire number to be capped and stowed is W6251–1002–20, which is terminated at splice SP41201. We have clarified this information in paragraph (h)(2) of this AD.

Request To Clarify the Terminating Action

JAL and UAL requested that we clarify the terminating action specified in the proposed rule. JAL asked that Boeing Service Bulletin 777–28A0034 be used as a terminating action for the requirements of the proposed rule. UAL stated that since AD 2013–05–03 already addressed MOV actuator P/N MA20A2027 and P/N MA30A1001, it contradicts airworthiness limitations (AWL) 28–AWL–MOV, which was mandated in AD 2015–19–01, Amendment 39–18264 (80 FR 55521, dated September 16, 2015) (''AD 2015–19–01'').

We agree that clarification is necessary. We agree that certain configurations in Boeing Service Bulletin 777–28A0034, Revision 3, dated September 25, 2015, in conjunction with previous airplane configurations, alleviate the need to do the AWL task implemented by AD 2013–05–03 because the configurations are outside the applicability of that AWL. However, we disagree with using Boeing Service Bulletin 777–28A0034, Revision 3, dated September 25, 2015, as a terminating action because the requirement of AD 2015–19–01 is to implement the airworthiness limitations items (ALI) into an operator's maintenance program, and this must be done regardless of the configuration of the airplane. Further, certain MOV actuator part numbers can be installed that will place an airplane in the applicability of AWL 28–AWL–MOV, thus requiring periodic inspections to ensure safe operation. Each operator has the option to select a configuration best for its circumstances and can evaluate its configurations and determine if AWL 28–AWL–MOV is applicable to their fleet configuration. We have not changed this AD in this regard.

Request To Review the Design and Certification Process

Geoffrey Barrance requested that we review the design and certification process that allowed for the unsafe condition to exist, as well as a review of designs in other airplanes with similar unsafe conditions. Mr. Barrance commented that the unsafe condition indicated a failure has occurred in the design and certification process for the airplane type. Mr. Barrance also commented that a review of the airplane design is required to prevent the implementation of common mode fault exposures for redundant systems.

We acknowledge the commenter's concerns. We continuously evaluate our certification system and procedures and improve them when problems are found. If the FAA is made aware of potential design deficiencies occurring on a certificated product, we conduct an investigation, evaluate the manufacturer's root-cause analysis, and make a determination whether or not an unsafe condition exists. We then take appropriate action to mitigate the unsafe condition and to identify and incorporate certification system process improvements for future designs. Furthermore, the manufacturer performs a cross model evaluation to determine if the condition exists on other models. We agree with the manufacturer's actions in this regard. We have not changed this AD regarding this issue.

Conclusion

We reviewed the relevant data, considered the comments received, and determined that air safety and the public interest require adopting this AD with the changes described previously and minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM.

We also determined that these changes will not increase the economic burden on any operator or increase the scope of this AD.

Related Service Information Under 1 CFR Part 51

We reviewed Boeing Special Attention Service Bulletin 777–28–0061, Revision 2, dated May 4, 2015. The service information describes procedures for modifying the wiring, and installing a new relay bracket and new location for the relay on the left and right engine fuel spar valves.

We have also reviewed Boeing Service Bulletin 777–28A0034, Revision 3, dated September 25, 2015. The service information describes procedures for an inspection of the MOV actuators of the left and right engine fuel spar valves for (P/N) MA20A1001–1, replacement of MOV actuators, measurement of the electrical resistance of the bond from the adapter plate to the airplane structure, and applicable corrective actions.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

We estimate that this AD affects 133 airplanes of U.S. registry.

We estimate the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Installation and modification.	119 work-hours × $85 per hour = $10,115.	Up to $3,780 depending on airplane configuration.	Up to $13,895 depending on airplane configuration.	Up to $1,848,035 depending on airplane configuration.
Inspection of MOV actuators [concurrent requirements].	1 work-hour × $85 per hour = $85.	$0	$85	$11,305.

We estimate the following costs to do any necessary replacements and bonding resistance measurements that would be required based on the results of the inspection. We have no way of determining the number of aircraft that might need these replacements:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Replacement of MOV actuators for the left and right engine fuel spar valves.	Up to 105 work-hours × $85 per hour = $8,925.	Up to $10,954	Up to $19,879.
Bonding resistance measurements	1 work-hour × $85 per hour = $85	$0	$85.

We have received no definitive data on the costs of the corrective actions for the bonding resistance measurement in this AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2016–21–05 The Boeing Company: Amendment 39–18686; Docket No. FAA–2015–7527; Directorate Identifier 2015–NM–094–AD.

(a) Effective Date

This AD is effective December 19, 2016.

(b) Affected ADs

None.

(c) Applicability

This AD applies to The Boeing Company Model 777–200, –200LR, –300, and –300ER series airplanes, certificated in any category, as identified in Boeing Special Attention Service Bulletin 777–28–0061, Revision 2, dated May 4, 2015.

(d) Subject

Air Transport Association (ATA) of America Code 2822, Fuel Boost Pump.

(e) Unsafe Condition

This AD was prompted by a report indicating that the manufacturer discovered locations where the control components and wiring of the left and right engine fuel spar valves do not have adequate physical separation to meet the redundant system separation requirements. We are issuing this AD to prevent loss of control of both the left and right engine fuel spar valves during a single event, such as local wire bundle damage or a wire bundle fire, which could cause both engines to shut down or result in the inability to control an engine fire.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Modification

Within 60 months after the effective date of this AD, modify the wiring and install new relay brackets in new locations to allow installation of new relays for the left and right engine fuel spar valves, in accordance with the Accomplishment Instructions of Boeing Special Attention Service Bulletin 777–28–0061, Revision 2, dated May 4, 2015, except as required by paragraph (h) of this AD.

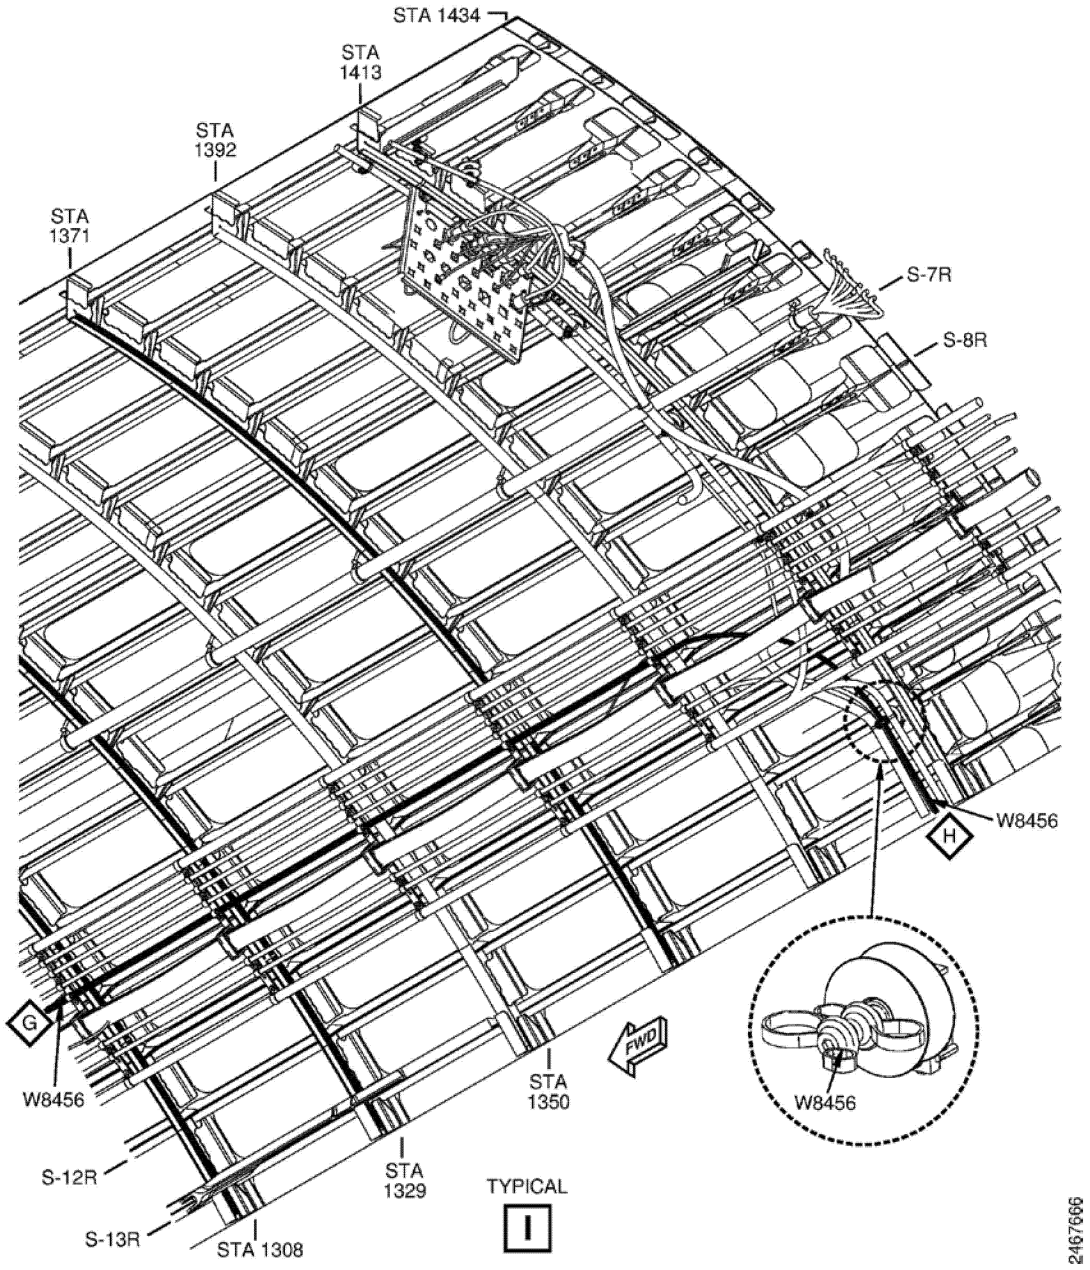
(h) Exceptions to the Service Information

(1) Where Boeing Special Attention Service Bulletin 777–28–0061, Revision 2, dated May 4, 2015, specifies to use Figure 22, Sheet 9, for the wiring installation of the right engine fuel spar valve, this AD requires using figure 1 to paragraph (h) of this AD.

(2) Boeing Special Attention Service Bulletin 777–28–0061, Revision 2, dated May 4, 2015, specifies to use Figure 11, Sheet 1, for the wiring change at E2–6—Shelf to Disconnect Panel and Splice Area. The figure shows the capping and stowing of an existing wire, W4255–1002–20, which is terminated at splice SP41201. The wire number is incorrect. The correct wire number to cap and stow is W6251–1002–20, which is terminated at splice SP41201.

BILLING CODE 4910–13–P

Figure 1 to paragraph (h) of this AD: *Wiring Installation - Right Engine Fuel Spar Valve*



BILLING CODE 4910–13–C

(i) Concurrent Requirements

(1) Prior to or concurrently with accomplishing the requirements of paragraph (g) of this AD: Do an inspection of the motor operated valve (MOV) actuators of the left and right engine fuel spar valves for part number (P/N) MA20A1001–1, in accordance with the Accomplishment Instructions of Boeing Service Bulletin 777–28A0034, Revision 3, dated September 25, 2015. A review of airplane maintenance records is acceptable in lieu of this inspection if the part number can be conclusively determined from that review.

(2) If any MOV actuator having P/N MA20A1001–1 is found during the inspection required by paragraph (i)(1) of this AD, prior to or concurrently with accomplishing the requirements of paragraph (g) of this AD, replace the MOV actuator with either a new or serviceable MOV actuator having P/N MA30A1001, MA30A1017, MA20A2027, or an MOV actuator that meets the criteria specified in paragraphs (i)(2)(i) and (i)(2)(ii) of this AD; and, as applicable, measure the electrical resistance of the bond from the adapter plate to the airplane structure and, before further flight, do all applicable corrective actions. All actions specified in this paragraph for the left and right engine fuel spar valves must be done in accordance with the Accomplishment Instructions of Boeing Service Bulletin 777–28A0034, Revision 3, dated September 25, 2015.

(i) The replacement MOV actuator must be a Boeing part that is approved after the issuance of Boeing Service Bulletin 777–28A0034, Revision 3, dated September 25, 2015, by the Manager, Seattle Aircraft

Certification Office (ACO), FAA; or the Boeing Commercial Airplanes Organization Designation Authorization (ODA) that has been authorized by the Manager, Seattle ACO, to approve the part.

(ii) The replacement MOV actuator must be fully interchangeable with the part specified in Boeing Service Bulletin 777–28A0034, Revision 3, dated September 25, 2015.

(j) Credit for Previous Actions

(1) This paragraph provides credit for the requirements of paragraph (g) of this AD, if those actions were performed before the effective date of this AD using Boeing Special Attention Service Bulletin 777–28–0061, dated October 25, 2010; or Boeing Special Attention Service Bulletin 777–28–0061, Revision 1, dated January 26, 2012; as applicable. These documents are not incorporated by reference in this AD.

(2) This paragraph provides credit for the requirements of paragraph (i) of this AD, if those actions were performed before April 25, 2013 (the effective date of AD 2013–05–03, Amendment 39–17375 (78 FR 17290, March 21, 2013), ''AD 2013–05–03''), using Boeing Alert Service Bulletin 777–28A0034, dated August 2, 2007; or Boeing Alert Service Bulletin 777–28A0034, Revision 1, dated May 20, 2010; except that the replacement of MOV actuators of the left and right engine fuel spar valves must also include cap sealing the bonding jumper, as described in Boeing Service Bulletin 777–28A0034, Revision 2, dated September 20, 2010; and provided that the replacement is an MOV actuator identified in paragraph (j)(2)(i) or (j)(2)(ii) of this AD. Boeing Alert Service Bulletin 777–28A0034, dated August 2, 2007, and Boeing Alert Service Bulletin 777–28A0034, Revision 1, dated May 20, 2010, are not incorporated by reference in this AD. Boeing Service Bulletin 777–28A0034, Revision 2, dated September 20, 2010, is incorporated by reference in AD 2013–05–03.

(i) An MOV actuator that has P/N MA30A1001, MA30A1017, or MA20A2027.

(ii) An MOV actuator that has a part number other than P/N MA20A1001–1 and meets the criteria specified in paragraphs (i)(2)(i) and (i)(2)(ii) of this AD.

(3) This paragraph provides credit for the requirements of paragraph (i) of this AD, if those actions were performed before the effective date of this AD using Boeing Service Bulletin 777–28A0034, Revision 2, dated September 20, 2010, which was incorporated by reference in AD 2013–05–03.

(k) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Seattle ACO, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the ACO, send it to the attention of the person identified in paragraph (l)(1) of this AD. Information may be emailed to: *9-ANM-Seattle-ACO-AMOC-Requests@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair, modification, or alteration required by this AD if it is approved by the Boeing Commercial Airplanes ODA that has been authorized by the Manager, Seattle ACO, to make those findings. To be approved, the repair method, modification deviation, or alteration deviation must meet the certification basis of the airplane and the approval must specifically refer to this AD.

(l) Related Information

(1) For more information about this AD, contact Brendan Shanley, Aerospace Engineer, Systems and Equipment Branch, ANM–130S, FAA, Seattle Aircraft Certification Office, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone: 425–917–6492; fax: 425–917–6590; email: *brendan.shanley@faa.gov.*

(2) Service information identified in this AD that is not incorporated by reference is available at the addresses specified in paragraphs (m)(3) and (m)(4) of this AD.

(m) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

BILLING CODE 4910–13–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

21 CFR Part 1308

[Docket No. DEA–440]

Schedules of Controlled Substances: Temporary Placement of U–47700 Into Schedule I

AGENCY: Drug Enforcement Administration, Department of Justice.

ACTION: Final order.

SUMMARY: The Administrator of the Drug Enforcement Administration is issuing this final order to temporarily schedule the synthetic opioid, 3,4-dichloro-*N*-[2-(dimethylamino)cyclohexyl]-*N*-methylbenzamide (also known as U–47700), and its isomers, esters, ethers, salts and salts of isomers, esters and ethers, into schedule I pursuant to the temporary scheduling provisions of the Controlled Substances Act. This action is based on a finding by the Administrator that the placement of U–47700 into schedule I of the Controlled Substances Act is necessary to avoid an imminent hazard to the public safety. As a result of this order, the regulatory controls and administrative, civil, and criminal sanctions applicable to schedule I controlled substances will be imposed on persons who handle (manufacture, distribute, reverse distribute, import, export, engage in research, conduct instructional activities or chemical analysis, or possess), or propose to handle,
U–47700.

DATES: This final order is effective on November 14, 2016.

FOR FURTHER INFORMATION CONTACT: Michael J. Lewis, Diversion Control Division, Drug Enforcement Administration; Mailing Address: 8701 Morrissette Drive, Springfield, Virginia 22152; Telephone: (202) 598–6812.

SUPPLEMENTARY INFORMATION:

Legal Authority

The Drug Enforcement Administration (DEA) implements and enforces titles II and III of the Comprehensive Drug Abuse Prevention and Control Act of 1970, as amended. 21 U.S.C. 801–971. Titles II and III are referred to as the ''Controlled Substances Act'' and the ''Controlled Substances Import and Export Act,'' respectively, and are collectively referred to as the ''Controlled Substances Act'' or the ''CSA'' for the purpose of this action. The DEA publishes the implementing regulations

for these statutes in title 21 of the Code of Federal Regulations (CFR), chapter II. The CSA and its implementing regulations are designed to prevent, detect, and eliminate the diversion of controlled substances and listed chemicals into the illicit market while ensuring an adequate supply is available for the legitimate medical, scientific, research, and industrial needs of the United States. Controlled substances have the potential for abuse and dependence and are controlled to protect the public health and safety.

Under the CSA, every controlled substance is classified into one of five schedules based upon its potential for abuse, its currently accepted medical use in treatment in the United States, and the degree of dependence the drug or other substance may cause. 21 U.S.C. 812. The initial schedules of controlled substances established by Congress are found at 21 U.S.C. 812(c), and the current list of all scheduled substances is published at 21 CFR part 1308.

Section 201 of the CSA, 21 U.S.C. 811, provides the Attorney General with the authority to temporarily place a substance into schedule I of the CSA for two years without regard to the requirements of 21 U.S.C. 811(b) if she finds that such action is necessary to avoid an imminent hazard to the public safety. 21 U.S.C. 811(h)(1). In addition, if proceedings to control a substance are initiated under 21 U.S.C. 811(a)(1), the Attorney General may extend the temporary scheduling for up to one year. 21 U.S.C. 811(h)(2).

Where the necessary findings are made, a substance may be temporarily scheduled if it is not listed in any other schedule under section 202 of the CSA, 21 U.S.C. 812, or if there is no exemption or approval in effect for the substance under section 505 of the Federal Food, Drug, and Cosmetic Act (FDCA), 21 U.S.C. 355. 21 U.S.C. 811(h)(1). The Attorney General has delegated her scheduling authority under 21 U.S.C. 811 to the Administrator of the DEA. 28 CFR 0.100.

Background

Section 201(h)(4) of the CSA, 21 U.S.C. 811(h)(4), requires the Administrator to notify the Secretary of the Department of Health and Human Services (HHS) of his intention to temporarily place a substance into schedule I of the CSA.[1] The Administrator transmitted the notice of intent to place U–47700 into schedule I on a temporary basis to the Assistant Secretary by letter dated April 18, 2016. The Assistant Secretary responded to this notice by letter dated April 28, 2016, and advised that based on review by the Food and Drug Administration (FDA), there are currently no investigational new drug applications or approved new drug applications for U–47700. The Assistant Secretary also stated that the HHS has no objection to the temporary placement of U–47700 into schedule I of the CSA. The DEA has taken into consideration the Assistant Secretary's comments as required by 21 U.S.C. 811(h)(4). U–47700 is not currently listed in any schedule under the CSA, and no exemptions or approvals are in effect for U–47700 under section 505 of the FDCA, 21 U.S.C. 355. The DEA has found that the control of U–47700 in schedule I on a temporary basis is necessary to avoid an imminent hazard to the public safety, and as required by 21 U.S.C. 811(h)(1)(A), a notice of intent to temporarily schedule U–47700 was published in the **Federal Register** on September 7, 2016. 81 FR 61636.

To find that placing a substance temporarily into schedule I of the CSA is necessary to avoid an imminent hazard to the public safety, the Administrator is required to consider three of the eight factors set forth in section 201(c) of the CSA, 21 U.S.C. 811(c): The substance's history and current pattern of abuse; the scope, duration and significance of abuse; and what, if any, risk there is to the public health. 21 U.S.C. 811(h)(3). Consideration of these factors includes actual abuse, diversion from legitimate channels, and clandestine importation, manufacture, or distribution. 21 U.S.C. 811(h)(3).

A substance meeting the statutory requirements for temporary scheduling may only be placed into schedule I. 21 U.S.C. 811(h)(1). Substances in schedule I are those that have a high potential for abuse, no currently accepted medical use in treatment in the United States, and a lack of accepted safety for use under medical supervision. 21 U.S.C. 812(b)(1). Available data and information for U–47700, summarized below, indicate that this synthetic opioid has a high potential for abuse, no currently accepted medical use in treatment in the United States, and a lack of accepted safety for use under medical supervision. The DEA's updated three-factor analysis, and the Assistant Secretary's April 28, 2016, letter, are available in their entirety under the tab ''Supporting Documents'' of the public docket of this action at *www.regulations.gov* under FDMS Docket ID: DEA–2016–0016 (Docket Number DEA–440).

Factor 4. History and Current Pattern of Abuse

The recreational abuse of novel opioids continues to be a significant concern. These substances are distributed to users with often unpredictable outcomes. The novel synthetic opioid U–47700 has recently been encountered by law enforcement and public health officials and the adverse health effects and outcomes are documented in the scientific literature. Self-reporting by users describes the effects of U–47700 to be similar to other opioids. The negative effects documented in the scientific literature are also consistent with other opioids. The National Forensic Laboratory Information System (NFLIS) is a national drug forensic laboratory reporting system that systematically collects results from drug chemistry analyses conducted by participating Federal, State, and local forensic laboratories across the country. The DEA utilizes NFLIS to monitor for drug trends. The first laboratory submission of U–47700 was recorded in October 2015; a total of 88 records were reported from State and local forensic laboratories between October 2015—September 2016 according to NFLIS (query date: October 24, 2016).

On October 1, 2014, the DEA implemented STARLiMS (a web-based, commercial laboratory information management system) as its laboratory drug evidence data system of record. DEA laboratory data submitted after September 30, 2014, are reposited in STARLiMS; data from STARLiMS were queried on November 1, 2016. STARLiMS registered 45 reports containing U–47700 in 2016 from California, Connecticut, Florida, Maryland, Montana, North Dakota, New Jersey, New York, Tennessee, Texas, Virginia, West Virginia, and the District of Columbia. Through information collected from NFLIS, law enforcement reports, and email communications, the DEA is aware of the identification of U–47700 from toxicology reports and submitted evidence to forensic laboratories in several states, including Arkansas, California, Colorado, Connecticut, Florida, Georgia, Iowa, Kentucky, Missouri, Montana, New

[1] As discussed in a memorandum of understanding entered into by the Food and Drug Administration (FDA) and the National Institute on Drug Abuse (NIDA), the FDA acts as the lead agency within the HHS in carrying out the Secretary's scheduling responsibilities under the CSA, with the concurrence of NIDA. 50 FR 9518, Mar. 8, 1985. The Secretary of the HHS has delegated to the Assistant Secretary for Health of the HHS the authority to make domestic drug scheduling recommendations. 58 FR 35460, July 1, 1993.

Hampshire, New Jersey, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Texas, and Wisconsin. These identifications occurred in 2015 and 2016.

Evidence suggests that the pattern of abuse of U–47700 parallels that of heroin, prescription opioid analgesics, and other novel opioids. Seizures of U–47700 have been encountered in powder form and in counterfeit tablets that mimic pharmaceutical opioids. U–47700 has also been encountered in glassine bags and envelopes and knotted corners of plastic bags. These clandestine forms of distribution demonstrate the abuse of this substance as a replacement for heroin or other opioids, either knowingly or unknowingly. Further, U–47700 has been encountered as a single substance as well as in combination with other substances, including heroin, fentanyl, and furanyl fentanyl in drug exhibits.

The scientific literature and information collected by DEA demonstrate U–47700 is being abused for its opioid properties. The distribution of U–47700 and the increased prevalence of abuse remain deeply concerning to the DEA.

Factor 5. Scope, Duration and Significance of Abuse

The scientific literature and reports collected by the DEA demonstrate U–47700 is being abused for its opioid properties. This abuse of U–47700 has resulted in morbidity and mortality (see updated DEA 3-Factor Analysis for full discussion). The DEA has received reports for at least 46 confirmed fatalities [2] associated with U–47700. The information on these deaths occurring in 2015 and 2016 was collected from email communications and toxicology and medical examiner reports and was reported from New Hampshire (1), New York (31), North Carolina (10), Ohio (1), Texas (2), and Wisconsin (1). The scientific literature notes additional fatal overdoses connected to U–47700. The population likely to abuse U–47700 appears to overlap with the populations abusing prescription opioid analgesics, other ''designer opioids,'' and heroin, as evidenced by drug use history documented in U–47700 fatal overdose cases. This observation is further supported by U–47700 being sold on the illicit market in glassine bags, some of which are marked with stamped logos, imitating the sale of heroin.

[2] Due to a proofreading error, the number of fatalities listed in the U–47700 NOI, which was 15, is incorrect. The correct number, 46, has been added to this Final Order.

Additionally, U–47700 has been found in counterfeit pills. Because abusers of U–47700 are likely to obtain this substance through non-regulated sources (*i.e.*, on-line purchases or drug dealers), the identity, purity, and quantity are uncertain and inconsistent, thus posing significant adverse health risks to the end user. Individuals who initiate (*i.e.*, use a drug for the first time) U–47700 abuse are likely to be at risk of developing substance use disorder, overdose, and death similar to that of other opioid analgesics (*e.g.*, fentanyl, morphine, etc.).

STARLiMS contains 45 reports in which U–47700 was identified in drug exhibits submitted in 2016. A query of NFLIS returned 88 records of U–47700 being identified in exhibits submitted to State and local forensic laboratories between October 2015—September 2016. The DEA is not aware of any laboratory analyses of drug evidence identifying U–47700 prior to 2015, indicating that this synthetic opioid only recently became available as a replacement for other opioids that are commonly abused (*i.e.* oxycodone, heroin, fentanyl). U–47700 is available over the Internet and is marketed as a ''research chemical.'' The on-line sale and marketing of U–47700 are similar to other new psychoactive substances that have rapidly appeared on the recreational drug market and also resulted in negative consequences for the user.

Factor 6. What, if Any, Risk There Is to the Public Health

U–47700 exhibits pharmacological profiles similar to that of morphine and other mu-opioid receptor agonists. Cases of intoxication are reported in the literature with morbidity and mortality associated with U–47700 use. The toxic effects of U–47700 in humans are demonstrated by overdoses and overdose fatalities associated with this substance, as reported in the scientific literature. Abusers of U–47700 may not know the origin, identity, or purity of this substance, thus posing significant adverse health risks when compared to abuse of pharmaceutical preparations of opioid analgesics, such as morphine and oxycodone. Additionally, the potent opioid U–47700 may serve as a precursor to problematic opioid use and dependence.

Based on reports in the scientific literature and information received by the DEA, the abuse of U–47700 leads to the same qualitative public health risks as heroin, fentanyl and other opioid analgesic substances. As with any non-medically approved opioid, the health and safety risks for users are great. The public health risks attendant to the abuse of heroin and opioid analgesics are well established and have resulted in large numbers of drug treatment admissions, emergency department visits, and fatal overdoses.

U–47700 has been associated with a number of fatalities and non-fatal overdoses as detailed in the scientific literature. The DEA has received information connecting U–47700 to at least 46 confirmed overdose deaths, occurring in 2015 and 2016 in New Hampshire (1), New York (31), North Carolina (10), Ohio (1), Texas (2), and Wisconsin (1).

Finding of Necessity of Schedule I Placement To Avoid Imminent Hazard to Public Safety

In accordance with 21 U.S.C. 811(h)(3), based on the data and information summarized above, the continued uncontrolled manufacture, distribution, importation, exportation, and abuse of U–47700 pose an imminent hazard to the public safety. The DEA is not aware of any currently accepted medical uses for this substance in the United States. A substance meeting the statutory requirements for temporary scheduling, 21 U.S.C. 811(h)(1), may only be placed into schedule I. Substances in schedule I are those that have a high potential for abuse, no currently accepted medical use in treatment in the United States, and a lack of accepted safety for use under medical supervision. Available data and information for U–47700 indicate that this substance has a high potential for abuse, no currently accepted medical use in treatment in the United States, and a lack of accepted safety for use under medical supervision. As required by section 201(h)(4) of the CSA, 21 U.S.C. 811(h)(4), the Administrator, through a letter dated April 18, 2016, notified the Assistant Secretary of the DEA's intention to temporarily place this substance into schedule I.

Conclusion

In accordance with the provisions of section 201(h) of the CSA, 21 U.S.C. 811(h), the Administrator considered available data and information, herein sets forth the grounds for his determination that it is necessary to temporarily schedule U–47700 into schedule I of the CSA, and finds that placement of this synthetic opioid into schedule I of the CSA is necessary to avoid an imminent hazard to the public safety. Because the Administrator hereby finds it necessary to temporarily place this synthetic opioid into schedule I to avoid an imminent hazard

to the public safety, this final order temporarily scheduling U–47700 will be effective on the date of publication in the **Federal Register**, and will be in effect for a period of two years, with a possible extension of one additional year, pending completion of the regular (permanent) scheduling process. 21 U.S.C. 811(h) (1) and (2).

The CSA sets forth specific criteria for scheduling a drug or other substance. Permanent scheduling actions in accordance with 21 U.S.C. 811(a) are subject to formal rulemaking procedures done ''on the record after opportunity for a hearing'' conducted pursuant to the provisions of 5 U.S.C. 556 and 557. 21 U.S.C. 811. The permanent scheduling process of formal rulemaking affords interested parties with appropriate process and the government with any additional relevant information needed to make a determination. Final decisions that conclude the permanent scheduling process of formal rulemaking are subject to judicial review. 21 U.S.C. 877. Temporary scheduling orders are not subject to judicial review. 21 U.S.C. 811(h)(6).

Requirements for Handling

Upon the effective date of this final order, U–47700 will become subject to the regulatory controls and administrative, civil, and criminal sanctions applicable to the manufacture, distribution, reverse distribution, importation, exportation, engagement in research, and conduct of instructional activities or chemical analysis with, and possession of schedule I controlled substances including the following:

1. *Registration.* Any person who handles (manufactures, distributes, reverse distributes, imports, exports, engages in research, or conducts instructional activities or chemical analysis with, or possesses), or who desires to handle, U–47700 must be registered with the DEA to conduct such activities pursuant to 21 U.S.C. 822, 823, 957, and 958 and in accordance with 21 CFR parts 1301 and 1312, as of November 14, 2016. Any person who currently handles U–47700, and is not registered with the DEA, must submit an application for registration and may not continue to handle U–47700 as of November 14, 2016, unless the DEA has approved that application for registration pursuant to 21 U.S.C. 822, 823, 957, 958, and in accordance with 21 CFR parts 1301 and 1312. Retail sales of schedule I controlled substances to the general public are not allowed under the CSA. Possession of any quantity of this substance in a manner not authorized by the CSA on or after November 14, 2016 is unlawful and those in possession of any quantity of this substance may be subject to prosecution pursuant to the CSA.

2. *Disposal of stocks.* Any person who does not desire or is not able to obtain a schedule I registration to handle U–47700, must surrender all quantities of currently held U–47700.

3. *Security.* U–47700 is subject to schedule I security requirements and must be handled and stored pursuant to 21 U.S.C. 821, 823, 871(b), and in accordance with 21 CFR 1301.71–1301.93, as of November 14, 2016.

4. *Labeling and packaging.* All labels, labeling, and packaging for commercial containers of U–47700 must be in compliance with 21 U.S.C. 825, 958(e), and be in accordance with 21 CFR part 1302. Current DEA registrants shall have 30 calendar days from November 14, 2016, to comply with all labeling and packaging requirements.

5. *Inventory.* Every DEA registrant who possesses any quantity of U–47700 on the effective date of this order must take an inventory of all stocks of this substance on hand, pursuant to 21 U.S.C. 827 and 958, and in accordance with 21 CFR 1304.03, 1304.04, and 1304.11. Current DEA registrants shall have 30 calendar days from the effective date of this order to be in compliance with all inventory requirements. After the initial inventory, every DEA registrant must take an inventory of all controlled substances (including U–47700) on hand on a biennial basis, pursuant to 21 U.S.C. 827 and 958, and in accordance with 21 CFR 1304.03, 1304.04, and 1304.11.

6. *Records.* All DEA registrants must maintain records with respect to U–47700 pursuant to 21 U.S.C. 827 and 958, and in accordance with 21 CFR parts 1304, and 1312, 1317 and § 1307.11. Current DEA registrants shall have 30 calendar days from the effective date of this order to be in compliance with all recordkeeping requirements.

7. *Reports.* All DEA registrants who manufacture or distribute U–47700 must submit reports pursuant to 21 U.S.C. 827 and in accordance with 21 CFR parts 1304, and 1312 as of November 14, 2016.

8. *Order Forms.* All DEA registrants who distribute U–47700 must comply with order form requirements pursuant to 21 U.S.C. 828 and in accordance with 21 CFR part 1305 as of November 14, 2016.

9. *Importation and Exportation.* All importation and exportation of U–47700 must be in compliance with 21 U.S.C. 952, 953, 957, 958, and in accordance with 21 CFR part 1312 as of November 14, 2016.

10. *Quota.* Only DEA registered manufacturers may manufacture U–47700 in accordance with a quota assigned pursuant to 21 U.S.C. 826 and in accordance with 21 CFR part 1303 as of November 14, 2016.

11. *Liability.* Any activity involving U–47700 not authorized by, or in violation of the CSA, occurring as of November 14, 2016, is unlawful, and may subject the person to administrative, civil, and/or criminal sanctions.

Regulatory Matters

Section 201(h) of the CSA, 21 U.S.C. 811(h), provides for a temporary scheduling action where such action is necessary to avoid an imminent hazard to the public safety. As provided in this subsection, the Attorney General may, by order, schedule a substance in schedule I on a temporary basis. Such an order may not be issued before the expiration of 30 days from (1) the publication of a notice in the **Federal Register** of the intention to issue such order and the grounds upon which such order is to be issued, and (2) the date that notice of the proposed temporary scheduling order is transmitted to the Assistant Secretary. 21 U.S.C. 811(h)(1).

Inasmuch as section 201(h) of the CSA directs that temporary scheduling actions be issued by order and sets forth the procedures by which such orders are to be issued, the DEA believes that the notice and comment requirements of the Administrative Procedure Act (APA) at 5 U.S.C. 553, do not apply to this temporary scheduling action. In the alternative, even assuming that this action might be subject to 5 U.S.C. 553, the Administrator finds that there is good cause to forgo the notice and comment requirements of 5 U.S.C. 553, as any further delays in the process for issuance of temporary scheduling orders would be impracticable and contrary to the public interest in view of the manifest urgency to avoid an imminent hazard to the public safety.

Further, the DEA believes that this temporary scheduling action is not a ''rule'' as defined by 5 U.S.C. 601(2), and, accordingly, is not subject to the requirements of the Regulatory Flexibility Act. The requirements for the preparation of an initial regulatory flexibility analysis in 5 U.S.C. 603(a) are not applicable where, as here, the DEA is not required by the APA or any other law to publish a general notice of proposed rulemaking.

Additionally, this action is not a significant regulatory action as defined by Executive Order 12866 (Regulatory Planning and Review), section 3(f), and, accordingly, this action has not been

reviewed by the Office of Management and Budget (OMB).

This action will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 13132 (Federalism) it is determined that this action does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

As noted above, this action is an order, not a rule. Accordingly, the Congressional Review Act (CRA) is inapplicable, as it applies only to rules. However, if this were a rule, pursuant to the Congressional Review Act, ''any rule for which an agency for good cause finds that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest, shall take effect at such time as the federal agency promulgating the rule determines.'' 5 U.S.C. 808(2). It is in the public interest to schedule this substance immediately because it poses a public health risk. This temporary scheduling action is taken pursuant to 21 U.S.C. 811(h), which is specifically designed to enable the DEA to act in an expeditious manner to avoid an imminent hazard to the public safety. 21 U.S.C. 811(h) exempts the temporary scheduling order from standard notice and comment rulemaking procedures to ensure that the process moves swiftly. For the same reasons that underlie 21 U.S.C. 811(h), that is, the DEA's need to move quickly to place this substance into schedule I because it poses an imminent hazard to the public safety and it would be contrary to the public interest to delay implementation of the temporary scheduling order. Therefore, this order shall take effect immediately upon its publication. The DEA has submitted a copy of this final order to both Houses of Congress and to the Comptroller General, although such filing is not required under the Small Business Regulatory Enforcement Fairness Act of 1996 (Congressional Review Act), 5 U.S.C. 801–808, because, as noted above, this action is an order, not a rule.

List of Subjects in 21 CFR Part 1308

Administrative practice and procedure, Drug traffic control, Reporting and recordkeeping requirements.

For the reasons set out above, the DEA amends 21 CFR part 1308 as follows:

PART 1308—SCHEDULES OF CONTROLLED SUBSTANCES

■ 1. The authority citation for part 1308 continues to read as follows:

Authority: 21 U.S.C. 811, 812, 871(b), unless otherwise noted.

■ 2. Amend § 1308.11 by adding paragraph (h)(18) to read as follows:

§ 1308.11 Schedule I.

* * * * *

(h) * * *

(18)	3,4-Dichloro-*N*-[2-(dimethylamino)cyclohexyl]-*N*-methylbenzamide, its isomers, esters, ethers, salts and salts of isomers, esters and ethers (Other name: U–47700)	(9547)

* * * * *

Dated: November 7, 2016.

Chuck Rosenberg,

Acting Administrator.

BILLING CODE 4410–09–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[Docket No. USCG–2016–1008]

Drawbridge Operation Regulation; Great Channel, New Jersey Intracoastal Waterway, Stone Harbor, NJ

AGENCY: Coast Guard, DHS.

ACTION: Notice of deviation from drawbridge regulation.

SUMMARY: The Coast Guard has issued a temporary deviation from the operating schedule that governs the Stone Harbor Boulevard (CR657) Bridge across the Great Channel, mile 102.0, New Jersey Intracoastal Waterway, at Stone Harbor, NJ. This deviation is necessary to avoid bridge failure and perform emergency bridge repairs. This deviation allows the bridge to remain in the closed-to-navigation position.

DATES: This deviation is effective without actual notice from November 14, 2016 through 4 p.m. on December 2, 2016. For the purposes of enforcement, actual notice will be used from November 8, 2016, until November 14, 2016.

ADDRESSES: The docket for this deviation, [USCG–2016–1008] is available at *http://www.regulations.gov.* Type the docket number in the ''SEARCH'' box and click ''SEARCH''. Click on Open Docket Folder on the line associated with this deviation.

FOR FURTHER INFORMATION CONTACT: If you have questions on this temporary deviation, call or email Mr. Hal R. Pitts, Bridge Administration Branch Fifth District, Coast Guard, telephone 757–398–6222, email *Hal.R.Pitts@uscg.mil.*

SUPPLEMENTARY INFORMATION: The County of Cape May, NJ, that owns and operates the Stone Harbor Boulevard (CR657) Bridge across the Great Channel, mile 102.0, New Jersey Intracoastal Waterway, at Stone Harbor, NJ, has requested a temporary deviation from the current operating regulations to avoid bridge failure and perform emergency repairs to the bridge, due to a serious crack in one of two main bridge girders, causing the bridge to be unsafe for vehicular traffic and movement of the bascule spans. The bridge is a bascule drawbridge and has a vertical clearance in the closed position of 10 feet above mean high water.

The current operating schedule is set out in 33 CFR 117.733(h). Under this temporary deviation, the bridge will remain in the closed-to-navigation position until 4 p.m. on December 2, 2016.

The Great Channel, New Jersey Intracoastal Waterway is used by a variety of vessels including small public vessels, small commercial vessels, tug and barge traffic, and recreational vessels. The Coast Guard has carefully considered the nature and volume of vessel traffic on the waterway in publishing this temporary deviation.

Vessels able to safely pass through the bridge in the closed position may do so at any time. The bridge will not be able to open for emergencies and there is no immediate alternate route for vessels to pass. The Coast Guard will also inform the users of the waterways through our Local and Broadcast Notices to Mariners of the change in operating schedule for the bridge so that vessel operators can arrange their transit to minimize any impact caused by the temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: November 8, 2016.

Hal R. Pitts,

Bridge Program Manager, Fifth Coast Guard District.

Proposed Rules

Federal Register
Vol. 81, No. 219
Monday, November 14, 2016

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF COMMERCE

Economic Development Administration

13 CFR Parts 300, 301, 302, 303, 304, 305, 307, 309, and 314

Webinar on Notice of Proposed Rulemaking, Revolving Loan Fund Program Changes and General Updates to PWEDA Regulations

AGENCY: Economic Development Administration, U.S. Department of Commerce.

ACTION: Notice.

SUMMARY: The Economic Development Administration (''EDA''), U.S. Department of Commerce (''DOC''), will hold a webinar to discuss proposed updates to the agency's regulations implementing the Public Works and Economic Development Act of 1965, as amended (''PWEDA''). On October 3, 2016, EDA published a Notice of Proposed Rulemaking (''NPRM'') in the **Federal Register** at 81 FR 68186. Through this NPRM, EDA is proposing important changes to the regulations governing the Revolving Loan Fund (''RLF'') program that are intended to reflect current best practices and strengthen EDA's efforts to evaluate, monitor, and improve RLF performance by establishing the Risk Analysis System, a risk-based management framework, to evaluate and manage the RLF program. EDA also proposes to reorganize the RLF regulations to improve their readability and clarify the requirements that apply to the distinct phases of an RLF award. In addition, EDA proposes specific changes to RLF requirements to make RLF awards more efficient for Recipients to administer and for EDA to monitor. Through this NPRM EDA proposes important, but less comprehensive updates to other parts of its regulations, including revising definitions, replacing references to superseded regulations to reflect the promulgation of the Uniform Administrative Requirements, Cost Principles, and Audit Requirements (2 CFR part 200) (''Uniform Guidance''), streamlining the provisions that outline EDA's application process, and clarifying EDA's property management regulations. Given the more comprehensive nature of the changes being proposed to the RLF program, EDA will use this webinar to focus on the proposed RLF changes and explain both the rationale behind those changes and their potential impact. All members of the public are invited to participate.

DATES: The webinar will be held on Tuesday, November 15, 2016, at 2 p.m. Eastern Standard Time.

ADDRESSES: The webinar will be held through Adobe Connect. No registration is required to participate.

You may join the webinar using the following link: *https://doc-eda.adobeconnect.com/rlf-nprmwebinar/*.

To join by audio conference, please dial the following number: 800–832–0736. When prompted, please enter the following Conference Room Number: 4130458

FOR FURTHER INFORMATION CONTACT: If you have questions about the meeting, please contact Mitchell Harrison, Program Analyst, Performance and National Programs Division, Economic Development Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Suite 71030, Washington, DC 20230; telephone: (202) 482–4696.

SUPPLEMENTARY INFORMATION:

a. *What is the agenda for the webinar?* The agenda for the webinar includes: (1) Introduction by Tom Guevara, Deputy Assistant Secretary for Regional Affairs, EDA, (2) overview of the RLF program, (3) explanation of key RLF changes proposed in the NRPM, and (4) public questions and comments.

b. *Will the webinar be recorded?* Following the webinar, a recording of the webinar will be posted on EDA's YouTube page at *https://www.youtube.com/user/EDACommerce*.

c. *May I submit questions or comments during the webinar?* You may submit a written comment or question during the presentation. We have scheduled the last fifteen minutes of the meeting, from 2:45 to 3 p.m., to address questions or comments from the public. Please note that this public question and comment period may start before 2:45 p.m. if all other agenda items have been covered and may end before 3 p.m. if we have responded to all submitted questions before that time.

d. *What do I do if I need additional assistance during the webinar?* For information on facilities or services for individuals with disabilities or to request special assistance at the teleconference, please contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section, as soon as possible.

e. *Can I submit questions after the webinar?* In addition to submitting questions or comments during the webinar, members of the public may also submit a comment in writing until December 2, 2016, as indicated in the NPRM, using one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov*. Follow the instructions for submitting comments. All comments received are a part of the public record and will generally be posted for public viewing on *www.regulations.gov* without change. All personal identifying information (*e.g.,* name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. EDA will accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain anonymous).
- *Email: regulations@eda.gov*. Include ''Comments on EDA's regulations'' and Docket No. 160519444–6444–01 in the subject line of the message.
- *Fax:* (202) 482–5671. Please indicate ''Attention: Office of Chief Counsel,'' ''Comments on EDA's regulations,'' and Docket No. 160519444–6444–01 on the cover page.
- *Mail:* Office of the Chief Counsel, Economic Development Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Suite 72023, Washington, DC 20230. Please indicate ''Comments on EDA's regulations'' and Docket No. 160519444–6444–01 on the envelope.

Dated: November 2, 2016.

Roy K.J. Williams,

Assistant Secretary of Commerce for Economic Development.

BILLING CODE 3510–24–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2015–3984; Directorate Identifier 2015–NM–033–AD]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Supplemental notice of proposed rulemaking (SNPRM); reopening of comment period.

SUMMARY: We are revising an earlier proposal to supersede Airworthiness Directive (AD) 2008–13–12 R1, for certain The Boeing Company Model 737–100, –200, –200C, –300, –400, and –500 series airplanes. AD 2008–13–12 R1 requires various repetitive inspections for cracking of the upper-frame-to-side-frame splice of the fuselage, and other specified and corrective actions if necessary; and also provides for an optional preventive modification, which would terminate the repetitive inspections. This action revises the notice of proposed rulemaking (NPRM) by adding post-repair/post-modification inspections. We are proposing this SNPRM to detect and correct fatigue cracking of the upper-frame-to-side-frame splice of the fuselage, which could result in reduced structural integrity of the frame and adjacent lap joint, causing increased loading in the fuselage skin, which will accelerate skin crack growth and result in decompression of the airplane. Since these actions impose an additional burden over that proposed in the NPRM, we are reopening the comment period to allow the public the chance to comment on these proposed changes.

DATES: We must receive comments on this SNPRM by December 29, 2016.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this SNPRM, contact Boeing Commercial Airplanes, Attention: Data & Services Management, P.O. Box 3707, MC 2H–65, Seattle, WA 98124–2207; telephone 206–544–5000, extension 1; fax 206–766–5680; Internet *https://www.myboeingfleet.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221. It is also available on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2015–3984.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2015–3984; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (phone: 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Wayne Lockett, Aerospace Engineer, Airframe Branch, ANM–120S, FAA, Seattle Aircraft Certification Office, 1601 Lind Avenue SW., Renton, WA 98057–3356; phone: 425–917–6447; fax: 425–917–6590; email: *wayne.lockett@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2015–3984; Directorate Identifier 2015–NM–033–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD because of those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

We issued an NPRM to amend 14 CFR part 39 to supersede AD 2008–13–12 R1, Amendment 39–15719 (73 FR 67383, November 14, 2008) (''AD 2008–13–12 R1''). AD 2008–13–12 R1 applied to certain The Boeing Company Model 737–100, –200, –200C, –300, –400, and –500 series airplanes. AD 2008–13–12 R1 requires various repetitive inspections for cracking of the upper-frame-to-side-frame splice of the fuselage, and other specified and corrective actions if necessary. AD 2008–13–12 R1 also provides for an optional preventive modification, which terminates the repetitive inspections. AD 2008–13–12 R1 resulted from a report that the upper frame of the fuselage was severed between stringers (S) S–13L and S–14L at station (STA) 747, and the adjacent frame at STA 767 had a 1.3-inch-long crack at the same stringer location. The NPRM published in the **Federal Register** on October 9, 2015 (80 FR 61133) (''The NPRM''). The NPRM was prompted by reports of additional fatigue cracking of the upper-frame-to-side-frame splice of the fuselage, and one report of a severed frame. The NPRM proposed to add, for certain airplanes, an inspection to determine if the existing frame repair meets all specified requirements, and for certain other airplanes, a new modification of the upper-frame-to-side-frame splice, which would terminate the repetitive inspections. The NPRM also proposed to reduce certain inspection thresholds and repetitive intervals.

Actions Since Previous NPRM Was Issued

Since we issued the NPRM, we have determined that it is necessary to require post-repair/post-modification inspections that were not included in the NPRM.

Related Service Information Under 1 CFR Part 51

We reviewed Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015. The service information describes procedures for various repetitive inspections for cracking of the upper-frame-to-side-frame splice of the fuselage, a preventive modification to prevent WFD, an inspection to determine if the existing frame repair meets all specified requirements, and corrective actions. This service information is reasonably available because the interested parties

have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Comments

We gave the public the opportunity to comment on the NPRM. The following presents the comments received on the NPRM and the FAA's response to each comment. One commenter supported the actions specified in the NPRM.

Request To Require Post-Repair/Post-Modification Inspections

Boeing asked that we change paragraph (j) of the proposed AD (in the NPRM) to require the post-repair/post-modification inspections that are not required in that paragraph. Boeing stated that the WFD evaluation of the frame repair/modification specified in Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015, indicated the need for reduced repetitive inspection intervals from those provided in Boeing Damage Tolerance Inspection Data Service Bulletin 737–00–1006, dated March 12, 2010. Boeing added that since the inspections specified in Boeing Service Bulletin 737–00–1006, dated March 12, 2010, are not to be used for the post-repair/post-modification inspections required by 14 CFR 121.1109(c)(2) or 129.109(c)(2), they should be required by paragraph (j) of the proposed AD.

We agree with the commenter for the reasons provided. We have changed paragraph (j) of this SNPRM to require that post-repair/post-modification inspections be done in accordance with the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015.

Effect of Winglets on Accomplishment of the Proposed Actions

Aviation Partners Boeing stated that accomplishing the Supplemental Type Certificate (STC) ST01219SE does not affect the actions specified in the NPRM.

We agree with the commenter. We have changed paragraph (c) of this proposed AD to state that installation of STC ST01219SE does not affect the ability to accomplish the actions required by this final rule. Therefore, for airplanes on which STC ST01219SE is installed, a ''change in product'' alternative methods of compliance (AMOC) approval request is not necessary to comply with the requirements of 14 CFR 39.17.

Request To Clarify That the NPRM Addresses WFD

Boeing asked that we update the language in ''Actions Since AD 2008–13–12 R1, Amendment 39–15719 (73 FR 67383, November 14, 2008) Was Issued'' section of the NPRM to clarify that this action is intended to address WFD by supporting the airplane's limit of validity (LOV). Boeing noted that a recently issued WFD-related AD action used different language regarding WFD. Boeing stated that Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015, was released in support of the requirements of 14 CFR 26.21(b) and (c) and provides additional service action required to support LOV.

We agree to provide clarification. The NPRM addressed WFD in several locations in the preamble. To clarify, this action is intended to address WFD by supporting the airplane's LOV, as stated by Boeing. However, we have not updated the language in that section of the NPRM because that section of the NPRM is not carried over to this SNPRM. Therefore, no change to this SNPRM is necessary in this regard.

Request To Clarify Certain Procedures in the Related Service Information Section

Boeing asked that we change the ''Related Service Information under 1 CFR part 51'' section in the NPRM to clarify the description of the modification procedures in the service information. Boeing asked that the proposed language ''. . . a new preventive modification, which would eliminate the need for the repetitive inspections'' be changed to ''. . . a preventive modification to prevent the WFD.'' Boeing stated that Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015, retains all inspections specified in Boeing Alert Service Bulletin 737–53A1261, dated January 19, 2006, and mandates the previously optional preventive modification to mitigate the WFD concern.

We agree with the commenter for the reasons provided. We have clarified the ''Related Service Information under 1 CFR part 51'' section of this SNPRM accordingly.

Request To Clarify Reason for Supersedure

Boeing asked that we clarify in the **SUMMARY** section of the NPRM the events that prompted the proposed supersedure of AD 2008–13–12 R1. Boeing stated that instead of two reports of severed frames, as specified in the NPRM, there was just one report of a severed frame.

We agree to provide clarification. We agree that the commenter's statement is accurate. However, we have removed details relating to the NPRM from the **SUMMARY** section of this SNPRM; therefore, no change is necessary to this SNPRM in this regard.

Request To Clarify Provisions Related to Repetitive Actions

Boeing asked that we clarify paragraph (g)(1)(ii) of the proposed AD (in the NPRM) to state that the actions are to be repeated until the preventive modification in paragraph (k) or the terminating action in paragraph (l) of the proposed AD has been accomplished. Boeing added that this change is consistent with the provisions of Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015, and the requirements of AD 2008–13–12 R1.

We agree with the commenter for the reasons provided. We have clarified paragraph (g)(1)(ii) of this proposed AD accordingly.

Request To Clarify Inspection Locations

Boeing asked that we change paragraph (g)(2)(i) of the proposed AD (in the NPRM) to clarify that the inspections are for ''existing frame repairs,'' instead of ''frames.'' Boeing requested that we change ''frame'' to ''frame repairs,'' and ''tied frames'' to ''existing frame repairs.''

We agree with the commenter. We have revised paragraph (g)(2)(i) of this proposed AD accordingly.

Request To Revise Inspection Type

Boeing asked that we revise paragraphs (k) and (l) of the proposed AD (in the NPRM) by changing ''detailed and HFEC inspections'' to just ''HFEC inspections.'' Boeing stated that detailed inspections are not specified during accomplishment of the preventive modification in Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015.

We agree with the commenter for the reason provided. We have removed ''detailed'' inspections from paragraphs (k) and (l) of this proposed AD.

Request To Change Certain Language in Paragraph (l)(2) of the Proposed AD

Boeing asked that we change paragraph (l)(2) of the proposed AD (in the NPRM), which stated that the repair would terminate the repetitive inspections required by paragraph (g)(1) of this AD. Boeing requested that the proposed AD instead state that the repair would terminate not only the repetitive inspections, but also the preventive modification required by

paragraph (k) of the proposed AD. Boeing added that Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015, provides a terminating action provision for the repetitive inspections and the preventive modification under the repair. Boeing stated that accomplishment of the repair removes the WFD, and therefore the preventive modification is not required for repaired frames.

We agree with the commenter for the reasons provided. We have clarified the language in paragraph (l)(2) of this proposed AD accordingly.

Request To Move Terminating Action in Paragraph (l)(3) of the Proposed AD to the Credit Paragraph

Boeing asked that we move the terminating action specified in paragraph (l)(3) of the proposed AD (in the NPRM) into the credit for previous actions specified in paragraph (m) of the proposed AD (in the NPRM) for clarification. Boeing stated that accomplishment of the repair or preventive modification, as specified in Boeing Message M–7200–02–1294, dated August 20, 2002, is a ''previous action'' similar to accomplishment of the repair or preventive modification specified in Boeing Alert Service Bulletin 737–53A1261, dated January 19, 2006. Boeing added that paragraph (l)(3) of the proposed AD (in the NPRM) stated that the repair or preventive modification done before the effective date of the AD terminates the repetitive inspection requirements of paragraph (g)(1) of the proposed AD (in the NPRM). Boeing also asked that we revise the proposed AD (in the NPRM) to state that accomplishment of the repair or preventive modification in accordance with Boeing Message M–7200–02–1294, dated August 20, 2002, if performed before the effective date of the AD, would also terminate the preventive modification required by paragraph (k) of the proposed AD (in the NPRM).

We agree to revise paragraph (l)(3) of this proposed AD to state that a repair or preventive modification done in accordance with Boeing Message M–7200–02–1294, dated August 20, 2002, is acceptable for terminating both the inspections and the preventive modification requirements in paragraphs (g)(1) and (k) of this proposed AD respectively. We have changed paragraph (l)(3) of this proposed AD accordingly.

We do not agree to move paragraph (l)(3) of the proposed AD (in the NPRM) into the credit for previous actions specified in paragraph (m) of this proposed AD. Paragraph (m) of this proposed AD is intended to give credit for actions accomplished using previous revisions of service information for accomplishing corresponding actions prior to the effective date of the AD; it does not terminate any actions and does not address future actions.

Request To Provide Credit for Certain Repairs

Boeing asked that we change paragraph (m) of the proposed AD (in the NPRM) to provide credit for repairs that were accomplished before the effective date of the AD, in accordance with Boeing Alert Service Bulletin 737–53A1261, dated January 19, 2006. Boeing stated that the repair procedures are the same as those in Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015 (as specified in paragraph (l)(2) of the proposed AD (in the NPRM)).

We agree with the commenter for the reason provided. We have added a new paragraph (m)(3) to this proposed AD to give credit for repairs specified in paragraph (l)(2) of the this proposed AD that are accomplished before the effective date of this proposed AD.

Request To Remove Repairs as Terminating Action Under Certain Conditions

Boeing asked that we change paragraph (l)(4) of the proposed AD (in the NPRM) to remove repairs as acceptable terminating action. Boeing stated that paragraph (l)(4) of the proposed AD (in the NPRM) would provide a terminating action provision for the repetitive inspections required by paragraph (g)(2) of the proposed AD (in the NPRM) if a repair or preventive modification is accomplished that is different from the one provided in Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015, provided it has been approved by the Manager, Los Angeles Aircraft Certification Office. Boeing added that there have been repairs performed in the past that involve trimming the production upper frame web near S–11 and replacing it with an identical replacement frame web without additional reinforcement similar to the preventive modification or repair. Boeing noted that the repair is structurally acceptable; however, it does not sufficiently reinforce the frame to provide terminating action for the inspections, and would require further service actions, including inspections and a preventive modification. Boeing added that the additional inspection requirements should be specified in the AMOC approval, and noted that a preventive modification would not necessarily be required since prior approvals would not have taken the WFD requirements into account.

We agree with the commenter for the reasons provided. All previously installed repairs or modifications installed in accordance with Boeing Alert Service Bulletin 737–53A1261, dated January 19, 2006, must be reevaluated or replaced to ensure that all WFD requirements are met. Therefore, we have removed paragraph (l)(4) of the proposed AD (in the NPRM) from this proposed AD.

FAA's Determination

We are proposing this SNPRM because we evaluated all the relevant information and determined the unsafe condition described previously is likely to exist or develop in other products of the same type design. Certain changes described above expand the scope of the NPRM. As a result, we have determined that it is necessary to reopen the comment period to provide additional opportunity for the public to comment on this SNPRM.

Proposed Requirements of This SNPRM

This SNPRM would require accomplishing the actions specified in the service information described previously, except as discussed under ''Difference Between this AD and the Service Information.'' Refer to this service information for information on the procedures and compliance times.

Difference Between This SNPRM and the Service Information

Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015, specifies to contact the manufacturer for certain repair instructions, but this proposed AD would require repair methods, modification deviations, and alteration deviations in one of the following ways:

- In accordance with a method that we approve; or
- Using data that meet the certification basis of the airplane, and that have been approved by the Boeing Commercial Airplanes Organization Designation Authorization (ODA) whom we have authorized to make those findings.

Costs of Compliance

We estimate that this proposed AD affects 391 airplanes of U.S. registry.

We estimate the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Retained inspections from AD 2008–13–12 R1.	Between 18 and 38 work-hours × $85 per hour, depending on airplane configuration = between $1,530 and $3,230 per inspection cycle.	$0	Between $1,530 and $3,230 per inspection cycle.	Between $598,230 and $1,262,930, per inspection cycle.
New proposed inspections.	213 work-hours × $85 per hour, $18,105 per inspection cycle	$0	$18,105 per inspection cycle.	$7,079,055, per inspection cycle.
New proposed modification.	256 work-hours × $85 per hour = $21,760	(1)	$21,760	$8,508,160

[1] We currently have no specific cost estimates associated with the parts necessary for the proposed modification.

We have received no definitive data that would enable us to provide a cost estimate for the on-condition actions specified in this proposed AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by removing Airworthiness Directive (AD) 2008–13–12 R1, Amendment 39–15719 (73 FR 67383, November 14, 2008), and adding the following new AD.

The Boeing Company: Docket No. FAA–2015–3984; Directorate Identifier 2015–NM–033–AD.

(a) Comments Due Date

We must receive comments by December 29, 2016.

(b) Affected ADs

This AD replaces AD 2008–13–12 R1, Amendment 39–15719 (73 FR 67383, November 14, 2008) (''AD 2008–13–12 R1'').

(c) Applicability

(1) This AD applies to The Boeing Company Model 737–100, –200, –200C, –300, –400, and –500 series airplanes, certificated in any category, as identified in Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015.

(2) Installation of Supplemental Type Certificate (STC) ST01219SE *(http://rgl.faa.gov/Regulatory_and_Guidance_Library/rgstc.nsf/0/BE866B732F6CF31086257B9700692796?OpenDocument&Highlight=st01219se*) does not affect the ability to accomplish the actions required by this AD. Therefore, for airplanes on which STC ST01219SE is installed, a ''change in product'' alternative method of compliance (AMOC) approval request is not necessary to comply with the requirements of 14 CFR 39.17.

(d) Subject

Air Transport Association (ATA) of America Code 53, Fuselage.

(e) Unsafe Condition

This AD was prompted by reports of additional fatigue cracking of the upper-frame-to-side-frame splice of the fuselage, and one report of a severed frame due to susceptibility to widespread fatigue damage (WFD). We are issuing this AD to detect and correct fatigue cracking of the upper-frame-to-side-frame splice of the fuselage, which could result in reduced structural integrity of the frame and adjacent lap joint, causing increased loading in the fuselage skin, which will accelerate skin crack growth and result in decompression of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Repetitive Inspections and Corrective Actions for Certain Airplanes

(1) For Groups 1 through 3, Configurations 1, 3, 4, and 5 airplanes; Group 7, Configurations 1, 3, 4, and 5 airplanes; Groups 4 through 6, Configurations 1, 3, 4, and 6 airplanes; and Groups 8 through 11, Configurations 1, 3, 4, and 6 airplanes; as identified in Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015: Do the actions specified in paragraphs (g)(1)(i) and (g)(1)(ii) of this AD, and all applicable corrective actions, in accordance with the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015, except as required by paragraph (i)(3) of this AD. Do all applicable corrective actions before further flight.

(i) At the applicable time specified in Tables 1, 2, 3, 5, 6, and 8 of paragraph 1.E., ''Compliance,'' of Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015, except as required by paragraphs (i)(1) and (i)(2) of this AD: Do medium frequency eddy current inspections for cracking of the upper-frame-to-side-frame splice of the fuselage.

(ii) Repeat the inspections specified in paragraph (g)(1)(i) of this AD at the applicable time specified in Tables 1, 2, 3, 5, 6, and 8 of paragraph 1.E., ''Compliance,'' of

Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015, until the preventive modification required by paragraph (k) of this AD, or a terminating action specified in paragraph (l) of this AD, has been accomplished. The inspections are terminated for the repaired or modified areas only.

(2) For Groups 4 through 6, Configurations 2 and 5 airplanes; and Groups 8 through 11, Configurations 2 and 5 airplanes; as identified in Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015: Do the actions specified in paragraphs (g)(2)(i) and (g)(2)(ii) of this AD, and all applicable corrective actions, in accordance with the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015, except as required by paragraph (i)(3) of this AD. Do all applicable corrective actions before further flight.

(i) At the applicable time specified in Tables 4 and 7 of paragraph 1.E., ''Compliance,'' of Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015, except as required by paragraphs (i)(1) and (i)(2) of this AD: Do a detailed inspection to determine if the existing frame repair meets all requirements specified in Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015, and for any frame repair that does meet all requirements, do detailed and high frequency eddy current (HFEC) inspections for cracking of the existing frame repairs.

(ii) Repeat the inspections for cracking specified in paragraph (g)(2)(i) of this AD at the applicable time specified in Tables 4 and 7 of paragraph 1.E., ''Compliance,'' of Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015.

(h) Post-Repair and Post-Modification Actions for Certain Airplanes

For Group 1, Configurations 2 and 6 airplanes; Group 2, Configurations 2 and 6 airplanes; Group 3, Configurations 2 and 6 airplanes; and Group 7, Configurations 2 and 6 airplanes; as identified in Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015: Within 120 days after the effective date of this AD, do post-repair and post-modification actions using a method approved in accordance with the procedures specified in paragraph (n) of this AD.

(i) Exceptions to Service Bulletin Specifications

(1) Where Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015, specifies a compliance time ''after the Revision 1 date of this service bulletin,'' this AD requires compliance within the specified compliance time after the effective date of this AD.

(2) Where the ''Condition'' column of paragraph 1.E., ''Compliance,'' of Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015, specifies a condition based on whether an airplane has or has not been inspected, this AD bases the condition on whether an airplane has or has not been inspected as of the effective date of this AD.

(3) Where Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015, specifies to contact Boeing for repair instructions: Before further flight, repair using a method approved in accordance with the procedures specified in paragraph (n) of this AD.

(j) Post-Repair/Post-Modification Inspections

For Groups 4 through 6, Configurations 1, 3, 4, 6, 7, 8, 9, and 10 airplanes; and Groups 8 through 11, Configurations 1, 3, 4, 6, 7, 8, 9, and 10 airplanes; as identified in Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015: Except as provided by paragraphs (i)(1) and (i)(2) of this AD, at the applicable time specified in Tables 12 through 17 of paragraph 1.E., ''Compliance,'' of Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015; do the post-repair/post-modification inspections, in accordance with the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015, except as required by paragraph (i)(3) of this AD. Do all applicable corrective actions before further flight.

(k) Preventive Modification for Certain Airplanes

For Groups 4 through 6, Configurations 1, 3, 4, and 6 airplanes; and Groups 8 through 11, Configurations 1, 3, 4, and 6 airplanes; as identified in Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015: Except as provided by paragraphs (i)(1) and (i)(2) of this AD, at the applicable time specified in Tables 3, 5, 6, and 8 in paragraph 1.E., ''Compliance,'' of Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015, do the preventive modification, including HFEC inspections for cracking and applicable corrective actions, in accordance with Part 4 of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015, except as required by paragraph (i)(3) of this AD. Do all applicable corrective actions before further flight. Accomplishing the modification required by this paragraph terminates the inspections required by paragraph (g)(1) of this AD for the modified area only.

(l) Terminating Action

(1) For Groups 4 through 6, Configurations 1, 3, 4, and 6 airplanes; and Groups 8 through 11, Configurations 1, 3, 4, and 6 airplanes; as identified in Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015: Accomplishing the preventive modification, including HFEC inspections for cracking and applicable corrective actions, in accordance with Part 4 of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015, except as required by paragraph (i)(3) of this AD, terminates the inspections required by paragraph (g)(1) of this AD for the modified area only.

(2) For Groups 4 through 6, Configurations 3 and 6 airplanes; and Groups 8 through 11, Configurations 3 and 6 airplanes; as identified in Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015: Accomplishing the repair, including HFEC inspections for cracking and applicable corrective actions, in accordance with Part 3 of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1261, Revision 1, dated January 30, 2015, except as required by paragraph (i)(3) of this AD, terminates the repetitive inspections required by paragraph (g)(1) of this AD, and the preventive modification required by paragraph (k) of this AD, for the repaired area only.

(3) Accomplishment of the repair or the preventive modification specified in Boeing Message M–7200–02–1294, dated August 20, 2002, before the effective date of this AD terminates the repetitive inspections required by paragraph (g)(1) of this AD and the preventive modification required by paragraph (k) of this AD for the repaired or modified area only.

(m) Credit for Previous Actions

(1) This paragraph provides credit for the inspections required by paragraph (g) of this AD, if those inspections were performed before the effective date of this AD using Boeing Alert Service Bulletin 737–53A1261, dated January 19, 2006, which was incorporated by reference in AD 2008–13–12, Amendment 39–15575 (73 FR 38905, July 8, 2008) (''AD 2008–13–12'').

(2) This paragraph provides credit for the modification specified in paragraphs (k) and (l)(1) of this AD, if performed before the effective date of this AD using Boeing Alert Service Bulletin 737–53A1261, dated January 19, 2006.

(3) This paragraph provides credit for repairs specified in paragraphs (l)(2) of this AD, if performed before the effective date of this AD using Boeing Alert Service Bulletin 737–53A1261, dated January 19, 2006.

(n) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Los Angeles ACO, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the ACO, send it to the attention of the person identified in paragraph (o)(1) of this AD. Information may be emailed to: *9-ANM-LAACO-AMOC-Requests@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair required by this AD if it is approved by the Boeing Commercial Airplanes Organization Designation Authorization (ODA) that has been authorized by the Manager, Los Angeles ACO, to make those findings. For a repair method to be approved, the repair must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

(4) AMOCs approved for AD 2008–13–12, and AD 2008–13–12 R1; are approved as AMOCs for the corresponding provisions of paragraph (g) of this AD.

(o) Related Information

(1) For more information about this AD, contact Wayne Lockett, Aerospace Engineer, Airframe Branch, ANM–120S, FAA, Seattle ACO, 1601 Lind Avenue SW., Renton, WA 98057–3356; phone: 425–917–6447; fax: 425–917–6590; email: *wayne.lockett@faa.gov.*

(2) For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Data & Services Management, P.O. Box 3707, MC 2H–65, Seattle, WA 98124–2207; telephone 206–544–5000, extension 1; fax 206–766–5680; Internet *https://www.myboeingfleet.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington. For information on the availability of this material at the FAA, call 425–227–1221.

Issued in Renton, Washington, on September 12, 2016.

Michael Kaszycki,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Chapter 1

[Docket No. FDA–2008–N–0622]

Withdrawal of Two Proposed Rules

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of withdrawal.

SUMMARY: The Food and Drug Administration (FDA) is announcing the withdrawal of two proposed rules that published in the **Federal Register** more than 5 years ago. These proposed rules are no longer considered viable candidates for final action. FDA is taking this action because these proposed rules are out of date.

DATES: The proposed rules are withdrawn on November 14, 2016.

FOR FURTHER INFORMATION CONTACT: Lisa M. Helmanis, Regulations Policy and Management Staff, Office of the Commissioner, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 32, Rm. 3326, Silver Spring, MD 20993–0002, 301–796–9135, email: *Lisa.Helmanis.@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

In 1990, FDA began a process of periodically conducting comprehensive reviews of its regulation process, including reviewing the backlog of notices of proposed rulemakings that were never finalized. As FDA removed many proposed rules that had not been finalized, the Agency was able to clean out the backlog and implement a process of reviewing these proposed rules every 5 years. In the **Federal Register** of December 12, 2008 (73 FR 75625), FDA withdrew four proposed rules that were more than 5 years old that it did not intend to finalize.

Recently, FDA has conducted a review of proposed rules that are more than 5 years old, and is announcing the withdrawal the following two proposed rules:

	Title of proposed rule	Publication date and Docket No.	Reason for withdrawal
1	Availability for Public Disclosure and Submission to FDA for Public Disclosure of Certain Data and Information Related to Human Gene Therapy or Xenotransplantation.	1/18/2001, 00N–0989	FDA has reconsidered our position on this issue and deemed our concerns from 2001 outdated. We will continue to assess whether rulemaking in this area is necessary, and if so, we will proceed with a new proposed rule.
2	Crabmeat; Amendment of Common or Usual Name Regulation.	4/23/1998, 94P–0043	This proposed rule is obsolete because FDA has created a new process that allows for routine updates to the seafood names without going through notice and comment rulemaking. See FDA's Guide to Acceptable Market Names for Seafood Sold in Interstate Commerce.

The withdrawal of these proposals identified in this document does not preclude the Agency from reinstituting rulemaking concerning the issues addressed in the proposals listed in the chart. Should we decide to undertake such rulemakings in the future, we will re-propose the actions and provide new opportunities for comment. Furthermore, this notice is only intended to address the specific actions identified in this document, and not any other pending proposals that the Agency has issued or is considering. The Agency notes that withdrawal of a proposal does not necessarily mean that the preamble statement of the proposal no longer reflects the current position of FDA on the matter addressed. You may wish to review the Agency's Web site (*http://www.fda.gov*) for any current guidance on the matter.

Dated: November 8, 2016.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

NATIONAL MEDIATION BOARD

29 CFR Part 1208

[Docket No. C–7156]

RIN 3140–AA00

Access to Information

AGENCY: National Mediation Board.

ACTION: Proposed rule with request for comments; notice of hearing.

SUMMARY: The National Mediation Board (NMB or Board) proposes to revise its Freedom of Information Act (FOIA) regulations in order to implement the FOIA Improvement Act of 2016 and to amend its regulations regarding responding to subpoenas. The NMB also proposes to update these regulations where needed in accordance with Department of Justice guidance, Executive Order 12,600, and changes in Agency practice and procedure.

DATES: Submit comments on or before January 13, 2017. The NMB will hold a public hearing on Thursday, December 8, 2016. Submit requests to speak at the hearing until 4 p.m. EST on Thursday, December 1, 2016.

ADDRESSES: You may submit comments by any of the methods listed below. Please submit requests to speak and materials for the public hearing only to the NMB's physical or email address. Clearly identify all submissions by Docket Number C–7156.

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.

• *Agency Web site: www.nmb.gov.* Follow the instructions for submitting comments.
• *Email: legal@nmb.gov.* Include docket number in the subject line of the message.
• *Fax:* (202) 692–5085.
• *Mail and Hand Delivery:* National Mediation Board, 1301 K Street NW., Suite 250E, Washington, DC, 20005.

See **SUPPLEMENTARY INFORMATION** for other information about electronic submission.

FOR FURTHER INFORMATION CONTACT: Mary Johnson, General Counsel, National Mediation Board, 202–692–5050, *legal@nmb.gov.*

SUPPLEMENTARY INFORMATION:

I. Introduction

The NMB proposes revisions to all seven sections of part 1208 entitled ''Availability of Information.'' Most of these revisions implement the FOIA Improvement Act of 2016 (Pub. L. 114–185). In addition, section 1208.7 proposes ''Touhy'' regulations to address the NMB's response to subpoenas and other formal requests for information. Other proposed changes reflect current NMB practice and procedures. In drafting proposed changes, the NMB consulted Guidance for Agency FOIA Regulations issued by the Department of Justice's Office for Information Policy (OIP).

The Board invites commenters to address any matters they consider relevant to the changes in the regulations. The NMB may incorporate any comments in a Final Rule. All submissions must include the agency name and docket number. All comments received will be posted without change to *www.nmb.gov,* including any personal information provided. For access to the docket or to read background documents or comments received, go to *www.nmb.gov.*

II. Section-by-Section Analysis

1208.1 General Provisions

Current sections 1208.1 ''Purpose'' and 1208.3 ''General Policy'' have been combined into this proposed section. Proposed section 1208.1(c) includes the requirement in the FOIA Improvement Act of 2016 that an agency must release information unless it ''reasonably foresees that disclosure would harm an interest protected by an exemption.'' Proposed section 1208.1(d) has been added to specify that the NMB will preserve all correspondence related to FOIA requests until destruction or other disposition is authorized pursuant to Title 44 of the United States Code or under General Records Schedule 14 of the National Archives and Records Administration.

1208.2 Requests for Records or Information Under the Freedom of Information Act

Proposed section 1208.2(a) generally updates procedures for requesting documents under the FOIA, including providing updated Agency contact information. Several existing paragraphs will be renumbered to accommodate new provisions described here.

Proposed section 1208.2(a)(2) provides requesters with the option to contact the NMB's FOIA Public Liaison for assistance in formulating a request.

Proposed section 1208.2(b) generally updates procedures related to the NMB's processing of FOIA requests. The FOIA allows agencies to toll the 20-day response period one time to request information from the requester or to clarify a fee issue. 5 U.S.C. 552(a)(6)(A). This procedure has been expressly added to proposed section 1208.2(b)(1).

The FOIA Improvement Act of 2016 requires agencies to notify requesters of their right to engage in dispute resolution services from the Office of Government Information Services. Proposed section 1208.2(b)(2) requires the NMB to notify a requester of this right whenever the NMB requests an extension of longer than 10 days to respond to a request. Proposed section 1208.2(b)(6)(iii) includes the requirement that the NMB notify the requester of this right whenever a FOIA request is not granted in full.

Proposed section 1208.2(b)(4) includes procedures that the NMB follows when it receives a request for records that originated at another agency or contain information of interest to another agency, in accordance with prior guidance from the OIP. The NMB currently follows these procedures, but they are not included in current regulations.

Proposed section 1208.2(b)(5) relates to requests for confidential business information provided to the NMB that may be protected from disclosure under Exemption 4 of the FOIA, 5 U.S.C. 552(b)(4). Executive Order 12,600 requires agencies to notify submitters of confidential business information when such information is the subject of a FOIA request. Proposed sections 1208.2(b)(5)(i) through (ii) describe the procedure for notifying submitters of the request and allowing an opportunity to object to disclosure. Proposed section 1208.2(b)(5)(iv) requires submitters of confidential business information to use a good faith effort to designate information they consider protected by Exemption 4.

Proposed section 1208.2(c) extends the time to appeal from 30 days to 90 days when a request for records has been denied in whole or part. This change is required by the FOIA Improvement Act of 2016.

1208.3 Proactive Disclosure of Information

The NMB proposes to replace current section 1208.3 with provisions related to the proactive disclosure of information as required by the FOIA Improvement Act of 2016. Among the provisions related to proactive disclosure is the ''rule of three'' requirement. This proposed section requires the NMB to post on its Web site any materials released in response to a FOIA request and for which the NMB has received at least three requests or which the NMB determines are likely to become the subject of subsequent requests.

1208.4 Material Relating to Representation Function

Proposed section 1208.4(b) discusses which materials related to the NMB's representation function are generally available and which remain confidential and not available for release. Proposed section 1208.4(b) clarifies that evidence submitted in connection with the showing of interest in a representation dispute will be treated as confidential.

1208.5 Material Relating to Mediation Function

Proposed section 1208.5 describes which material related to the NMB's mediation function is confidential, clarifying and updating language in the current section 1208.5.

1208.6 Fees Under the Freedom of Information Act

Proposed section 1208.6 has been redrafted based on Guidance for Agency FOIA Regulations issued by the OIP. Most provisions remain the same while the language has been streamlined and updated.

Proposed section 1208.6(d)(2) would prohibit the NMB from charging fees when it has failed to comply with the FOIA's time limits for responding to requests, except in limited circumstances. This change is required by the FOIA Improvement Act of 2016.

1208.7 Subpoenas and Other Requests for Testimony and Production of Documents in Legal Proceedings Where the NMB Is Not a Party

The NMB has on occasion received formal demands or subpoenas to produce records, information, or testimony in judicial, legislative, or administrative proceedings in which it or the United States is not a party. Many federal agencies have issued regulations to address these requests and provide a process for evaluating and responding to such requests. The United States Supreme Court has upheld this type of regulation in *United States ex rel. Touhy* v. *Ragen,* 340 U.S. 462 (1951). The NMB has never before issued a regulation governing the submission, evaluation, and processing of subpoenas and other similar demands for information. Proposed section 1208.7 would replace current rule 1208.7 addressing compliance with subpoenas. This proposed rule would prohibit NMB employees from producing records, information, or testimony in response to demands, unless those demands are submitted in accordance with the provisions in proposed section 1208.7(a) and release has been authorized by the NMB's General Counsel. Proposed section 1208.7(c) describes the factors the General Counsel will consider in determining whether to release information.

III. Public Hearing

Pursuant to provisions in the Railway Labor Act, the NMB will hold an open public hearing on Thursday, December 8, 2016 from 10 a.m. until 12 p.m. The public hearing will be held in the Agency's offices at 1301 K Street NW., Suite 250E, Washington, DC, 20005. The purpose of the hearing will be to solicit views of interested persons concerning the proposed rule changes.

Individuals desiring to attend the meeting must notify the NMB at the above listed physical or email address by the deadline posted. If the individual desires to make a presentation to the Board at the meeting, he or she is required to submit a brief outline of the presentation when making the request. In addition, a full written statement must be submitted no later than 4 p.m. on Monday, December 5, 2016. In lieu of making an oral presentation, individuals may submit a written statement for the record. To attend the meeting, all potential attendees must include in their request: (1) Their full name and (2) organizational affiliation (if any). Attendees are reminded to bring a photo identification card with them to the public meeting in order to gain admittance to the building.

IV. Procedural Requirements

Paperwork Reduction Act

This rule does not contain information collection requirements that require approval by the Office of Management and Budget under the Paperwork Reduction Act (44 U.S.C. 3507 *et seq.*).

Regulatory Flexibility Act

The NMB certifies that this rule will not have a significant impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). The proposed rule imposes no requirements upon carriers or derivative carriers subject to the RLA. The proposed rule would not directly affect any entities that are small businesses under the Regulatory Flexibility Act. Accordingly, the National Mediation Board certifies that it will not have a significant impact on a substantial number of small entities.

National Environmental Policy Act

This proposal will not have any significant impact on the quality of the human environment under the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*).

List of Subjects in 29 CFR Part 1208

Information, Confidential business information, Freedom of information.

For the reasons stated in the preamble, the National Mediation Board proposes to revise 29 CFR part 1208 to read as follows:

PART 1208—AVAILABILITY OF INFORMATION

Sec.

Authority: 44 Stat. 577, as amended; 45 U.S.C. 151–163.

§ 1208.1 General provisions.

(a) The purpose of this part is to set forth the regulations of the NMB regarding the availability and disclosure of information in its possession and to implement the Freedom of Information Act (FOIA). These regulations establish procedures for requesting access to records maintained by the NMB and should be read together with the FOIA, the 1987 Office of Management and Budget Guidelines for FOIA Fees, Executive Order 12,600, and the NMB's other rules and regulations.

(b) Public policy and the successful effectuation of the NMB's mission require that Board members and the employees of the NMB maintain a reputation for impartiality and integrity. Labor and management and other interested parties participating in mediation efforts must have assurance, as must labor organizations, carriers, and individuals involved in questions of representation, that confidential information disclosed to Board members and employees of the NMB will not be divulged, voluntarily or by compulsion.

(c) Notwithstanding this general policy, the Board will under all circumstances endeavor to make public as much information as can be allowed. The Board will withhold information under the FOIA only if it reasonably foresees that disclosure would harm an interest protected by one of the exemptions described in the FOIA or when disclosure is prohibited by law. When full disclosure is not possible, the NMB will consider whether partial disclosure of information is possible and will take necessary steps to segregate and release nonexempt information.

(d) The NMB will preserve all correspondence pertaining to requests it receives under the FOIA, as well as copies of all requested records, until disposition or destruction is authorized pursuant to Title 44 of the United States Code or the General Records Schedule 14 of the National Archives and Records Administration. The NMB will not dispose of or destroy records while they are the subject of a pending request, appeal, or lawsuit under the FOIA.

§ 1208.2 Requests for records or information under the Freedom of Information Act.

(a) *Requests for records.* (1) All requests for NMB records shall be filed in writing by emailing *FOIA@nmb.gov* or mailing the request to the Chief FOIA Officer, National Mediation Board, 1301 K Street NW., Suite 250E, Washington, DC, 20005. Additional information about submitting requests is available at *www.nmb.gov.* Requesters must provide contact information, such as their phone number, email address, and/or mailing address, to assist in communications about the request.

(2) The request shall reasonably describe the records being sought in a

manner which permits identification and location of the records. To the extent possible, requesters should include specific information that may help the NMB identify the requested records, such as the date, title or name, author, recipient, subject matter, case or file number, or reference number. Before submitting a request, a requester may contact the NMB's FOIA Public Liaison to discuss the records sought or to receive assistance in describing the records.

(3) The request shall include any request for waiver of fees, clearly outlining the reasons for any such request.

(4) Requests may specify the preferred form or format (including electronic formats) for the records sought. The NMB will accommodate such requests if the record is readily reproducible in that form or format.

(5) Upon receipt of a request for the records, the Chief FOIA Officer shall assign the request a FOIA tracking number and record the date and time received, the name and address of the requester, and the nature of the records requested. If the request will take more than 10 working days to process, the Chief FOIA Officer will acknowledge the request in writing, providing the requester with an individualized tracking number and a brief description of records sought.

(6) All time limitations established pursuant to this section with respect to processing initial requests and appeals shall commence at the time a written request for records is received at the Board's offices in Washington, DC or via email.

(b) *Processing the request.* (1) *Time limits.* Within 20 working days after a request for records is received, the Chief FOIA Officer shall determine whether to comply with the request and immediately notify the requester, unless an extension is taken under paragraph (b)(2) of this section. The NMB may make one request for additional information from the requester or clarify a fee issue with the requester and may toll the 20-day period while awaiting receipt of the additional information.

(2) *Extension of time.* In unusual circumstances as specified in this paragraph, the Chief FOIA Officer may extend the time for initial determination on requests up to a total of 10 days (excluding Saturdays, Sundays, and legal public holidays). Extensions shall be made by written notice to the requester within 20 working days of receipt of the request and shall set forth the reason for the extension, provide the date on which a determination is expected to be dispatched, and make available the NMB's Public Liaison to assist with any disputes between the requester and the NMB. Where the extension exceeds 10 working days, the Chief FOIA Officer will notify the requester of the right to seek dispute resolution services from the Office of Government Information Services. As used in this paragraph ''unusual circumstances'' means, but only to the extent necessary to the proper processing of the request:

(i) The need to search for, collect, and appropriately examine a voluminous amount of separate and distinct records which are demanded in a single request; or

(ii) The need for consultation, according to the procedures set forth in paragraph (b)(4), with another agency having substantial interest in the determination of the request.

(3) *Expedited processing.* The Chief FOIA Officer shall process a request on an expedited basis whenever a requester demonstrates a compelling need. A request for expedited processing may be made at any time.

(i) For purposes of this section, ''compelling need'' means that a failure to obtain the requested records on an expedited basis could reasonably be expected to pose an imminent threat to the life or physical safety of an individual or, with respect to a request made by a person primarily engaged in disseminating information, urgency to inform the public concerning actual or alleged Federal Government activity.

(ii) The Chief FOIA Officer shall make a determination of whether to provide expedited processing, and notice of the determination shall be provided to the person making the request, within 10 days after the date of the request.

(4) *Consultations and referrals.*

(i) When the NMB receives a request for a record (or a portion thereof) in its possession that originated with another federal agency, the Chief FOIA Officer shall refer the request and record to that agency for direct response to the requester. The Chief FOIA Officer will notify the requester of any referral and provide the requester with the name and FOIA contact information of the agency to which the request was referred.

(ii) In instances where a record is requested that originated with the NMB and another federal agency has a significant interest in the record (or a portion thereof), the NMB shall consult with that federal agency before responding to a requester.

(iii) All consultations and referrals received by the NMB will receive a tracking number and be processed according to the date that the first agency received the request.

(5) *Requests for business information provided to the NMB.* Business information is financial or commercial information obtained by the NMB from a submitter that may be protected from disclosure under Exemption 4 of the FOIA, 5 U.S.C. 552(b)(4).

(i) When the NMB has reason to believe that requested information may fall under Exemption 4, it will promptly provide written notice to the submitter. The notice will either describe the requested business information or include a copy of the requested records. The NMB shall provide the submitter with seven days (excepting Saturdays, Sunday, and legal public holidays) to provide a statement of any objection to disclosure.

(ii) The NMB will consider the submitter's objections in deciding whether to disclose business information. If the NMB decides to disclose business information over such objection, it shall provide written notice to the submitter of its reasons for not sustaining the objections, a description of information to be disclosed, and the disclosure date.

(iii) Whenever the NMB provides a submitter with notice and the opportunity to object under paragraph (b)(5)(ii) of this section, it shall also inform the requestor that the request is being processed according to these provisions and there may be a subsequent delay in processing.

(iv) A submitter of confidential business information must use good faith efforts to designate any portion of its submission that it considers to be protected from disclosure under Exemption 4. These designations expire 10 years after the date of the submission unless the submitter requests and provides justification for a longer designation period.

(6) *Response to requests.* Within 20 days (excepting Saturdays, Sunday, and legal public holidays) after the receipt of a request, the requester shall be notified of the determination and the right to seek assistance from the NMB's FOIA Public Liaison. If the request for records is not granted in full, the final response letter shall also include:

(i) A reference to the specific exemption or exemptions under the FOIA authorizing the withholding of the record or parts of the record and a brief explanation of how the exemption applies to the record withheld.

(ii) A statement that the denial may be appealed within 90 days by writing to the Chairman, by emailing *FOIA@nmb.gov,* or by writing to National Mediation Board, 1301 K Street NW., Suite 250E, Washington, DC 20005, and that judicial review will thereafter be

available in the district in which the requester resides, or has his principal place of business, or the district in which Agency records are situated, or the District of Columbia.

(iii) A notification of the right to seek dispute resolution services from the Office of Government Information Services.

(7) *Treatment of delay as a denial.* If no determination has been dispatched at the end of the 20-day period, or the last extension thereof, the requester may deem the request denied, and exercise a right of appeal, in accordance with paragraph (c) of this section. When no determination can be dispatched within the applicable time limit, the Chief FOIA Officer shall continue to process the request and shall inform the requester of the reason for the delay, the date on which a determination may be expected to be dispatched, and of the right to treat the delay as a denial and to appeal to the Chairman of the Board in accordance with paragraph (c) of this section.

(c) *Appeals to the Chairman of the Board.* (1) When a request for records has been denied in whole or in part by the Chief FOIA Officer or other person authorized to deny requests, the requester may, within 90 days of its receipt, appeal the denial to the Chairman of the Board. Appeals to the Chairman shall be in writing, addressed to the Chairman, National Mediation Board, Washington, DC 20005 or emailed to *FOIA@nmb.gov.*

(2) The Chairman of the Board will act upon the appeal within 20 working days (excluding Saturdays, Sundays and legal public holidays) of its receipt unless an extension is made under paragraph (c)(3) of this section.

(3) In unusual circumstances as defined in paragraph (b)(2) of this section, the time for action on an appeal may be extended up to 10 days (excluding Saturdays, Sundays and legal public holidays). Written notice of such extension shall be made prior to the expiration of the 20-day response period, setting forth the reason for the extension and the date on which a determination is expected to be dispatched.

(4) If no determination on the appeal has been dispatched at the end of the 20-day period or the last extension thereof, the requester is deemed to have exhausted administrative remedies, giving rise to a right of review in a district court of the United States, as specified in 5 U.S.C. 552(a)(4). When no determination can be dispatched within the applicable time limit, the appeal will nevertheless continue to be processed; on expiration of the time limit the requester shall be informed of the reason for the delay, of the date on which a determination may be expected to be dispatched, and of a right to seek judicial review in the United States district court in the district in which they reside or have their principal place of business, the district in which the Board records are situated or the District of Columbia. The requester may be asked to forego judicial review until determination of the appeal.

§ 1208.3 Proactive disclosure of information.

The NMB shall, in conformance with 5 U.S.C. 552(a)(2), maintain and make available for public inspection, by posting on its Web site (unless the Board determines by order published in the **Federal Register** that such publication would be unnecessary or impracticable) the following information: Final opinions, including concurring and dissenting opinions made in representation cases; statements of policy and interpretation made by the NMB but not published in the **Federal Register**; administrative staff materials, such as the Representation Manual; frequently requested materials, defined as those released in response to a FOIA request and for which the Agency has received at least three requests or those records that because of the nature of their subject matter the Agency determines are likely to become the subject of subsequent requests; and a general index of records available under this section.

§ 1208.4 Material relating to representation function.

(a) The documents constituting the record of a case, such as the notices of hearing, motions, rulings, findings upon investigation, determinations of craft or class, dismissals, withdrawals, and certifications, are matters of official record and shall be made available on the NMB's Web site.

(b) This part notwithstanding, the NMB will treat as confidential evidence submitted in connection with the showing of interest in a representation dispute, including authorization cards and signature samples, and other personally identifying information received during an investigation.

§ 1208.5 Material relating to mediation function.

All files, reports, letters, memoranda, and documents relating to the mediation function of the NMB, with the exception of procedural or administrative materials, such as applications, docket letters, or public meeting notices, in the custody of the NMB or its employees relating to or acquired in their mediatory capacity under the Railway Labor Act are hereby declared to be confidential. No such confidential documents or the material contained therein shall be disclosed to any unauthorized person, or be taken or withdrawn, copied or removed from the custody of the NMB or its employees by any person or by any agent of such person or their representative without the explicit consent of the NMB.

§ 1208.6 Fees under the Freedom of Information Act.

(a) *In general.* The NMB will charge for processing requests under the FOIA in accordance with the provisions of this section and with Office of Management and Budget Guidelines. For purposes of assessing fees, the FOIA establishes three categories of requesters: (1) Commercial use requesters, (2) non-commercial scientific or educational institutions or news media requesters, and (3) all other requesters. Different fees are assessed depending on the category. Requesters may seek a fee waiver. The NMB will consider requests for fee waivers in accordance with the requirements in paragraph (k) of this section. To resolve any fee issues that arise under this section, the NMB may contact a requester for additional information. The NMB ordinarily will collect all applicable fees before sending copies of records to a requester. Requesters must pay fees by check or money order made payable to the United States Treasury.

(b) *Definitions.* For purposes of this section:

Commercial use request is a request that asks for information for a use or a purpose that furthers a commercial, trade, or profit interest, which can include furthering those interests through litigation. An agency's decision to place a requester in the commercial use category will be made on a case-by-case basis based on the requester's intended use of the information. The NMB will notify requesters of their placement in this category.

Direct costs are those expenses that an agency incurs in searching for and duplicating (and, in the case of commercial use requests, reviewing) records in order to respond to a FOIA request. For example, direct costs include the salary of the employee performing the work (*i.e.,* the basic rate of pay for the employee, plus 16 percent of that rate to cover benefits) and the cost of operating computers and other electronic equipment, such as photocopiers and scanners. Direct costs do not include overhead expenses such

as the costs of space, and of heating or lighting a facility.

Duplication is reproducing a copy of a record, or of the information contained in it, necessary to respond to a FOIA request. Copies can take the form of paper, audiovisual materials, or electronic records, among others.

Educational institution is any school that operates a program of scholarly research. A requester in this fee category must show that the request is made in connection with his or her role at the educational institution. Agencies may seek verification from the requester that the request is in furtherance of scholarly research, and agencies will advise requesters of their placement in this category.

Noncommercial scientific institution is an institution that is not operated on a ''commercial'' basis, as defined in this paragraph (b) and that is operated solely for the purpose of conducting scientific research the results of which are not intended to promote any particular product or industry. A requester in this category must show that the request is authorized by and is made under the auspices of a qualifying institution and that the records are sought to further scientific research and are not for a commercial use. The NMB will advise requesters of their placement in this category.

Representative of the news media is any person or entity that gathers information of potential interest to a segment of the public, uses its editorial skills to turn the raw materials into a distinct work, and distributes that work to an audience. The term ''news'' means information that is about current events or that would be of current interest to the public. Examples of news media entities include television or radio stations that broadcast ''news'' to the public at large and publishers of periodicals that disseminate ''news'' and make their products available through a variety of means to the general public, including news organizations that disseminate solely on the Internet. A request for records supporting the news-dissemination function of the requester will not be considered to be for a commercial use. ''Freelance'' journalists who demonstrate a solid basis for expecting publication through a news media entity will be considered as a representative of the news media. A publishing contract would provide the clearest evidence that publication is expected; however, agencies can also consider a requester's past publication record in making this determination. The NMB will advise requesters of their placement in this category.

Review is the examination of a record located in response to a request in order to determine whether any portion of it is exempt from disclosure. Review time includes processing any record for disclosure, such as doing all that is necessary to prepare the record for disclosure, including the process of redacting the record and marking the appropriate exemptions. Review costs are properly charged even if a record ultimately is not disclosed. Review time also includes time spent both obtaining and considering any formal objection to disclosure made by a confidential business information submitter under section 1208.2(b)(5), but it does not include time spent resolving general legal or policy issues regarding the application of exemptions.

Search is the process of looking for and retrieving records or information responsive to a request. Search time includes page-by-page or line-by-line identification of information within records and the reasonable efforts expended to locate and retrieve information from electronic records.

(c) *Charging fees.* In responding to FOIA requests, the NMB will charge the following fees unless a waiver or reduction of fees has been granted under paragraph (k) of this section. Because the fee amounts provided below already account for the direct costs associated with a given fee type, the NMB will not add any additional costs to charges calculated under this section. (1) *Search.*

(i) Requests made by educational institutions, noncommercial scientific institutions, or representatives of the news media are not subject to search fees. The NMB will charge search fees for all other requesters, subject to the restrictions of paragraph (d) of this section. The NMB may properly charge for time spent searching even if it does not locate any responsive records or determines that the records are entirely exempt from disclosure.

(ii) For each quarter hour spent by personnel searching for requested records, including electronic searches that do not require new programming, direct costs will be charged.

(iii) The NMB will also charge direct costs associated with conducting any search that requires the creation of a new computer program to locate the requested records. The NMB will notify the requester of the costs associated with creating such a program, and the requester must agree to pay the associated costs before the costs may be incurred.

(2) *Duplication.* The NMB will charge duplication fees to all requesters, subject to the restrictions of paragraph (d) of this section. The NMB will honor a requester's preference for receiving a record in a particular form or format where it can readily reproduce it in the form or format requested. Where photocopies are supplied, the NMB will provide one copy per request at the cost of 15 cents per page. For copies of records produced on tapes, disks, or other media, the NMB will charge the direct costs of producing the copy, including operator time. Where paper documents must be scanned in order to comply with a requester's preference to receive the records in an electronic format, the requester must also pay the direct costs associated with scanning those materials. For other forms of duplication, the NMB will charge the direct costs.

(3) *Review.* The NMB will charge review fees to requesters who make commercial use requests. Review fees will be assessed in connection with the initial review of the record, *i.e.,* the review conducted by the NMB to determine whether an exemption applies to a particular record or portion of a record. No charge will be made for review at the administrative appeal stage of exemptions applied at the initial review stage. However, if a particular exemption is deemed to no longer apply, any costs associated with the re-review of the records in order to consider the use of other exemptions may be assessed as review fees. Review fees will be charged at the same rates as those charged for a search under paragraph (c)(1)(ii) of this section.

(d) *Restrictions on charging fees.* (1) When the NMB determines that a requester is an educational institution, non-commercial scientific institution, or representative of the news media, and the records are not sought for commercial use, it will not charge search fees.

(2)(i) If the NMB fails to comply with the time limits described in section 1208.2(b)(1) in which to respond to a request, it may not charge search fees, or, in the instances of requests from requesters described in paragraph (d)(1) of this section, may not charge duplication fees, except as described in paragraph (d)(2)(ii) through (iv) of this section.

(ii) If the NMB has determined that unusual circumstances as defined in section 1208.2(b)(2) apply and the NMB provided timely written notice to the requester in accordance with that section, a failure to comply with the time limit shall be excused for an additional 10 days.

(iii) If the NMB has determined that unusual circumstances apply and more than 5,000 pages are necessary to

respond to the request, the NMB may charge search fees, or, in the case of requesters described in paragraph (d)(1) of this section, may charge duplication fees, if the following steps are taken. The NMB must have provided timely written notice of unusual circumstances to the requester in accordance with the FOIA and must have discussed with the requester via written mail, email, or telephone (or made not less than three good-faith attempts to do so) how the requester could effectively limit the scope of the request in accordance with 5 U.S.C. 552(a)(6)(B)(ii). If this exception is satisfied, the NMB may charge all applicable fees incurred in the processing of the request.

(iv) If a court has determined that exceptional circumstances exist, as defined by the FOIA, a failure to comply with the time limits shall be excused for the length of time provided by the court order.

(3) No search or review fees will be charged for a quarter-hour period unless more than half of that period is required for search or review.

(4) Except for requesters seeking records for a commercial use, the NMB will provide without charge:

(i) The first 100 pages of duplication (or the cost equivalent for other media); and

(ii) The first two hours of search.

(5) No fee will be charged when the total fee, after deducting the 100 free pages (or its cost equivalent) and the first two hours of search, is equal to or less than $25.

(e) *Notice of anticipated fees in excess of $25.00.* (1) When the NMB determines or estimates that the fees to be assessed in accordance with this section will exceed $25.00, the Agency must notify the requester of the actual or estimated amount of the fees, including a breakdown of the fees for search, review or duplication, unless the requester has indicated a willingness to pay fees as high as those anticipated. If only a portion of the fee can be estimated readily, the NMB will advise the requester accordingly. If the request is not for noncommercial use, the notice will specify that the requester is entitled to the statutory entitlements of 100 pages of duplication at no charge and, if the requester is charged search fees, two hours of search time at no charge, and will advise the requester whether those entitlements have been provided.

(2) If the NMB notifies the requester that the actual or estimated fees are in excess of $25.00, the request will not be considered received and further work will not be completed until the requester commits in writing to pay the actual or estimated total fee, or designates some amount of fees the requester is willing to pay, or in the case of a noncommercial use requester who has not yet been provided with the requester's statutory entitlements, designates that the requester seeks only that which can be provided by the statutory entitlements. The requester must provide the commitment or designation in writing, and must, when applicable, designate an exact dollar amount the requester is willing to pay. The NMB is not required to accept payments in installments.

(3) If the requester has indicated a willingness to pay some designated amount of fees, but the NMB estimates that the total fee will exceed that amount, it will toll the processing of the request when it notifies the requester of the estimated fees in excess of the amount the requester has indicated a willingness to pay. The NMB will inquire whether the requester wishes to revise the amount of fees the requester is willing to pay or modify the request. Once the requester responds, the time to respond will resume from where it was at the date of the notification.

(4) The NMB will make available its FOIA Public Liaison or other FOIA professional to assist any requester in reformulating a request to meet the requester's needs at a lower cost.

(f) *Charges for other services.* Although not required to provide special services, if the NMB chooses to do so as a matter of administrative discretion, the direct costs of providing the service will be charged. Examples of such services include certifying that records are true copies, providing multiple copies of the same document, or sending records by means other than first class mail.

(g) *Charging interest.* The NMB may charge interest on any unpaid bill starting on the 31st day following the date of billing the requester. Interest charges will be assessed at the rate provided in 31 U.S.C. 3717 and will accrue from the billing date until payment is received by the Agency. The NMB will follow the provisions of the Debt Collection Act of 1982 (Public Law 97–365, 96 Stat. 1749), as amended, and its administrative procedures, including the use of consumer reporting agencies, collection agencies, and offset.

(h) *Aggregating requests.* When the NMB reasonably believes that a requester or a group of requesters acting in concert is attempting to divide a single request into a series of requests for the purpose of avoiding fees, it may aggregate those requests and charge accordingly. The NMB may presume that multiple requests of this type made within a 30-day period have been made in order to avoid fees. For requests separated by a longer period, the NMB will aggregate them only where there is a reasonable basis for determining that aggregation is warranted in view of all the circumstances involved. Multiple requests involving unrelated matters cannot be aggregated.

(i) *Advance payments.* (1) For requests other than those described in paragraphs (i)(2) or (i)(3) of this section, the NMB will not require the requester to make an advance payment before work is commenced or continued on a request. Payment owed for work already completed (*i.e.,* payment before copies are sent to a requester) is not an advance payment.

(2) When the NMB determines or estimates that a total fee to be charged under this section will exceed $250.00, it may require that the requester make an advance payment up to the amount of the entire anticipated fee before beginning to process the request. The NMB may elect to process the request prior to collecting fees when it receives a satisfactory assurance of full payment from a requester with a history of prompt payment.

(3) Where a requester has previously failed to pay a properly charged FOIA fee within 30 calendar days of the billing date, the NMB may require that the requester pay the full amount due, plus any applicable interest on that prior request, and it may require that the requester make an advance payment of the full amount of any anticipated fee before beginning to process a new request or continuing to process a pending request or any pending appeal. Where the NMB has a reasonable basis to believe that a requester has misrepresented the requester's identity in order to avoid paying outstanding fees, it may require that the requester provide proof of identity.

(4) In cases in which the NMB requires advance payment, the request will not be considered received and further work will not be completed until the required payment is received. If the requester does not pay the advance payment within 30 calendar days after the date of the fee determination, the request will be closed.

(j) *Other statutes specifically providing for fees.* The fee schedule of this section does not apply to fees charged under any statute that specifically requires the NMB to set and collect fees for particular types of records. In instances where records responsive to a request are subject to a statutorily-based fee schedule program, the NMB must inform the requester of the contact information for that program.

(k) *Requirements for waiver or reduction of fees.* (1) Requesters may seek a waiver of fees by submitting a written application demonstrating how disclosure of the requested information is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the government and is not primarily in the commercial interest of the requester.

(2) The NMB will furnish records responsive to a request without charge or at a reduced rate when it determines, based on all available information, that the factors described in paragraphs (k)(2)(i) through (iii) of this section are satisfied:

(i) Disclosure of the requested information would shed light on the operations or activities of the government. The subject of the request must concern identifiable operations or activities of the Federal Government with a connection that is direct and clear, not remote or attenuated.

(ii) Disclosure of the requested information is likely to contribute significantly to public understanding of those operations or activities. This factor is satisfied when the following criteria are met:

(A) Disclosure of the requested records must be meaningfully informative about government operations or activities. The disclosure of information that already is in the public domain, in either the same or a substantially identical form, would not be meaningfully informative if nothing new would be added to the public's understanding.

(B) The disclosure must contribute to the understanding of a reasonably broad audience of persons interested in the subject, as opposed to the individual understanding of the requester. A requester's expertise in the subject area as well as the requester's ability and intention to effectively convey information to the public must be considered. Agencies will presume that a representative of the news media will satisfy this consideration.

(iii) The disclosure must not be primarily in the commercial interest of the requester. To determine whether disclosure of the requested information is primarily in the commercial interest of the requester, agencies will consider the following criteria:

(A) The NMB will identify whether the requester has any commercial interest that would be furthered by the requested disclosure. A commercial interest includes any commercial, trade, or profit interest. Requesters must be given an opportunity to provide explanatory information regarding this consideration.

(B) If there is an identified commercial interest, the NMB must determine whether that is the primary interest furthered by the request. A waiver or reduction of fees is justified when the requirements of paragraphs (k)(2)(i) and (ii) of this section are satisfied and any commercial interest is not the primary interest furthered by the request. The NMB will presume that when a news media requester has satisfied the factors in paragraphs (k)(2)(i) and (ii) of this section, the request is not primarily in the commercial interest of the requester. Disclosure to data brokers or others who merely compile and market government information for direct economic return will not be presumed to primarily serve the public interest.

(3) Where only some of the records to be released satisfy the requirements for a waiver of fees, a waiver will be granted for those records.

(4) Requests for a waiver or reduction of fees should be made when the request is first submitted and should address the criteria referenced above. A requester may submit a fee waiver request at a later time so long as the underlying record request is pending or on administrative appeal. When a requester who has committed to pay fees subsequently asks for a waiver of those fees and that waiver is denied, the requester must pay any costs incurred up to the date the fee waiver request was received.

§ 1208.7 Subpoenas and other requests for testimony and production of documents in legal proceedings where the NMB is not a party.

(a) In legal proceedings between private litigants, a subpoena or other demand for the production of records held by the Agency or for oral or written testimony of a current or former NMB employee should be addressed to the General Counsel, National Mediation Board, 1301 K Street NW., Suite 250E, Washington, DC 20005. No other official or employee of the NMB is authorized to accept service of a demand or subpoena on behalf of the Agency.

(b) No current or former employee may produce official records or information or provide testimony in response to a demand or subpoena unless authorized by the General Counsel.

(c) The General Counsel may grant an employee permission to testify or produce official records or information in response to a demand or subpoena. In making this determination, the General Counsel shall consider whether:

(1) Release of the requested records or testimony is prohibited under § 1208.5;

(2) The disclosure is appropriate under the rules of procedure governing the case or matter;

(3) The requested testimony or records are privileged under the relevant substantive law concerning privilege;

(4) Disclosure would violate a statute or regulation;

(5) Disclosure would reveal trade secrets without the owner's consent; and

(6) Allowing testimony or production of records would be in the best interest of the NMB or the United States.

Dated: November 3, 2016.

Mary Johnson,

General Counsel, National Mediation Board.

[FR Doc. 2016–26986 Filed 11–10–16; 8:45 am]

BILLING CODE 7550–01–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[DA 16–1229; MB Docket No. 16–362; RM–11776]

Radio Broadcasting Services; Mullin, Texas

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document proposes to amend the FM Table of Allotments, by substituting Channel 277A for vacant Channel 224A at Mullin, Texas, to accommodate the hybrid application requesting modification of the license for Station KNUZ(FM), San Saba, Texas to specify operation on Channel 224A rather than Channel 291A at San Saba, Texas. A staff engineering analysis indicates that Channel 277A can be allotted to Mullin consistent with the minimum distance separation requirements of the Commission's rules with site restriction 3.1 km (1.9 miles) north of the city. The reference coordinates are 31–35–00 NL and 98–40–31 WL.

DATES: Comments must be filed on or before December 19, 2016, and reply comments on or before January 3, 2017.

ADDRESSES: Federal Communications Commission, 445 12th Street SW., Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the rule making petitioner and the counter proponent as follows: John C. Trent, Esq., Putbrese, Hunsaker & Trust, 200 S. Church Street, Woodstock, VA 22664.

FOR FURTHER INFORMATION CONTACT: Adrienne Y. Denysyk, Media Bureau, (202) 418–2700.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's *Notice of Proposed Rule Making,* MB Docket No. 16–362, adopted October 27, 2016. The FM Table of Allotment does not contain vacant Channel 224A at Mullins, Texas because the channel was removed from the FM Table because it was auctioned in Auction 93, and considered an authorized station. *See* 79 FR 64125, published October 28, 2014. Channel 224A at Mullins, Texas is no longer considered an authorized station but instead a vacant allotment because the construction permit for Station DKFON was cancelled on January 8, 2016. *See* File No. BNPH–20120523ABP. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC's Reference Information Center at Portals II, CY–A257, 445 12th Street, SW., Washington, DC 20554. The full text is also available online at *http://apps.fcc.gov/ecfs/.* This document does not contain proposed information collection requirements subject to the Paperwork Reduction Act of 1995, Public Law 104–13. In addition, therefore, it does not contain any proposed information collection burden ''for small business concerns with fewer than 25 employees,'' pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, *see* 44 U.S.C. 3506(c)(4).

Provisions of the Regulatory Flexibility Act of l980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

List of Subjects in 47 CFR Part 73

Radio, Radio broadcasting.

Federal Communications Commission.

Nazifa Sawez,

Assistant Chief, Audio Division, Media Bureau.

For the reasons discussed in the preamble, the Federal Communications Commission proposes to amend 47 CFR part 73 as follows:

PART 73—RADIO BROADCAST SERVICES

■ 1. The authority citation for part 73 continues to read as follows:

Authority: 47 U.S.C. 154, 303, 334, 336 and 339.

§ 73.202 [Amended]

■ 2. In § 73.202(b) amend the table under Texas by adding Mullin, Channel 277A to read as follows:

§ 73.202 Table of Allotments.

* * * * *

(b) *Table of FM Allotments.*

Texas	
* * * * *	
Mullin	277A
* * * * *

RIN 1018–AX36

Management of Non-Federal Oil and Gas Rights

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule; availability of record of decision.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), make available the final record of decision (ROD) on revising regulations governing non-Federal oil and gas activities on National Wildlife Refuge System lands in order to improve our ability to protect refuge resources, visitors, and the general public's health and safety from potential impacts associated with non-Federal oil and gas operations located within refuges. The Service has selected Alternative B, implementation of the final rule, Management of Non-Federal Oil and Gas Rights, which revises current Service regulations, as its final decision. This decision is described and analyzed in the final environmental impact statement and summarized in the ROD.

ADDRESSES: Copies of the ROD are available for public review at *http://www.fws.gov/refuges/oil-and-gas/rulemaking.html* and at *http://www.regulations.gov* under Docket No. FWS–HQ–NWRS–2012–0086.

FOR FURTHER INFORMATION CONTACT: Scott Covington, U.S. Fish and Wildlife Service, Division of Natural Resources and Planning, MS: NWRS, 5275 Leesburg Pike, Falls Church, Virginia 22041; telephone 703–358–2427. If you use a telecommunications device for the deaf (TDD), call the Federal Information Relay Service (FIRS) at 800–877–8339. Further contact information can be found on the Refuge's Energy Program Web site at *http://www.fws.gov/refuges/oil-and-gas/rulemaking.html.*

SUPPLEMENTARY INFORMATION:

Background

With this document, we announce the availability of the record of decision (ROD) for the final environmental impact statement (EIS) analyzing revisions to the Service's regulations governing non-Federal oil and gas development on lands of the National Wildlife Refuge System (NWRS). Non-Federal oil and gas development refers to oil and gas activities associated with any private, State, or tribally owned mineral interest where the surface estate is administered by the Service as part of the Refuge System.

On February 24, 2014, we issued an advance notice of proposed rulemaking (79 FR 10080) to assist us in developing a proposed rule and announced our intent to prepare an EIS; the comment period for this document closed April 25, 2014. In response to requests we received, on June 9, 2014, we reopened the comment period until July 9, 2014 (79 FR 32903). During the two comment periods, we received almost 80,000 responses, mostly form letters, of which greater than 99 percent were in support of revising the existing regulations. We reviewed and considered substantive comments as we drafted the proposed rule. On December 11, 2015, we published a proposed rule and draft EIS (80 FR 77200). In response to the proposed rule and draft EIS, we received almost 40,000 responses, mostly form letters. All comments we received were carefully considered and, where appropriate, incorporated into the final rule and EIS. On August 22, 2016, we announced the availability of a final EIS, which evaluated the impacts of three alternatives (81 FR 56575):

The FEIS evaluates the impacts of the following three alternatives:

Alternative A, the no-action alternative, retains the current level of regulation and oversight of oil and gas activities by the Service.

Alternative B, the Service's selected alternative to implement, establishes a uniform process for when and how an operator must obtain an ''operations permit'' and ensures that all new operations on the NWRS are conducted under a suite of performance-based standards for avoiding or minimizing impacts to refuge resources or visitor uses. Alternative B also ensures that all operators on the NWRS successfully reclaim their area of operations once operations end. Under Alternative B, operations in Alaska would continue to be governed by title XI of the Alaska National Interest Lands Conservation Act (16 U.S.C. 410hh–410hh–5, 16 U.S.C. 3101 *et seq.,* 43 U.S.C. 1601 *et seq.*), and the Department's implementing regulations and standards found at 43 CFR part 36.

Alternative C includes all the proposed changes in Alternative B, with these additions: Service jurisdiction would expand to regulate non-Federal oil and gas operations that occur on private surface within the boundary of a refuge (*i.e.,* inholdings) and to operations on non-Federal surface locations that use directional drilling to access non-Federal oil and gas underneath the surface of a refuge; and performance-based standards and the permitting process would expand to actively regulate downhole operations such as well cementing, well casing, and well integrity testing.

Decision

The Service has determined that Alternative B, the agency-preferred alternative, best meets the agency's purpose and needs for revising regulations governing non-Federal oil and gas activities on the NWRS, because it most appropriately balances protection for refuge resources and uses with the administrative and cost burden imposed on both the regulated community and the Service. Therefore, it is the Service's decision to implement Alternative B, and make final the rule defined by that alternative for managing non-Federal oil and gas activities on the NWRS. This decision is based on the information contained in the final EIS. The ROD was prepared pursuant to the requirements of the Council on Environmental Quality regulations for implementing NEPA at 40 CFR parts 1500–1508 and the Department of the Interior's implementing regulations.

Authority

We issue this document under the authority of the National Environmental Policy Act (NEPA) (42 U.S.C. 4321 *et seq.*) and the Department of the Interior regulations that implement NEPA (part 46 of title 43 of the Code of Federal Regulations) and the National Wildlife Refuge System Administration Act, as amended by the National Wildlife Refuge System Improvement Act (16 U.S.C. 668dd *et seq.*).

Dated: October 5, 2016

Michael J. Bean,

Principal Deputy Assistant Secretary for Fish and Wildlife and Parks.

[FR Doc. 2016–27215 Filed 11–10–16; 8:45 am]

BILLING CODE 4333–15–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 635

RIN 0648–BD22

Atlantic Highly Migratory Species; Atlantic Shark Management Measures; Draft Amendment 5b

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of change of public hearing location.

SUMMARY: On October 18, 2016, NMFS published a proposed rule for Amendment 5b to the 2006 Consolidated Highly Migratory Species (HMS) Fishery Management Plan (FMP) based on the results of the 2016 stock assessment update for Atlantic dusky sharks. Based on the assessment update, NMFS determined that the stock remains overfished and is experiencing overfishing. As described in the proposed rule, NMFS proposed management measures that would reduce fishing mortality on dusky sharks and rebuild the dusky shark population, consistent with legal requirements. The proposed rule included times and locations of several public hearings. This notice announces that we are changing the location of the Florida public hearing.

DATES: NMFS will hold six public hearings on Draft Amendment 5b as announced in the October 18, 2016 proposed rule, except the November 21, 2016 meeting location has changed from Melbourne, Florida, to Satellite Beach, Florida. Written comments on the October 18, 2016 proposed rule for Amendment 5b will be accepted until December 22, 2016. See **SUPPLEMENTARY INFORMATION** for the revised Florida meeting location. See **SUPPLEMENTARY INFORMATION** in the Amendment 5b proposed rule (October 18, 2016, 81 FR 71672) for the other public hearings, conference calls, and an HMS Advisory Panel meeting dates, times, and locations.

ADDRESSES: NMFS will hold a public hearing on the proposed rule for Amendment 5b to the 2006 Consolidated HMS FMP (October 18, 2016, 81 FR 71672) in Satellite Beach, FL. For specific location, date and time see the **SUPPLEMENTARY INFORMATION** section of this document.

Copies of the supporting documents—including the draft environmental impact statement (DEIS), Regulatory Impact Review (RIR), Initial Regulatory Flexibility Analysis (IRFA), and the 2006 Consolidated Atlantic HMS FMP are available from the HMS Web site at *http://www.nmfs.noaa.gov/sfa/hms/* or by contacting Tobey Curtis at 978–281–9273.

FOR FURTHER INFORMATION CONTACT: Tobey Curtis at 978–281–9273 or Karyl Brewster-Geisz at 301–427–8503.

SUPPLEMENTARY INFORMATION:

Background

On October 18, 2016, NMFS published a proposed rule (81 FR 71672) for Draft Amendment 5b to the 2006 Consolidated HMS FMP based on the results of the 2016 stock assessment update for Atlantic dusky sharks. Based on this assessment, NMFS determined that the dusky shark stock remains overfished and is experiencing overfishing and in the Draft Amendment proposed management measures that would reduce fishing mortality on dusky sharks and rebuild the dusky shark population consistent with legal requirements. The comment period for the proposed rule closes December 22, 2016, and any comments received during the comment period will be considered in the development of Final Amendment 5b to the 2006 Consolidated HMS FMP.

Request for Comments

As announced in the proposed rule, NMFS will hold six public hearings (in New Jersey, Rhode Island, Louisiana, Texas, Florida, and North Carolina) to provide the opportunity for public comment on the proposed measures. NMFS will also hold one public conference call/webinar to provide individuals an opportunity to submit public comment if they are unable to attend a public hearing. Due to a scheduling conflict at the Melbourne Public Library, the location of the Florida public hearing announced in the proposed rule has changed. The public hearing will now be held in Satellite Beach, FL; the date and time have not

changed (Table 1). None of the other public hearing locations have changed.

TABLE 1—DATE, TIME AND LOCATION OF RESCHEDULED PUBLIC HEARING

Venue	Date/Time	Meeting locations	Location contact information
Public Hearing	November 21, 2016, 5 p.m.–8 p.m..	Satellite Beach, FL	Satellite Beach Public Library, 751 Jamaica Blvd., Satellite Beach, FL 32937.

The public is reminded that NMFS expects participants at the public hearing to conduct themselves appropriately. At the beginning of each public hearing, a representative of NMFS will explain the ground rules (*e.g.,* alcohol is prohibited from the hearing room; attendees will be called to give their comments in the order in which they registered to speak; each attendee will have an equal amount of time to speak; and attendees should not interrupt one another). The NMFS representative will attempt to structure the meeting so that all attending members of the public will be able to comment, if they choose, regardless of the controversial nature of the subject(s). Attendees are expected to respect the ground rules, and, if they do not, they may be asked to leave the hearing or conference call.

Authority: 16 U.S.C. 971 *et seq.;* 16 U.S.C. 1801 *et seq.*

Dated: November 8, 2016.

Jennifer M. Wallace,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Notices

Federal Register
Vol. 81, No. 219
Monday, November 14, 2016

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

Agency Information Collection Activities: Revision of Approved Information Collection; Comment Request—Supplemental Nutrition Assistance Program (SNAP): Operating Guidelines, Forms and Waivers

AGENCY: Food and Nutrition Service (FNS), USDA.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice invites the general public and other public agencies to comment on this information collection. This is a revision of a currently approved collection. This information collection package consists of five components of State agency reporting and/or recordkeeping: a budget projection statement, a program activity report, State plans of operation updates, waiver requests and other plans and submissions such as advance planning documents for information systems and for electronic benefit transfer (EBT) systems.

DATES: Written comments must be received on or before January 13, 2017.

ADDRESSES: Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions that were used; (c) ways to enhance the quality, utility and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including use of appropriate automated, electronic, mechanical or other technological collection techniques or other forms of information technology.

Comments may be sent to: Ralph Badette, Food and Nutrition Service, U.S. Department of Agriculture, 3101 Park Center Drive, Room 818, Alexandria, VA 22302. Comments will also be accepted through the Federal eRulemaking Portal. Go to *http://www.regulations.gov,* and follow the online instructions for submitting comments electronically.

All written comments will be open for public inspection at the office of the Food and Nutrition Service during regular business hours (8:30 a.m. to 5:00 p.m. Monday through Friday) at 3101 Park Center Drive, Room 810, Alexandria, Virginia 22302.

All responses to this notice will be summarized and included in the request for Office of Management and Budget approval. All comments will be a matter of public record.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of this information collection should be directed to Ralph Badette at 703–457–7717.

SUPPLEMENTARY INFORMATION:

Title: Operating Guidelines, Forms and Waivers.

OMB Number: 0584–0083.

Forms: FNS–366A; FNS–366B; SNAP Waiver Request Form

Expiration Date: April 30, 2017.

Type of Request: Revision of a currently approved collection.

Abstract: Section 16(a) of the Food and Nutrition Act of 2008 (the Act) authorizes 50 percent Federal reimbursement for State agency costs to administer the program. 7 CFR 272.2(a) of SNAP regulations requires that State agencies plan and budget program operations and establish objectives for the next year. The basic components of the State Plan of Operation are the Federal/State Agreement, the Budget Projection Statement (FNS–366A) and the Program Activity Statement (FNS–366B) (7 CFR 272.2(a)(2)). Under 7 CFR 272.2(c), the State agency shall submit to FNS for approval a Budget Projection Statement (which projects total Federal administrative costs for the upcoming fiscal year) and a Program Activity Statement (which provides program activity data for the preceding fiscal year). In addition, certain attachments to the plan as specified in subparagraphs (c) and (d) are to be submitted. As specified in subparagraph (f), State agencies only have to provide FNS with changes to these attachments as they occur. Consequently, these attachments are considered State plan updates. Under Section 11(o) of the Act each State agency is required to develop and submit plans for the use of automated data processing (ADP) and information retrieval systems to administer SNAP. Section 16(a) of the Act authorizes partial Federal reimbursement of State costs for State ADP systems that the Secretary determines will assist meeting the requirements of the Act, meets conditions prescribed by the Secretary, are likely to provide more efficient and effective administration of the program, and are compatible with certain other Federally-funded systems.

Under 7 CFR 277.18(c)(1) of SNAP regulations, State agencies must obtain prior written approval from FNS when it plans to acquire ADP equipment with a total acquisition cost of $5 million or more in Federal and State funds. The State agency must submit an Advance Planning Document (APD) prior to acquiring planning services and an Implementation APD prior to acquiring ADP equipment or services. Additionally, State agencies administering SNAP may submit formal written requests, SNAP waiver requests, to obtain approval from FNS to deviate from a specific program rule or regulation. Current procedures require that in order for FNS to approve a SNAP waiver request, the State agency must submit the SNAP Waiver Request Form via the SWIM application.

In 2014, FNS submitted a change justification for the SNAP Recipient Trafficking Data Survey, which added 26.5 hours to this burden. This survey is no longer being conducted, and the associated hours are removed from this collection with this notice. The reporting burden for forms FNS–366A and FNS–366B was merged in 2015 with the burden for the Food Programs Reporting System (OMB control number 0584–0594, expiration date September 30, 2019); therefore, reporting hours associated with these forms are removed from this collection with this notice. However, recordkeeping requirements for these forms remains in this OMB Control Number.

Burden Estimates

The burden within this collection consists of reporting and recordkeeping burden for the State Plan of Operation Updates and APD Plans or Updates; reporting burden for SNAP Waiver Requests via the SNAP Workflow Information Management (SWIM) system; and recordkeeping burden for forms FNS–366A and FNS–366B. The current burden is 2,754 hours. The revised estimated burden for this collection is 1,120.95 hours (1,088.62 reporting hours and 32.33 recordkeeping hours). This results in a decrease of 1,633 hours, which is a result of removing the reporting burden for forms FNS–366A and FNS–366B and the SNAP Trafficking Survey from this collection. The calculation of the burden for each of these components is described below:

Reporting

Reporting Burden Estimates:

Affected Public: State, Local and Tribal Government Agencies.

Estimated Number of Respondents: 53.

Estimated Number of Responses per Respondent: 8.35.

Estimated Total Annual Responses: 442.3.

Estimated Reporting Time per Response: 3.36.

Estimated Annual Reporting Burden Hours: 1,088.62.

State Plan of Operation Updates. Fifty-three (53) State agencies submit 1 response annually for a total of 53 annual responses. The reporting burden for submission of updates to State Plans of Operation is 6.58 hours per respondent, resulting in estimated burden hours of 348.99 ($53 \times 6.5847 = 348.99$).

APD Plans or Updates. We estimate that up to 53 State agencies may submit on an average of four (4) APD, plan, or update submission for a total of 212 annual responses at an average estimate of 2.5 hours per respondent. The reporting burden is 530 hours.

SNAP Waiver Request Form. FNS estimates that out of 53 State agencies 45 State will submit 3.94 of the three identified waivers annually for a total number of 177 Waivers annually. Completion and submission of these waivers take approximately 1 hour for a total of 177 burden hours annually.

Affected public	Forms	Number of respondents	Frequency of response	Total annual responses	Time per response (hrs)	Annual reporting burden hours
State Agencies	Plan of Operation Updates	53	1	53	6.58	348.99
	Other APD Plan or Update	53	4	212	2.5	530
	SNAP Waiver Request Form (SWIM).	45	3.94	177.3	1	177.3
Reporting Total Burden Estimates.		53.00	2.98	442.3	3.36	1,056.29

Recordkeeping

Recordkeeping Burden Estimates:

Affected Public: State, Local and Tribal Government Agencies.

Estimated Number of Recordkeepers: 53.

Estimated Number of Records per Recordkeepers: 6.84.

Estimated Total Annual Records: 363.

Estimated Recordkeeping time per Recordkeepers: 0.07.

Estimated Annual Recordkeeping Burden Hours: 31.77.

FNS–366A. State agencies are required to submit to FNS for approval a Budget Projection Statement, Form FNS–366A, which includes projections of the total Federal costs for major areas of program operations. There is a total of 53 recordkeepers for each activity. Each State agency submits 1 response annually for a total of 53 annual responses. A copy is maintained for 3 years. It takes approximately 0.05 minutes to maintain each record. Total annual recordkeeping burden for FNS–366A is estimated at 2.65 hours annually per recordkeeper.

FNS–366B. State agencies are required to submit to FNS a Program Activity Statement, Form FNS–366B, providing a summary of program activity for the State agency's operations during its preceding fiscal year. Each State agency submits 1 response annually for a total of 53 annual responses; each record takes approximately 0.05 minutes to maintain. The annual recordkeeping burden for FNS–366B is estimated annually at 2.65 hours per recordkeeper.

State Plan of Operation Updates. Each State agency submits 1 response annually for a total of 45 annual responses; each record takes approximately 0.07 minutes to maintain. The annual recordkeeping burden for updates to State Plans of Operation as attachments to the FNS–366B is 3.15 hours per record-keeper.

Other APD Plans and Updates. FNS estimated that up to 53 State agencies may submit an average of 4 APD, Plan, or Update submissions and approximately 212 records at an average estimate of 0.11 minutes per record keeper for an estimated total of 23.32 recordkeeping burden for this activity hours.

Affected public	(b) Form No. or activity	(c) Number recordkeepers	(d) Number records per respondent	(e) Estimate total annual records (cxd)	(f) Hours per recordkeeper	(g) Total burden (exf)
RECORDKEEPING						
State Agencies	FNS–366A	53	1	53	0.05	2.65
	FNS–366B	53	1	53	0.05	2.65
	Plan of Operations Updates	45	1	45	0.07	3.15
	Other APD Plan or Update	53	4	212	0.11	23.32
Recordkeeping Total Burden Estimates.		53	1.75	363	0.07	31.77

COMMISSION OF CIVIL RIGHTS

Sunshine Act Meeting Notice

AGENCY: United States Commission on Civil Rights.

ACTION: Notice of Commission business meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission), and the Federal Advisory Committee Act (FACA), that a Business Meeting of the U.S. Commission on Civil Rights will be convened at 10 a.m. on Friday, November 18, 2016.

DATES: Friday, November 18, 2016, at 10 a.m. EST.

ADDRESSES: National Place Building, 1331 Pennsylvania Ave. NW., 11th Floor, Suite 1150, Washington, DC 20425 (Entrance on F Street NW.).

FOR FURTHER INFORMATION CONTACT: Brian Walch, Communications and Public Engagement Director. Telephone: (202) 376–8371; TTY: (202) 376–8116; Email: *publicaffairs@usccr.gov*.

SUPPLEMENTARY INFORMATION: This business meeting is open to the public. If you would like to listen to the business meeting, please contact the above for the call-in information.

Hearing-impaired persons who will attend the briefing and require the services of a sign language interpreter should contact Pamela Dunston at (202) 376–8105 or at *signlanguage@usccr.gov* at least three business days before the scheduled date of the meeting.

Meeting Agenda

I. Approval of Agenda
II. Business Meeting
A. Program Planning
- Discussion and Vote on Outline, Timeline, and Discovery Plan for FY2017 Statutory Enforcement Report

B. State Advisory Committees
- Presentation by the Chair of the Michigan Advisory Committee on the Committee's Report on Civil Forfeiture in Michigan
- State Advisory Committee Appointments
- Arkansas
- Pennsylvania
- Iowa
- Ohio

C. Management and Operations.
- Staff Director's Report

III. Adjourn Meeting

Dated: November 9, 2016.

Brian Walch,

Director, Communications and Public Engagement.

DEPARTMENT OF COMMERCE

Economics and Statistics Administration

Request for Nominations of Member To Serve on the Commerce Data Advisory Council (CDAC)

AGENCY: Economics and Statistics Administration (ESA), Department of Commerce.

ACTION: Notice of request for nominations to the CDAC.

SUMMARY: The Secretary of Commerce is requesting nomination of individuals to the Commerce Data Advisory Council. The Secretary will consider nominations received in response to this notice, as well as from other sources. The **SUPPLEMENTARY INFORMATION** section of this notice provides committee and membership criteria.

DATES: The Economics and Statistics Administration must receive nominations for members by midnight November 10, 2016.

ADDRESSES: Please submit nominations to the email account *DataAdvisoryCouncil@doc.gov*, this account is specifically set up to receive Data Advisory Council applications. Nominations may also be submitted by postal delivery to Burton Reist, Director of External Affairs, Economics and Statistics Administration/DFO CDAC, Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Burton Reist, Director of External Affairs, Economics and Statistics Administration, Department of Commerce, at (202) 482–3331 or email *BReist@doc.gov*, also at 1401 Constitution Avenue NW., Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Commerce (Department) collects, compiles, analyzes, and disseminates a treasure trove of data, including data on the Nation's economy, population, and environment. This data is fundamental to the Department's mission and is used for the protection of life and property, for scientific purposes, and to enhance economic growth. However, the Department's capacity to disseminate the increasing amount of data held and to disseminate it in formats most useful to its customers is significantly constrained.

In order to realize the potential value of the data the Department collects, stores, and disseminates, the Department must minimize barriers to accessing and using the data. Consistent with privacy and security considerations, the Department is firmly committed to unleashing its untapped data resources in ways that best support downstream information access, processing, analysis, and dissemination.

The Commerce Data Advisory Council (CDAC) provides advice and recommendations, to include process and infrastructure improvements, to the Secretary on ways to make Commerce data easier to find, access, use, combine and disseminate. The aim of this advice shall be to maximize the value of Commerce data to all users including governments, businesses, communities, academia, and individuals.

The Secretary will draw CDAC membership from the data industry academia, non-profits and state and local governments with a focus on recognized expertise in collection, compilation, analysis, and dissemination. As privacy concerns span the entire data lifecycle, expertise in privacy protection also will be represented on the Council. The Secretary will select members that represent the entire spectrum of Commerce data including demographic, economic, scientific, environmental, patent, and geospatial data. The Secretary will select members from the information technology, business, non-profit, and academic communities, and state and local governments. Collectively, their knowledge will include all types of data Commerce distributes and the full lifecycle of data collection, compilation, analysis, and dissemination.

II. Description of Duties

The Council shall advise the Secretary on ways to make Commerce data easier to find, access, use, combine, and disseminate. Such advice may include recommended process and infrastructure improvements. The aim of this advice shall be to maximize the value of Commerce data to governments, businesses, communities, and individuals.

In carrying out its duties, the Council may consider the following:

—Data management practices that make it easier to track and disseminate integrated, interoperable data for diverse users;

—Best practices that can be deployed across Commerce to achieve common, open standards related to taxonomy, vocabulary, application programming interfaces (APIs), metadata, and other key data characteristics;

—Policy issues that arise from expanding access to data, including issues related to privacy, confidentiality, latency, and consistency;

—Opportunities and risks related to the combination of public and private data sources and the development of joint data products and services resulting from public-private partnerships;

—External uses of Commerce data and similar federal, state, and private data sets by businesses; and,

—Methods to enhance communication and collaboration between stakeholders and subject-matter experts at Commerce on data access and use.

The Council meets up to four times a year, budget permitting. Special meetings may be called when appropriate.

Federal Advisory Committee Act (5 U.S.C. Appendix 2), which sets forth standards for the formation and use of advisory committees, is the governing instrument for the CDAC.

III. Membership

1. The Council shall consist of up to 20 members.

2. The Secretary shall select and appoint members and members shall serve at the pleasure of the Secretary.

3. Members shall represent a cross-section of business, academic, non-profit, and non-governmental organizations.

4. The Secretary will choose members of the Council who ensure objectivity and balance, a diversity of perspectives, and guard against potential for conflicts of interest.

5. Members shall be prominent experts in their fields, recognized for their professional and other relevant achievements and their objectivity.

6. In order to ensure the continuity of the Commerce Data Advisory Council, the Council shall be appointed so that each year the terms expire of approximately one-third of the members of the Council.

7. Council members serve for terms of two years and may be reappointed to any number of additional terms. Initial appointments may be for 12-, 18- and 24-month increments to provide staggered terms.

8. Nominees must be able to actively participate in the tasks of the Council, including, but not limited to regular meeting attendance, Council meeting discussant responsibilities, and review of materials, as well as participation in conference calls, webinars, working groups, and special Council activities.

9. Should a council member be unable to complete a two-year term and when vacancies occur, the Secretary will select replacements who can best either replicate the expertise of the departing member or provide the CDAC with a new, identified needed area of expertise. An individual chosen to fill a vacancy shall be appointed for the remainder of the term of the member replaced or for a two-year term as deemed. A vacancy shall not affect the exercise of any power of the remaining members to execute the duties of the Council.

10. No employee of the federal government can serve as a member of the Census Scientific Advisory Committee.

All members of the Commerce Data Advisory Council shall adhere to the conflict of interest rules applicable to Special Government Employees as such employees are defined in 18 U.S.C. 202(a). These rules include relevant provisions in 18 U.S.C. related to criminal activity, Standards of Ethical Conduct for Employees of the Executive Branch (5 CFR part 2635), and Executive Order 12674 (as modified by Executive Order 12731).

IV. Compensation

1. Membership is under voluntary circumstances and therefore members do not receive compensation for service on the Commerce Data Advisory Council.

2. Members shall receive per diem and travel expenses as authorized by 5 U.S.C. 5703, as amended, for persons employed intermittently in the Government service.

V. Nominations Information

The Secretary will consider nominations of all qualified individuals to ensure that the CDAC includes the areas of subject matter expertise noted above (see ''Background and Membership''). Individuals may nominate themselves or other individuals, and professional associations and organizations may nominate one or more qualified persons for membership on the CDAC. Nominations shall state that the nominee is willing to serve as a member of the Council.

A nomination package should include the following information for each nominee:

1. A letter of nomination stating the name, affiliation, and contact information for the nominee, the basis for the nomination (*i.e.*, what specific attributes recommend him/her for service in this capacity), and the nominee's field(s) of expertise;

2. A biographical sketch of the nominee and a copy of his/her resume or curriculum vitae; and

3. The name, return address, email address, and daytime telephone number at which the nominator can be contacted.

The Department of Commerce is committed to equal opportunity in the workplace and seeks diverse Committee membership. The Department has special interest in assuring that women, minority groups, and the physically disabled are adequately represented on advisory committees; and therefore, extends particular encouragement to nominations for appropriately qualified female, minority, or disabled candidates. The Department of Commerce also encourages geographic diversity in the composition of the Council. All nomination information should be provided in a single, complete package and received by the stated deadline, November 10, 2016. Interested applicants should send their nomination package to the email or postal address provided above.

Potential candidates will be asked to provide detailed information concerning financial interests, consultancies, research grants, and/or contracts that might be affected by recommendations of the Council to permit evaluation of possible sources of conflicts of interest. Finally, nominees will be required to certify that they are not subject to the Foreign Agents Registration Act (22 U.S.C. 611) or the Lobbying Disclosure Act (2 U.S.C. 1601 *et seq.*).

Dated: November 5, 2016.

Austin Durrer,

Chief of Staff for Under Secretary for Economic Affairs.

BILLING CODE P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Order No. 2015]

Approval of Subzone Status; G2 LNG LLC; Cameron, Louisiana

Pursuant to its authority under the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), the Foreign-

Trade Zones Board (the Board) adopts the following Order:

Whereas, the Foreign-Trade Zones Act provides for ''. . . the establishment . . . of foreign-trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes,'' and authorizes the Foreign-Trade Zones Board to grant to qualified corporations the privilege of establishing foreign-trade zones in or adjacent to U.S. Customs and Border Protection ports of entry;

Whereas, the Board's regulations (15 CFR part 400) provide for the establishment of subzones for specific uses;

Whereas, the West Cameron Port Commission, grantee of Foreign-Trade Zone 291, has made application to the Board for the establishment of a subzone at the facility of G2 LNG LLC located in Cameron, Louisiana (FTZ Docket B–22–2016, docketed April 20, 2016);

Whereas, notice inviting public comment has been given in the **Federal Register** (81 FR 24563, April 26, 2016) and the application has been processed pursuant to the FTZ Act and the Board's regulations; and,

Whereas, the Board adopts the findings and recommendations of the examiner's memorandum, and finds that the requirements of the FTZ Act and the Board's regulations are satisfied;

Now, therefore, the Board hereby approves subzone status at the facility of G2 LNG LLC, located in Cameron, Louisiana (Subzone 291A), as described in the application and **Federal Register** notice, subject to the FTZ Act and the Board's regulations, including Section 400.13.

Signed at Washington, DC, this 1st day of November 2016.

Paul Piquado,

Assistant Secretary of Commerce for Enforcement and Compliance, Alternate Chairman, Foreign-Trade Zones Board.

Andrew McGilvray,

Executive Secretary.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Order No. 2018]

Reorganization of Foreign-Trade Zone 110 Under the Alternative Site Framework; Albuquerque, New Mexico

Pursuant to its authority under the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), the Foreign-Trade Zones Board (the Board) adopts the following Order:

Whereas, the Board adopted the alternative site framework (ASF) (15 CFR Sec. 400.2(c)) as an option for the establishment or reorganization of zones;

Whereas, the City of Albuquerque, New Mexico, grantee of Foreign-Trade Zone 110, submitted an application to the Board (FTZ Docket B–32–2016, docketed May 10, 2016, amended August 22, 2016) for authority to reorganize under the ASF with a service area of Bernalillo and Valencia Counties and the Cities of Santa Fe, Rio Rancho, Bernalillo and Moriarty, New Mexico, in and adjacent to the Albuquerque, New Mexico U.S Customs and Border Protection port of entry, and FTZ 110's existing Site 1 would be categorized as a magnet site;

Whereas, notice inviting public comment was given in the **Federal Register** (81 FR 30516, May 17, 2016) and the application has been processed pursuant to the FTZ Act and the Board's regulations; and,

Whereas, the Board adopts the findings and recommendations of the examiner's report, and finds that the requirements of the FTZ Act and the Board's regulations are satisfied;

Now, Therefore, the Board hereby orders:

The amended application to reorganize FTZ 110 under the ASF is approved, subject to the FTZ Act and the Board's regulations, including Section 400.13, to the Board's standard 2,000-acre activation limit for the zone.

Signed at Washington, DC, this 1st day of November 2016.

Paul Piquado,

Assistant Secretary of Commerce for Enforcement and Compliance, Alternate Chairman, Foreign-Trade Zones Board.

ATTEST:

Andrew McGilvray,

Executive Secretary.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[B–73–2016]

Foreign-Trade Zone (FTZ) 176—Rockford, Illinois; Notification of Proposed Production Activity; Brake Parts Inc (Automotive Parts Kitting); McHenry, Illinois

Brake Parts Inc (BPI) submitted a notification of proposed production activity to the FTZ Board for its facility in McHenry, Illinois, within FTZ 176. The notification conforming to the requirements of the regulations of the FTZ Board (15 CFR 400.22) was received on November 2, 2016.

The BPI facility is located within Subzone 176G. The facility is used for the kitting of aftermarket automotive parts. Pursuant to 15 CFR 400.14(b), FTZ activity would be limited to the specific foreign-status materials and components and specific finished products described in the submitted notification (as described below) and subsequently authorized by the FTZ Board.

Production under FTZ procedures could exempt BPI from customs duty payments on the foreign-status components used in export production. On its domestic sales, BPI would be able to choose the duty rates during customs entry procedures that apply to master cylinder kits, brake drum kits, brake pad kits, brake shoe kits and brake caliper kits (duty rate free to 2.5%) for the foreign-status inputs noted below. Customs duties also could possibly be deferred or reduced on foreign-status production equipment.

The components and materials sourced from abroad include: Rubber O-rings; rubber seals; rubber brake components; paperboard corrugated boxes; steel hex bolts; steel bolts; steel brake clips; galvanized cast iron brake brackets; master cylinders; brake drums; brake pads; brake shoes; and, wheel cylinders (duty rate ranges from free to 2.5%).

Public comment is invited from interested parties. Submissions shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is December 27, 2016,

A copy of the notification will be available for public inspection at the Office of the Executive Secretary, Foreign-Trade Zones Board, Room 21013, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230–0002, and in the ''Reading Room'' section of the Board's Web site, which is accessible via *www.trade.gov/ftz.*

For further information, contact Christopher Kemp at *Christopher.Kemp@trade.gov* or (202) 482–0862.

Dated: November 7, 2016.

Andrew McGilvray,

Executive Secretary.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Order No. 2017]

Reorganization of Foreign-Trade Zone 261 Under Alternative Site Framework; Alexandria, Louisiana

Pursuant to its authority under the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), the Foreign-Trade Zones Board (the Board) adopts the following Order:

Whereas, the Board adopted the alternative site framework (ASF) (15 CFR Sec. 400.2(c)) as an option for the establishment or reorganization of zones;

Whereas, the England Economic & Industrial Development District, grantee of Foreign-Trade Zone 261, submitted an application to the Board (FTZ Docket B–37–2016, docketed May 25, 2016) for authority to reorganize under the ASF with a service area of Rapides Parish, Louisiana, adjacent to the Morgan City Customs and Border Protection port of entry, to remove Site 3 from the zone, and FTZ 261's existing Sites 1 and 2 would be categorized as magnet sites;

Whereas, notice inviting public comment was given in the **Federal Register** (81 FR 35298, June 2, 2016) and the application has been processed pursuant to the FTZ Act and the Board's regulations; and,

Whereas, the Board adopts the findings and recommendations of the examiner's report, and finds that the requirements of the FTZ Act and the Board's regulations are satisfied;

Now, therefore, the Board hereby orders:

The application to reorganize FTZ 261 under the ASF is approved, subject to the FTZ Act and the Board's regulations, including Section 400.13, to the Board's standard 2,000-acre activation limit for the zone, and to an ASF sunset provision for magnet sites that would terminate authority for Site 2 if not activated within five years from the month of approval.

Dated: November 1, 2016.

Paul Piquado,

Assistant Secretary of Commerce for Enforcement and Compliance, Alternate Chairman, Foreign-Trade Zones Board.

Andrew McGilvray,

Executive Secretary.

DEPARTMENT OF COMMERCE

International Trade Administration

[A–433–812]

Certain Carbon and Alloy Steel Cut-To-Length Plate From Austria: Preliminary Determination of Sales at Less Than Fair Value and Postponement of the Final Determination

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the Department) preliminarily determines that certain carbon and alloy steel cut-to-length plate (CTL plate) from Austria is being, or is likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is April 1, 2015, through March 31, 2016. The estimated weighted-average dumping margins of sales at LTFV are shown in the ''Preliminary Determination'' section of this notice. Interested parties are invited to comment on this preliminary determination.

DATES: Effective November 14, 2016.

FOR FURTHER INFORMATION CONTACT: Edythe Artman or Madeline Heeren, AD/CVD Operations, Office VI, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–3931 or (202) 482–9179, respectively.

SUPPLEMENTARY INFORMATION:

Background

The Department published the initiation of this investigation on April 28, 2016.[1] For a complete description of the events that followed the initiation of this investigation, *see* the memorandum that is dated concurrently with this determination and hereby adopted by this notice.[2] A list of topics in the Preliminary Decision Memorandum is included as Appendix II to this notice.

The Preliminary Decision Memorandum is a public document and is made available to the public *via* Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov,* and is available to all parties in the Department's Central Records Unit, room B8024 of the main Department of Commerce building. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly on the internet at *http://enforcement.trade.gov/frn/.* The signed Preliminary Decision Memorandum and the electronic version of the Preliminary Decision Memorandum are identical in content.

Scope of the Investigation

The product covered by this investigation is CTL plate from Austria. For a full description of the scope of this investigation, *see* the ''Scope of the Investigation,'' in Appendix I of this notice.

Scope Comments

In accordance with the *Preamble* to the Department's regulations,[3] the *Initiation Notice* set aside a period of time for parties to raise issues regarding product coverage, *i.e.,* scope.[4] Certain interested parties commented on the scope of the concurrent CTL plate investigations as it appeared in the *Initiation Notice.* For a summary of the product coverage comments and rebuttal responses submitted to the records of this and the concurrent CTL plate investigations, and a discussion and analysis of all comments timely received, *see* the Department's Preliminary Scope Decision Memorandum and the Department's Additional Preliminary Scope Decision Memorandum.[5] The Department has

[1] *See Certain Carbon and Alloy Steel Cut-To-Length Plate From Austria, Belgium, Brazil, France, the Federal Republic of Germany, Italy, Japan, the Republic of Korea, the People's Republic of China, South Africa, Taiwan, and the Republic of Turkey: Initiation of Less-Than-Fair Value Investigations,* 81 FR 27089 (May 5, 2016) (*Initiation Notice*).

[2] *See* Memorandum from Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, to Paul Piquado, Assistant Secretary for Enforcement and Compliance, entitled ''Decision Memorandum for the Preliminary Determination in the Antidumping Duty Investigation of Certain Carbon and Alloy Steel Cut-To-Length Plate From Italy'' (Preliminary Decision Memorandum), dated concurrently with this notice.

[3] *See Antidumping Duties; Countervailing Duties; Final Rule,* 62 FR 27296, 27323 (May 19, 1997) (*Preamble*).

[4] *See Initiation Notice,* 81 FR at 27090.

[5] *See* Memorandum to Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, ''Certain Carbon and Alloy Steel Cut-to-Length Plate From Austria, Belgium, Brazil, the People's Republic of China, France, the Federal Republic of Germany, Italy, Japan, the Republic of Korea, the Republic of South Africa, Taiwan, and Turkey: Scope Comments Decision Memorandum for the Preliminary Determinations,'' dated September 6, 2016 (Preliminary Scope Decision Memorandum), and Memorandum to Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, ''Certain Carbon and Alloy Steel Cut-to-Length Plate From Austria, Belgium, Brazil, the People's Republic of China, France, the Federal Republic of Germany, Italy, Japan, the Republic of Korea, the Republic of South Africa, Taiwan, and Turkey: Additional Scope Comments Preliminary Decision Memorandum and Extension of Deadlines for Scope Case Briefs and Scope Rebuttal Briefs,''

preliminarily modified the scope language as it appeared in the *Initiation Notice* to clarify the exclusion for stainless steel plate, correct two tariff numbers that were misidentified in the Petitions and in the *Initiation Notice,* and modify language pertaining to existing steel plate and hot-rolled flat-rolled steel orders.[6]

Methodology

The Department is conducting this investigation in accordance with section 731 of the Tariff Act of 1930, as amended (the Act). There is one mandatory respondent participating in this investigation. Export price and, where appropriate, constructed export price are calculated in accordance with section 772 of the Act. Normal value (NV) is calculated in accordance with section 773 of the Act. For a full description of the methodology underlying our preliminary conclusions, *see* the Preliminary Decision Memorandum.

All Others Rate

Section 735(c)(5)(A) of the Act provides that the estimated ''all others'' rate shall be an amount equal to the weighted-average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero or *de minimis* margins, and any margins determined entirely under section 776 of the Act.

Voestalpine is the only respondent for which the Department calculated a company-specific rate.[7] Therefore, for purposes of determining the ''all others'' rate and pursuant to section 735(c)(5)(A) of the Act, we are using the estimated weighted-average dumping margin calculated for voestalpine as the all-others rate, as referenced in the ''Preliminary Determination'' section below.

Preliminary Determination

The Department preliminarily determines that CTL plate from Austria is being, or is likely to be, sold in the United States at LTFV, pursuant to section 733 of the Act, and that the following estimated weighted-average dumping margins exist:

Exporter/manufacturer	Weighted-average dumping margin (percent)
Bohler Edelstahl GmbH & Co KG; Bohler Bleche GmbH & Co KG; Bohler International GmbH; voestalpine Grobblech GmbH; voestalpine Steel Service Center GmbH	41.97
All Others	41.97

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, we will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of all entries of subject merchandise from Austria, as described in Appendix I of this notice, which are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**, except for voestalpine, as described below.

Section 733(e)(2) of the Act provides that, given an affirmative determination of critical circumstances, any suspension of liquidation shall apply to unliquidated entries of merchandise entered, or withdrawn from warehouse, for consumption on or after the later of (a) the date which is 90 days before the date on which the suspension of liquidation was first ordered, or (b) the date on which notice of initiation of the investigation was published.

Because we have preliminarily found that critical circumstances exist with regard to imports produced and exported by the mandatory respondent voestalpine,[8] we will instruct CBP to suspend liquidation of all entries of CTL plate from Austria, as described in the scope of the investigation, from voestalpine that are entered, or withdrawn from warehouse, for consumption on or after the date that is 90 days prior to the date on which suspension of liquidation is first ordered, *e.g.,* the date of publication of this notice.

Pursuant to section 733(d) of the Act and 19 CFR 351.205(d), we will instruct CBP to require a cash deposit[9] equal to the weighted-average amount by which NV exceeds U.S. price, as indicated in the chart above, as follows: (1) The rate for the mandatory respondent listed above will be the respondent-specific rate we determined in this preliminary determination; (2) if the exporter is not a mandatory respondent identified above, but the producer is, the rate will be the specific rate established for the producer of the subject merchandise; (3) the rate for all other producers or exporters will be the all-others rate. These suspension of liquidation instructions will remain in effect until further notice.

Disclosure

We intend to disclose the calculations performed to interested parties in this proceeding within five days of the public announcement of this preliminary determination in accordance with 19 CFR 351.224(b).

Verification

As provided in section 782(i) of the Act, we intend to verify information relied upon in making our final determination.

Public Comment

Interested parties are invited to comment on this preliminary determination. Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the final verification report is issued in this proceeding, and rebuttal briefs, limited to issues raised in case briefs, may be submitted no later than five days after the deadline date for case briefs.[10] Pursuant to 19 CFR 351.309(c)(2) and (d)(2), parties who submit case briefs or rebuttal briefs in this proceeding are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.

The Department established separate deadlines for interested parties to provide comments on scope issues.[11]

dated October 13, 2016 (Additional Preliminary Scope Decision Memorandum), respectively.

[6] *See* Preliminary Scope Decision Memorandum at 2 and 56, and Additional Preliminary Scope Decision Memorandum at 10–11 and 20.

[7] For this preliminary determination, the Department has preliminarily determined to collapse, and treat as a single entity, Bohler Edelstahl GmbH & Co KG (BEG), Bohler Bleche GmbH & Co KG (BBG), Bohler International GmbH (BIG), voestalpine Grobblech (Grobblech), and voestalpine Steel Service Center GmbH (SSC) (collectively, voestalpine). *See* Memorandum to the File, entitled ''Certain Carbon and Alloy Steel Cut-to-Length Plate from Austria, Less-Than-Fair-Value Investigation: voestalpine Collapsing Memorandum,'' dated concurrently with this notice.

[8] *See Certain Carbon and Alloy Steel Cut-to-Length Plate From Austria, Belgium, Brazil, the Republic of Korea, Taiwan, and Turkey; Antidumping and Countervailing Duty Investigations: Preliminary Determinations of Critical Circumstances,* 81 FR 61666 (September 7, 2016).

[9] *See Modification of Regulations Regarding the Practice of Accepting Bonds During the Provisional Measures Period in Antidumping and Countervailing Duty Investigations,* 76 FR 61042 (October 3, 2011).

[10] *See* 19 CFR 351.309; *see also* 19 CFR 351.303 (for general filing requirements).

[11] *See* Preliminary Scope Decision Memorandum, Additional Preliminary Scope Decision Memorandum, and Memorandum to the File ''Deadlines for Submitting Scope Case Briefs and Scope Rebuttal Briefs,'' dated October 18, 2016 (Deadline Memo for Scope Briefs); and Memorandum to the File ''Extension of Deadline for Submitting Scope Rebuttal Briefs,'' dated October

Continued

Specifically, case briefs on scope issues were to be submitted no later than October 21, 2016. Scope rebuttal briefs, limited to issues raised in the scope case briefs, were to be submitted no later than November 1, 2016.[12] The Department explained that parties should limit comments on scope issues to their scope case brief and their scope rebuttal brief.[13] Thus, comments on scope issues belong in parties' scope case briefs and scope rebuttal briefs only and not in other case briefs and rebuttal briefs submitted in this investigation. The Department intends to address parties' scope comments in a final scope memorandum.

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, and a list of the issues to be discussed. If a request for a hearing is made, the Department intends to hold the hearing at the U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230, at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

All documents in this investigation must be filed electronically using ACCESS. An electronically-filed request must be received successfully in its entirety by ACCESS by 5:00 p.m. Eastern Standard Time.

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. 19 CFR 351.210(e)(2) requires that requests by respondents for postponement of a final determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.

Respondent voestalpine has requested that, in the event of an affirmative preliminary determination in this investigation, the Department postpone its final determination, *i.e.,* no later than 135 days after the publication of the preliminary determination in the **Federal Register**, and agreed to extend the application of the provisional measures prescribed under section 733(d) of the Act and 19 CFR 351.210(e)(2), from a four-month period to a period not to exceed six months.[14]

In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because (1) our preliminary determination is affirmative; (2) the requesting exporters account for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, we are postponing the final determination until no later than 135 days after the publication of this notice in the **Federal Register** and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, we will issue our final determination no later than 135 days after the date of publication of this preliminary determination, pursuant to section 735(a)(2) of the Act.[15]

International Trade Commission (ITC) Notification

In accordance with section 733(f) of the Act, we are notifying the ITC of our affirmative preliminary determination of sales at LTFV. If our final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after our final determination whether these imports are materially injuring, or threaten material injury to, the U.S. industry.

This determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act and 19 CFR 351.205(c).

Dated: November 4, 2016.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

Appendix I—Scope of the Investigation

The products covered by this investigation are certain carbon and alloy steel hot-rolled or forged flat plate products not in coils, whether or not painted, varnished, or coated with plastics or other non-metallic substances (cut-to-length plate). Subject merchandise includes plate that is produced by being cut-to-length from coils or from other discrete length plate and plate that is rolled or forged into a discrete length. The products covered include (1) Universal mill plates (*i.e.,* flat-rolled products rolled on four faces or in a closed box pass, of a width exceeding 150 mm but not exceeding 1250 mm, and of a thickness of not less than 4 mm, which are not in coils and without patterns in relief), and (2) hot-rolled or forged flat steel products of a thickness of 4.75 mm or more and of a width which exceeds 150 mm and measures at least twice the thickness, and which are not in coils, whether or not with patterns in relief. The covered products described above may be rectangular, square, circular or other shapes and include products of either rectangular or non-rectangular cross-section where such non-rectangular cross-section is achieved subsequent to the rolling process, *i.e.,* products which have been ''worked after rolling'' (*e.g.,* products which have been beveled or rounded at the edges).

For purposes of the width and thickness requirements referenced above, the following rules apply:

(1) Except where otherwise stated where the nominal and actual thickness or width measurements vary, a product from a given subject country is within the scope if application of either the nominal or actual measurement would place it within the scope based on the definitions set forth above; and

(2) Where the width and thickness vary for a specific product (*e.g.,* the thickness of certain products with non-rectangular cross-section, the width of certain products with non-rectangular shape, *etc.*), the measurement at its greatest width or thickness applies.

Steel products included in the scope of this investigation are products in which: (1) Iron predominates, by weight, over each of the other contained elements; and (2) the carbon content is 2 percent or less by weight.

Subject merchandise includes cut-to-length plate that has been further processed in the subject country or a third country, including but not limited to pickling, oiling, levelling, annealing, tempering, temper rolling, skin passing, painting, varnishing, trimming, cutting, punching, beveling, and/or slitting, or any other processing that would not otherwise remove the merchandise from the scope of the investigation if performed in the country of manufacture of the cut-to-length plate.

All products that meet the written physical description, are within the scope of this investigation unless specifically excluded or covered by the scope of an existing order. The following products are outside of, and/or specifically excluded from, the scope of this investigation:

(1) products clad, plated, or coated with metal, whether or not painted, varnished or coated with plastic or other non-metallic substances;

(2) military grade armor plate certified to one of the following specifications or to a specification that references and incorporates one of the following specifications:

28, 2016 (Extension Memo for Scope Rebuttal Briefs).

- T9074–BD–GIB–010/0300 Mod. Grade HSLA115,

except that any cut-to-length plate certified to one of the above specifications, or to a military grade armor specification that references and incorporates one of the above specifications, will not be excluded from the scope if it is also dual- or multiple-certified to any other non-armor specification that otherwise would fall within the scope of this order;

(3) stainless steel plate, containing 10.5 percent or more of chromium by weight and not more than 1.2 percent of carbon by weight;

(4) CTL plate meeting the requirements of ASTM A–829, Grade E 4340 that are over 305 mm in actual thickness;

(5) Alloy forged and rolled CTL plate greater than or equal to 152.4 mm in actual thickness meeting each of the following requirements:

(a) Electric furnace melted, ladle refined & vacuum degassed and having a chemical composition (expressed in weight percentages):

- Carbon 0.23–0.28,
- Silicon 0.05–0.20,
- Manganese 1.20–1.60,
- Nickel not greater than 1.0,
- Sulfur not greater than 0.007,
- Phosphorus not greater than 0.020,
- Chromium 1.0–2.5,
- Molybdenum 0.35–0.80,
- Boron 0.002–0.004,
- Oxygen not greater than 20 ppm,
- Hydrogen not greater than 2 ppm, and
- Nitrogen not greater than 60 ppm;

(b) With a Brinell hardness measured in all parts of the product including mid thickness falling within one of the following ranges:

(i) 270–300 HBW,

(ii) 290–320 HBW, or

(iii) 320–350HBW;

(c) Having cleanliness in accordance with ASTM E45 method A (Thin and Heavy): A not exceeding 1.5, B not exceeding 1.0, C not exceeding 0.5, D not exceeding 1.5; and

(d) Conforming to ASTM A578–S9 ultrasonic testing requirements with acceptance criteria 2 mm flat bottom hole;

(6) Alloy forged and rolled steel CTL plate over 407 mm in actual thickness and meeting the following requirements:

(a) Made from Electric Arc Furnace melted, Ladle refined & vacuum degassed, alloy steel with the following chemical composition (expressed in weight percentages):

- Carbon 0.23–0.28,
- Silicon 0.05–0.15,
- Manganese 1.20–1.50,
- Nickel not greater than 0.4,
- Sulfur not greater than 0.010,
- Phosphorus not greater than 0.020,
- Chromium 1.20–1.50,
- Molybdenum 0.35–0.55,
- Boron 0.002–0.004,
- Oxygen not greater than 20 ppm,
- Hydrogen not greater than 2 ppm, and
- Nitrogen not greater than 60 ppm;

(b) Having cleanliness in accordance with ASTM E45 method A (Thin and Heavy): A not exceeding 1.5, B not exceeding 1.5, C not exceeding 1.0, D not exceeding 1.5;

(c) Having the following mechanical properties:

(i) With a Brinell hardness not more than 237 HBW measured in all parts of the product including mid thickness; and having a Yield Strength of 75ksi min and UTS 95ksi or more, Elongation of 18% or more and Reduction of area 35% or more; having charpy V at −75 degrees F in the longitudinal direction equal or greater than 15 ft. lbs (single value) and equal or greater than 20 ft. lbs (average of 3 specimens) and conforming to the requirements of NACE MR01–75; or

(ii) With a Brinell hardness not less than 240 HBW measured in all parts of the product including mid thickness; and having a Yield Strength of 90 ksi min and UTS 110 ksi or more, Elongation of 15% or more and Reduction of area 30% or more; having charpy V at −40 degrees F in the longitudinal direction equal or greater than 21 ft. lbs (single value) and equal or greater than 31 ft. lbs (average of 3 specimens);

(d) Conforming to ASTM A578–S9 ultrasonic testing requirements with acceptance criteria 3.2 mm flat bottom hole; and

(e) Conforming to magnetic particle inspection in accordance with AMS 2301;

(7) Alloy forged and rolled steel CTL plate over 407 mm in actual thickness and meeting the following requirements:

(a) Made from Electric Arc Furnace melted, ladle refined & vacuum degassed, alloy steel with the following chemical composition (expressed in weight percentages):

- Carbon 0.25–0.30,
- Silicon not greater than 0.25,
- Manganese not greater than 0.50,
- Nickel 3.0–3.5,
- Sulfur not greater than 0.010,
- Phosphorus not greater than 0.020,
- Chromium 1.0–1.5,
- Molybdenum 0.6–0.9,
- Vanadium 0.08 to 0.12
- Boron 0.002–0.004,
- Oxygen not greater than 20 ppm,
- Hydrogen not greater than 2 ppm, and
- Nitrogen not greater than 60 ppm.

(b) Having cleanliness in accordance with ASTM E45 method A (Thin and Heavy): A not exceeding 1.0(t) and 0.5(h), B not exceeding 1.5(t) and 1.0(h), C not exceeding 1.0(t) and 0.5(h), and D not exceeding 1.5(t) and 1.0(h);

(c) Having the following mechanical properties: A Brinell hardness not less than 350 HBW measured in all parts of the product including mid thickness; and having a Yield Strength of 145ksi or more and UTS 160ksi or more, Elongation of 15% or more and Reduction of area 35% or more; having charpy V at −40 degrees F in the transverse direction equal or greater than 20 ft. lbs (single value) and equal or greater than 25 ft. lbs (average of 3 specimens);

(d) Conforming to ASTM A578–S9 ultrasonic testing requirements with acceptance criteria 3.2 mm flat bottom hole; and

(e) Conforming to magnetic particle inspection in accordance with AMS 2301.

The products subject to the investigation are currently classified in the Harmonized Tariff Schedule of the United States (HTSUS) under item numbers: 7208.40.3030, 7208.40.3060, 7208.51.0030, 7208.51.0045, 7208.51.0060, 7208.52.0000, 7211.13.0000, 7211.14.0030, 7211.14.0045, 7225.40.1110, 7225.40.1180, 7225.40.3005, 7225.40.3050, 7226.20.0000, and 7226.91.5000.

The products subject to the investigation may also enter under the following HTSUS item numbers: 7208.40.6060, 7208.53.0000, 7208.90.0000, 7210.70.3000, 7210.90.9000, 7211.19.1500, 7211.19.2000, 7211.19.4500, 7211.19.6000, 7211.19.7590, 7211.90.0000, 7212.40.1000, 7212.40.5000, 7212.50.0000, 7214.10.0000, 7214.30.0010, 7214.30.0080, 7214.91.0015, 7214.91.0060, 7214.91.0090, 7225.11.0000, 7225.19.0000, 7225.40.5110, 7225.40.5130, 7225.40.5160, 7225.40.7000, 7225.99.0010, 7225.99.0090, 7226.11.1000, 7226.11.9060, 7226.19.1000, 7226.19.9000, 7226.91.0500, 7226.91.1530, 7226.91.1560, 7226.91.2530, 7226.91.2560, 7226.91.7000, 7226.91.8000, and 7226.99.0180.

The HTSUS subheadings above are provided for convenience and customs purposes only. The written description of the scope of the investigation is dispositive.

Appendix II—List of Topics Discussed in the Preliminary Decision Memorandum

[FR Doc. 2016–27305 Filed 11–10–16; 8:45 am]

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

[A–583–858]

Certain Carbon and Alloy Steel Cut-to-Length Plate From Taiwan: Preliminary Determination of Sales at Less Than Fair Value

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the Department) preliminarily determines that certain carbon and alloy steel cut-to-length plate (CTL plate) from Taiwan is being, or is likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is April 1, 2015, through March 31, 2016. The estimated weighted-average dumping margins of sales at LTFV are shown in the ''Preliminary Determination'' section of this notice. Interested parties are invited to comment on this preliminary determination.

DATES: Effective November 14, 2016.

FOR FURTHER INFORMATION CONTACT: Davina Friedmann or Tyler Weinhold, AD/CVD Operations, Office VI, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–0698 or (202) 482–1121, respectively.

SUPPLEMENTARY INFORMATION:

Background

The Department initiated this investigation on April 28, 2016.[1] We selected two mandatory respondents in this investigation, China Steel Corporation (China Steel) and Shang Chen Steel Co., Ltd. (Shang Chen). For a complete description of the events that followed the initiation of this investigation, *see* the memorandum that is dated concurrently with this determination and hereby adopted by this notice.[2] A list of topics in the Preliminary Decision Memorandum is included as Appendix II to this notice.

The Preliminary Decision Memorandum is a public document and is made available to the public via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov,* and is available to all parties in the Department's Central Records Unit, room B8024 of the main Department of Commerce building. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly on the internet at *http://enforcement.trade.gov/frn/.* The signed Preliminary Decision Memorandum and the electronic version of the Preliminary Decision Memorandum are identical in content.

Scope of the Investigation

The product covered by this investigation is CTL plate from Taiwan. For a full description of the scope of this investigation, *see* the ''Scope of the Investigation,'' in Appendix I of this notice.

Scope Comments

In accordance with the *Preamble* to the Department's regulations,[3] the *Initiation Notice* set aside a period of time for parties to raise issues regarding product coverage, *i.e.,* scope.[4] Certain interested parties commented on the scope of the concurrent CTL plate investigations as it appeared in the *Initiation Notice.* For a summary of the product coverage comments and rebuttal responses submitted to the records of this and the concurrent CTL plate investigations, and a discussion and analysis of all comments timely received, *see* the Department's Preliminary Scope Decision Memorandum and the Department's Additional Preliminary Scope Decision Memorandum.[5] The Department has preliminarily modified the scope language as it appeared in the *Initiation Notice* to clarify the exclusion for stainless steel plate, corrected two tariff numbers that were misidentified in the Petitions and in the *Initiation Notice,* and modified language pertaining to existing steel plate and hot-rolled flat-rolled steel orders.[6]

Methodology

The Department is conducting this investigation in accordance with section 731 of the Act. Export price is calculated in accordance with section 772 of the Tariff Act of 1930, as amended (the Act). Normal value (NV) is calculated in accordance with section 773 of the Act.[7] For a full description of the methodology underlying our preliminary conclusions, *see* the Preliminary Decision Memorandum.

Adverse Facts Available

Because mandatory respondent China Steel failed to cooperate to the best of its ability in responding to the Department's questionnaires, we preliminarily determine to use adverse facts available (AFA) with respect to this respondent, in accordance with sections 776(a) and (b) of the Act and 19 CFR 351.308. For further discussion, *see* the Preliminary Decision Memorandum.

All-Others Rate

Consistent with sections 733(d)(1)(A)(ii) and 735(c)(5) of the Act, the Department also calculated an estimated all-others rate. Section 735(c)(5)(A) of the Act provides that the estimated all-others rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero and *de minimis* margins, and any margins determined entirely under section 776 of the Act.

In this investigation, because the margin for China Steel was determined entirely under section 776 of the Act, and hence, because Shang Chen was the only respondent for which we calculated a weighted-average dumping margin, we based our determination of the all-others rate on the estimated

[7] We have determined that Shang Chen does not have Constructed Export Price (CEP) sales.

weighted-average dumping margin calculated for Shang Chen.[8]

Preliminary Determination

The Department preliminarily determines that CTL plate from Taiwan is being, or is likely to be, sold in the United States at LTFV, pursuant to section 733 of the Act, and that the following estimated weighted-average dumping margins exist:

Exporter/manufacturer	Weighted-average dumping margin (percent)
China Steel Corporation	28.00
Shang Chen Steel Co., Ltd	3.51
All Others	3.51

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, we will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of all entries of CTL plate from Taiwan, as described in the Scope of the Investigation in Appendix I, from Shang Chen that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**.

Section 733(e)(2) of the Act provides that, given an affirmative preliminary determination of critical circumstances, any suspension of liquidation shall apply to unliquidated entries of merchandise entered, or withdrawn from warehouse, for consumption on or after the later of (a) the date which is 90 days before the date on which the suspension of liquidation was first ordered, or (b) the date on which notice of initiation of the investigation was published.

Because we have preliminarily found that critical circumstances exist with regard to imports produced and exported by China Steel and ''all other'' companies,[9] we will instruct CBP to suspend liquidation of all entries of CTL plate from Taiwan, as described in the scope of the investigation, from China Steel and the ''all other'' companies that are entered, or withdrawn from warehouse, for consumption on or after the date that is 90 days prior to the date on which suspension of liquidation is first ordered (*e.g.,* the date of publication of this notice).

Pursuant to section 733(d) of the Act and 19 CFR 351.205(d), we will instruct CBP to require cash deposits [10] equal to the weighted-average amount by which the NV exceeds U.S. price, as indicated in the chart above, as follows: (1) The rate for the mandatory respondents listed above will be the respondent-specific rates we determined in this preliminary determination; (2) if the exporter is not a mandatory respondent identified above, but the producer is, the rate will be the specific rate established for the producer of the subject merchandise; and (3) the rate for all other producers or exporters will be the all-others rate. The suspension of liquidation instructions will remain in effect until further notice.

Disclosure

We intend to disclose the calculations performed to interested parties in this proceeding within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Verification

As provided in section 782(i) of the Act, we intend to verify information relied upon in making our final determination.

Public Comment

Interested parties are invited to comment on this preliminary determination. Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the final verification report is issued in this proceeding, and rebuttal briefs, limited to issues raised in case briefs, may be submitted no later than five days after the deadline date for case briefs.[11] Pursuant to 19 CFR 351.309(c)(2) and (d)(2), parties who submit case briefs or rebuttal briefs in this proceeding are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.

The Department established separate deadlines for interested parties to provide comments on scope issues.[12] Specifically, case briefs on scope issues were to be submitted no later than October 21, 2016. Scope rebuttal briefs, limited to issues raised in the scope case briefs, were to be submitted no later than November 1, 2016.[13] The Department explained that parties should limit comments on scope issues to their scope case brief and their scope rebuttal brief.[14] Thus, comments on scope issues belong in parties' scope case briefs and scope rebuttal briefs only and not in other case briefs and rebuttal briefs submitted in this investigation. The Department intends to address parties' scope comments in a final scope memorandum.

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, and a list of the issues to be discussed. If a request for a hearing is made, the Department intends to hold the hearing at the U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230, at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

All documents must be filed electronically using ACCESS. An electronically-filed request must be received successfully in its entirety by ACCESS by 5:00 p.m. Eastern Standard Time.

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. 19 CFR 351.210(e)(2) requires that requests by respondents for

[8] *See, e.g., Welded Line Pipe From the Republic of Turkey: Final Determination of Sales at Less Than Fair Value,* 80 FR 61362, 61363 (October 13, 2015).

[9] *See Certain Carbon and Alloy Steel Cut-to-Length Plate From Austria, Belgium, Brazil, the Republic of Korea, Taiwan, and Turkey; Antidumping and Countervailing Duty Investigations: Preliminary Determinations of Critical Circumstances,* 81 FR 61666 (September 7, 2016).

[10] *See Modification of Regulations Regarding the Practice of Accepting Bonds During the Provisional Measures Period in Antidumping and Countervailing Duty Investigations,* 76 FR 61042 (October 3, 2011).

[11] *See* 19 CFR 351.309; *see also* 19 CFR 351.303 (for general filing requirements).

[12] *See* Preliminary Scope Decision Memorandum; Additional Preliminary Scope Decision Memorandum; Memorandum to the File ''Deadlines for Submitting Scope Case Briefs and Scope Rebuttal Briefs,'' dated October 18, 2016 (''Deadline Memo for Scope Briefs''); and Memorandum to the File regarding, ''Extension of Deadline for Submitting Scope Rebuttal Briefs,'' dated October 28, 2016 (''Extension Memo for Scope Rebuttal Briefs'').

[13] *See* Deadline Memo for Scope Briefs and Extension Memo for Scope Rebuttal Briefs.

[14] *See, e.g.,* Deadline Memo for Scope Briefs.

postponement of a final determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.

Respondents China Steel and Shang Chen have requested that, in the event of an affirmative preliminary determination in this investigation, the Department postpone its final determination, *i.e.,* no later than 135 days after the publication of the preliminary determination in the **Federal Register**, and agreed to extend the application of the provisional measures prescribed under section 733(d) of the Act and 19 CFR 351.210(e)(2), from a four-month period to a period not to exceed six months.[15]

In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because (1) our preliminary determination is affirmative; (2) the requesting exporters account for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, we are postponing the final determination until no later than 135 days after the publication of this notice in the **Federal Register** and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, we will issue our final determination no later than 135 days after the date of publication of this preliminary determination, pursuant to section 735(a)(2) of the Act.[16]

International Trade Commission (ITC) Notification

In accordance with section 733(f) of the Act, we are notifying the ITC of our affirmative preliminary determination of sales at LTFV. If our final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after our final determination whether these imports are materially injuring, or threaten material injury to, the U.S. industry.

This determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act and 19 CFR 351.205(c).

[15] *See* letters from China Steel and Shang Chen regarding, ''Certain Carbon and Alloy Steel Cut-to-Length Plate From Taiwan—Request for Extension of the Deadline for the Department's Final Determination,'' dated October 31, 2016.

[16] *See* 19 CFR 351.210(b)(2) and (e).

Dated: November 4, 2016.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

Appendix I—Scope of the Investigation

The products covered by this investigation are certain carbon and alloy steel hot-rolled or forged flat plate products not in coils, whether or not painted, varnished, or coated with plastics or other non-metallic substances (cut-to-length plate). Subject merchandise includes plate that is produced by being cut-to-length from coils or from other discrete length plate and plate that is rolled or forged into a discrete length. The products covered include (1) Universal mill plates (*i.e.,* flat-rolled products rolled on four faces or in a closed box pass, of a width exceeding 150 mm but not exceeding 1250 mm, and of a thickness of not less than 4 mm, which are not in coils and without patterns in relief), and (2) hot-rolled or forged flat steel products of a thickness of 4.75 mm or more and of a width which exceeds 150 mm and measures at least twice the thickness, and which are not in coils, whether or not with patterns in relief. The covered products described above may be rectangular, square, circular or other shapes and include products of either rectangular or non-rectangular cross-section where such non-rectangular cross-section is achieved subsequent to the rolling process, *i.e.,* products which have been ''worked after rolling'' (*e.g.,* products which have been beveled or rounded at the edges).

For purposes of the width and thickness requirements referenced above, the following rules apply:

(1) Except where otherwise stated where the nominal and actual thickness or width measurements vary, a product from a given subject country is within the scope if application of either the nominal or actual measurement would place it within the scope based on the definitions set forth above unless the product is already covered by an order existing on that specific country (*i.e., Notice of Antidumping Duty Order; Certain Hot-Rolled Carbon Steel Flat Products From Taiwan,* 66 FR 59563 (November 29, 2001).); and

(2) where the width and thickness vary for a specific product (*e.g.,* the thickness of certain products with non-rectangular cross-section, the width of certain products with non-rectangular shape, *etc.*), the measurement at its greatest width or thickness applies.

Steel products included in the scope of this investigation are products in which:

(1) Iron predominates, by weight, over each of the other contained elements; and

(2) the carbon content is 2 percent or less by weight.

Subject merchandise includes cut-to-length plate that has been further processed in the subject country or a third country, including but not limited to pickling, oiling, levelling, annealing, tempering, temper rolling, skin passing, painting, varnishing, trimming, cutting, punching, beveling, and/or slitting, or any other processing that would not otherwise remove the merchandise from the scope of the investigation if performed in the country of manufacture of the cut-to-length plate.

All products that meet the written physical description, are within the scope of this investigation unless specifically excluded or covered by the scope of an existing order. The following products are outside of, and/or specifically excluded from, the scope of this investigation:

(1) Products clad, plated, or coated with metal, whether or not painted, varnished or coated with plastic or other non-metallic substances;

(2) military grade armor plate certified to one of the following specifications or to a specification that references and incorporates one of the following specifications:

- MIL–A–12560,
- MIL–DTL–12560H,
- MIL–DTL–12560J,
- MIL–DTL–12560K,
- MIL–DTL–32332,
- MIL–A–46100D,
- MIL–DTL–46100–E,
- MIL–46177C,
- MIL–S–16216K Grade HY80,
- MIL–S–16216K Grade HY100,
- MIL–S–24645A HSLA–80;
- MIL–S–24645A HSLA–100,
- T9074–BD–GIB–010/0300 Grade HY80,
- T9074–BD–GIB–010/0300 Grade HY100,
- T9074–BD–GIB–010/0300 Grade HSLA80,
- T9074–BD–GIB–010/0300 Grade HSLA100, and
- T9074–BD–GIB–010/0300 Mod. Grade HSLA115,

except that any cut-to-length plate certified to one of the above specifications, or to a military grade armor specification that references and incorporates one of the above specifications, will not be excluded from the scope if it is also dual- or multiple-certified to any other non-armor specification that otherwise would fall within the scope of this order;

(3) stainless steel plate, containing 10.5 percent or more of chromium by weight and not more than 1.2 percent of carbon by weight;

(4) CTL plate meeting the requirements of ASTM A–829, Grade E 4340 that are over 305 mm in actual thickness;

(5) Alloy forged and rolled CTL plate greater than or equal to 152.4 mm in actual thickness meeting each of the following requirements:

(a) Electric furnace melted, ladle refined & vacuum degassed and having a chemical composition (expressed in weight percentages):

- Carbon 0.23–0.28,
- Silicon 0.05–0.20,
- Manganese 1.20–1.60,
- Nickel not greater than 1.0,
- Sulfur not greater than 0.007,
- Phosphorus not greater than 0.020,
- Chromium 1.0–2.5,
- Molybdenum 0.35–0.80,
- Boron 0.002–0.004,
- Oxygen not greater than 20 ppm,
- Hydrogen not greater than 2 ppm, and
- Nitrogen not greater than 60 ppm;

(b) With a Brinell hardness measured in all parts of the product including mid thickness falling within one of the following ranges:

(i) 270–300 HBW,
(ii) 290–320 HBW, or
(iii) 320–350 HBW;

(c) Having cleanliness in accordance with ASTM E45 method A (Thin and Heavy): A not exceeding 1.5, B not exceeding 1.0, C not exceeding 0.5, D not exceeding 1.5; and

(d) Conforming to ASTM A578–S9 ultrasonic testing requirements with acceptance criteria 2 mm flat bottom hole;

(6) Alloy forged and rolled steel CTL plate over 407 mm in actual thickness and meeting the following requirements:

(a) Made from Electric Arc Furnace melted, Ladle refined & vacuum degassed, alloy steel with the following chemical composition (expressed in weight percentages):

- Carbon 0.23–0.28,
- Silicon 0.05–0.15,
- Manganese 1.20–1.50,
- Nickel not greater than 0.4,
- Sulfur not greater than 0.010,
- Phosphorus not greater than 0.020,
- Chromium 1.20–1.50,
- Molybdenum 0.35–0.55,
- Boron 0.002–0.004,
- Oxygen not greater than 20 ppm,
- Hydrogen not greater than 2 ppm, and
- Nitrogen not greater than 60 ppm;

(b) Having cleanliness in accordance with ASTM E45 method A (Thin and Heavy): A not exceeding 1.5, B not exceeding 1.5, C not exceeding 1.0, D not exceeding 1.5;

(c) Having the following mechanical properties:

(i) With a Brinell hardness not more than 237 HBW measured in all parts of the product including mid thickness; and having a Yield Strength of 75ksi min and UTS 95ksi or more, Elongation of 18% or more and Reduction of area 35% or more; having charpy V at −75 degrees F in the longitudinal direction equal or greater than 15 ft. lbs (single value) and equal or greater than 20 ft. lbs (average of 3 specimens) and conforming to the requirements of NACE MR01–75; or

(ii) With a Brinell hardness not less than 240 HBW measured in all parts of the product including mid thickness; and having a Yield Strength of 90 ksi min and UTS 110 ksi or more, Elongation of 15% or more and Reduction of area 30% or more; having charpy V at −40 degrees F in the longitudinal direction equal or greater than 21 ft. lbs (single value) and equal or greater than 31 ft. lbs (average of 3 specimens);

(d) Conforming to ASTM A578–S9 ultrasonic testing requirements with acceptance criteria 3.2 mm flat bottom hole; and

(e) Conforming to magnetic particle inspection in accordance with AMS 2301;

(7) Alloy forged and rolled steel CTL plate over 407 mm in actual thickness and meeting the following requirements:

(a) Made from Electric Arc Furnace melted, ladle refined & vacuum degassed, alloy steel with the following chemical composition (expressed in weight percentages):

- Carbon 0.25–0.30,
- Silicon not greater than 0.25,
- Manganese not greater than 0.50,
- Nickel 3.0–3.5,
- Sulfur not greater than 0.010,
- Phosphorus not greater than 0.020,
- Chromium 1.0–1.5,
- Molybdenum 0.6–0.9,
- Vanadium 0.08 to 0.12
- Boron 0.002–0.004,
- Oxygen not greater than 20 ppm,
- Hydrogen not greater than 2 ppm, and
- Nitrogen not greater than 60 ppm.

(b) Having cleanliness in accordance with ASTM E45 method A (Thin and Heavy): A not exceeding 1.0(t) and 0.5(h), B not exceeding 1.5(t) and 1.0(h), C not exceeding 1.0(t) and 0.5(h), and D not exceeding 1.5(t) and 1.0(h);

(c) Having the following mechanical properties: A Brinell hardness not less than 350 HBW measured in all parts of the product including mid thickness; and having a Yield Strength of 145ksi or more and UTS 160ksi or more, Elongation of 15% or more and Reduction of area 35% or more; having charpy V at −40 degrees F in the transverse direction equal or greater than 20 ft. lbs (single value) and equal or greater than 25 ft. lbs (average of 3 specimens);

(d) Conforming to ASTM A578–S9 ultrasonic testing requirements with acceptance criteria 3.2 mm flat bottom hole; and

(e) Conforming to magnetic particle inspection in accordance with AMS 2301.

The products subject to the investigation are currently classified in the Harmonized Tariff Schedule of the United States (HTSUS) under item numbers: 7208.40.3030, 7208.40.3060, 7208.51.0030, 7208.51.0045, 7208.51.0060, 7208.52.0000, 7211.13.0000, 7211.14.0030, 7211.14.0045, 7225.40.1110, 7225.40.1180, 7225.40.3005, 7225.40.3050, 7226.20.0000, and 7226.91.5000.

The products subject to the investigation may also enter under the following HTSUS item numbers: 7208.40.6060, 7208.53.0000, 7208.90.0000, 7210.70.3000, 7210.90.9000, 7211.19.1500, 7211.19.2000, 7211.19.4500, 7211.19.6000, 7211.19.7590, 7211.90.0000, 7212.40.1000, 7212.40.5000, 7212.50.0000, 7214.10.0000, 7214.30.0010, 7214.30.0080, 7214.91.0015, 7214.91.0060, 7214.91.0090, 7225.11.0000, 7225.19.0000, 7225.40.5110, 7225.40.5130, 7225.40.5160, 7225.40.7000, 7225.99.0010, 7225.99.0090, 7226.11.1000, 7226.11.9060, 7226.19.1000, 7226.19.9000, 7226.91.0500, 7226.91.1530, 7226.91.1560, 7226.91.2530, 7226.91.2560, 7226.91.7000, 7226.91.8000, and 7226.99.0180.

The HTSUS subheadings above are provided for convenience and customs purposes only. The written description of the scope of the investigation is dispositive.

Appendix II—List of Topics Discussed in the Preliminary Decision Memorandum

[FR Doc. 2016–27306 Filed 11–10–16; 8:45 am]

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

[A–475–834]

Certain Carbon and Alloy Steel Cut-To-Length Plate From Italy: Preliminary Determination of Sales at Less Than Fair Value, Affirmative Determination of Critical Circumstances, and Postponement of Final Determination

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the Department) preliminarily determines that certain carbon and alloy steel cut-to-length plate (CTL plate) from Italy is being, or is likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is April 1, 2015, through March 31, 2016. The estimated weighted-average dumping margins of sales at LTFV are shown in the ''Preliminary Determination'' section of this notice. Interested parties are invited to comment on this preliminary determination.

DATES: Effective November 14, 2016

FOR FURTHER INFORMATION CONTACT: Alice Maldonado or Blaine Wiltse, AD/CVD Operations, Office II, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–4682 or (202) 482–6345, respectively.

SUPPLEMENTARY INFORMATION:

Background

The Department initiated this investigation on April 28, 2016.[1] For a complete description of the events that followed the initiation of this investigation, *see* the memorandum that is dated concurrently with this determination and hereby adopted by this notice.[2] A list of topics in the Preliminary Decision Memorandum is included as Appendix II to this notice.

The Preliminary Decision Memorandum is a public document and is made available to the public via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov,* and is available to all parties in the Department's Central Records Unit, room B8024 of the main Department of Commerce building. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly on the internet at *http://enforcement.trade.gov/frn/.* The signed Preliminary Decision Memorandum and the electronic version of the Preliminary Decision Memorandum are identical in content.

Scope of the Investigation

The product covered by this investigation is CTL plate from Italy. For a full description of the scope of this investigation, *see* the ''Scope of the Investigation,'' in Appendix I of this notice.

Scope Comments

In accordance with the *Preamble* to the Department's regulations,[3] the *Initiation Notice* set aside a period of time for parties to raise issues regarding product coverage, *i.e.,* scope.[4] Certain interested parties commented on the scope of the concurrent CTL plate investigations as it appeared in the *Initiation Notice.* For a summary of the product coverage comments and rebuttal responses submitted to the records of this and the concurrent CTL plate investigations, and a discussion and analysis of all comments timely received, *see* the Department's Preliminary Scope Decision Memorandum and the Department's Additional Preliminary Scope Decision Memorandum.[5] The Department has preliminarily modified the scope language as it appeared in the *Initiation Notice* to clarify the exclusion for stainless steel plate, corrected two tariff numbers that were misidentified in the Petitions and in the *Initiation Notice,* and modified language pertaining to existing steel plate and hot-rolled flat-rolled steel orders.[6]

Methodology

The Department is conducting this investigation in accordance with section 731 of the Act. Export price and, where appropriate, constructed export price are calculated in accordance with section 772 of the Tariff Act of 1930, as amended (the Act). Normal value (NV) is calculated in accordance with section 773 of the Act. For a full description of the methodology underlying our preliminary conclusions, *see* the Preliminary Decision Memorandum.

Preliminary Affirmative Determination of Critical Circumstances, in Part

On October 7, 2016, the petitioners timely filed an amendment to the petition, pursuant to section 733(e)(1) of the Act and 19 CFR 351.206(c)(2)(i), alleging that critical circumstances exist with respect to imports of subject merchandise.[7] We preliminarily determine that critical circumstances do not exist for all non-individually examined companies, but do exist for NLMK Verona SpA (NVR) and Officine Tecnosider s.r.l. (OTS). Further, pursuant to sections 776(a)(1) and 776(a)(2)(A)–(D) and section 776(b) of the Act, we preliminarily find as adverse facts available (AFA) that critical circumstances do exist for Marcegaglia SpA (Marcegaglia), a non-participating mandatory respondent. For a full description of the methodology and results of our analysis, *see* the Preliminary Decision Memorandum.

Adverse Facts Available

Because mandatory respondent Marcegaglia failed to respond to the Department's questionnaire, we preliminarily determine to apply AFA to this respondent, in accordance with sections 776(a) and (b) of the Act and 19 CFR 351.308. For further discussion, *see* the Preliminary Decision Memorandum.

All-Others Rate

Consistent with sections 733(d)(1)(A)(ii) and 735(c)(5) of the Act, the Department also calculated an estimated all-others rate. Section 735(c)(5)(A) of the Act provides that the estimated all-others rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero and *de minimis* margins, and any margins determined entirely under section 776 of the Act.

In this investigation, we based our calculation of the all-others rate on the weighted-average of the margins calculated for NVR and OTS using publicly-ranged data. Because we cannot apply our normal methodology of calculating a weighted-average margin due to requests to protect business-proprietary information, we find this rate to be the best proxy of the actual weighted-average margin determined for these respondents.[8] For further discussion of this calculation, *see* the memorandum entitled ''Certain Carbon and Alloy Steel Cut-to-Length Plate from Italy: Calculation of the Preliminary Margin for All Other Companies,'' dated concurrently with this notice.

Preliminary Determination

The Department preliminarily determines that CTL plate from Italy is being, or is likely to be, sold in the

United States at LTFV, pursuant to section 733 of the Act, and that the following estimated weighted-average dumping margins exist:

Exporter/manufacturer	Weighted-average dumping margin (percent)
NLMK Verona SpA	12.53
Officine Tecnosider s.r.l ..	6.10
Marcegaglia SpA	130.63
All Others	8.34

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, we will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of all entries of subject merchandise from Italy, as described in Appendix I of this notice, which are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**, except for Marcegaglia, NVR, and OTS, as described below.

Section 733(e)(2) of the Act provides that, given an affirmative determination of critical circumstances, any suspension of liquidation shall apply to unliquidated entries of merchandise entered, or withdrawn from warehouse, for consumption on or after the later of (a) the date which is 90 days before the date on which the suspension of liquidation was first ordered, or (b) the date on which notice of initiation of the investigation was published.

Because we have preliminarily found that critical circumstances exist with regard to imports produced and exported by the mandatory respondents Marcegaglia, NVR, and OTS, we will instruct CBP to suspend liquidation of all entries of CTL plate from Italy, as described in the scope of the investigation, from Marcegaglia, NVR, and OTS, that are entered, or withdrawn from warehouse, for consumption on or after the date that is 90 days prior to the date on which suspension of liquidation is first ordered, *e.g.,* the date of publication of this notice.

Pursuant to section 733(d) of the Act and 19 CFR 351.205(d), we will instruct CBP to require cash deposits [9] equal to the weighted-average amount by which the NV exceeds U.S. price, as indicated in the chart above, as follows: (1) The rate for the mandatory respondents listed above will be the respondent-specific rates we determined in this preliminary determination; (2) if the exporter is not a mandatory respondent identified above, but the producer is, the rate will be the specific rate established for the producer of the subject merchandise; and (3) the rate for all other producers or exporters will be the all-others rate. These suspension of liquidation instructions will remain in effect until further notice.

Disclosure

We intend to disclose the calculations performed to interested parties in this proceeding within five days of the public announcement of this preliminary determination in accordance with 19 CFR 351.224(b).

Verification

As provided in section 782(i) of the Act, we intend to verify information relied upon in making our final determination.

Public Comment

Interested parties are invited to comment on this preliminary determination. Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the final verification report is issued in this proceeding, and rebuttal briefs, limited to issues raised in case briefs, may be submitted no later than five days after the deadline date for case briefs.[10] Pursuant to 19 CFR 351.309(c)(2) and (d)(2), parties who submit case briefs or rebuttal briefs in this proceeding are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.

The Department established separate deadlines for interested parties to provide comments on scope issues.[11] Specifically, case briefs on scope issues were to be submitted no later than October 21, 2016. Scope rebuttal briefs, limited to issues raised in the scope case briefs, were to be submitted no later than November 1, 2016.[12] The Department explained that parties should limit comments on scope issues to their scope case brief and their scope rebuttal brief.[13] Thus, comments on scope issues belong in parties' scope case briefs and scope rebuttal briefs only and not in other case briefs and rebuttal briefs submitted in this investigation. The Department intends to address parties' scope comments in a final scope memorandum.

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, and a list of the issues to be discussed. If a request for a hearing is made, the Department intends to hold the hearing at the U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230, at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

All documents must be filed electronically using ACCESS. An electronically-filed request must be received successfully in its entirety by ACCESS by 5:00 p.m. Eastern Standard Time.

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. 19 CFR 351.210(e)(2) requires that requests by respondents for postponement of a final determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.

OTS requested that, in the event of an affirmative preliminary determination in this investigation, the Department postpone its final determination by 135 days after publication of the preliminary determination, and agreed to extend the application of the provisional measures prescribed under section 733(d) of the Act and 19 CFR 351.210(e)(2), from a four-month period to a period not to

[9] *See Modification of Regulations Regarding the Practice of Accepting Bonds During the Provisional Measures Period in Antidumping and Countervailing Duty Investigations,* 76 FR 61042 (October 3, 2011).

[10] *See* 19 CFR 351.309; *see also* 19 CFR 351.303 (for general filing requirements).

[11] *See* Preliminary Scope Decision Memorandum; Additional Preliminary Scope Decision Memorandum; and Memorandum to the File, entitled, ''Deadlines for Submitting Scope Case Briefs and Scope Rebuttal Briefs,'' dated October 18, 2016 (Deadline Memo for Scope Briefs); and Memorandum to the File, entitled, ''Extension of Deadline for Submitting Scope Rebuttal Briefs,'' dated October 28, 2016 (''Extension Memo for Scope Rebuttal Briefs'').

[12] *See* Deadline Memo for Scope Briefs and Extension Memo for Scope Rebuttal Briefs.

[13] *See e.g.* Deadline Memo for Scope Briefs.

exceed six months.[14] NVR also requested that the Department extend the deadline for the final determination and extend provisional measures.[15]

In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because (1) our preliminary determination is affirmative; (2) the requesting exporters account for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, we are postponing the final determination until no later than 135 days after the publication of this notice in the **Federal Register** and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, we will issue our final determination no later than 135 days after the date of publication of this preliminary determination, pursuant to section 735(a)(2) of the Act.[16]

International Trade Commission (ITC) Notification

In accordance with section 733(f) of the Act, we are notifying the ITC of our affirmative preliminary determination of sales at LTFV. If our final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after our final determination whether these imports are materially injuring, or threaten material injury to, the U.S. industry.

This determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act and 19 CFR 351.205(c).

Dated: November 4, 2016.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

Appendix I—Scope of the Investigation

The products covered by this investigation are certain carbon and alloy steel hot-rolled or forged flat plate products not in coils, whether or not painted, varnished, or coated with plastics or other non-metallic substances (cut-to-length plate). Subject merchandise includes plate that is produced by being cut-to-length from coils or from other discrete length plate and plate that is rolled or forged into a discrete length. The products covered include (1) Universal mill plates (*i.e.,* flat-rolled products rolled on four faces or in a closed box pass, of a width exceeding 150 mm but not exceeding 1250 mm, and of a thickness of not less than 4 mm, which are not in coils and without patterns in relief), and (2) hot-rolled or forged flat steel products of a thickness of 4.75 mm or more and of a width which exceeds 150 mm and measures at least twice the thickness, and which are not in coils, whether or not with patterns in relief. The covered products described above may be rectangular, square, circular or other shapes and include products of either rectangular or non-rectangular cross-section where such non-rectangular cross-section is achieved subsequent to the rolling process, *i.e.,* products which have been ''worked after rolling'' (*e.g.,* products which have been beveled or rounded at the edges).

For purposes of the width and thickness requirements referenced above, the following rules apply:

(1) Except where otherwise stated where the nominal and actual thickness or width measurements vary, a product from a given subject country is within the scope if application of either the nominal or actual measurement would place it within the scope based on the definitions set forth above; and

(2) where the width and thickness vary for a specific product (*e.g.,* the thickness of certain products with non-rectangular cross-section, the width of certain products with non-rectangular shape, *etc.*), the measurement at its greatest width or thickness applies.

Steel products included in the scope of this investigation are products in which: (1) Iron predominates, by weight, over each of the other contained elements; and (2) the carbon content is 2 percent or less by weight.

Subject merchandise includes cut-to-length plate that has been further processed in the subject country or a third country, including but not limited to pickling, oiling, levelling, annealing, tempering, temper rolling, skin passing, painting, varnishing, trimming, cutting, punching, beveling, and/or slitting, or any other processing that would not otherwise remove the merchandise from the scope of the investigation if performed in the country of manufacture of the cut-to-length plate.

All products that meet the written physical description, are within the scope of this investigation unless specifically excluded or covered by the scope of an existing order. The following products are outside of, and/or specifically excluded from, the scope of this investigation:

(1) Products clad, plated, or coated with metal, whether or not painted, varnished or coated with plastic or other non-metallic substances;

(2) military grade armor plate certified to one of the following specifications or to a specification that references and incorporates one of the following specifications:

- MIL–A–12560,
- MIL–DTL–12560H,
- MIL–DTL–12560J,
- MIL–DTL–12560K,
- MIL–DTL–32332,
- MIL–A–46100D,
- MIL–DTL–46100–E,
- MIL–46177C,
- MIL–S–16216K Grade HY80,
- MIL–S–16216K Grade HY100,
- MIL–S–24645A HSLA–80;
- MIL–S–24645A HSLA–100,
- T9074–BD–GIB–010/0300 Grade HY80,
- T9074–BD–GIB–010/0300 Grade HY100,
- T9074–BD–GIB–010/0300 Grade HSLA80,
- T9074–BD–GIB–010/0300 Grade HSLA100, and
- T9074–BD–GIB–010/0300 Mod. Grade HSLA115,

except that any cut-to-length plate certified to one of the above specifications, or to a military grade armor specification that references and incorporates one of the above specifications, will not be excluded from the scope if it is also dual- or multiple-certified to any other non-armor specification that otherwise would fall within the scope of this order;

(3) stainless steel plate, containing 10.5 percent or more of chromium by weight and not more than 1.2 percent of carbon by weight;

(4) CTL plate meeting the requirements of ASTM A–829, Grade E 4340 that are over 305 mm in actual thickness;

(5) Alloy forged and rolled CTL plate greater than or equal to 152.4 mm in actual thickness meeting each of the following requirements:

(a) Electric furnace melted, ladle refined & vacuum degassed and having a chemical composition (expressed in weight percentages):

- Carbon 0.23–0.28,
- Silicon 0.05–0.20,
- Manganese 1.20–1.60,
- Nickel not greater than 1.0,
- Sulfur not greater than 0.007,
- Phosphorus not greater than 0.020,
- Chromium 1.0–2.5,
- Molybdenum 0.35–0.80,
- Boron 0.002–0.004,
- Oxygen not greater than 20 ppm,
- Hydrogen not greater than 2 ppm, and
- Nitrogen not greater than 60 ppm;

(b) With a Brinell hardness measured in all parts of the product including mid thickness falling within one of the following ranges:

(i) 270–300 HBW,

(ii) 290–320 HBW, or

(iii) 320–350HBW;

(c) Having cleanliness in accordance with ASTM E45 method A (Thin and Heavy): A not exceeding 1.5, B not exceeding 1.0, C not exceeding 0.5, D not exceeding 1.5; and

(d) Conforming to ASTM A578–S9 ultrasonic testing requirements with acceptance criteria 2 mm flat bottom hole;

(6) Alloy forged and rolled steel CTL plate over 407 mm in actual thickness and meeting the following requirements:

(a) Made from Electric Arc Furnace melted, Ladle refined & vacuum degassed, alloy steel with the following chemical composition (expressed in weight percentages):

- Carbon 0.23–0.28,
- Silicon 0.05–0.15,
- Manganese 1.20–1.50,
- Nickel not greater than 0.4,
- Sulfur not greater than 0.010,
- Phosphorus not greater than 0.020,
- Chromium 1.20–1.50,
- Molybdenum 0.35–0.55,
- Boron 0.002–0.004,
- Oxygen not greater than 20 ppm,

[14] *See* letter from OTS, entitled, ''Certain Carbon Alloy Steel Cut-to-Length Plate From Italy: Request for Postponement of the Final Determination,'' dated October 28, 2016.

[15] *See* letter from NVR, entitled, ''NLMK Verona's Request to Postpone Final Determination,'' dated October 6, 2016.

[16] *See* 19 CFR 351.210(b)(2) and (e).

• Hydrogen not greater than 2 ppm, and
• Nitrogen not greater than 60 ppm;

(b) Having cleanliness in accordance with ASTM E45 method A (Thin and Heavy): A not exceeding 1.5, B not exceeding 1.5, C not exceeding 1.0, D not exceeding 1.5;

(c) Having the following mechanical properties:

(i) With a Brinell hardness not more than 237 HBW measured in all parts of the product including mid thickness; and having a Yield Strength of 75ksi min and UTS 95ksi or more, Elongation of 18% or more and Reduction of area 35% or more; having charpy V at −75 degrees F in the longitudinal direction equal or greater than 15 ft. lbs (single value) and equal or greater than 20 ft. lbs (average of 3 specimens) and conforming to the requirements of NACE MR01–75; or

(ii) With a Brinell hardness not less than 240 HBW measured in all parts of the product including mid thickness; and having a Yield Strength of 90 ksi min and UTS 110 ksi or more, Elongation of 15% or more and Reduction of area 30% or more; having charpy V at −40 degrees F in the longitudinal direction equal or greater than 21 ft. lbs (single value) and equal or greater than 31 ft. lbs (average of 3 specimens);

(d) Conforming to ASTM A578–S9 ultrasonic testing requirements with acceptance criteria 3.2 mm flat bottom hole; and

(e) Conforming to magnetic particle inspection in accordance with AMS 2301;

(7) Alloy forged and rolled steel CTL plate over 407 mm in actual thickness and meeting the following requirements:

(a) Made from Electric Arc Furnace melted, ladle refined & vacuum degassed, alloy steel with the following chemical composition (expressed in weight percentages):

• Carbon 0.25–0.30,
• Silicon not greater than 0.25,
• Manganese not greater than 0.50,
• Nickel 3.0–3.5,
• Sulfur not greater than 0.010,
• Phosphorus not greater than 0.020,
• Chromium 1.0–1.5,
• Molybdenum 0.6–0.9,
• Vanadium 0.08 to 0.12
• Boron 0.002–0.004,
• Oxygen not greater than 20 ppm,
• Hydrogen not greater than 2 ppm, and
• Nitrogen not greater than 60 ppm.

(b) Having cleanliness in accordance with ASTM E45 method A (Thin and Heavy): A not exceeding 1.0(t) and 0.5(h), B not exceeding 1.5(t) and 1.0(h), C not exceeding 1.0(t) and 0.5(h), and D not exceeding 1.5(t) and 1.0(h);

(c) Having the following mechanical properties: A Brinell hardness not less than 350 HBW measured in all parts of the product including mid thickness; and having a Yield Strength of 145ksi or more and UTS 160ksi or more, Elongation of 15% or more and Reduction of area 35% or more; having charpy V at −40 degrees F in the transverse direction equal or greater than 20 ft. lbs (single value) and equal or greater than 25 ft. lbs (average of 3 specimens);

(d) Conforming to ASTM A578–S9 ultrasonic testing requirements with acceptance criteria 3.2 mm flat bottom hole; and

(e) Conforming to magnetic particle inspection in accordance with AMS 2301.

The products subject to the investigation are currently classified in the Harmonized Tariff Schedule of the United States (HTSUS) under item numbers: 7208.40.3030, 7208.40.3060, 7208.51.0030, 7208.51.0045, 7208.51.0060, 7208.52.0000, 7211.13.0000, 7211.14.0030, 7211.14.0045, 7225.40.1110, 7225.40.1180, 7225.40.3005, 7225.40.3050, 7226.20.0000, and 7226.91.5000.

The products subject to the investigation may also enter under the following HTSUS item numbers: 7208.40.6060, 7208.53.0000, 7208.90.0000, 7210.70.3000, 7210.90.9000, 7211.19.1500, 7211.19.2000, 7211.19.4500, 7211.19.6000, 7211.19.7590, 7211.90.0000, 7212.40.1000, 7212.40.5000, 7212.50.0000, 7214.10.0000, 7214.30.0010, 7214.30.0080, 7214.91.0015, 7214.91.0060, 7214.91.0090, 7225.11.0000, 7225.19.0000, 7225.40.5110, 7225.40.5130, 7225.40.5160, 7225.40.7000, 7225.99.0010, 7225.99.0090, 7226.11.1000, 7226.11.9060, 7226.19.1000, 7226.19.9000, 7226.91.0500, 7226.91.1530, 7226.91.1560, 7226.91.2530, 7226.91.2560, 7226.91.7000, 7226.91.8000, and 7226.99.0180.

The HTSUS subheadings above are provided for convenience and customs purposes only. The written description of the scope of the investigation is dispositive.

Appendix II—List of Topics Discussed in the Preliminary Decision Memorandum

DEPARTMENT OF COMMERCE

International Trade Administration

[A–588–875]

Certain Carbon and Alloy Steel Cut-To-Length Plate From Japan: Preliminary Determination of Sales at Less Than Fair Value and Postponement of Final Determination

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (''Department'') preliminarily determines that certain carbon and alloy steel cut-to-length plate (''CTL plate'') from Japan is being, or is likely to be, sold in the United States at less than fair value (''LTFV''). The period of investigation (''POI'') is April 1, 2015, through March 31, 2016. The estimated weighted-average dumping margins of sales at LTFV are shown in the ''Preliminary Determination'' section of this notice. Interested parties are invited to comment on this preliminary determination.

DATES: Effective November 14, 2016.

FOR FURTHER INFORMATION CONTACT: Kabir Archuletta, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–2593.

SUPPLEMENTARY INFORMATION:

Background

The Department initiated this investigation on April 28, 2016.[1] For a complete description of the events that followed the initiation of this investigation, *see* the memorandum that is dated concurrently with this determination and hereby adopted by this notice.[2] A list of topics in the Preliminary Decision Memorandum is included as Appendix II to this notice.

The Preliminary Decision Memorandum is a public document and is made available to the public via

[1] *See Certain Carbon and Alloy Steel Cut-To-Length Plate From Austria, Belgium, Brazil, France, the Federal Republic of Germany, Italy, Japan, the Republic of Korea, the People's Republic of China, South Africa, Taiwan, and the Republic of Turkey: Initiation of Less-Than-Fair Value Investigations*, 81 FR 27089 (May 5, 2016) (''*Initiation Notice*'').

[2] *See* Memorandum from Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, to Paul Piquado, Assistant Secretary for Enforcement and Compliance, ''Decision Memorandum for the Preliminary Determination in the Antidumping Duty Investigation of Certain Carbon and Alloy Steel Cut-To-Length Plate From Japan'' (''Preliminary Decision Memorandum'') dated concurrently with this notice.

Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (''ACCESS''). ACCESS is available to registered users at *https://access.trade.gov*, and is available to all parties in the Department's Central Records Unit, room B8024 of the main Department of Commerce building. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly on the internet at *http://enforcement.trade.gov/frn/.* The signed Preliminary Decision Memorandum and the electronic version of the Preliminary Decision Memorandum are identical in content.

Scope of the Investigation

The product covered by this investigation is CTL plate from Japan. For a full description of the scope of this investigation, *see* the ''Scope of the Investigation,'' in Appendix I of this notice.

Scope Comments

In accordance with the *Preamble* to the Department's regulations,[3] the *Initiation Notice* set aside a period of time for parties to raise issues regarding product coverage, *i.e.*, scope.[4] Certain interested parties commented on the scope of the concurrent CTL plate investigations as it appeared in the *Initiation Notice.* For a summary of the product coverage comments and rebuttal responses submitted to the records of this and the concurrent CTL plate investigations, and a discussion and analysis of all comments timely received, *see* the Department's Preliminary Scope Decision Memorandum and the Department's Additional Preliminary Scope Decision Memorandum.[5] The Department has preliminarily modified the scope language as it appeared in the *Initiation Notice* to clarify the exclusion for stainless steel plate, corrected two tariff numbers that were misidentified in the Petitions and in the *Initiation Notice*, and modified language pertaining to existing steel plate and hot-rolled flat-rolled steel orders.[6]

Methodology

The Department is conducting this investigation in accordance with section 731 of the Tariff Act of 1930, as amended (''the Act''). There is one mandatory respondent participating in this investigation. Export price is calculated in accordance with section 772 of the Act. Normal value (''NV'') is calculated in accordance with section 773 of the Act. For a full description of the methodology underlying our preliminary conclusions, *see* the Preliminary Decision Memorandum.

Adverse Facts Available

Because mandatory respondent JFE Steel Corporation (''JFE'')[7] and Shimabun Corporation (''Shimabun'')[8] failed to respond to the Department's questionnaire, we preliminarily determine to apply adverse facts available (''AFA'') to these respondents, in accordance with sections 776(a) and (b) of the Act and 19 CFR 351.308. For further discussion, *see* the Preliminary Decision Memorandum.

All-Others Rate

Consistent with sections 733(d)(1)(A)(ii) and 735(c)(5) of the Act, the Department also calculated an estimated all-others rate. Section 735(c)(5)(A) of the Act provides that the estimated all-others rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero and *de minimis* margins, and any margins determined entirely under section 776 of the Act.

Tokyo Steel Manufacturing Co., Ltd (''Tokyo Steel'') is the only respondent for which the Department calculated a company-specific margin. Therefore, for purposes of determining the ''all others'' rate and pursuant to section 735(c)(5)(A) of the Act, we are using the dumping margin calculated for Tokyo Steel, as referenced in the ''Preliminary Determination'' section below.

Preliminary Determination

The Department preliminarily determines that CTL plate from Japan is being, or is likely to be, sold in the United States at LTFV, pursuant to section 733 of the Act, and that the following estimated weighted-average dumping margins exist:

Exporter/manufacturer	Weighted-average dumping margin (percent)
Tokyo Steel Manufacturing Co., Ltd	14.96
JFE Steel Corporation	48.64
Shimabun Corporation	48.64
All Others	14.96

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, we will direct U.S. Customs and Border Protection (''CBP'') to suspend liquidation of all entries of subject merchandise from Japan, as described in Appendix I of this notice, which are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**.

Pursuant to section 733(d) of the Act and 19 CFR 351.205(d), we will instruct CBP to require cash deposits[9] equal to the weighted-average amount by which the NV exceeds U.S. price, as indicated in the chart above, as follows: (1) The rate for the mandatory respondents listed above will be the respondent-specific rates we determined in this preliminary determination; (2) if the exporter is not a mandatory respondent identified above, but the producer is, the rate will be the specific rate established for the producer of the subject merchandise; and (3) the rate for all other producers or exporters will be the all-others rate. These suspension of liquidation instructions will remain in effect until further notice.

Disclosure

We intend to disclose the calculations performed to interested parties in this proceeding within five days of the public announcement of this preliminary determination in accordance with 19 CFR 351.224(b).

Verification

As provided in section 782(i) of the Act, we intend to verify information

[3] *See Antidumping Duties; Countervailing Duties; Final rule*, 62 FR 27296, 27323 (May 19, 1997) (*Preamble*).

relied upon in making our final determination.

Public Comment

Interested parties are invited to comment on this preliminary determination. Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the final verification report is issued in this proceeding, and rebuttal briefs, limited to issues raised in case briefs, may be submitted no later than five days after the deadline date for case briefs.[10] Pursuant to 19 CFR 351.309(c)(2) and (d)(2), parties who submit case briefs or rebuttal briefs in this proceeding are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.

The Department established separate deadlines for interested parties to provide comments on scope issues.[11] Specifically, case briefs on scope issues were to be submitted no later than October 21, 2016. Scope rebuttal briefs, limited to issues raised in the scope case briefs, were to be submitted no later than November 1, 2016.[12] The Department explained that parties should limit comments on scope issues to their scope case brief and their scope rebuttal brief. [13] Thus, comments on scope issues belong in parties' scope case briefs and scope rebuttal briefs only and not in other case briefs and rebuttal briefs submitted in this investigation. The Department intends to address parties' scope comments in a final scope memorandum.

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, and a list of the issues to be discussed. If a request for a hearing is made, the Department intends to hold the hearing at the U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230, at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

All documents must be filed electronically using ACCESS. An electronically-filed request must be received successfully in its entirety by ACCESS by 5:00 p.m. Eastern Standard Time.

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. 19 CFR 351.210(e)(2) requires that requests by respondents for postponement of a final determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.

Respondent Tokyo Steel requested that, in the event of an affirmative preliminary determination in this investigation, the Department postpone its final determination, *i.e.,* to 135 days after publication of the preliminary determination, and agreed to extend the application of the provisional measures prescribed under section 733(d) of the Act and 19 CFR 351.210(e)(2), from a four-month period to a period not to exceed six months.

In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because (1) our preliminary determination is affirmative; (2) the requesting exporters account for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, we are postponing the final determination until no later than 135 days after the publication of this notice in the **Federal Register** and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, we will issue our final determination no later than 135 days after the date of publication of this preliminary determination, pursuant to section 735(a)(2) of the Act.[14]

International Trade Commission (''ITC'') Notification

In accordance with section 733(f) of the Act, we are notifying the ITC of our affirmative preliminary determination of sales at LTFV. If our final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after our final determination whether these imports are materially injuring, or threaten material injury to, the U.S. industry.

This determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act and 19 CFR 351.205(c).

Dated: November 4, 2016.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

Appendix I—Scope of the Investigation

The products covered by this investigation are certain carbon and alloy steel hot-rolled or forged flat plate products not in coils, whether or not painted, varnished, or coated with plastics or other non-metallic substances (cut-to-length plate). Subject merchandise includes plate that is produced by being cut-to-length from coils or from other discrete length plate and plate that is rolled or forged into a discrete length. The products covered include (1) Universal mill plates (*i.e.,* flat-rolled products rolled on four faces or in a closed box pass, of a width exceeding 150 mm but not exceeding 1250 mm, and of a thickness of not less than 4 mm, which are not in coils and without patterns in relief), and (2) hot-rolled or forged flat steel products of a thickness of 4.75 mm or more and of a width which exceeds 150 mm and measures at least twice the thickness, and which are not in coils, whether or not with patterns in relief. The covered products described above may be rectangular, square, circular or other shapes and include products of either rectangular or non-rectangular cross-section where such non-rectangular cross-section is achieved subsequent to the rolling process, *i.e.,* products which have been ''worked after rolling'' (*e.g.,* products which have been beveled or rounded at the edges).

For purposes of the width and thickness requirements referenced above, the following rules apply:

(1) Except where otherwise stated where the nominal and actual thickness or width measurements vary, a product from a given subject country is within the scope if application of either the nominal or actual measurement would place it within the scope based on the definitions set forth above unless the product is already covered by an order existing on that specific country (*i.e., Certain Hot-Rolled Steel Flat Products From Australia, Brazil, Japan, the Republic of*

[10] *See* 19 CFR 351.309; *see also* 19 CFR 351.303 (for general filing requirements).

[11] *See* Preliminary Scope Decision Memorandum; Additional Preliminary Scope Decision Memorandum; and Memorandum to the File ''Deadlines for Submitting Scope Case Briefs and Scope Rebuttal Briefs'' (October 18, 2016) (''Deadline Memo for Scope Briefs''); and Memorandum to the File ''Extension of Deadline for Submitting Scope Rebuttal Briefs'' (October 28, 2016) (''Extension Memo for Scope Rebuttal Briefs'').

[12] *See* Deadline Memo for Scope Briefs and Extension Memo for Scope Rebuttal Briefs.

Korea, the Netherlands, the Republic of Turkey, and the United Kingdom: Amended Final Affirmative Antidumping Determinations for Australia, the Republic of Korea, and the Republic of Turkey and Antidumping Duty Orders, 81 FR 67962 (October 3, 2016).); and

(2) where the width and thickness vary for a specific product (*e.g.,* the thickness of certain products with non-rectangular cross-section, the width of certain products with non-rectangular shape, *etc.*), the measurement at its greatest width or thickness applies.

Steel products included in the scope of this investigation are products in which: (1) Iron predominates, by weight, over each of the other contained elements; and (2) the carbon content is 2 percent or less by weight.

Subject merchandise includes cut-to-length plate that has been further processed in the subject country or a third country, including but not limited to pickling, oiling, levelling, annealing, tempering, temper rolling, skin passing, painting, varnishing, trimming, cutting, punching, beveling, and/or slitting, or any other processing that would not otherwise remove the merchandise from the scope of the investigation if performed in the country of manufacture of the cut-to-length plate.

All products that meet the written physical description, are within the scope of this investigation unless specifically excluded or covered by the scope of an existing order. The following products are outside of, and/or specifically excluded from, the scope of this investigation:

(1) Products clad, plated, or coated with metal, whether or not painted, varnished or coated with plastic or other non-metallic substances;

(2) military grade armor plate certified to one of the following specifications or to a specification that references and incorporates one of the following specifications:

- MIL–A–12560,
- MIL–DTL–12560H,
- MIL–DTL–12560J,
- MIL–DTL–12560K,

- MIL–S–16216K Grade HY100,
- MIL–S–24645A HSLA–80;
- MIL–S–24645A HSLA–100,
- T9074–BD–GIB–010/0300 Grade HY80,
- T9074–BD–GIB–010/0300 Grade HY100,
- T9074–BD–GIB–010/0300 Grade HSLA80,
- T9074–BD–GIB–010/0300 Grade HSLA100, and
- T9074–BD–GIB–010/0300 Mod. Grade HSLA115,

except that any cut-to-length plate certified to one of the above specifications, or to a military grade armor specification that references and incorporates one of the above specifications, will not be excluded from the scope if it is also dual- or multiple-certified to any other non-armor specification that otherwise would fall within the scope of this order;

(3) stainless steel plate, containing 10.5 percent or more of chromium by weight and not more than 1.2 percent of carbon by weight;

(4) CTL plate meeting the requirements of ASTM A–829, Grade E 4340 that are over 305 mm in actual thickness;

(5) Alloy forged and rolled CTL plate greater than or equal to 152.4 mm in actual thickness meeting each of the following requirements:

(a) Electric furnace melted, ladle refined & vacuum degassed and having a chemical composition (expressed in weight percentages):

- Carbon 0.23–0.28,
- Silicon 0.05–0.20,
- Manganese 1.20–1.60,
- Nickel not greater than 1.0,
- Sulfur not greater than 0.007,
- Phosphorus not greater than 0.020,
- Chromium 1.0–2.5,
- Molybdenum 0.35–0.80,
- Boron 0.002–0.004,
- Oxygen not greater than 20 ppm,
- Hydrogen not greater than 2 ppm, and
- Nitrogen not greater than 60 ppm;

(b) With a Brinell hardness measured in all parts of the product including mid thickness falling within one of the following ranges:

(i) 270–300 HBW,

(ii) 290–320 HBW, or

(iii) 320–350HBW;

(c) Having cleanliness in accordance with ASTM E45 method A (Thin and Heavy): A not exceeding 1.5, B not exceeding 1.0, C not exceeding 0.5, D not exceeding 1.5; and

(d) Conforming to ASTM A578–S9 ultrasonic testing requirements with acceptance criteria 2 mm flat bottom hole;

(6) Alloy forged and rolled steel CTL plate over 407 mm in actual thickness and meeting the following requirements:

(a) Made from Electric Arc Furnace melted, Ladle refined & vacuum degassed, alloy steel with the following chemical composition (expressed in weight percentages):

- Carbon 0.23–0.28,
- Silicon 0.05–0.15,
- Manganese 1.20–1.50,
- Nickel not greater than 0.4,
- Sulfur not greater than 0.010,
- Phosphorus not greater than 0.020,
- Chromium 1.20–1.50,
- Molybdenum 0.35–0.55,
- Boron 0.002–0.004,
- Oxygen not greater than 20 ppm,
- Hydrogen not greater than 2 ppm, and
- Nitrogen not greater than 60 ppm;

(b) Having cleanliness in accordance with ASTM E45 method A (Thin and Heavy): A not exceeding 1.5, B not exceeding 1.5, C not exceeding 1.0, D not exceeding 1.5;

(c) Having the following mechanical properties:

(i) With a Brinell hardness not more than 237 HBW measured in all parts of the product including mid thickness; and having a Yield Strength of 75ksi min and UTS 95ksi or more, Elongation of 18% or more and Reduction of area 35% or more; having charpy V at −75 degrees F in the longitudinal direction equal or greater than 15 ft. lbs (single value) and equal or greater than 20 ft. lbs (average of 3 specimens) and conforming to the requirements of NACE MR01–75; or

(ii) With a Brinell hardness not less than 240 HBW measured in all parts of the product including mid thickness; and having a Yield Strength of 90 ksi min and UTS 110 ksi or more, Elongation of 15% or more and Reduction of area 30% or more; having charpy V at −40 degrees F in the longitudinal direction equal or greater than 21 ft. lbs (single value) and equal or greater than 31 ft. lbs (average of 3 specimens);

(d) Conforming to ASTM A578–S9 ultrasonic testing requirements with acceptance criteria 3.2 mm flat bottom hole; and

(e) Conforming to magnetic particle inspection in accordance with AMS 2301;

(7) Alloy forged and rolled steel CTL plate over 407 mm in actual thickness and meeting the following requirements:

(a) Made from Electric Arc Furnace melted, ladle refined & vacuum degassed, alloy steel with the following chemical composition (expressed in weight percentages):

- Carbon 0.25–0.30,
- Silicon not greater than 0.25,
- Manganese not greater than 0.50,
- Nickel 3.0–3.5,
- Sulfur not greater than 0.010,
- Phosphorus not greater than 0.020,
- Chromium 1.0–1.5,
- Molybdenum 0.6–0.9,
- Vanadium 0.08 to 0.12
- Boron 0.002–0.004,
- Oxygen not greater than 20 ppm,
- Hydrogen not greater than 2 ppm, and
- Nitrogen not greater than 60 ppm.

(b) Having cleanliness in accordance with ASTM E45 method A (Thin and Heavy): A not exceeding 1.0(t) and 0.5(h), B not exceeding 1.5(t) and 1.0(h), C not exceeding 1.0(t) and 0.5(h), and D not exceeding 1.5(t) and 1.0(h);

(c) Having the following mechanical properties: A Brinell hardness not less than 350 HBW measured in all parts of the product including mid thickness; and having a Yield Strength of 145ksi or more and UTS 160ksi or more, Elongation of 15% or more and Reduction of area 35% or more; having charpy V at −40 degrees F in the transverse direction equal or greater than 20 ft. lbs (single value) and equal or greater than 25 ft. lbs (average of 3 specimens);

(d) Conforming to ASTM A578–S9 ultrasonic testing requirements with acceptance criteria 3.2 mm flat bottom hole; and

(e) Conforming to magnetic particle inspection in accordance with AMS 2301.

The products subject to the investigation are currently classified in the Harmonized Tariff Schedule of the United States (HTSUS) under item numbers: 7208.40.3030, 7208.40.3060, 7208.51.0030, 7208.51.0045, 7208.51.0060, 7208.52.0000, 7211.13.0000, 7211.14.0030, 7211.14.0045, 7225.40.1110, 7225.40.1180, 7225.40.3005, 7225.40.3050, 7226.20.0000, and 7226.91.5000.

The products subject to the investigation may also enter under the following HTSUS item numbers: 7208.40.6060, 7208.53.0000, 7208.90.0000, 7210.70.3000, 7210.90.9000, 7211.19.1500, 7211.19.2000, 7211.19.4500, 7211.19.6000, 7211.19.7590, 7211.90.0000, 7212.40.1000, 7212.40.5000, 7212.50.0000, 7214.10.0000, 7214.30.0010, 7214.30.0080, 7214.91.0015, 7214.91.0060, 7214.91.0090, 7225.11.0000, 7225.19.0000, 7225.40.5110,

7225.40.5130, 7225.40.5160, 7225.40.7000, 7225.99.0010, 7225.99.0090, 7226.11.1000, 7226.11.9060, 7226.19.1000, 7226.19.9000, 7226.91.0500, 7226.91.1530, 7226.91.1560, 7226.91.2530, 7226.91.2560, 7226.91.7000, 7226.91.8000, and 7226.99.0180.

The HTSUS subheadings above are provided for convenience and customs purposes only. The written description of the scope of the investigation is dispositive.

Appendix II—List of Topics

Discussed in the Preliminary Decision Memorandum

DEPARTMENT OF COMMERCE

International Trade Administration

[A–423–812]

Certain Carbon and Alloy Steel Cut-To-Length Plate From Belgium: Preliminary Determination of Sales at Less Than Fair Value and Postponement of Final Determination

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the Department) preliminarily determines that certain carbon and alloy steel cut-to-length plate (CTL plate) from Belgium is being, or is likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is April 1, 2015, through March 31, 2016. The estimated weighted-average dumping margins of sales at LTFV are shown in the ''Preliminary Determination'' section of this notice. Interested parties are invited to comment on this preliminary determination.

DATES: Effective November 14, 2016.

FOR FURTHER INFORMATION CONTACT: Andrew Medley or David Crespo, AD/CVD Operations, Office II, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–4987 or (202) 482–3693, respectively.

SUPPLEMENTARY INFORMATION:

Background

The Department initiated this investigation on April 28, 2016.[1] For a complete description of the events that followed the initiation of this investigation, *see* the memorandum that is dated concurrently with this determination and hereby adopted by this notice.[2] A list of topics in the Preliminary Decision Memorandum is included as Appendix II to this notice.

The Preliminary Decision Memorandum is a public document and is made available to the public via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov,* and is available to all parties in the Department's Central Records Unit, Room B8024 of the main Department of Commerce building. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly on the internet at *http://enforcement.trade.gov/frn/.* The signed Preliminary Decision Memorandum and the electronic version of the Preliminary Decision Memorandum are identical in content.

Scope of the Investigation

The product covered by this investigation is CTL plate from Belgium. For a full description of the scope of this investigation, *see* the ''Scope of the Investigation,'' in Appendix I of this notice.

Scope Comments

In accordance with the *Preamble* to the Department's regulations,[3] the *Initiation Notice* set aside a period of time for parties to raise issues regarding product coverage, *i.e.,* scope.[4] Certain interested parties commented on the scope of the concurrent CTL plate investigations as it appeared in the *Initiation Notice.* For a summary of the product coverage comments and rebuttal responses submitted to the records of this and the concurrent CTL plate investigations, and a discussion and analysis of all comments timely received, *see* the Department's Preliminary Scope Decision Memorandum and the Department's Additional Preliminary Scope Decision Memorandum.[5] The Department has preliminarily modified the scope language as it appeared in the *Initiation Notice* to clarify the exclusion for stainless steel plate, corrected two tariff numbers that were misidentified in the Petitions and in the *Initiation Notice,* and modified language pertaining to existing steel plate and hot-rolled flat-rolled steel orders.[6]

Methodology

The Department is conducting this investigation in accordance with section 731 of the Act. Export price and, where appropriate, constructed export price are calculated in accordance with section 772 of the Tariff Act of 1930, as amended (the Act). Normal value (NV) is calculated in accordance with section 773 of the Act. For a full description of

[4] *See Initiation Notice,* 81 FR at 27090.

[5] *See* Memorandum to Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, entitled, ''Certain Carbon and Alloy Steel Cut-to-Length Plate From Austria, Belgium, Brazil, the People's Republic of China, France, the Federal Republic of Germany, Italy, Japan, the Republic of Korea, the Republic of South Africa, Taiwan, and Turkey: Scope Comments Decision Memorandum for the Preliminary Determinations,'' dated September 6, 2016 (Preliminary Scope Decision Memorandum), and Memorandum to Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, entitled, ''Certain Carbon and Alloy Steel Cut-to-Length Plate From Austria, Belgium, Brazil, the People's Republic of China, France, the Federal Republic of Germany, Italy, Japan, the Republic of Korea, the Republic of South Africa, Taiwan, and Turkey: Additional Scope Comments Preliminary Decision Memorandum and Extension of Deadlines for Scope Case Briefs and Scope Rebuttal Briefs,'' dated October 13, 2016 (Additional Preliminary Scope Decision Memorandum), respectively.

[6] *See* Preliminary Scope Decision Memorandum at 2 and 56, and Additional Preliminary Scope Decision Memorandum at 10–11 and 20.

the methodology underlying our preliminary conclusions, *see* the Preliminary Decision Memorandum.

All-Others Rate

Consistent with sections 733(d)(1)(A)(ii) and 735(c)(5) of the Act, the Department calculated an estimated all-others rate. Section 735(c)(5)(A) of the Act provides that the estimated all-others rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero and *de minimis* margins, and any margins determined entirely under section 776 of the Act.

In this investigation, we based our calculation of the all-others rate on the weighted-average of the margins calculated for the two mandatory respondents participating in this investigation, Industeel Belgium S.A. (Industeel) and NLMK Belgium,[7] using publicly-ranged data. Because we cannot apply our normal methodology of calculating a weighted-average margin due to requests to protect business-proprietary information, we find this rate to be the best proxy of the actual weighted-average margin determined for these respondents.[8] For further discussion of this calculation, *see* the memorandum entitled ''Certain Carbon and Alloy Steel Cut-to-Length Plate from Italy: Calculation of the Preliminary Margin for All Other Companies,'' dated concurrently with this notice.

Preliminary Determination

The Department preliminarily determines that CTL plate from Belgium is being, or is likely to be, sold in the United States at LTFV, pursuant to section 733 of the Act, and that the following estimated weighted-average dumping margins exist:

Exporter/manufacturer	Weighted-average dumping margin (percent)
Industeel Belgium S.A. ...	2.41
NLMK Clabecq S.A., NLMK Plate Sales S.A., NLMK Sales Europe S.A., NLMK Manage Steel Center S.A., and/or NLMK La Louviere S.A.	8.98
All Others	8.50

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, we will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of all entries of subject merchandise from Belgium, as described in Appendix I of this notice, which are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**, except for Industeel and NLMK Belgium, as described below.

Section 733(e)(2) of the Act provides that, given an affirmative determination of critical circumstances, any suspension of liquidation shall apply to unliquidated entries of merchandise entered, or withdrawn from warehouse, for consumption on or after the later of (a) the date which is 90 days before the date on which the suspension of liquidation was first ordered, or (b) the date on which notice of initiation of the investigation was published.

Because we preliminarily found that critical circumstances exist with regard to imports produced and exported by the mandatory respondents Industeel and NLMK Belgium,[9] we will instruct CBP to suspend liquidation of all entries of CTL plate from Belgium, as described in the scope of the investigation, from the mandatory respondents that are entered, or withdrawn from warehouse, for consumption on or after the date that is 90 days prior to the date on which suspension of liquidation is first ordered, *e.g.,* the date of publication of this notice.

Pursuant to section 733(d) of the Act and 19 CFR 351.205(d), we will instruct CBP to require cash deposits [10] equal to the weighted-average amount by which the NV exceeds U.S. price, as indicated in the chart above, as follows: (1) The rates for the mandatory respondents listed above will be the respondent-specific rates we determined in this preliminary determination; (2) if the exporter is not a mandatory respondent identified above, but the producer is, the rate will be the specific rate established for the producer of the subject merchandise; and (3) the rate for all other producers or exporters will be the all-others rate. These suspension of liquidation instructions will remain in effect until further notice.

Disclosure

We intend to disclose the calculations performed to interested parties in this proceeding within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Verification

As provided in section 782(i) of the Act, we intend to verify information relied upon in making our final determination.

Public Comment

Interested parties are invited to comment on this preliminary determination. Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the final verification report is issued in this proceeding, and rebuttal briefs, limited to issues raised in case briefs, may be submitted no later than five days after the deadline date for case briefs.[11] Pursuant to 19 CFR 351.309(c)(2) and (d)(2), parties who submit case briefs or rebuttal briefs in this proceeding are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.

The Department established separate deadlines for interested parties to provide comments on scope issues.[12] Specifically, case briefs on scope issues were to be submitted no later than October 21, 2016. Scope rebuttal briefs, limited to issues raised in the scope case briefs, were to be submitted no later than November 1, 2016.[13] The Department explained that parties

[7] For this preliminary determination, the Department preliminarily determined to collapse, and treat as a single entity, NLMK Clabecq S.A., NLMK Plate Sales S.A., NLMK Sales Europe S.A., NLMK Manage Steel Center S.A., and NLMK La Louviere S.A. (collectively, NLMK Belgium). *See* Memorandum to Melissa Skinner, Director, Office II, ''Less Than Fair Value Investigation of Certain Carbon and Alloy Steel Cut-To-Length Plate from Belgium: Preliminary Affiliation and Collapsing Memorandum for NLMK Belgium,'' dated October 27, 2016.

[8] *See, e.g., Welded Line Pipe From the Republic of Turkey: Final Determination of Sales at Less Than Fair Value,* 80 FR 61362, 61363 (October 13, 2015).

[9] *See Certain Carbon and Alloy Steel Cut-to-Length Plate From Austria, Belgium, Brazil, the Republic of Korea, Taiwan, and Turkey; Antidumping and Countervailing Duty Investigations: Preliminary Determinations of Critical Circumstances,* 81 FR 61666 (September 7, 2016).

[10] *See Modification of Regulations Regarding the Practice of Accepting Bonds During the Provisional Measures Period in Antidumping and Countervailing Duty Investigations,* 76 FR 61042 (October 3, 2011).

[11] *See* 19 CFR 351.309; *see also* 19 CFR 351.303 (for general filing requirements).

[12] *See* Preliminary Scope Decision Memorandum; Additional Preliminary Scope Decision Memorandum; and Memorandum to the File, entitled, ''Deadlines for Submitting Scope Case Briefs and Scope Rebuttal Briefs,'' dated October 18, 2016 (Deadline Memo for Scope Briefs); and Memorandum to the File, entitled, ''Extension of Deadline for Submitting Scope Rebuttal Briefs,'' dated October 28, 2016 (Extension Memo for Scope Rebuttal Briefs).

[13] *See* Deadline Memo for Scope Briefs and Extension Memo for Scope Rebuttal Briefs.

should limit comments on scope issues to their scope case brief and their scope rebuttal brief.[14] Thus, comments on scope issues belong in parties' scope case briefs and scope rebuttal briefs only and not in other case briefs and rebuttal briefs submitted in this investigation. The Department intends to address parties' scope comments in a final scope memorandum.

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, and a list of the issues to be discussed. If a request for a hearing is made, the Department intends to hold the hearing at the U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230, at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

All documents must be filed electronically using ACCESS. An electronically-filed request must be received successfully in its entirety by ACCESS by 5:00 p.m. Eastern Standard Time.

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. 19 CFR 351.210(e)(2) requires that requests by respondents for postponement of a final determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.

Respondents NLMK Belgium and Industeel requested that, in the event of an affirmative preliminary determination in this investigation, the Department postpone its final determination, and extend the application of the provisional measures prescribed under section 733(d) of the Act and 19 CFR 351.210(e)(2), from a four-month period to a period not to exceed six months.[15]

In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because: (1) Our preliminary determination is affirmative; (2) the requesting exporters account for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, we are postponing the final determination until no later than 135 days after the publication of this notice in the **Federal Register** and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, we intend to issue our final determination no later than 135 days after the date of publication of this preliminary determination, pursuant to section 735(a)(2) of the Act.[16]

International Trade Commission (ITC) Notification

In accordance with section 733(f) of the Act, we are notifying the ITC of our affirmative preliminary determination of sales at LTFV. If our final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after our final determination whether these imports are materially injuring, or threaten material injury to, the U.S. industry.

This determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act and 19 CFR 351.205(c).

Dated: November 4, 2016.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

Appendix I—Scope of the Investigation

The products covered by this investigation are certain carbon and alloy steel hot-rolled or forged flat plate products not in coils, whether or not painted, varnished, or coated with plastics or other non-metallic substances (cut-to-length plate). Subject merchandise includes plate that is produced by being cut-to-length from coils or from other discrete length plate and plate that is rolled or forged into a discrete length. The products covered include (1) Universal mill plates (*i.e.,* flat-rolled products rolled on four faces or in a closed box pass, of a width exceeding 150 mm but not exceeding 1250 mm, and of a thickness of not less than 4 mm, which are not in coils and without patterns in relief), and (2) hot-rolled or forged flat steel products of a thickness of 4.75 mm or more and of a width which exceeds 150 mm and measures at least twice the thickness, and which are not in coils, whether or not with patterns in relief. The covered products described above may be rectangular, square, circular or other shapes and include products of either rectangular or non-rectangular cross-section where such non-rectangular cross-section is achieved subsequent to the rolling process, *i.e.,* products which have been ''worked after rolling'' (*e.g.,* products which have been beveled or rounded at the edges).

For purposes of the width and thickness requirements referenced above, the following rules apply:

(1) Except where otherwise stated where the nominal and actual thickness or width measurements vary, a product from a given subject country is within the scope if application of either the nominal or actual measurement would place it within the scope based on the definitions set forth above; and

(2) where the width and thickness vary for a specific product (*e.g.,* the thickness of certain products with non-rectangular cross-section, the width of certain products with non-rectangular shape, etc.), the measurement at its greatest width or thickness applies.

Steel products included in the scope of this investigation are products in which: (1) Iron predominates, by weight, over each of the other contained elements; and (2) the carbon content is 2 percent or less by weight.

Subject merchandise includes cut-to-length plate that has been further processed in the subject country or a third country, including but not limited to pickling, oiling, levelling, annealing, tempering, temper rolling, skin passing, painting, varnishing, trimming, cutting, punching, beveling, and/or slitting, or any other processing that would not otherwise remove the merchandise from the scope of the investigation if performed in the country of manufacture of the cut-to-length plate.

All products that meet the written physical description, are within the scope of this investigation unless specifically excluded or covered by the scope of an existing order. The following products are outside of, and/or specifically excluded from, the scope of this investigation:

(1) Products clad, plated, or coated with metal, whether or not painted, varnished or coated with plastic or other non-metallic substances;

(2) military grade armor plate certified to one of the following specifications or to a specification that references and incorporates one of the following specifications:

- MIL–A–12560,
- MIL–DTL–12560H,
- MIL–DTL–12560J,
- MIL–DTL–12560K,
- MIL–DTL–32332,
- MIL–A–46100D,
- MIL–DTL–46100–E,
- MIL–46177C,
- MIL–S–16216K Grade HY80,
- MIL–S–16216K Grade HY100,

[14] *See, e.g.,* Deadline Memo for Scope Briefs.

[15] *See* Letter from NLMK Belgium entitled, ''NLMK Clabecq's Request to Postpone Final Determination: Certain Carbon and Alloy Steel Cut-To-Length Plate From Belgium,'' dated October 6, 2016 and Letter from Industeel entitled, ''Certain Carbon and Alloy Steel Cut-To-Length Plate From Belgium: Request for Postponement of Final Determination,'' dated October 13, 2016.

[16] *See* 19 CFR 351.210(b)(2) and (e).

- MIL–S–24645A HSLA–80;
- MIL–S–24645A HSLA–100,
- T9074–BD–GIB–010/0300 Grade HY80,
- T9074–BD–GIB–010/0300 Grade HY100,
- T9074–BD–GIB–010/0300 Grade HSLA80,
- T9074–BD–GIB–010/0300 Grade HSLA100, and
- T9074–BD–GIB–010/0300 Mod. Grade HSLA115,

except that any cut-to-length plate certified to one of the above specifications, or to a military grade armor specification that references and incorporates one of the above specifications, will not be excluded from the scope if it is also dual- or multiple-certified to any other non-armor specification that otherwise would fall within the scope of this order;

(3) stainless steel plate, containing 10.5 percent or more of chromium by weight and not more than 1.2 percent of carbon by weight;

(4) CTL plate meeting the requirements of ASTM A–829, Grade E 4340 that are over 305 mm in actual thickness;

(5) Alloy forged and rolled CTL plate greater than or equal to 152.4 mm in actual thickness meeting each of the following requirements:

(a) Electric furnace melted, ladle refined & vacuum degassed and having a chemical composition (expressed in weight percentages):

- Carbon 0.23–0.28,
- Silicon 0.05–0.20,
- Manganese 1.20–1.60,
- Nickel not greater than 1.0,
- Sulfur not greater than 0.007,
- Phosphorus not greater than 0.020,
- Chromium 1.0–2.5,
- Molybdenum 0.35–0.80,
- Boron 0.002–0.004,
- Oxygen not greater than 20 ppm,
- Hydrogen not greater than 2 ppm, and
- Nitrogen not greater than 60 ppm;

(b) With a Brinell hardness measured in all parts of the product including mid thickness falling within one of the following ranges:

(i) 270–300 HBW,

(ii) 290–320 HBW, or

(iii) 320–350HBW;

(c) Having cleanliness in accordance with ASTM E45 method A (Thin and Heavy): A not exceeding 1.5, B not exceeding 1.0, C not exceeding 0.5, D not exceeding 1.5; and

(d) Conforming to ASTM A578–S9 ultrasonic testing requirements with acceptance criteria 2 mm flat bottom hole;

(6) Alloy forged and rolled steel CTL plate over 407 mm in actual thickness and meeting the following requirements:

(a) Made from Electric Arc Furnace melted, Ladle refined & vacuum degassed, alloy steel with the following chemical composition (expressed in weight percentages):

- Carbon 0.23–0.28,
- Silicon 0.05–0.15,
- Manganese 1.20–1.50,
- Nickel not greater than 0.4,
- Sulfur not greater than 0.010,
- Phosphorus not greater than 0.020,
- Chromium 1.20–1.50,
- Molybdenum 0.35–0.55,
- Boron 0.002–0.004,
- Oxygen not greater than 20 ppm,
- Hydrogen not greater than 2 ppm, and
- Nitrogen not greater than 60 ppm;

(b) Having cleanliness in accordance with ASTM E45 method A (Thin and Heavy): A not exceeding 1.5, B not exceeding 1.5, C not exceeding 1.0, D not exceeding 1.5;

(c) Having the following mechanical properties:

(i) With a Brinell hardness not more than 237 HBW measured in all parts of the product including mid thickness; and having a Yield Strength of 75ksi min and UTS 95ksi or more, Elongation of 18% or more and Reduction of area 35% or more; having charpy V at −75 degrees F in the longitudinal direction equal or greater than 15 ft. lbs (single value) and equal or greater than 20 ft. lbs (average of 3 specimens) and conforming to the requirements of NACE MR01–75; or

(ii) With a Brinell hardness not less than 240 HBW measured in all parts of the product including mid thickness; and having a Yield Strength of 90 ksi min and UTS 110 ksi or more, Elongation of 15% or more and Reduction of area 30% or more; having charpy V at −40 degrees F in the longitudinal direction equal or greater than 21 ft. lbs (single value) and equal or greater than 31 ft. lbs (average of 3 specimens);

(d) Conforming to ASTM A578–S9 ultrasonic testing requirements with acceptance criteria 3.2 mm flat bottom hole; and

(e) Conforming to magnetic particle inspection in accordance with AMS 2301;

(7) Alloy forged and rolled steel CTL plate over 407 mm in actual thickness and meeting the following requirements:

(a) Made from Electric Arc Furnace melted, ladle refined & vacuum degassed, alloy steel with the following chemical composition (expressed in weight percentages):

- Carbon 0.25–0.30,
- Silicon not greater than 0.25,
- Manganese not greater than 0.50,
- Nickel 3.0–3.5,
- Sulfur not greater than 0.010,
- Phosphorus not greater than 0.020,
- Chromium 1.0–1.5,
- Molybdenum 0.6–0.9,
- Vanadium 0.08 to 0.12
- Boron 0.002–0.004,
- Oxygen not greater than 20 ppm,
- Hydrogen not greater than 2 ppm, and
- Nitrogen not greater than 60 ppm.

(b) Having cleanliness in accordance with ASTM E45 method A (Thin and Heavy): A not exceeding 1.0(t) and 0.5(h), B not exceeding 1.5(t) and 1.0(h), C not exceeding 1.0(t) and 0.5(h), and D not exceeding 1.5(t) and 1.0(h);

(c) Having the following mechanical properties: A Brinell hardness not less than 350 HBW measured in all parts of the product including mid thickness; and having a Yield Strength of 145ksi or more and UTS 160ksi or more, Elongation of 15% or more and Reduction of area 35% or more; having charpy V at −40 degrees F in the transverse direction equal or greater than 20 ft. lbs (single value) and equal or greater than 25 ft. lbs (average of 3 specimens);

(d) Conforming to ASTM A578–S9 ultrasonic testing requirements with acceptance criteria 3.2 mm flat bottom hole; and

(e) Conforming to magnetic particle inspection in accordance with AMS 2301.

The products subject to the investigation are currently classified in the Harmonized Tariff Schedule of the United States (HTSUS) under item numbers: 7208.40.3030, 7208.40.3060, 7208.51.0030, 7208.51.0045, 7208.51.0060, 7208.52.0000, 7211.13.0000, 7211.14.0030, 7211.14.0045, 7225.40.1110, 7225.40.1180, 7225.40.3005, 7225.40.3050, 7226.20.0000, and 7226.91.5000.

The products subject to the investigation may also enter under the following HTSUS item numbers: 7208.40.6060, 7208.53.0000, 7208.90.0000, 7210.70.3000, 7210.90.9000, 7211.19.1500, 7211.19.2000, 7211.19.4500, 7211.19.6000, 7211.19.7590, 7211.90.0000, 7212.40.1000, 7212.40.5000, 7212.50.0000, 7214.10.0000, 7214.30.0010, 7214.30.0080, 7214.91.0015, 7214.91.0060, 7214.91.0090, 7225.11.0000, 7225.19.0000, 7225.40.5110, 7225.40.5130, 7225.40.5160, 7225.40.7000, 7225.99.0010, 7225.99.0090, 7226.11.1000, 7226.11.9060, 7226.19.1000, 7226.19.9000, 7226.91.0500, 7226.91.1530, 7226.91.1560, 7226.91.2530, 7226.91.2560, 7226.91.7000, 7226.91.8000, and 7226.99.0180.

The HTSUS subheadings above are provided for convenience and customs purposes only. The written description of the scope of the investigation is dispositive.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

[A–580–889]

Dioctyl Terephthalate From the Republic of Korea: Postponement of Preliminary Determination of Antidumping Duty Investigation

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

DATES: Effective November 14, 2016.

FOR FURTHER INFORMATION CONTACT: Shanah Lee or Laurel LaCivita, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–6386 or (202) 482–4243, respectively.

SUPPLEMENTARY INFORMATION:

Background

On July 20, 2016, the Department of Commerce (''Department'') initiated an antidumping duty investigation concerning imports of dioctyl terephthalate (''DOTP'') from the Republic of Korea (''Korea'').[1] The notice of initiation stated that, in accordance with section 733(b)(1)(A) of the Tariff Act of 1930, as amended (''the Act''), and 19 CFR 351.205(b)(1), we would issue our preliminary determination no later than 140 days after the date of initiation, unless postponed. Currently, the preliminary determination in this investigation is due no later than December 7, 2016.

Postponement of Preliminary Determination

If the petitioner makes a timely request for a postponement, section 733(c)(1)(A) of the Act allows the Department to postpone making the preliminary determination until no later than 190 days after the date on which the Department initiated the investigation. On October 28, 2016, Eastman Chemical Company (''Petitioner'') submitted a timely request for a postponement of the preliminary determination pursuant to section 733(c)(1)(A) of the Act and 19 CFR 351.205(e), in order to provide the Department sufficient time to review all relevant information from the respondents and issue appropriate requests for clarification or additional information.[2]

For the reasons stated above, and because there are no compelling reasons to deny Petitioner's request, the Department is postponing the deadline for the preliminary determination to no later than 190 days after the day on which the investigation was initiated, in accordance with section 733(c)(1)(A) of the Act. Accordingly, the Department intends to issue the preliminary determination no later than January 26, 2017. In accordance with section 735(a)(1) of the Act and 19 CFR 351.210(b)(1), the deadline for the final determination of this investigation will continue to be 75 days after the date of the preliminary determination, unless postponed at a later date.

This notice is issued and published pursuant to section 733(c)(2) of the Act and 19 CFR 351.205(f)(1).

Dated: November 3, 2016.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

Steel Wire Garment Hangers From the People's Republic of China: Preliminary Results of Antidumping Duty Administrative Review; 2014–2015

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (''Department'') is conducting the seventh administrative review of the antidumping duty order on steel wire garment hangers (''hangers'') from the People's Republic of China (''PRC''). The Department preliminarily finds that subject merchandise was sold in the United States at prices below normal value during the period of review (''POR''), October 1, 2014, through September 30, 2015. If these preliminary results are adopted in our final results of review, we will instruct U.S. Customs and Border Protection (''CBP'') to assess antidumping duties on all appropriate entries of subject merchandise during the POR. We invite interested parties to comment on these preliminary results.

DATES: Effective November 14, 2016.

FOR FURTHER INFORMATION CONTACT: Jessica Weeks, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–4877.

SUPPLEMENTARY INFORMATION:

Background

On October 1, 2015, the Department published a notice of ''Opportunity to Request Administrative Review'' of the antidumping order on steel wire garment hangers from the PRC.[1] In November 2015, the Department received multiple timely requests to conduct an administrative review of the antidumping duty order on steel wire garment hangers from the PRC.[2] Based upon these requests, on December 3, 2015, the Department published a notice of initiation of an administrative review (''AR'') of the *Order* covering the period October 1, 2014, to September 30, 2015.[3] The Department initiated the administrative review with respect to 46 companies.[4] On December 16, 2015, Petitioner withdrew its request for an administrative review on 44 companies.[5] On June 2, 2016, the Department extended the period for issuing the preliminary results by 120 days.[6] As explained in the memorandum from the Acting Assistant Secretary for Enforcement and Compliance, the Department exercised its discretion to toll deadlines because of the closure of the Federal Government.[7] The preliminary results were extended by four business days.[8] The revised deadline for the preliminary results is November 4, 2016.

Scope of the Order

The merchandise subject to the *Order* is steel wire garment hangers. The products are currently classifiable under the Harmonized Tariff Schedule of the United States (''HTSUS'') subheadings: 7326.20.0020, 7323.99.9060, and 7323.99.9080. Although the HTSUS subheadings are provided for convenience and customs purposes, the written product description of the scope of the order remains dispositive.[9]

Separate Rates

The Department preliminarily determines that information [10] placed on the record by Shanghai Wells Hanger Co., Ltd. and Hong Kong Wells Ltd.[11] demonstrates that these companies are entitled to separate rate status. For additional information, *see* the Preliminary Decision Memorandum.

PRC-Wide Entity

The Department's policy regarding conditional review of the PRC-wide entity applies to this administrative review.[12] Under this policy, the PRC-wide entity will not be under review unless a party specifically requests, or the Department self-initiates, a review of the entity. Because no party requested a review of the PRC-wide entity in this review, the entity is not under review and the entity's rate is not subject to change, (*i.e.,* 187.25 percent).[13]

Methodology

The Department is conducting this review in accordance with section 751(a)(1)(B) of the Tariff Act of 1930, as amended (''the Act''). The Department calculated constructed export prices and export prices in accordance with section 772 of the Act. Because the PRC is a nonmarket economy (''NME'') within the meaning of section 771(18) of the Act, normal value is calculated in accordance with section 773(c) of the Act.

For a full description of the methodology underlying our conclusions, *see* the Preliminary Decision Memorandum. A list of the topics included in the Preliminary Decision Memorandum is included as an appendix to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (''ACCESS''). ACCESS is available to registered users at *https://access.trade.gov* and to all parties in the Central Records Unit, room B8024 of the main Department of Commerce building. In addition, a complete version of the Preliminary Decision Memorandum is available at *http://enforcement.trade.gov/frn/.* The signed Preliminary Decision Memorandum and the electronic versions of the Preliminary Decision Memorandum are identical in content.

Preliminary Results of Review

The Department preliminarily determines that the following weighted-average dumping margin exists for the POR from October 1, 2014, through September 30, 2015:

Exporter	Weighted-average dumping margin (percent)
Shanghai Wells Hanger Co., Ltd./Hong Kong Wells Ltd.[14]	49.40

Disclosure, Public Comment and Opportunity To Request a Hearing

The Department intends to disclose the calculations used in our analysis to parties in this review within five days of the date of any public announcement of this notice in accordance with 19 CFR 351.224(b).

Interested parties may submit case briefs within 30 days after the date of publication of these preliminary results of review in the **Federal Register**.[15] Rebuttals to case briefs, which must be limited to issues raised in the case briefs, must be filed within five days after the time limit for filing case briefs.[16] Parties who submit arguments are requested to submit with the argument: (a) A statement of the issue (b) a brief summary of the argument, and (c) a table of authorities.[17] Parties submitting briefs should do so pursuant to the Department's electronic filing system, ACCESS.[18]

Any interested party may request a hearing within 30 days of publication of this notice.[19] Hearing requests should contain the following information: (1) The party's name, address, and telephone number; (2) the number of participants; and (3) a list of the issues to be discussed. Oral presentations will be limited to issues raised in the briefs.[20] Parties requesting a hearing should do so pursuant to the Department's electronic filing system, ACCESS.[21] If a party requests a hearing, the Department will inform parties of the scheduled date for the hearing which will be held at the U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230, at a time and location to be determined.[22]

Unless otherwise extended, the Department intends to issue the final results of this administrative review, which will include the results of our analysis of all issues raised in parties' case briefs, within 120 days of publication of these preliminary results in the **Federal Register**, pursuant to section 751(a)(3)(A) of the Act.

Assessment Rates

Upon issuance of the final results, pursuant to section 751(a)(2)(C) of the Act and 19 CFR 351.212(b), the Department will determine, and CBP shall assess, antidumping duties on all appropriate entries covered by this

[9] *See* Memorandum to Paul Piquado, Assistant Secretary for Enforcement and Compliance, from Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, regarding ''Decision Memorandum for the Preliminary Results of the Antidumping Duty Administrative Review of Steel Wire Garment Hangers From the People's Republic of China; 2014–2015,'' dated concurrently with and hereby adopted by this notice, (''Preliminary Decision Memorandum'') for a complete description of the scope of the *Order.*

[10] *See* Shanghai Wells' Section A questionnaire response, dated January 5, 2016 at pages 2–10.

[11] In the first administrative review of the *Order,* the Department found that Shanghai Wells Hanger Co., Ltd. and Hong Kong Wells Ltd. are a single entity and, because there were no changes to the facts that supported that decision since that determination was made, we continue to find that these companies are part of a single entity for this administrative review. *See Steel Wire Garment Hangers From the People's Republic of China: Preliminary Results and Preliminary Rescission, in Part, of the First Antidumping Duty Administrative Review,* 75 FR 68758, 68761 (November 9, 2010), unchanged in *First Administrative Review of Steel Wire Garment Hangers From the People's Republic of China: Final Results and Final Partial Rescission of Antidumping Duty Administrative Review,* 76 FR 27994, 27996 (May 13, 2011); *see also Steel Wire Garment Hangers from the People's Republic of China: Final Results of Antidumping Duty Administrative Review,* 2013–2014, 80 FR 69942 (November 2, 2015).

[12] *See Antidumping Proceedings: Announcement of Change in Department Practice for Respondent Selection in Antidumping Duty Proceedings and Conditional Review of the Nonmarket Economy Entity in NME Antidumping Duty Proceedings,* 78 FR 65963 (November 4, 2013).

[13] *See Steel Wire Garment Hangers From the People's Republic of China: Final Results of Antidumping Duty Administrative Review, 2012–2013,* 80 FR 13332, and accompanying Issues and Decision Memorandum (March 13, 2015) (''*5th AR Hangers Final Results*'').

[14] As previously stated, we continue to find Shanghai Wells Hanger Co., Ltd. and Hong Kong Wells Ltd. (collectively ''Shanghai Wells'') to be a single entity.

[15] *See* 19 CFR 351.309(c)(1)(ii).

[16] *See* 19 CFR 351.309(d)(1)–(2).

[17] *See* 19 CFR 351.309(c)(2) and (d)(2).

[18] *See* 19 CFR 351.303 (for general filing requirements).

[19] *See* 19 CFR 351.310(c).

[20] *Id.*

[21] *See* 19 CFR 351.303 (for general filing requirements).

[22] *See* 19 CFR 351.310(d).

review. The Department intends to issue assessment instructions to CBP 15 days after the publication date of the final results of this review.

For any individually examined respondent whose weighted-average dumping margin is above the *de minimis* threshold (*i.e.,* 0.50 percent), the Department will calculate importer-specific *ad valorem* assessment rates on the basis of the ratio of the total amount of dumping calculated for the importer's examined sales and the total entered value of sales. Where either the respondent's weighted-average dumping margin is zero or *de minimis,* or an importer-specific *ad valorem* assessment rate is zero or *de minimis,* we will instruct CBP to liquidate the appropriate entries without regard to antidumping duties.

In these preliminary results, the Department applied the assessment rate calculation method adopted in *Final Modification for Reviews, i.e.,* on the basis of monthly average-to-average comparisons using only the transactions associated with that importer with offsets being provided for non-dumped comparisons.[23]

Pursuant to a refinement in the Department's NME practice, for sales that were not reported in the U.S. sales data submitted by companies individually examined during this review, the Department will instruct CBP to liquidate entries associated with those sales at the rate for the PRC-wide entity. In addition, if the Department determines that an exporter under review had no shipments of the subject merchandise, any suspended entries that entered under that exporter's case number (*i.e.,* at that exporter's cash deposit rate) will be liquidated at the rate for the PRC-wide entity.[24]

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of the final results of this administrative review for all shipments of the subject merchandise from the PRC entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided by section 751(a)(2)(C) of the Act: (1) For the company listed above, the cash deposit rate will be established in the final results of this review (except, if the rate is zero or *de minimis,* then zero cash deposit will be required); (2) for previously investigated or reviewed PRC and non-PRC exporters not listed above that have separate rates, the cash deposit rate will continue to be the exporter-specific rate published for the most recently completed segment of this proceeding in which they were reviewed; (3) for all PRC exporters of subject merchandise that have not been found to be entitled to a separate rate, the cash deposit rate will be equal to the weighted-average dumping margin for the PRC-wide entity (*i.e.,* 187.25 percent); and (4) for all non-PRC exporters of subject merchandise which have not received their own separate rate, the cash deposit rate will be the rate applicable to the PRC exporter(s) that supplied that non-PRC exporter. These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Department's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

Notification to Interested Parties

This administrative review and notice is issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act, and 19 CFR 351.221(b)(4) and 19 CFR 351.213.

Dated: November 4, 2016

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

Certain Carbon and Alloy Steel Cut-To-Length Plate From France: Preliminary Determination of Sales at Less Than Fair Value and Postponement of Final Determination

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the Department) preliminarily determines that certain carbon and alloy steel cut-to-length plate (CTL plate) from France is being, or is likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is April 1, 2015, through March 31, 2016. The estimated weighted-average dumping margins of sales at LTFV are shown in the ''Preliminary Determination'' section of this notice. Interested parties are invited to comment on this preliminary determination.

DATES: Effective November 14, 2016.

FOR FURTHER INFORMATION CONTACT: Terre Keaton Stefanova or Brandon Custard, AD/CVD Operations, Office II, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–1280 or (202) 482–1823, respectively.

SUPPLEMENTARY INFORMATION:

Background

The Department initiated this investigation on April 28, 2016.[1] We selected two mandatory respondents in this investigation, Dillinger France S.A. (Dillinger) and Industeel France S.A. (Industeel). For a complete description of the events that followed the initiation of this investigation, *see* the memorandum that is dated concurrently

[1] *See Certain Carbon and Alloy Steel Cut-To-Length Plate From Austria, Belgium, Brazil, France, the Federal Republic of Germany, Italy, Japan, the Republic of Korea, the People's Republic of China, South Africa, Taiwan, and the Republic of Turkey: Initiation of Less-Than-Fair Value Investigations*, 81 FR 27089 (May 5, 2016) (*Initiation Notice*).

with this determination, and hereby adopted by, this notice.[2] A list of topics in the Preliminary Decision Memorandum is included as Appendix II to this notice.

The Preliminary Decision Memorandum is a public document and is made available to the public via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov*, and is available to all parties in the Department's Central Records Unit, Room B8024 of the main Department of Commerce building. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly on the Internet at *http://enforcement.trade.gov/frn/.* The signed Preliminary Decision Memorandum and the electronic version of the Preliminary Decision Memorandum are identical in content.

Scope of the Investigation

The product covered by this investigation is CTL plate from France. For a full description of the scope of this investigation, *see* the ''Scope of the Investigation,'' in Appendix I of this notice.

Scope Comments

In accordance with the *Preamble* to the Department's regulations,[3] the *Initiation Notice* set aside a period of time for parties to raise issues regarding product coverage, *i.e.*, scope.[4] Certain interested parties commented on the scope of the concurrent CTL plate investigations as it appeared in the *Initiation Notice.* For a summary of the product coverage comments and rebuttal responses submitted to the records of this and the concurrent CTL plate investigations, and a discussion and analysis of all comments timely received, *see* the Department's Preliminary Scope Decision Memorandum and the Department's Additional Preliminary Scope Decision Memorandum.[5] The Department has preliminarily modified the scope language as it appeared in the *Initiation Notice* to clarify the exclusion for stainless steel plate, corrected two tariff numbers that were misidentified in the Petitions and in the *Initiation Notice*, and modified language pertaining to existing steel plate and hot-rolled flat-rolled steel orders.[6]

Methodology

The Department is conducting this investigation in accordance with section 731 of the Act. Export price and, where appropriate, constructed export price are calculated in accordance with section 772 of the Tariff Act of 1930, as amended (the Act). Normal value (NV) is calculated in accordance with section 773 of the Act. For a full description of the methodology underlying our preliminary conclusions, *see* the Preliminary Decision Memorandum.

All-Others Rate

Consistent with sections 733(d)(1)(A)(ii) and 735(c)(5) of the Act, the Department also calculated an estimated all-others rate. Section 735(c)(5)(A) of the Act provides that the estimated all-others rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero and *de minimis* margins, and any margins determined entirely under section 776 of the Act.

In this investigation, we cannot apply our normal methodology of calculating a weighted-average margin due to requests to protect business-proprietary information. Therefore, we based our calculation of the all-others rate on the simple average of the margins calculated for Dillinger and Industeel. For further discussion of this calculation, *see* the memorandum entitled ''Certain Carbon and Alloy Steel Cut-to-Length Plate from France: Calculation of the Preliminary Margin for All Other Companies,'' dated concurrently with this notice.

Preliminary Determination

The Department preliminarily determines that CTL plate from France is being, or is likely to be, sold in the United States at LTFV, pursuant to section 733 of the Act, and that the following estimated weighted-average dumping margins exist:

Exporter/Manufacturer	Weighted-average dumping margin (percent)
Dillinger France S.A.	12.97
Industeel France S.A.	4.26
All Others	8.62

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, we will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of all entries of subject merchandise from France, as described in Appendix I of this notice, which are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**.

Pursuant to section 733(d) of the Act and 19 CFR 351.205(d), we will instruct CBP to require cash deposits[7] equal to the weighted-average amount by which the NV exceeds U.S. price, as indicated in the chart above, as follows: (1) The rate for the mandatory respondents listed above will be the respondent-specific rates we determined in this preliminary determination; (2) if the exporter is not a mandatory respondent identified above, but the producer is, the rate will be the specific rate established for the producer of the subject merchandise; and (3) the rate for all other producers or exporters will be the all-others rate. These suspension of liquidation instructions will remain in effect until further notice.

Disclosure

We intend to disclose the calculations performed to interested parties in this proceeding within five days of the public announcement of this preliminary determination in accordance with 19 CFR 351.224(b).

[2] *See* Memorandum from Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, to Paul Piquado, Assistant Secretary for Enforcement and Compliance, entitled, ''Decision Memorandum for the Preliminary Determination in the Antidumping Duty Investigation of Certain Carbon and Alloy Steel Cut-To-Length Plate From France'' (Preliminary Decision Memorandum), dated concurrently with this notice.

Verification

As provided in section 782(i) of the Act, we intend to verify information relied upon in making our final determination.

Public Comment

Interested parties are invited to comment on this preliminary determination. Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the final verification report is issued in this proceeding, and rebuttal briefs, limited to issues raised in case briefs, may be submitted no later than five days after the deadline date for case briefs.[8] Pursuant to 19 CFR 351.309(c)(2) and (d)(2), parties who submit case briefs or rebuttal briefs in this proceeding are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.

The Department established separate deadlines for interested parties to provide comments on scope issues.[9] Specifically, case briefs on scope issues were to be submitted no later than October 21, 2016. Scope rebuttal briefs, limited to issues raised in the scope case briefs, were to be submitted no later than November 1, 2016.[10] The Department explained that parties should limit comments on scope issues to their scope case brief and their scope rebuttal brief.[11] Thus, comments on scope issues belong in parties' scope case briefs and scope rebuttal briefs only and not in other case briefs and rebuttal briefs submitted in this investigation. The Department intends to address parties' scope comments in a final scope memorandum.

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, and a list of the issues to be discussed. If a request for a hearing is made, the Department intends to hold the hearing at the U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230, at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

All documents must be filed electronically using ACCESS. An electronically-filed request must be received successfully in its entirety by ACCESS by 5:00 p.m. Eastern Standard Time.

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. 19 CFR 351.210(e)(2) requires that requests by respondents for postponement of a final determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.

Respondents Dillinger and Industeel have requested that, in the event of an affirmative preliminary determination in this investigation, the Department postpone its final determination by 60 days, *i.e.*, to 135 days after publication of the preliminary determination.[12] Further, Industeel agreed to extend the application of the provisional measures prescribed under section 733(d) of the Act and 19 CFR 351.210(e)(2), from a four-month period to a period not to exceed six months.

In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because (1) our preliminary determination is affirmative; (2) Industeel accounts for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, we are postponing the final determination until no later than 135 days after the publication of this notice in the **Federal Register** and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, we will issue our final determination no later than 135 days after the date of publication of this preliminary determination, pursuant to section 735(a)(2) of the Act.[13]

International Trade Commission (ITC) Notification

In accordance with section 733(f) of the Act, we are notifying the ITC of our affirmative preliminary determination of sales at LTFV. If our final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after our final determination whether these imports are materially injuring, or threaten material injury to, the U.S. industry.

This determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act and 19 CFR 351.205(c).

Dated: November 4, 2016.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

Appendix I—Scope of the Investigation

The products covered by this investigation are certain carbon and alloy steel hot-rolled or forged flat plate products not in coils, whether or not painted, varnished, or coated with plastics or other non-metallic substances (cut-to-length plate). Subject merchandise includes plate that is produced by being cut-to-length from coils or from other discrete length plate and plate that is rolled or forged into a discrete length. The products covered include (1) Universal mill plates (*i.e.*, flat-rolled products rolled on four faces or in a closed box pass, of a width exceeding 150 mm but not exceeding 1250 mm, and of a thickness of not less than 4 mm, which are not in coils and without patterns in relief), and (2) hot-rolled or forged flat steel products of a thickness of 4.75 mm or more and of a width which exceeds 150 mm and measures at least twice the thickness, and which are not in coils, whether or not with patterns in relief. The covered products described above may be rectangular, square, circular or other shapes and include products of either rectangular or non-rectangular cross-section where such non-rectangular cross-section is achieved subsequent to the rolling process, *i.e.*, products which have been ''worked after rolling'' (*e.g.*, products which have been beveled or rounded at the edges).

For purposes of the width and thickness requirements referenced above, the following rules apply:

[8] *See* 19 CFR 351.309; *see also* 19 CFR 351.303 (for general filing requirements).

[9] *See* Preliminary Scope Decision Memorandum; Additional Preliminary Scope Decision Memorandum; Memorandum to the File, entitled, ''Deadlines for Submitting Scope Case Briefs and Scope Rebuttal Briefs,'' dated October 18, 2016 (Deadline Memo for Scope Briefs); and Memorandum to the File ''Extension of Deadline for Submitting Scope Rebuttal Briefs,'' dated October 28, 2016 (Extension Memo for Scope Rebuttal Briefs).

[10] *See* Deadline Memo for Scope Briefs and Extension Memo for Scope Rebuttal Briefs.

[11] *See, e.g.*, Deadline Memo for Scope Briefs.

[12] *See* letter from Dillinger entitled, ''Certain Carbon and Alloy Steel Cut-To-Length Plate From France: Request for Extension of Final Determination,'' dated October 17, 2016; and Letter from Industeel entitled, ''Certain Carbon and Alloy Steel Cut-To-Length Plate From France: Request for Postponement of Final Determination,'' dated October 13, 2016.

[13] *See* 19 CFR 351.210(b)(2) and (e).

(1) Except where otherwise stated where the nominal and actual thickness or width measurements vary, a product from a given subject country is within the scope if application of either the nominal or actual measurement would place it within the scope based on the definitions set forth above; and

(2) where the width and thickness vary for a specific product (*e.g.*, the thickness of certain products with non-rectangular cross-section, the width of certain products with non-rectangular shape, *etc.*), the measurement at its greatest width or thickness applies.

Steel products included in the scope of this investigation are products in which: (1) Iron predominates, by weight, over each of the other contained elements; and (2) the carbon content is 2 percent or less by weight.

Subject merchandise includes cut-to-length plate that has been further processed in the subject country or a third country, including but not limited to pickling, oiling, levelling, annealing, tempering, temper rolling, skin passing, painting, varnishing, trimming, cutting, punching, beveling, and/or slitting, or any other processing that would not otherwise remove the merchandise from the scope of the investigation if performed in the country of manufacture of the cut-to-length plate.

All products that meet the written physical description, are within the scope of this investigation unless specifically excluded or covered by the scope of an existing order. The following products are outside of, and/or specifically excluded from, the scope of this investigation:

(1) Products clad, plated, or coated with metal, whether or not painted, varnished or coated with plastic or other non-metallic substances;

(2) military grade armor plate certified to one of the following specifications or to a specification that references and incorporates one of the following specifications:

- MIL–A–12560,
- MIL–DTL–12560H,
- MIL–DTL–12560J,
- MIL–DTL–12560K,
- MIL–DTL–32332,
- MIL–A–46100D,
- MIL–DTL–46100–E,
- MIL–46177C,
- MIL–S–16216K Grade HY80,
- MIL–S–16216K Grade HY100,
- MIL–S–24645A HSLA–80;
- MIL–S–24645A HSLA–100,
- T9074–BD–GIB–010/0300 Grade HY80,
- T9074–BD–GIB–010/0300 Grade HY100,
- T9074–BD–GIB–010/0300 Grade HSLA80,
- T9074–BD–GIB–010/0300 Grade HSLA100, and
- T9074–BD–GIB–010/0300 Mod. Grade HSLA115,

except that any cut-to-length plate certified to one of the above specifications, or to a military grade armor specification that references and incorporates one of the above specifications, will not be excluded from the scope if it is also dual- or multiple-certified to any other non-armor specification that otherwise would fall within the scope of this order;

(3) stainless steel plate, containing 10.5 percent or more of chromium by weight and not more than 1.2 percent of carbon by weight;

(4) CTL plate meeting the requirements of ASTM A–829, Grade E 4340 that are over 305 mm in actual thickness;

(5) Alloy forged and rolled CTL plate greater than or equal to 152.4 mm in actual thickness meeting each of the following requirements:

(a) Electric furnace melted, ladle refined & vacuum degassed and having a chemical composition (expressed in weight percentages):

- Carbon 0.23–0.28,
- Silicon 0.05–0.20,
- Manganese 1.20–1.60,
- Nickel not greater than 1.0,
- Sulfur not greater than 0.007,
- Phosphorus not greater than 0.020,
- Chromium 1.0–2.5,
- Molybdenum 0.35–0.80,
- Boron 0.002–0.004,
- Oxygen not greater than 20 ppm,
- Hydrogen not greater than 2 ppm, and
- Nitrogen not greater than 60 ppm;

(b) With a Brinell hardness measured in all parts of the product including mid thickness falling within one of the following ranges:

(i) 270–300 HBW,

(ii) 290–320 HBW, or (iii) 320–350HBW;

(c) Having cleanliness in accordance with ASTM E45 method A (Thin and Heavy): A not exceeding 1.5, B not exceeding 1.0, C not exceeding 0.5, D not exceeding 1.5; and

(d) Conforming to ASTM A578–S9 ultrasonic testing requirements with acceptance criteria 2 mm flat bottom hole;

(6) Alloy forged and rolled steel CTL plate over 407 mm in actual thickness and meeting the following requirements:

(a) Made from Electric Arc Furnace melted, Ladle refined & vacuum degassed, alloy steel with the following chemical composition (expressed in weight percentages):

- Carbon 0.23–0.28,
- Silicon 0.05–0.15,
- Manganese 1.20–1.50,
- Nickel not greater than 0.4,
- Sulfur not greater than 0.010,
- Phosphorus not greater than 0.020,
- Chromium 1.20–1.50,
- Molybdenum 0.35–0.55,
- Boron 0.002–0.004,
- Oxygen not greater than 20 ppm,
- Hydrogen not greater than 2 ppm, and
- Nitrogen not greater than 60 ppm;

(b) Having cleanliness in accordance with ASTM E45 method A (Thin and Heavy): A not exceeding 1.5, B not exceeding 1.5, C not exceeding 1.0, D not exceeding 1.5;

(c) Having the following mechanical properties:

(i) With a Brinell hardness not more than 237 HBW measured in all parts of the product including mid thickness; and having a Yield Strength of 75ksi min and UTS 95ksi or more, Elongation of 18% or more and Reduction of area 35% or more; having charpy V at −75 degrees F in the longitudinal direction equal or greater than 15 ft. lbs (single value) and equal or greater than 20 ft. lbs (average of 3 specimens) and conforming to the requirements of NACE MR01–75; or

(ii) With a Brinell hardness not less than 240 HBW measured in all parts of the product including mid thickness; and having a Yield Strength of 90 ksi min and UTS 110 ksi or more, Elongation of 15% or more and Reduction of area 30% or more; having charpy V at −40 degrees F in the longitudinal direction equal or greater than 21 ft. lbs (single value) and equal or greater than 31 ft. lbs (average of 3 specimens);

(d) Conforming to ASTM A578–S9 ultrasonic testing requirements with acceptance criteria 3.2 mm flat bottom hole; and

(e) Conforming to magnetic particle inspection in accordance with AMS 2301;

(7) Alloy forged and rolled steel CTL plate over 407 mm in actual thickness and meeting the following requirements:

(a) Made from Electric Arc Furnace melted, ladle refined & vacuum degassed, alloy steel with the following chemical composition (expressed in weight percentages):

- Carbon 0.25–0.30,
- Silicon not greater than 0.25,
- Manganese not greater than 0.50,
- Nickel 3.0–3.5,
- Sulfur not greater than 0.010,
- Phosphorus not greater than 0.020,
- Chromium 1.0–1.5,
- Molybdenum 0.6–0.9,
- Vanadium 0.08 to 0.12
- Boron 0.002–0.004,
- Oxygen not greater than 20 ppm,
- Hydrogen not greater than 2 ppm, and
- Nitrogen not greater than 60 ppm.

(b) Having cleanliness in accordance with ASTM E45 method A (Thin and Heavy): A not exceeding 1.0(t) and 0.5(h), B not exceeding 1.5(t) and 1.0(h), C not exceeding 1.0(t) and 0.5(h), and D not exceeding 1.5(t) and 1.0(h);

(c) Having the following mechanical properties: A Brinell hardness not less than 350 HBW measured in all parts of the product including mid thickness; and having a Yield Strength of 145ksi or more and UTS 160ksi or more, Elongation of 15% or more and Reduction of area 35% or more; having charpy V at −40 degrees F in the transverse direction equal or greater than 20 ft. lbs (single value) and equal or greater than 25 ft. lbs (average of 3 specimens);

(d) Conforming to ASTM A578–S9 ultrasonic testing requirements with acceptance criteria 3.2 mm flat bottom hole; and

(e) Conforming to magnetic particle inspection in accordance with AMS 2301.

The products subject to the investigation are currently classified in the Harmonized Tariff Schedule of the United States (HTSUS) under item numbers: 7208.40.3030, 7208.40.3060, 7208.51.0030, 7208.51.0045, 7208.51.0060, 7208.52.0000, 7211.13.0000, 7211.14.0030, 7211.14.0045, 7225.40.1110, 7225.40.1180, 7225.40.3005, 7225.40.3050, 7226.20.0000, and 7226.91.5000.

The products subject to the investigation may also enter under the following HTSUS item numbers: 7208.40.6060, 7208.53.0000, 7208.90.0000, 7210.70.3000, 7210.90.9000, 7211.19.1500, 7211.19.2000, 7211.19.4500, 7211.19.6000, 7211.19.7590, 7211.90.0000, 7212.40.1000, 7212.40.5000, 7212.50.0000, 7214.10.0000, 7214.30.0010, 7214.30.0080, 7214.91.0015, 7214.91.0060, 7214.91.0090, 7225.11.0000, 7225.19.0000, 7225.40.5110,

7225.40.5130, 7225.40.5160, 7225.40.7000, 7225.99.0010, 7225.99.0090, 7226.11.1000, 7226.11.9060, 7226.19.1000, 7226.19.9000, 7226.91.0500, 7226.91.1530, 7226.91.1560, 7226.91.2530, 7226.91.2560, 7226.91.7000, 7226.91.8000, and 7226.99.0180.

The HTSUS subheadings above are provided for convenience and customs purposes only. The written description of the scope of the investigation is dispositive.

Appendix II—List of Topics Discussed in the Preliminary Decision Memorandum

[FR Doc. 2016–27314 Filed 11–10–16; 8:45 am]

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

[A–580–887]

Certain Carbon and Alloy Steel Cut-To-Length Plate From the Republic of Korea: Affirmative Preliminary Determination of Sales at Less Than Fair Value and Postponement of Final Determination

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the Department) preliminarily determines that certain carbon and alloy steel cut-to-length plate (CTL plate) from the Republic of Korea (Korea) is being, or is likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is April 1, 2015, through March 31, 2016. The estimated weighted-average dumping margins of sales at LTFV are shown in the ''Preliminary Determination'' section of this notice. Interested parties are invited to comment on this preliminary determination.

DATES: Effective November 14, 2016.

FOR FURTHER INFORMATION CONTACT: Michael J. Heaney or Erin Kearney, AD/CVD Operations, Office VI, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–4475 or (202) 482–0167, respectively.

SUPPLEMENTARY INFORMATION:

Background

The Department initiated this investigation on April 28, 2016.[1] We selected POSCO and POSCO Daewoo International Corp. as mandatory respondents in this investigation. For a complete description of the events that followed the initiation of this investigation, *see* the memorandum that is dated concurrently with this determination and hereby adopted by this notice.[2] A list of topics in the Preliminary Decision Memorandum is included as Appendix II to this notice.

The Preliminary Decision Memorandum is a public document and is made available to the public via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov,* and is available to all parties in the Department's Central Records Unit, room B8024 of the main Department of Commerce building. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly on the Internet at *http://enforcement.trade.gov/frn/.* The signed Preliminary Decisiom Memorandum and the electronic version of the Preliminary Decision Memorandum are identical in content.

Scope of the Investigation

The product covered by this investigation is CTL plate from the Republic of Korea. For a full description of the scope of this investigation, *see* the ''Scope of the Investigation,'' in Appendix I of this notice.

Scope Comments

In accordance with the *Preamble* to the Department's regulations,[3] the *Initiation Notice* set aside a period of time for parties to raise issues regarding product coverage, *i.e.,* scope.[4] Certain interested parties commented on the scope of the concurrent CTL plate investigations as it appeared in the *Initiation Notice.* For a summary of the product coverage comments and rebuttal responses submitted to the records of this and the concurrent CTL plate investigations, and a discussion and analysis of all comments timely received, *see* the Department's Preliminary Scope Decision Memorandum and the Department's Additional Preliminary Scope Decision Memorandum.[5] The Department has preliminarily modified the scope language as it appeared in the *Initiation Notice* to clarify the exclusion for stainless steel plate, corrected two tariff numbers that were misidentified in the Petitions and in the *Initiation Notice,* and modified language pertaining to existing steel plate and hot-rolled flat-rolled steel orders.[6]

Methodology

The Department is conducting this investigation in accordance with section 731 of the Tariff Act of 1930, as amended (the Act). Export price and, where appropriate, constructed export price are calculated in accordance with section 772 of the the Act. Normal value (NV) is calculated in accordance with

[1] *See Certain Carbon and Alloy Steel Cut-To-Length Plate From Austria, Belgium, Brazil, France, the Federal Republic of Germany, Italy, Japan, the Republic of Korea, the People's Republic of China, South Africa, Taiwan, and the Republic of Turkey: Initiation of Less-Than-Fair Value Investigations,* 81 FR 27089 (May 5, 2016) (*Initiation Notice*).

[2] *See* Memorandum from Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, to Paul Piquado, Assistant Secretary for Enforcement and Compliance, entitled ''Decision Memorandum for the Preliminary Determination in the Antidumping Duty Investigation of Certain Carbon and Alloy Steel Cut-To-Length Plate From the Republic of Korea'' (Preliminary Decision Memorandum), dated concurrently with this notice.

[3] *See Antidumping Duties; Countervailing Duties; Final rule,* 62 FR 27296, 27323 (May 19, 1997) (*Preamble*).

[4] *See Initiation Notice,* 81 FR at 27090.

[5] *See* Memorandum to Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, ''Certain Carbon and Alloy Steel Cut-to-Length Plate From Austria, Belgium, Brazil, the People's Republic of China, France, the Federal Republic of Germany, Italy, Japan, the Republic of Korea, the Republic of South Africa, Taiwan, and Turkey: Scope Comments Decision Memorandum for the Preliminary Determinations,'' dated September 6, 2016 (Preliminary Scope Decision Memorandum), and Memorandum to Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, Certain Carbon and Alloy Steel Cut-to-Length Plate From Austria, Belgium, Brazil, the People's Republic of China, France, the Federal Republic of Germany, Italy, Japan, the Republic of Korea, the Republic of South Africa, Taiwan, and Turkey: Additional Scope Comments Preliminary Decision Memorandum and Extension of Deadlines for Scope Case Briefs and Scope Rebuttal Briefs,'' dated October 13, 2016 (Additional Preliminary Scope Decision Memorandum), respectively.

[6] *See* Preliminary Scope Decision Memorandum at 2 and 56, and Additional Preliminary Scope Decision Memorandum at 10–11 and 20.

section 773 of the Act. For a full description of the methodology underlying our preliminary conclusions, *see* the Preliminary Decision Memorandum.

All-Others Rate

Consistent with sections 733(d)(1)(A)(ii) and 735(c)(5) of the Act, the Department also calculated an estimated all-others rate. Section 735(c)(5)(A) of the Act provides that the estimated all-others rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero and *de minimis* margins, and any margins determined entirely under section 776 of the Act. In this investigation, because we individually investigated only one exporter or producer, we based our calculation of the all-others rate on the weighted-average dumping margin calculated for POSCO.

Preliminary Determination

The Department preliminarily determines that CTL Palte from the Republic of Korea is being, or is likely to be, sold in the United States at LTFV, pursuant to section 733 of the Act, and that the following weighted-average dumping margins exist:

Exporter/ manufacturer	Weighted-average dumping margin (percent)
POSCO and POSCO Daewoo Corporation ...	6.82
All Others	6.82

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, we will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of all entries of subject merchandise from the Republic of Korea, as described in Appendix I of this notice, which are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**.

Pursuant to section 733(d) of the Act and 19 CFR 351.205(d), we will instruct CBP to require cash deposits [7] equal to the weighted-average amount by which the NV exceeds U.S. price, as indicated in the chart above, adjusted where appropriate for export subsidies.[8] However, the preliminary determination in the concurrent countervailing duty investigation was negative.[9] Therefore, no adjustments for export subsidies will be applied to the weighted average dumping margin preliminarily calculated for POSCO, and for the all-other rates. The Department will instruct CBP to require cash deposits equal to the weighted average amount by which NV exceeds U.S. price, as indicated in the chart above, as follows: (1) The rate for the mandatory respondent listed above will be the respondent-specific rate we determined in this preliminary determination; (2) if the exporter is not a mandatory respondent identified above, but the producer is, the rate will be the specific rate established for the producer of the subject merchandise; and (3) the rate for all other producers or exporters will be the all-others rate. These suspension of liquidation instructions will remain in effect until further notice.

Disclosure

We intend to disclose the calculations performed to interested parties in this proceeding within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Verification

As provided in section 782(i) of the Act, we intend to verify information relied upon in making our final determination.

Public Comment

Interested parties are invited to comment on this preliminary determination. Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the final verification report is issued in this proceeding, and rebuttal briefs, limited to issues raised in case briefs, may be submitted no later than five days after the deadline date for case briefs.[10] Pursuant to 19 CFR 351.309(c)(2) and (d)(2), parties who submit case briefs or rebuttal briefs in this proceeding are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.

The Department established separate deadlines for interested parties to provide comments on scope issues.[11] Specifically, case briefs on scope issues were to be submitted no later than October 21, 2016. Scope rebuttal briefs, limited to issues raised in the scope case briefs, were to be submitted no later than November 1, 2016.[12] The Department explained that parties should limit comments on scope issues to their scope case brief and their scope rebuttal brief. [13] Thus, comments on scope issues belong in parties' scope case briefs and scope rebuttal briefs only and not in other case briefs and rebuttal briefs submitted in this investigation. The Department intends to address parties' scope comments in a final scope memorandum.

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce. All documents must be filed electronically using ACCESS. An electronically-filed request must be received successfully in its entirety by ACCESS by 5:00 p.m. Eastern Time, within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, and a list of the issues to be discussed. If a request for a hearing is made, the Department intends to hold the hearing at the U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230, at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. Section 351.210(e)(2) of the Department's regulations requires that requests by respondents for postponement of a final determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.

Respondent POSCO has requested that, in the event of an affirmative preliminary determination in this investigation, the Department postpone its final determination, *i.e.,* to 135 days after publication of the preliminary determination. Further, POSCO agreed to extend the application of the provisional measures prescribed under section 733(d) of the Act and 19 CFR 351.210(e)(2), from a four-month period to a period not to exceed six months.[14]

In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because (1) our preliminary determination is affirmative; (2) the requesting exporters account for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, we are postponing the final determination until no later than 135 days after the publication of this notice in the **Federal Register** and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, we will issue our final determination no later than 135 days after the date of publication of this preliminary determination, pursuant to section 735(a)(2) of the Act.[15]

International Trade Commission (ITC) Notification

In accordance with section 733(f) of the Act, we are notifying the ITC of our affirmative preliminary determination of sales at LTFV. If our final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after our final determination whether these imports are materially injuring, or threaten material injury to, the U.S. industry.

This determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act and 19 CFR 351.205(c).

Dated: November 4, 2016.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

Appendix I—Scope of the Investigation

The products covered by this investigation are certain carbon and alloy steel hot-rolled or forged flat plate products not in coils, whether or not painted, varnished, or coated with plastics or other non-metallic substances (cut-to-length plate). Subject merchandise includes plate that is produced by being cut-to-length from coils or from other discrete length plate and plate that is rolled or forged into a discrete length. The products covered include (1) Universal mill plates (*i.e.,* flat-rolled products rolled on four faces or in a closed box pass, of a width exceeding 150 mm but not exceeding 1250 mm, and of a thickness of not less than 4 mm, which are not in coils and without patterns in relief), and (2) hot-rolled or forged flat steel products of a thickness of 4.75 mm or more and of a width which exceeds 150 mm and measures at least twice the thickness, and which are not in coils, whether or not with patterns in relief. The covered products described above may be rectangular, square, circular or other shapes and include products of either rectangular or non-rectangular cross-section where such non-rectangular cross-section is achieved subsequent to the rolling process, *i.e.,* products which have been ''worked after rolling'' (*e.g.,* products which have been beveled or rounded at the edges).

For purposes of the width and thickness requirements referenced above, the following rules apply:

(1) Except where otherwise stated where the nominal and actual thickness or width measurements vary, a product from a given subject country is within the scope if application of either the nominal or actual measurement would place it within the scope based on the definitions set forth above unless the product is already covered by an order existing on that specific country (*i.e., Certain Hot Rolled Steel Flat Products From Australia, Brazil, Japan, the Republic of Korea, the Netherlands, the Republic of Turkey, and the United Kingdom: Amended Final Affirmative Antidumping Determination for Australia, the Republic of Korea, and the the Republic of Turkey and Antidumping Duty Orders,* 81 FR 67962 (October 3, 2016), and

(2) where the width and thickness vary for a specific product (*e.g.,* the thickness of certain products with non-rectangular cross-section, the width of certain products with non-rectangular shape, *etc.*), the measurement at its greatest width or thickness applies.

Steel products included in the scope of this investigation are products in which: (1) Iron predominates, by weight, over each of the other contained elements; and (2) the carbon content is 2 percent or less by weight.

Subject merchandise includes cut-to-length plate that has been further processed in the subject country or a third country, including but not limited to pickling, oiling, levelling, annealing, tempering, temper rolling, skin passing, painting, varnishing, trimming, cutting, punching, beveling, and/or slitting, or any other processing that would not otherwise remove the merchandise from the scope of the investigation if performed in the country of manufacture of the cut-to-length plate.

All products that meet the written physical description, are within the scope of this investigation unless specifically excluded or covered by the scope of an existing order. The following products are outside of, and/or specifically excluded from, the scope of this investigation:

(1) Products clad, plated, or coated with metal, whether or not painted, varnished or coated with plastic or other non-metallic substances;

(2) military grade armor plate certified to one of the following specifications or to a specification that references and incorporates one of the following specifications:

- MIL–A–12560,
- MIL–DTL–12560H,
- MIL–DTL–12560J,
- MIL–DTL–12560K,
- MIL–DTL–32332,
- MIL–A–46100D,
- MIL–DTL–46100–E,
- MIL–46177C,
- MIL–S–16216K Grade HY80,
- MIL–S–16216K Grade HY100,
- MIL–S–24645A HSLA–80;
- MIL–S–24645A HSLA–100,
- T9074–BD–GIB–010/0300 Grade HY80,
- T9074–BD–GIB–010/0300 Grade HY100,
- T9074–BD–GIB–010/0300 Grade HSLA80,
- T9074–BD–GIB–010/0300 Grade HSLA100, and
- T9074–BD–GIB–010/0300 Mod. Grade HSLA115,

except that any cut-to-length plate certified to one of the above specifications, or to a military grade armor specification that references and incorporates one of the above specifications, will not be excluded from the scope if it is also dual- or multiple-certified to any other non-armor specification that otherwise would fall within the scope of this order;

(3) stainless steel plate, containing 10.5 percent or more of chromium by weight and not more than 1.2 percent of carbon by weight;

(4) CTL plate meeting the requirements of ASTM A–829, Grade E 4340 that are over 305 mm in actual thickness;

(5) Alloy forged and rolled CTL plate greater than or equal to 152.4 mm in actual thickness meeting each of the following requirements:

(a) Electric furnace melted, ladle refined & vacuum degassed and having a chemical

[14] *See* Letter from POSCO to Secretary of Commerce Re: Carbon and Alloy Steel Cut to Length Plate from Korea: Request to Postpone the Final Determination dated October 31, 2016 (POSCO Final Postponement Request).

[15] *See* 19 CFR 351.210(b)(2) and (e).

composition (expressed in weight percentages):
- Carbon 0.23–0.28,
- Silicon 0.05–0.20,
- Manganese 1.20–1.60,
- Nickel not greater than 1.0,
- Sulfur not greater than 0.007,
- Phosphorus not greater than 0.020,
- Chromium 1.0–2.5,
- Molybdenum 0.35–0.80,
- Boron 0.002–0.004,
- Oxygen not greater than 20 ppm,
- Hydrogen not greater than 2 ppm, and
- Nitrogen not greater than 60 ppm;

(b) With a Brinell hardness measured in all parts of the product including mid thickness falling within one of the following ranges:

(i) 270–300 HBW,

(ii) 290–320 HBW, or

(iii) 320–350HBW;

(c) Having cleanliness in accordance with ASTM E45 method A (Thin and Heavy): A not exceeding 1.5, B not exceeding 1.0, C not exceeding 0.5, D not exceeding 1.5; and

(d) Conforming to ASTM A578–S9 ultrasonic testing requirements with acceptance criteria 2 mm flat bottom hole;

(6) Alloy forged and rolled steel CTL plate over 407 mm in actual thickness and meeting the following requirements:

(a) Made from Electric Arc Furnace melted, Ladle refined & vacuum degassed, alloy steel with the following chemical composition (expressed in weight percentages):
- Carbon 0.23–0.28,
- Silicon 0.05–0.15,
- Manganese 1.20–1.50,
- Nickel not greater than 0.4,
- Sulfur not greater than 0.010,
- Phosphorus not greater than 0.020,
- Chromium 1.20–1.50,
- Molybdenum 0.35–0.55,
- Boron 0.002–0.004,
- Oxygen not greater than 20 ppm,
- Hydrogen not greater than 2 ppm, and
- Nitrogen not greater than 60 ppm;

(b) Having cleanliness in accordance with ASTM E45 method A (Thin and Heavy): A not exceeding 1.5, B not exceeding 1.5, C not exceeding 1.0, D not exceeding 1.5;

(c) Having the following mechanical properties:

(i) With a Brinell hardness not more than 237 HBW measured in all parts of the product including mid thickness; and having a Yield Strength of 75ksi min and UTS 95ksi or more, Elongation of 18% or more and Reduction of area 35% or more; having charpy V at −75 degrees F in the longitudinal direction equal or greater than 15 ft. lbs (single value) and equal or greater than 20 ft. lbs (average of 3 specimens) and conforming to the requirements of NACE MR01–75; or

(ii) With a Brinell hardness not less than 240 HBW measured in all parts of the product including mid thickness; and having a Yield Strength of 90 ksi min and UTS 110 ksi or more, Elongation of 15% or more and Reduction of area 30% or more; having charpy V at −40 degrees F in the longitudinal direction equal or greater than 21 ft. lbs (single value) and equal or greater than 31 ft. lbs (average of 3 specimens);

(d) Conforming to ASTM A578–S9 ultrasonic testing requirements with acceptance criteria 3.2 mm flat bottom hole; and

(e) Conforming to magnetic particle inspection in accordance with AMS 2301;

(7) Alloy forged and rolled steel CTL plate over 407 mm in actual thickness and meeting the following requirements:

(a) Made from Electric Arc Furnace melted, ladle refined & vacuum degassed, alloy steel with the following chemical composition (expressed in weight percentages):
- Carbon 0.25–0.30,
- Silicon not greater than 0.25,
- Manganese not greater than 0.50,
- Nickel 3.0–3.5,
- Sulfur not greater than 0.010,
- Phosphorus not greater than 0.020,
- Chromium 1.0–1.5,
- Molybdenum 0.6–0.9,
- Vanadium 0.08 to 0.12
- Boron 0.002–0.004,
- Oxygen not greater than 20 ppm,
- Hydrogen not greater than 2 ppm, and
- Nitrogen not greater than 60 ppm.

(b) Having cleanliness in accordance with ASTM E45 method A (Thin and Heavy): A not exceeding 1.0(t) and 0.5(h), B not exceeding 1.5(t) and 1.0(h), C not exceeding 1.0(t) and 0.5(h), and D not exceeding 1.5(t) and 1.0(h);

(c) Having the following mechanical properties: A Brinell hardness not less than 350 HBW measured in all parts of the product including mid thickness; and having a Yield Strength of 145ksi or more and UTS 160ksi or more, Elongation of 15% or more and Reduction of area 35% or more; having charpy V at −40 degrees F in the transverse direction equal or greater than 20 ft. lbs (single value) and equal or greater than 25 ft. lbs (average of 3 specimens);

(d) Conforming to ASTM A578–S9 ultrasonic testing requirements with acceptance criteria 3.2 mm flat bottom hole; and

(e) Conforming to magnetic particle inspection in accordance with AMS 2301.

At the time of the filing of the petition, there was an existing antidumping duty order on certain cut-to-length carbon-quality steel plate products from Korea. *See Notice of Final Determination of Sales at Less Than Fair Value: Certain Cut-To-Length Carbon-Quality Steel Plate Products from Korea,* 64 FR 73,196 (Dep't Commerce Dec. 29, 1999), as amended, 65 FR 6,585 (Dep't Commerce Feb 10, 2000) (1999 Korea AD Order). The scope of the antidumping duty investigation with regard to cut-to-length plate from Korea covers only (1) subject cut-to-length plate not within the physical description of cut-to-length carbon quality steel plate in the 1999 Korea AD Order, regardless of producer or exporter; and (2) cut-to-length plate produced and/or exported by those companies that were excluded or revoked from the 1999 Korea AD Order as of April 8, 2016. The only revoked or excluded company is Pohang Iron and Steel Company, also known as POSCO.

The products subject to the investigation are currently classified in the Harmonized Tariff Schedule of the United States (HTSUS) under item numbers: 7208.40.3030, 7208.40.3060, 7208.51.0030, 7208.51.0045, 7208.51.0060, 7208.52.0000, 7211.13.0000, 7211.14.0030, 7211.14.0045, 7225.40.1110, 7225.40.1180, 7225.40.3005, 7225.40.3050, 7226.20.0000, and 7226.91.5000.

The products subject to the investigation may also enter under the following HTSUS item numbers: 7208.40.6060, 7208.53.0000, 7208.90.0000, 7210.70.3000, 7210.90.9000, 7211.19.1500, 7211.19.2000, 7211.19.4500, 7211.19.6000, 7211.19.7590, 7211.90.0000, 7212.40.1000, 7212.40.5000, 7212.50.0000, 7214.10.0000, 7214.30.0010, 7214.30.0080, 7214.91.0015, 7214.91.0060, 7214.91.0090, 7225.11.0000, 7225.19.0000, 7225.40.5110, 7225.40.5130, 7225.40.5160, 7225.40.7000, 7225.99.0010, 7225.99.0090, 7226.11.1000, 7226.11.9060, 7226.19.1000, 7226.19.9000, 7226.91.0500, 7226.91.1530, 7226.91.1560, 7226.91.2530, 7226.91.2560, 7226.91.7000, 7226.91.8000, and 7226.99.0180.

The HTSUS subheadings above are provided for convenience and customs purposes only. The written description of the scope of the investigation is dispositive

DEPARTMENT OF COMMERCE

International Trade Administration

[A–570–967, C–570–968]

Aluminum Extrusions From the People's Republic of China: Affirmative Preliminary Determination of Circumvention of the Antidumping and Countervailing Duty Orders and Intent To Rescind Minor Alterations Anti-Circumvention Inquiry

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the Department) preliminarily determines that heat-treated extruded aluminum products that meet the chemical specifications for 5050-grade aluminum alloy, regardless of producer, exporter, or importer, constitute later-developed merchandise, and are circumventing the antidumping (AD) and countervailing duty (CVD) orders on aluminum extrusions from the People's Republic of China (PRC). The Department also preliminarily intends to rescind its minor alterations anti-circumvention.

DATES: Effective November 14, 2016.

FOR FURTHER INFORMATION CONTACT: Scott Hoefke or Erin Kearney, AD/CVD Operations, Office VI, Enforcement & Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC, 20230; telephone: (202) 482–4947 or (202) 482–0167, respectively.

SUPPLEMENTARY INFORMATION:

Background

Based on a request from Aluminum Extrusions Fair Trade Committee (Petitioner),[1] on March 21, 2016, the Department initiated its anti-circumvention inquiry [2] pursuant to sections 781(c) and (d) of the Tariff Act of 1930, as amended (the Act) to determine whether extruded aluminum products that meet the chemical specifications for 5050-grade aluminum alloy, which are heat-treated, and are exported by China Zhongwang Holdings Ltd. and its affiliates (collectively, Zhongwang), are circumventing the AD and CVD orders on aluminum extrusions from the PRC.[3] We also indicated in our *Initiation Notice* that we intended to consider whether the inquiry should apply to all such imports of extruded aluminum products, regardless of producer, exporter, or importer, from the PRC. During the course of the proceeding, the Department issued a questionnaire to Zhongwang, who did not respond, and also received additional factual information and comments from Petitioner and Endura Products Inc., a domestic interested party.

Scope of the Orders

The merchandise covered by the *Orders* are aluminum extrusions from the People's Republic of China. The merchandise subject to the orders are currently classifiable in the Harmonized Tariff Schedule of the United States (HTSUS): 8481.90.9060, 8481.90.9085, 9031.90.9195, 8424.90.9080, 9405.99.4020, 9031.90.90.95, 7616.10.90.90, 7609.00.00, 7610.10.00, 7610.90.00, 7615.10.30, 7615.10.71, 7615.10.91, 7615.19.10, 7615.19.30, 7615.19.50, 7615.19.70, 7615.19.90, 7615.20.00, 7616.99.10, 7616.99.50, 8479.89.98, 8479.90.94, 8513.90.20, 9403.10.00, 9403.20.00, 7604.21.00.00, 7604.29.10.00, 7604.29.30.10, 7604.29.30.50, 7604.29.50.30, 7604.29.50.60, 7608.20.00.30, 7608.20.00.90, 8302.10.30.00, 8302.10.60.30, 8302.10.60.60, 8302.10.60.90, 8302.20.00.00, 8302.30.30.10, 8302.30.30.60, 8302.41.30.00, 8302.41.60.15, 8302.41.60.45, 8302.41.60.50, 8302.41.60.80, 8302.42.30.10, 8302.42.30.15, 8302.42.30.65, 8302.49.60.35, 8302.49.60.45, 8302.49.60.55, 8302.49.60.85, 8302.50.00.00, 8302.60.90.00, 8305.10.00.50, 8306.30.00.00, 8414.59.60.90, 8415.90.80.45, 8418.99.80.05, 8418.99.80.50, 8418.99.80.60, 8419.90.10.00, 8422.90.06.40, 8473.30.20.00, 8473.30.51.00, 8479.90.85.00, 8486.90.00.00, 8487.90.00.80, 8503.00.95.20, 8508.70.00.00, 8515.90.20.00, 8516.90.50.00, 8516.90.80.50, 8517.70.00.00, 8529.90.73.00, 8529.90.97.60, 8536.90.80.85, 8538.10.00.00, 8543.90.88.80, 8708.29.50.60, 8708.80.65.90, 8803.30.00.60, 9013.90.50.00, 9013.90.90.00, 9401.90.50.81, 9403.90.10.40, 9403.90.10.50, 9403.90.10.85, 9403.90.25.40, 9403.90.25.80, 9403.90.40.05, 9403.90.40.10, 9403.90.40.60, 9403.90.50.05, 9403.90.50.10, 9403.90.50.80, 9403.90.60.05, 9403.90.60.10, 9403.90.60.80, 9403.90.70.05, 9403.90.70.10, 9403.90.70.80, 9403.90.80.10, 9403.90.80.15, 9403.90.80.20, 9403.90.80.41, 9403.90.80.51, 9403.90.80.61, 9506.11.40.80, 9506.51.40.00, 9506.51.60.00, 9506.59.40.40, 9506.70.20.90, 9506.91.00.10, 9506.91.00.20, 9506.91.00.30, 9506.99.05.10, 9506.99.05.20, 9506.99.05.30, 9506.99.15.00, 9506.99.20.00, 9506.99.25.80, 9506.99.28.00, 9506.99.55.00, 9506.99.60.80, 9507.30.20.00, 9507.30.40.00, 9507.30.60.00, 9507.90.60.00, and 9603.90.80.50.

Products subject to these orders may also enter under HTSUS: 7610.10, 7610.90, 7615.19, 7615.20, and 7616.99 as well as under other HTSUS chapters. Subject merchandise may also enter under HTSUS numbers: 8418.99.80.50 and 8418.99.80.60. While HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of these *Orders* is dispositive.[4]

Merchandise Subject to the Anti-Circumvention Inquiry

The products covered by this inquiry are heat-treated extruded aluminum products that meet the chemical specifications for 5050-grade aluminum alloy (inquiry merchandise), regardless of producer, exporter, or importer, from the PRC.

Methodology

The Department has conducted this circumvention inquiry in accordance with section 781(d) of the Act and 19 CFR 351.225(j). For a full description of the methodology underlying our conclusions, *see* the Preliminary Decision Memorandum. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (''ACCESS''). ACCESS is available to registered users at *http://access.trade.gov* and is available to all parties in the Central Records Unit, room B8024 of the main Department of Commerce building. In addition, the signed Preliminary Decision Memorandum can be accessed directly at *http://enforcement.trade.gov/frn/index.html.* The signed and electronic versions of the Preliminary Decision Memorandum are identical in content. A list of topics discussed in the Preliminary Decision Memorandum is attached as an Appendix to this notice.

Affirmative Preliminary Determination of Circumvention

Based on our analysis, as detailed in the Preliminary Decision Memorandum,

[1] *See* Letter to the Secretary from Petitioner, ''Aluminum Extrusions from the People's Republic of China: Resubmission of Circumvention Inquiry Request Pursuant to the Department's Request,'' dated December 30, 2015.

[2] *See Aluminum Extrusions from the People's Republic of China: Initiation of Anti-Circumvention Inquiry,* 81 FR 15039 (March 21, 2016) (*Initiation Notice*).

[3] *See Aluminum Extrusions from the People's Republic of China: Antidumping Duty Order,* 76 FR 30650 (May 26, 2011) *and Aluminum Extrusions from the People's Republic of China: Countervailing Duty Order,* 76 FR 30653 (May 26, 2011) (collectively, the *Orders*).

[4] A full description of the scope of the *Orders* is contained in the memorandum to Paul Piquado, Assistant Secretary for Enforcement and Compliance, from Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, titled ''Anti-Circumvention Inquiry Regarding the Antidumping Duty and Countervailing Duty Orders on Aluminum Extrusions from the People's Republic of China: Preliminary Determination Decision Memorandum'' (Preliminary Decision Memorandum), dated concurrently with, and adopted by, this notice.

we preliminarily find that all imports from the PRC of heat-treated extruded aluminum products that meet the chemical specifications for 5050-grade aluminum alloy, regardless of producer, exporter, or importer, constitute later-developed merchandise that is circumventing, and should be included within, the scope of the *Orders*.[5] In addition, if in our final determination we affirm our preliminary determination pursuant to section 781(d) of the Act, the Department intends to rescind its minor alterations anti-circumvention inquiry pursuant to section 781(c) of the Act.

Suspension of Liquidation

In accordance with 19 CFR 351.225(l)(2), the Department will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of inquiry merchandise from the PRC (regardless of producer, exporter, or importer), entered, or withdrawn from warehouse, for consumption, on or after March 21, 2016, the date of publication of the initiation of this inquiry. The Department will also instruct CBP to require a cash deposit of estimated duties at the rate applicable to the exporter, on all unliquidated entries of inquiry merchandise entered, or withdrawn from warehouse, for consumption on or after March 21, 2016.

Intent To Consider Certification Requirement

In light of the Department's preliminary finding of circumvention, the Department intends to consider whether to require importers of certain aluminum extrusions who claim their merchandise is not subject to the *Orders* to maintain a certification certifying that their aluminum extrusions were not produced from heat-treated 5050 grade aluminum alloy. The Department intends to invite comments on this issue.

Notification to the International Trade Commission

As discussed in the Preliminary Decision Memorandum, because the Department has preliminarily determined, for purposes of sections 781(d)(1) and (e) of the Act, that the inquiry merchandise does not incorporate a significant technological advance or significant alteration of an earlier product, the Department is not notifying the ITC of its preliminary determination.

[5] *See* section 781(d) of the Act and 19 CFR 351.225(i).

Public Comment

The Department may solicit new factual information in this inquiry. Additionally, should a party seek to submit new factual information, the Department intends to consider requests to accept new factual information on a case-by-case basis.

The Department will invite comments on this preliminary determination and issue a memorandum establishing a briefing schedule. Interested parties may submit case briefs and rebuttal briefs within the designated timeframe outlined in the memorandum. Rebuttals to case briefs are limited to issues raised in the case briefs. Parties who submit case or rebuttal briefs are requested to submit with the argument: (a) A statement of the issue, (b) a brief summary of the argument, and (c) a table of authorities. Parties submitting briefs should do so using the Department's electronic filing system, ACCESS.

Interested parties who wish to request a hearing must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, filed electronically using ACCESS. A written request for a hearing must be received successfully in its entirety by the Department's electronic records system, ACCESS, by 5:00 p.m. Eastern Time, within 30 days after the date of publication of this notice.[6] Hearing requests should contain the party's name, address, and telephone number, the number of participants, and a list of the issues parties intend to present at the hearing. If a request for a hearing is made, the Department intends to hold the hearing at the U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230, at a time and location to be determined.

Final Determination

Pursuant to section 781(f) of the Act, the final determination with respect to this anti-circumvention inquiry, including the results of the Department's analysis of any written comments, will be issued no later than January 9, 2017, unless extended.[7]

This preliminary affirmative anti-circumvention determination is published in accordance with section 781(d) of the Act and 19 CFR 351.225.

[6] *See* 19 CFR 351.310(c).

[7] This date reflect the next business day after the 300 day deadline of January 8, 2017. *See Notice of Clarification: Application of ''Next Business Day'' Rule for Administrative Determination Deadlines Pursuant to the Tariff Act of 1930, As Amended,* 70 FR 24533 (May 10, 2005).

Dated: November 3, 2016.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

Certain Carbon and Alloy Steel Cut-to-Length Plate From the Federal Republic of Germany: Preliminary Determination of Sales at Less Than Fair Value and Postponement of Final Determination

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the Department) preliminarily determines that certain carbon and alloy steel cut-to-length plate (CTL plate) from the Federal Republic of Germany (Germany) is being, or is likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is April 1, 2015, through March 31, 2016. The estimated weighted-average dumping margins of sales at LTFV are shown in the ''Preliminary Determination'' section of this notice. Interested parties are invited to comment on this preliminary determination.

DATES: Effective November 14, 2016.

FOR FURTHER INFORMATION CONTACT: Ross Belliveau or David J. Goldberger, AD/CVD Operations, Office II, Enforcement and Compliance, International Trade

Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–4952 or (202) 482–4136, respectively.

SUPPLEMENTARY INFORMATION:

Background

The Department initiated this investigation on April 28, 2016.[1] For a complete description of the events that followed the initiation of this investigation, *see* the memorandum that is dated concurrently with this determination and hereby adopted by this notice.[2] A list of topics in the Preliminary Decision Memorandum is included as Appendix II to this notice.

The Preliminary Decision Memorandum is a public document and is made available to the public via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov,* and is available to all parties in the Department's Central Records Unit, Room B8024 of the main Department of Commerce building. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly on the internet at *http://enforcement.trade.gov/frn/.* The signed Preliminary Decision Memorandum and the electronic version of the Preliminary Decision Memorandum are identical in content.

Scope of the Investigation

The product covered by this investigation is CTL plate from Germany. For a full description of the scope of this investigation, *see* the ''Scope of the Investigation,'' in Appendix I of this notice.

Scope Comments

In accordance with the *Preamble* to the Department's regulations,[3] the *Initiation Notice* set aside a period of time for parties to raise issues regarding product coverage, *i.e.,* scope.[4] Certain interested parties commented on the scope of the concurrent CTL plate investigations as it appeared in the *Initiation Notice.* For a summary of the product coverage comments and rebuttal responses submitted to the records of this and the concurrent CTL plate investigations, and a discussion and analysis of all comments timely received, see the Department's Preliminary Scope Decision Memorandum and the Department's Additional Preliminary Scope Decision Memorandum.[5] The Department has preliminarily modified the scope language as it appeared in the *Initiation Notice* to clarify the exclusion for stainless steel plate, corrected two tariff numbers that were misidentified in the Petitions and in the *Initiation Notice,* and modified language pertaining to existing steel plate and hot-rolled flat-rolled steel orders.[6]

Methodology

The Department is conducting this investigation in accordance with section 731 of the Act. There are two mandatory respondents participating in this investigation, AG der Dillinger Hüttenwerke (Dillinger) and Ilsenburger Grobblech GmbH, Salzgitter Mannesmann Grobblech GmbH, Salzgitter Flachstahl GmbH, and Salzgitter Mannesmann International GmbH (collectively, Salzgitter).[7] Export price and, where appropriate, constructed export price, are calculated in accordance with section 772 of the Tariff Act of 1930, as amended (the Act). Normal value (NV) is calculated in accordance with section 773 of the Act. For a full description of the methodology underlying our preliminary conclusions, *see* the Preliminary Decision Memorandum.

All-Others Rate

Consistent with sections 733(d)(1)(A)(ii) and 735(c)(5) of the Act, the Department also calculated an estimated all-others rate. Section 735(c)(5)(A) of the Act provides that the estimated all-others rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero, and *de minimis* margins, and any margins determined entirely under section 776 of the Act. Because we calculated a *de minimis* weighted average dumping margin for Salzgitter, we have based the all-others rate on the estimated weighted-average dumping margin calculated for Dillinger, the other mandatory respondent in this investigation.

Preliminary Determination

The Department preliminarily determines that CTL plate from Germany is being, or is likely to be, sold in the United States at LTFV, pursuant to section 733 of the Act, and that the following estimated weighted-average dumping margins exist:

Exporter/manufacturer	Weighted-average dumping margin (percent)
AG der Dillinger Hüttenwerke	6.56
Ilsenburger Grobblech GmbH, Salzgitter Mannesmann Grobblech GmbH, Salzgitter Flachstahl GmbH, and Salzgitter Mannesmann International GmbH	0.00
All-Others	6.56

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, we will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of all entries of subject merchandise from Germany, with the exception of those produced and/or exported by Salzgitter, as described in Appendix I of this notice, which are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal**

[1] *See Certain Carbon and Alloy Steel Cut-to-Length Plate From Austria, Belgium, Brazil, France, the Federal Republic of Germany, Italy, Japan, the Republic of Korea, the People's Republic of China, South Africa, Taiwan, and the Republic of Turkey: Initiation of Less-Than-Fair Value Investigations,* 81 FR 27089 (May 5, 2016) (*Initiation Notice*).

[2] *See* Memorandum from Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, to Paul Piquado, Assistant Secretary for Enforcement and Compliance, entitled ''Decision Memorandum for the Preliminary Determination in the Antidumping Duty Investigation of Certain Carbon and Alloy Steel Cut-To-Length Plate From Germany'' (Preliminary Decision Memorandum), dated concurrently with this notice.

[3] *See Antidumping Duties; Countervailing Duties; Final rule,* 62 FR 27296, 27323 (May 19, 1997) (*Preamble*).

[4] *See Initiation Notice,* 81 FR at 27090.

[5] *See* Memorandum to Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, entitled, ''Certain Carbon and Alloy Steel Cut-to-Length Plate From Austria, Belgium, Brazil, the People's Republic of China, France, the Federal Republic of Germany, Italy, Japan, the Republic of Korea, the Republic of South Africa, Taiwan, and Turkey: Scope Comments Decision Memorandum for the Preliminary Determinations,'' dated September 6, 2016 (Preliminary Scope Decision Memorandum), and Memorandum to Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, entitled, ''Certain Carbon and Alloy Steel Cut-to-Length Plate From Austria, Belgium, Brazil, the People's Republic of China, France, the Federal Republic of Germany, Italy, Japan, the Republic of Korea, the Republic of South Africa, Taiwan, and Turkey: Additional Scope Comments Preliminary Decision Memorandum and Extension of Deadlines for Scope Case Briefs and Scope Rebuttal Briefs,'' dated October 13, 2016 (Additional Preliminary Scope Decision Memorandum), respectively.

[6] *See* Preliminary Scope Decision Memorandum at 2 and 56, and Additional Preliminary Scope Decision Memorandum at 10–11 and 20.

[7] *See* Memorandum to Melissa G. Skinner, Director, AD/CVD Operations Office II, entitled, ''Whether to Collapse Salzgitter Mannesmann International GmbH and its Affiliated Producers in the Antidumping Duty Investigation of Certain Carbon and Alloy Steel Cut-to-Length Plate (CTL Plate) from the Federal Republic of Germany (Germany),'' dated October 27, 2016.

Register. Because the estimated preliminary weighted-average dumping margin for Salzgitter is zero, we are not directing CBP to suspend liquidation of entries of the merchandise it produced and/or exported.

Pursuant to section 733(d) of the Act and 19 CFR 351.205(d), we will instruct CBP to require cash deposits [8] equal to the weighted-average amount by which the NV exceeds U.S. price, as indicated in the chart above, as follows: (1) The rate for the mandatory respondents listed above will be the respondent-specific rates we determined in this preliminary determination; (2) if the exporter is not a mandatory respondent identified above, but the producer is, the rate will be the specific rate established for the producer of the subject merchandise; and (3) the rate for all other producers or exporters will be the all-others rate. These suspension of liquidation instructions will remain in effect until further notice.

Disclosure

We intend to disclose the calculations performed to interested parties in this proceeding within five days of the date of the public announcement of this notice in accordance with 19 CFR 351.224(b).

Verification

As provided in section 782(i) of the Act, we intend to verify information relied upon in making our final determination.

Public Comment

Interested parties are invited to comment on this preliminary determination. Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the final verification report is issued in this proceeding, and rebuttal briefs, limited to issues raised in case briefs, may be submitted no later than five days after the deadline date for case briefs.[9] Pursuant to 19 CFR 351.309(c)(2) and (d)(2), parties who submit case briefs or rebuttal briefs in this proceeding are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.

The Department established separate deadlines for interested parties to provide comments on scope issues.[10] Specifically, case briefs on scope issues were to be submitted no later than October 21, 2016. Scope rebuttal briefs, limited to issues raised in the scope case briefs, were to be submitted no later than November 1, 2016.[11] The Department explained that parties should limit comments on scope issues to their scope case brief and their scope rebuttal brief.[12] Thus, comments on scope issues belong in parties' scope case briefs and scope rebuttal briefs only and not in other case briefs and rebuttal briefs submitted in this investigation. The Department intends to address parties' scope comments in a final scope memorandum.

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, and a list of the issues to be discussed. If a request for a hearing is made, the Department intends to hold the hearing at the U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230, at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

All documents must be filed electronically using ACCESS. An electronically-filed request must be received successfully in its entirety by ACCESS by 5:00 p.m. Eastern Standard Time.

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. 19 CFR 351.210(e)(2) requires that requests by respondents for postponement of a final determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.

Respondents Dillinger and Salzgitter have requested that, in the event of an affirmative preliminary determination in this investigation, the Department postpone its final determination by 60 days (*i.e.,* to 135 days after publication of the preliminary determination).[13] Further, Salzgitter agreed to extend the application of the provisional measures prescribed under section 733(d) of the Act and 19 CFR 351.210(e)(2), from a four-month period to a period not to exceed six months.

In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because (1) our preliminary determination is affirmative; (2) Salzgitter accounts for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, we are postponing the final determination until no later than 135 days after the publication of this notice in the **Federal Register** and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, we will issue our final determination no later than 135 days after the date of publication of this preliminary determination, pursuant to section 735(a)(2) of the Act.[14]

International Trade Commission (ITC) Notification

In accordance with section 733(f) of the Act, we are notifying the ITC of our affirmative preliminary determination of sales at LTFV. If our final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after our final determination whether these imports are materially injuring, or threaten material injury to, the U.S. industry.

This determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act and 19 CFR 351.205(c).

[14] *See* 19 CFR 351.210(b)(2) and (e).

Dated: November 4, 2016.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

Appendix I—Scope of the Investigation

The products covered by this investigation are certain carbon and alloy steel hot-rolled or forged flat plate products not in coils, whether or not painted, varnished, or coated with plastics or other non-metallic substances (cut-to-length plate). Subject merchandise includes plate that is produced by being cut-to-length from coils or from other discrete length plate and plate that is rolled or forged into a discrete length. The products covered include (1) Universal mill plates (*i.e.,* flat-rolled products rolled on four faces or in a closed box pass, of a width exceeding 150 mm but not exceeding 1250 mm, and of a thickness of not less than 4 mm, which are not in coils and without patterns in relief), and (2) hot-rolled or forged flat steel products of a thickness of 4.75 mm or more and of a width which exceeds 150 mm and measures at least twice the thickness, and which are not in coils, whether or not with patterns in relief. The covered products described above may be rectangular, square, circular or other shapes and include products of either rectangular or non-rectangular cross-section where such non-rectangular cross-section is achieved subsequent to the rolling process, *i.e.,* products which have been ''worked after rolling'' (*e.g.,* products which have been beveled or rounded at the edges).

For purposes of the width and thickness requirements referenced above, the following rules apply:

(1) Except where otherwise stated where the nominal and actual thickness or width measurements vary, a product from a given subject country is within the scope if application of either the nominal or actual measurement would place it within the scope based on the definitions set forth above; and

(2) where the width and thickness vary for a specific product (*e.g.,* the thickness of certain products with non-rectangular cross-section, the width of certain products with non-rectangular shape, *etc.*), the measurement at its greatest width or thickness applies.

Steel products included in the scope of this investigation are products in which: (1) Iron predominates, by weight, over each of the other contained elements; and (2) the carbon content is 2 percent or less by weight.

Subject merchandise includes cut-to-length plate that has been further processed in the subject country or a third country, including but not limited to pickling, oiling, levelling, annealing, tempering, temper rolling, skin passing, painting, varnishing, trimming, cutting, punching, beveling, and/or slitting, or any other processing that would not otherwise remove the merchandise from the scope of the investigation if performed in the country of manufacture of the cut-to-length plate.

All products that meet the written physical description, are within the scope of this investigation unless specifically excluded or covered by the scope of an existing order. The following products are outside of, and/or specifically excluded from, the scope of this investigation:

(1) Products clad, plated, or coated with metal, whether or not painted, varnished or coated with plastic or other non-metallic substances;

(2) military grade armor plate certified to one of the following specifications or to a specification that references and incorporates one of the following specifications:

- MIL–A–12560,
- MIL–DTL–12560H,
- MIL–DTL–12560J,
- MIL–DTL–12560K,
- MIL–DTL–32332,
- MIL–A–46100D,
- MIL–DTL–46100–E,
- MIL–46177C,
- MIL–S–16216K Grade HY80,
- MIL–S–16216K Grade HY100,
- MIL–S–24645A HSLA–80;
- MIL–S–24645A HSLA–100,
- T9074–BD–GIB–010/0300 Grade HY80,
- T9074–BD–GIB–010/0300 Grade HY100,
- T9074–BD–GIB–010/0300 Grade HSLA80,
- T9074–BD–GIB–010/0300 Grade HSLA100, and
- T9074–BD–GIB–010/0300 Mod. Grade HSLA115,

except that any cut-to-length plate certified to one of the above specifications, or to a military grade armor specification that references and incorporates one of the above specifications, will not be excluded from the scope if it is also dual- or multiple-certified to any other non-armor specification that otherwise would fall within the scope of this order;

(3) stainless steel plate, containing 10.5 percent or more of chromium by weight and not more than 1.2 percent of carbon by weight;

(4) CTL plate meeting the requirements of ASTM A–829, Grade E 4340 that are over 305 mm in actual thickness;

(5) Alloy forged and rolled CTL plate greater than or equal to 152.4 mm in actual thickness meeting each of the following requirements:

(a) Electric furnace melted, ladle refined & vacuum degassed and having a chemical composition (expressed in weight percentages):

- Carbon 0.23–0.28,
- Silicon 0.05–0.20,
- Manganese 1.20–1.60,
- Nickel not greater than 1.0,
- Sulfur not greater than 0.007,
- Phosphorus not greater than 0.020,
- Chromium 1.0–2.5,
- Molybdenum 0.35–0.80,
- Boron 0.002–0.004,
- Oxygen not greater than 20 ppm,
- Hydrogen not greater than 2 ppm, and
- Nitrogen not greater than 60 ppm;

(b) With a Brinell hardness measured in all parts of the product including mid thickness falling within one of the following ranges:

(i) 270–300 HBW,

(ii) 290–320 HBW, or

(iii) 320–350HBW;

(c) Having cleanliness in accordance with ASTM E45 method A (Thin and Heavy): A not exceeding 1.5, B not exceeding 1.0, C not exceeding 0.5, D not exceeding 1.5; and

(d) Conforming to ASTM A578–S9 ultrasonic testing requirements with acceptance criteria 2 mm flat bottom hole;

(6) Alloy forged and rolled steel CTL plate over 407 mm in actual thickness and meeting the following requirements:

(a) Made from Electric Arc Furnace melted, Ladle refined & vacuum degassed, alloy steel with the following chemical composition (expressed in weight percentages):

- Carbon 0.23–0.28,
- Silicon 0.05–0.15,
- Manganese 1.20–1.50,
- Nickel not greater than 0.4,
- Sulfur not greater than 0.010,
- Phosphorus not greater than 0.020,
- Chromium 1.20–1.50,
- Molybdenum 0.35–0.55,
- Boron 0.002–0.004,
- Oxygen not greater than 20 ppm,
- Hydrogen not greater than 2 ppm, and
- Nitrogen not greater than 60 ppm;

(b) Having cleanliness in accordance with ASTM E45 method A (Thin and Heavy): A not exceeding 1.5, B not exceeding 1.5, C not exceeding 1.0, D not exceeding 1.5;

(c) Having the following mechanical properties:

(i) With a Brinell hardness not more than 237 HBW measured in all parts of the product including mid thickness; and having a Yield Strength of 75ksi min and UTS 95ksi or more, Elongation of 18% or more and Reduction of area 35% or more; having charpy V at −75 degrees F in the longitudinal direction equal or greater than 15 ft. lbs (single value) and equal or greater than 20 ft. lbs (average of 3 specimens) and conforming to the requirements of NACE MR01–75; or

(ii) With a Brinell hardness not less than 240 HBW measured in all parts of the product including mid thickness; and having a Yield Strength of 90 ksi min and UTS 110 ksi or more, Elongation of 15% or more and Reduction of area 30% or more; having charpy V at −40 degrees F in the longitudinal direction equal or greater than 21 ft. lbs (single value) and equal or greater than 31 ft. lbs (average of 3 specimens);

(d) Conforming to ASTM A578–S9 ultrasonic testing requirements with acceptance criteria 3.2 mm flat bottom hole; and

(e) Conforming to magnetic particle inspection in accordance with AMS 2301;

(7) Alloy forged and rolled steel CTL plate over 407 mm in actual thickness and meeting the following requirements:

(a) Made from Electric Arc Furnace melted, Ladle refined & vacuum degassed, alloy steel with the following chemical composition (expressed in weight percentages):

- Carbon 0.23–0.28,
- Silicon 0.05–0.15,
- Manganese 1.20–1.50,
- Nickel not greater than 0.4,
- Sulfur not greater than 0.010,
- Phosphorus not greater than 0.020,
- Chromium 1.20–1.50,
- Molybdenum 0.35–0.55,
- Boron 0.002–0.004,
- Oxygen not greater than 20 ppm,
- Hydrogen not greater than 2 ppm, and
- Nitrogen not greater than 60 ppm;

(b) Having cleanliness in accordance with ASTM E45 method A (Thin and Heavy): A

not exceeding 1.5, B not exceeding 1.5, C not exceeding 1.0, D not exceeding 1.5;

(c) Having the following mechanical properties:

(i) With a Brinell hardness not more than 237 HBW measured in all parts of the product including mid thickness; and having a Yield Strength of 75ksi min and UTS 95ksi or more, Elongation of 18% or more and Reduction of area 35% or more; having charpy V at −75 degrees F in the longitudinal direction equal or greater than 15 ft. lbs (single value) and equal or greater than 20 ft. lbs (average of 3 specimens) and conforming to the requirements of NACE MR01–75; or

(ii) With a Brinell hardness not less than 240 HBW measured in all parts of the product including mid thickness; and having a Yield Strength of 90 ksi min and UTS 110 ksi or more, Elongation of 15% or more and Reduction of area 30% or more; having charpy V at −40 degrees F in the longitudinal direction equal or greater than 21 ft. lbs (single value) and equal or greater than 31 ft. lbs (average of 3 specimens);

(d) Conforming to ASTM A578–S9 ultrasonic testing requirements with acceptance criteria 3.2 mm flat bottom hole; and

(e) Conforming to magnetic particle inspection in accordance with AMS 2301;

(7) Alloy forged and rolled steel CTL plate over 407 mm in actual thickness and meeting the following requirements:

(a) Made from Electric Arc Furnace melted, ladle refined & vacuum degassed, alloy steel with the following chemical composition (expressed in weight percentages):

- Carbon 0.25–0.30,
- Silicon not greater than 0.25,
- Manganese not greater than 0.50,
- Nickel 3.0–3.5,
- Sulfur not greater than 0.010,
- Phosphorus not greater than 0.020,
- Chromium 1.0–1.5,
- Molybdenum 0.6–0.9,
- Vanadium 0.08 to 0.12
- Boron 0.002–0.004,
- Oxygen not greater than 20 ppm,
- Hydrogen not greater than 2 ppm, and
- Nitrogen not greater than 60 ppm.

(b) Having cleanliness in accordance with ASTM E45 method A (Thin and Heavy): A not exceeding 1.0(t) and 0.5(h), B not exceeding 1.5(t) and 1.0(h), C not exceeding 1.0(t) and 0.5(h), and D not exceeding 1.5(t) and 1.0(h);

(c) Having the following mechanical properties: A Brinell hardness not less than 350 HBW measured in all parts of the product including mid thickness; and having a Yield Strength of 145ksi or more and UTS 160ksi or more, Elongation of 15% or more and Reduction of area 35% or more; having charpy V at −40 degrees F in the transverse direction equal or greater than 20 ft. lbs (single value) and equal or greater than 25 ft. lbs (average of 3 specimens);

(d) Conforming to ASTM A578–S9 ultrasonic testing requirements with acceptance criteria 3.2 mm flat bottom hole; and

(e) Conforming to magnetic particle inspection in accordance with AMS 2301.

The products subject to the investigation are currently classified in the Harmonized Tariff Schedule of the United States (HTSUS) under item numbers: 7208.40.3030, 7208.40.3060, 7208.51.0030, 7208.51.0045, 7208.51.0060, 7208.52.0000, 7211.13.0000, 7211.14.0030, 7211.14.0045, 7225.40.1110, 7225.40.1180, 7225.40.3005, 7225.40.3050, 7226.20.0000, and 7226.91.5000.

The products subject to the investigation may also enter under the following HTSUS item numbers: 7208.40.6060, 7208.53.0000, 7208.90.0000, 7210.70.3000, 7210.90.9000, 7211.19.1500, 7211.19.2000, 7211.19.4500, 7211.19.6000, 7211.19.7590, 7211.90.0000, 7212.40.1000, 7212.40.5000, 7212.50.0000, 7214.10.0000, 7214.30.0010, 7214.30.0080, 7214.91.0015, 7214.91.0060, 7214.91.0090, 7225.11.0000, 7225.19.0000, 7225.40.5110, 7225.40.5130, 7225.40.5160, 7225.40.7000, 7225.99.0010, 7225.99.0090, 7226.11.1000, 7226.11.9060, 7226.19.1000, 7226.19.9000, 7226.91.0500, 7226.91.1530, 7226.91.1560, 7226.91.2530, 7226.91.2560, 7226.91.7000, 7226.91.8000, and 7226.99.0180.

The HTSUS subheadings above are provided for convenience and customs purposes only. The written description of the scope of the investigation is dispositive.

Appendix II—List of Topics Discussed in the Preliminary Decision Memorandum

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

[A–570–047]

Certain Carbon and Alloy Steel Cut-To-Length Plate From the People's Republic of China: Preliminary Affirmative Determination of Sales at Less Than Fair Value

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (''Department'') preliminarily determines that certain carbon and alloy steel cut-to-length plate (''CTL plate'') from the People's Republic of China (''PRC'') is being, or is likely to be, sold in the United States at less than fair value (''LTFV''). The period of investigation (''POI'') is October 1, 2015, through March 31, 2016. The estimated dumping margin of sales at LTFV is shown in the ''Preliminary Determination'' section of this notice. Interested parties are invited to comment on this preliminary determination.

DATES: Effective November 14, 2016.

FOR FURTHER INFORMATION CONTACT: Irene Gorelik, AD/CVD Operations, Office VIII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–6905.

SUPPLEMENTARY INFORMATION:

Background

The Department initiated this investigation on April 28, 2016.[1] For a complete description of the events that followed the initiation of this investigation, *see* the memorandum that is dated concurrently with this determination and hereby adopted by this notice.[2] A list of topics in the Preliminary Decision Memorandum is included as Appendix II to this notice.

The Preliminary Decision Memorandum is a public document and is made available to the public via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (''ACCESS''). ACCESS is available to registered users at *https://access.trade.gov,* and is available to all parties in the Department's Central Records Unit, room B8024 of the main Department of Commerce building. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly on the internet at

[1] *See Certain Carbon and Alloy Steel Cut-To-Length Plate From Austria, Belgium, Brazil, France, the Federal Republic of Germany, Italy, Japan, the Republic of Korea, the People's Republic of China, South Africa, Taiwan, and the Republic of Turkey: Initiation of Less-Than-Fair-Value Investigations,* 81 FR 27089 (May 5, 2016) (''*Initiation Notice*'').

[2] *See* Memorandum from Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, to Paul Piquado, Assistant Secretary for Enforcement and Compliance, re: ''Decision Memorandum for the Preliminary Determination in the Antidumping Duty Investigation of Certain Carbon and Alloy Steel Cut-To-Length Plate from the People's Republic of China'' (''Preliminary Decision Memorandum'').

http://enforcement.trade.gov/frn/. The signed Preliminary Decision Memorandum and the electronic version of the Preliminary Decision Memorandum are identical in content.

Scope of the Investigation

The product covered by this investigation is CTL plate from the PRC. For a full description of the scope of this investigation, *see* the ''Scope of the Investigation'' in Appendix I of this notice.

Scope Comments

In accordance with the *Preamble* to the Department's regulations,[3] the *Initiation Notice* set aside a period of time for parties to raise issues regarding product coverage, *i.e.,* scope.[4] Certain interested parties commented on the scope of the concurrent CTL plate investigations as it appeared in the *Initiation Notice.* For a summary of the product coverage comments and rebuttal responses submitted to the records of this and the concurrent CTL plate investigations, and a discussion and analysis of all comments timely received, *see* the Department's Preliminary Scope Decision Memorandum and the Department's Additional Preliminary Scope Decision Memorandum.[5] The Department has preliminarily modified the scope language as it appeared in the *Initiation Notice* to clarify the exclusion for stainless steel plate, corrected two tariff numbers that were misidentified in the Petitions and in the *Initiation Notice,* and modified language pertaining to existing steel plate and hot-rolled flat-rolled steel orders.[6]

[3] *See Antidumping Duties; Countervailing Duties; Final rule,* 62 FR 27296, 27323 (May 19, 1997) (''*Preamble*'').

[4] *See Initiation Notice,* 81 FR at 27089.

[5] *See* Memorandum to Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, ''Certain Carbon and Alloy Steel Cut-to-Length Plate From Austria, Belgium, Brazil, the People's Republic of China, France, the Federal Republic of Germany, Italy, Japan, the Republic of Korea, the Republic of South Africa, Taiwan, and Turkey: Scope Comments Decision Memorandum for the Preliminary Determinations,'' dated September 6, 2016 (''Preliminary Scope Decision Memorandum''), and Memorandum to Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, Certain Carbon and Alloy Steel Cut-to-Length Plate From Austria, Belgium, Brazil, the People's Republic of China, France, the Federal Republic of Germany, Italy, Japan, the Republic of Korea, the Republic of South Africa, Taiwan, and Turkey: Additional Scope Comments Preliminary Decision Memorandum and Extension of Deadlines for Scope Case Briefs and Scope Rebuttal Briefs,'' dated October 13, 2016 (''Additional Preliminary Scope Decision Memorandum''), respectively.

[6] *See* Preliminary Scope Decision Memorandum at 2 and 56, and Additional Preliminary Scope Decision Memorandum at 10–11 and 20.

Methodology

The Department is conducting this investigation in accordance with section 731 of the Tariff Act of 1930, as amended (''the Act''). For purposes of this preliminary LTFV determination, the Department continues to treat the PRC as a non-market economy country within the meaning of section 771(18) of the Act. Jiangyin Xingcheng Special Steel Works Co., Ltd., the sole mandatory respondent in this investigation, is not entitled to a separate rate, and is included within the PRC-wide entity. Furthermore, because the PRC-wide entity did not cooperate to the best of its ability with the Department's requests for information, the Department preliminarily determines that the application of adverse facts available (''AFA'') is warranted for this preliminary determination, in accordance with sections 776(a) and (b) of the Act and 19 CFR 351.308. For a full discussion of the Department's methodology, *see* Preliminary Decision Memorandum.

Combination Rates

In the *Initiation Notice,* the Department stated that it would calculate combination rates for the respondents that are eligible for a separate rate in this investigation. *Policy Bulletin 05.1* describes this practice.[7] However, as described in the Preliminary Decision Memorandum, all parties subject to this investigation are preliminarily found to be part of the PRC-wide entity, to which we do not assign a separate combination rate.[8]

Preliminary Determination

The Department preliminarily determines that CTL plate from the PRC is being, or is likely to be, sold in the United States at LTFV, pursuant to section 733 of the Act, and that the following estimated dumping margin exists:

Exporter	Dumping margin (percent)
PRC-Wide Entity [9]	68.27

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, we will direct U.S. Customs and Border Protection (''CBP'') to suspend liquidation of all entries of subject merchandise from the PRC, as described in Appendix I of this notice, which are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. Pursuant to section 733(d) of the Act and 19 CFR 351.205(d), we will instruct CBP to require a cash deposit equal to the margin indicated in the chart above.[10] These suspension of liquidation instructions will remain in effect until further notice.

We normally adjust antidumping duty cash deposit rates by the amount of export subsidies, where appropriate. However, the Department is making no adjustments to the PRC-wide entity's antidumping cash deposit rate of 68.27 percent because the Department made no findings in the companion CVD investigation that any of the programs are export subsidies.[11]

Further, pursuant to section 777A(f) of the Act, we normally adjust cash deposit rates for estimated domestic subsidy pass-through, where appropriate. However, in this case there is no basis to grant a domestic subsidy pass-through adjustment.[12]

Disclosure

Normally, the Department discloses to interested parties the calculations performed in connection with a preliminary determination within five days of the date of public announcement of a preliminary determination, in accordance with 19 CFR 351.224(b). However, because the Department established only one rate in this investigation based entirely on AFA

[7] *See Enforcement and Compliance's Policy Bulletin No. 05.1, regarding, ''Separate-Rates Practice and Application of Combination Rates in Antidumping Investigations involving Non-Market Economy Countries''* (April 5, 2005) (''*Policy Bulletin 05.1*''), available on the Department's Web site at *http://enforcement.trade.gov/policy/bull05–1.pdf.*

See also Calcium Hypochlorite from the People's Republic of China: Preliminary Determination of Sales at Less Than Fair Value and Postponement of Final Determination,* 79 FR 43393, 43394 (July 25, 2014), unchanged in *Calcium Hypochlorite from the People's Republic of China: Final Determination of Sales at Less Than Fair Value,* 79 FR 74065 (December 15, 2014).

[9] As detailed in the Preliminary Decision Memorandum, Jiangyin Xingcheng Special Steel Works Co., Ltd. the sole mandatory respondent in this investigation, did not demonstrate that it was entitled to a separate rate. Accordingly, we consider this company to be part of the PRC-wide entity.

[10] *See Modification of Regulations Regarding the Practice of Accepting Bonds During the Provisional Measures Period in Antidumping and Countervailing Duty Investigations,* 76 FR 61042, (October 3, 2011).

[11] *See* Preliminary Decision Memorandum. *See also Circular Welded Carbon-Quality Steel Pipe from Pakistan: Affirmative Preliminary Determination of Sales at Less Than Fair Value and Postponement of Final Determination and Extension of Provisional Measures,* 81 FR 36867 (June 8, 2016) and accompanying Preliminary Decision Memorandum at page 13, unchanged in *Circular Welded Carbon-Quality Steel Pipe from Pakistan: Final Affirmative Determination of Sales at Less Than Fair Value,* 81 FR 75028 (October 28, 2016).

[12] *See* Preliminary Decision Memorandum.

in accordance with section 776 of the Act, there are no calculations to disclose. Accordingly, the calculations performed in connection with this preliminary determination are not proprietary in nature, and are described in the Petition and in the PRC AD Initiation Checklist.[13]

Verification

Because the only rate established in this investigation is based entirely on AFA, we do not intend to conduct verification.

Public Comment

Interested parties are invited to comment on this preliminary determination. Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance no later than 30 days after the date of publication of this preliminary determination and rebuttal briefs, limited to issues raised in case briefs, may be submitted no later than five days after the deadline date for case briefs.[14] Pursuant to 19 CFR 351.309(c)(2) and (d)(2), parties who submit case briefs or rebuttal briefs in this proceeding are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.

The Department established separate deadlines for interested parties to provide comments on scope issues.[15] Specifically, case briefs on scope issues were to be submitted no later than October 21, 2016. Scope rebuttal briefs, limited to issues raised in the scope case briefs, were to be submitted no later than November 1, 2016.[16] The Department explained that parties should limit comments on scope issues to their scope case brief and their scope rebuttal brief.[17] Thus, comments on scope issues belong in parties' scope case briefs and scope rebuttal briefs only and not in other case briefs and rebuttal briefs submitted in this investigation. The Department intends to address parties' scope comments in a final scope memorandum.

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, and a list of the issues to be discussed. If a request for a hearing is made, the Department intends to hold the hearing at the U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230, at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

All documents must be filed electronically using ACCESS. An electronically-filed request must be received successfully in its entirety by ACCESS by 5:00 p.m. Eastern Standard Time.

Pursuant to section 735(a)(1) of the Act, we intend to make our final determination no later than 75 days after the date of publication of this preliminary determination.

International Trade Commission (''ITC'') Notification

In accordance with section 733(f) of the Act, we are notifying the ITC of our affirmative preliminary determination of sales at LTFV. If our final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after our final determination whether these imports are materially injuring, or threaten material injury to, the U.S. industry.

This determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act and 19 CFR 351.205(c).

Dated: November 4, 2016.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigation

The products covered by this investigation are certain carbon and alloy steel hot-rolled or forged flat plate products not in coils, whether or not painted, varnished, or coated with plastics or other non-metallic substances (cut-to-length plate). Subject merchandise includes plate that is produced by being cut-to-length from coils or from other discrete length plate and plate that is rolled or forged into a discrete length. The products covered include (1) Universal mill plates (*i.e.,* flat-rolled products rolled on four faces or in a closed box pass, of a width exceeding 150 mm but not exceeding 1250 mm, and of a thickness of not less than 4 mm, which are not in coils and without patterns in relief), and (2) hot-rolled or forged flat steel products of a thickness of 4.75 mm or more and of a width which exceeds 150 mm and measures at least twice the thickness, and which are not in coils, whether or not with patterns in relief. The covered products described above may be rectangular, square, circular or other shapes and include products of either rectangular or non-rectangular cross-section where such non-rectangular cross-section is achieved subsequent to the rolling process, *i.e.,* products which have been ''worked after rolling'' (*e.g.,* products which have been beveled or rounded at the edges).

For purposes of the width and thickness requirements referenced above, the following rules apply:

(1) Except where otherwise stated where the nominal and actual thickness or width measurements vary, a product from a given subject country is within the scope if application of either the nominal or actual measurement would place it within the scope based on the definitions set forth above unless the product is already covered by an order existing on that specific country (*e.g., Notice of the Antidumping Duty Order: Certain Hot-Rolled Carbon Steel Flat Products From the People's Republic of China,* 66 FR 59561 (November 29, 2001)); and

(2) where the width and thickness vary for a specific product (*e.g.,* the thickness of certain products with non-rectangular cross-section, the width of certain products with non-rectangular shape, *etc.*), the measurement at its greatest width or thickness applies.

Steel products included in the scope of this investigation are products in which: (1) Iron predominates, by weight, over each of the other contained elements; and (2) the carbon content is 2 percent or less by weight.

Subject merchandise includes cut-to-length plate that has been further processed in the subject country or a third country, including but not limited to pickling, oiling, levelling, annealing, tempering, temper rolling, skin passing, painting, varnishing, trimming, cutting, punching, beveling, and/or slitting, or any other processing that would not

otherwise remove the merchandise from the scope of the investigation if performed in the country of manufacture of the cut-to-length plate.

All products that meet the written physical description, are within the scope of this investigation unless specifically excluded or covered by the scope of an existing order. The following products are outside of, and/or specifically excluded from, the scope of this investigation:

(1) Products clad, plated, or coated with metal, whether or not painted, varnished or coated with plastic or other non-metallic substances;

(2) military grade armor plate certified to one of the following specifications or to a specification that references and incorporates one of the following specifications:

- MIL–A–12560,
- MIL–DTL–12560H,
- MIL–DTL–12560J,
- MIL–DTL–12560K,
- MIL–DTL–32332,
- MIL–A–46100D,
- MIL–DTL–46100–E,
- MIL–46177C,
- MIL–S–16216K Grade HY80,
- MIL–S–16216K Grade HY100,
- MIL–S–24645A HSLA–80;
- MIL–S–24645A HSLA–100,
- T9074–BD–GIB–010/0300 Grade HY80,
- T9074–BD–GIB–010/0300 Grade HY100,
- T9074–BD–GIB–010/0300 Grade HSLA80,
- T9074–BD–GIB–010/0300 Grade HSLA100, and
- T9074–BD–GIB–010/0300 Mod. Grade HSLA115,

except that any cut-to-length plate certified to one of the above specifications, or to a military grade armor specification that references and incorporates one of the above specifications, will not be excluded from the scope if it is also dual- or multiple-certified to any other non-armor specification that otherwise would fall within the scope of this order;

(3) stainless steel plate, containing 10.5 percent or more of chromium by weight and not more than 1.2 percent of carbon by weight;

(4) CTL plate meeting the requirements of ASTM A–829, Grade E 4340 that are over 305 mm in actual thickness;

(5) Alloy forged and rolled CTL plate greater than or equal to 152.4 mm in actual thickness meeting each of the following requirements:

(a) Electric furnace melted, ladle refined & vacuum degassed and having a chemical composition (expressed in weight percentages):

- Carbon 0.23–0.28,
- Silicon 0.05–0.20,
- Manganese 1.20–1.60,
- Nickel not greater than 1.0,
- Sulfur not greater than 0.007,
- Phosphorus not greater than 0.020,
- Chromium 1.0–2.5,
- Molybdenum 0.35–0.80,
- Boron 0.002–0.004,
- Oxygen not greater than 20 ppm,
- Hydrogen not greater than 2 ppm, and
- Nitrogen not greater than 60 ppm;

(b) With a Brinell hardness measured in all parts of the product including mid thickness falling within one of the following ranges:

(i) 270–300 HBW,

(ii) 290–320 HBW, or

(iii) 320–350HBW;

(c) Having cleanliness in accordance with ASTM E45 method A (Thin and Heavy): A not exceeding 1.5, B not exceeding 1.0, C not exceeding 0.5, D not exceeding 1.5; and

(d) Conforming to ASTM A578–S9 ultrasonic testing requirements with acceptance criteria 2 mm flat bottom hole;

(6) Alloy forged and rolled steel CTL plate over 407 mm in actual thickness and meeting the following requirements:

(a) Made from Electric Arc Furnace melted, Ladle refined & vacuum degassed, alloy steel with the following chemical composition (expressed in weight percentages):

- Carbon 0.23–0.28,
- Silicon 0.05–0.15,
- Manganese 1.20–1.50,
- Nickel not greater than 0.4,
- Sulfur not greater than 0.010,
- Phosphorus not greater than 0.020,
- Chromium 1.20–1.50,
- Molybdenum 0.35–0.55,
- Boron 0.002–0.004,
- Oxygen not greater than 20 ppm,
- Hydrogen not greater than 2 ppm, and
- Nitrogen not greater than 60 ppm;

(b) Having cleanliness in accordance with ASTM E45 method A (Thin and Heavy): A not exceeding 1.5, B not exceeding 1.5, C not exceeding 1.0, D not exceeding 1.5;

(c) Having the following mechanical properties:

(i) With a Brinell hardness not more than 237 HBW measured in all parts of the product including mid thickness; and having a Yield Strength of 75ksi min and UTS 95ksi or more, Elongation of 18% or more and Reduction of area 35% or more; having charpy V at −75 degrees F in the longitudinal direction equal or greater than 15 ft. lbs (single value) and equal or greater than 20 ft. lbs (average of 3 specimens) and conforming to the requirements of NACE MR01–75; or

(ii) With a Brinell hardness not less than 240 HBW measured in all parts of the product including mid thickness; and having a Yield Strength of 90 ksi min and UTS 110 ksi or more, Elongation of 15% or more and Reduction of area 30% or more; having charpy V at −40 degrees F in the longitudinal direction equal or greater than 21 ft. lbs (single value) and equal or greater than 31 ft. lbs (average of 3 specimens);

(d) Conforming to ASTM A578–S9 ultrasonic testing requirements with acceptance criteria 3.2 mm flat bottom hole; and

(e) Conforming to magnetic particle inspection in accordance with AMS 2301;

(7) Alloy forged and rolled steel CTL plate over 407 mm in actual thickness and meeting the following requirements:

(a) Made from Electric Arc Furnace melted, ladle refined & vacuum degassed, alloy steel with the following chemical composition (expressed in weight percentages):

- Carbon 0.25–0.30,
- Silicon not greater than 0.25,
- Manganese not greater than 0.50,
- Nickel 3.0–3.5,
- Sulfur not greater than 0.010,
- Phosphorus not greater than 0.020,
- Chromium 1.0–1.5,
- Molybdenum 0.6–0.9,
- Vanadium 0.08 to 0.12
- Boron 0.002–0.004,
- Oxygen not greater than 20 ppm,
- Hydrogen not greater than 2 ppm, and
- Nitrogen not greater than 60 ppm.

(b) Having cleanliness in accordance with ASTM E45 method A (Thin and Heavy): A not exceeding 1.0(t) and 0.5(h), B not exceeding 1.5(t) and 1.0(h), C not exceeding 1.0(t) and 0.5(h), and D not exceeding 1.5(t) and 1.0(h);

(c) Having the following mechanical properties: A Brinell hardness not less than 350 HBW measured in all parts of the product including mid thickness; and having a Yield Strength of 145ksi or more and UTS 160ksi or more, Elongation of 15% or more and Reduction of area 35% or more; having charpy V at −40 degrees F in the transverse direction equal or greater than 20 ft. lbs (single value) and equal or greater than 25 ft. lbs (average of 3 specimens);

(d) Conforming to ASTM A578–S9 ultrasonic testing requirements with acceptance criteria 3.2 mm flat bottom hole; and

(e) Conforming to magnetic particle inspection in accordance with AMS 2301.

Excluded from the scope of the antidumping duty investigation on cut-to-length plate from the People's Republic of China are any products covered by the existing antidumping duty order on certain cut-to-length carbon steel plate from the People's Republic of China. *See Suspension Agreement on Certain Cut-to-Length Carbon Steel Plate From the People's Republic of China; Termination of Suspension Agreement and Notice of Antidumping Duty Order,* 68 FR 60,081 (Dep't Commerce Oct. 21, 2003), as amended, *Affirmative Final Determination of Circumvention of the Antidumping Duty Order on Certain Cut-to-Length Carbon Steel Plate From the People's Republic of China,* 76 FR 50,996, 50,996–97 (Dep't of Commerce Aug. 17, 2011). On August 17, 2011, the U.S. Department of Commerce found that the order covered all imports of certain cut-to-length carbon steel plate products with 0.0008 percent or more boron, by weight, from China not meeting all of the following requirements: Aluminum level of 0.02 percent or greater, by weight; a ratio of 3.4 to 1 or greater, by weight, of titanium to nitrogen; and a hardenability test (*i.e.,* Jominy test) result indicating a boron factor of 1.8 or greater.

The products subject to the investigation are currently classified in the Harmonized Tariff Schedule of the United States (HTSUS) under item numbers: 7208.40.3030, 7208.40.3060, 7208.51.0030, 7208.51.0045, 7208.51.0060, 7208.52.0000, 7211.13.0000, 7211.14.0030, 7211.14.0045, 7225.40.1110, 7225.40.1180, 7225.40.3005, 7225.40.3050, 7226.20.0000, and 7226.91.5000.

The products subject to the investigation may also enter under the following HTSUS item numbers: 7208.40.6060, 7208.53.0000, 7208.90.0000, 7210.70.3000, 7210.90.9000, 7211.19.1500, 7211.19.2000, 7211.19.4500,

7211.19.6000, 7211.19.7590, 7211.90.0000, 7212.40.1000, 7212.40.5000, 7212.50.0000, 7214.10.0000, 7214.30.0010, 7214.30.0080, 7214.91.0015, 7214.91.0060, 7214.91.0090, 7225.11.0000, 7225.19.0000, 7225.40.5110, 7225.40.5130, 7225.40.5160, 7225.40.7000, 7225.99.0010, 7225.99.0090, 7226.11.1000, 7226.11.9060, 7226.19.1000, 7226.19.9000, 7226.91.0500, 7226.91.1530, 7226.91.1560, 7226.91.2530, 7226.91.2560, 7226.91.7000, 7226.91.8000, and 7226.99.0180.

The HTSUS subheadings above are provided for convenience and customs purposes only. The written description of the scope of the investigation is dispositive.

International Trade Administration

[A–570–026, C–570–027]

Certain Corrosion-Resistant Steel Products From the People's Republic of China: Initiation of Anti-Circumvention Inquiries on the Antidumping Duty and Countervailing Duty Orders

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: In response to requests from ArcelorMittal USA LLC, Nucor Corporation, United States Steel Corporation, and AK Steel Corporation, as well as Steel Dynamics, Inc. and California Steel Industries, (collectively, Domestic Producers), the Department of Commerce (the Department) is initiating anti-circumvention inquiries to determine whether certain imports of corrosion-resistant steel products (CORE), produced in the Socialist Republic of Vietnam (Vietnam) using carbon hot-rolled steel (HRS) and cold-rolled steel (CRS) flat products manufactured in the People's Republic of China (PRC), are circumventing the antidumping duty (AD) and countervailing duty (CVD) orders on CORE from the PRC.

DATES: Effective November 14, 2016.

FOR FURTHER INFORMATION CONTACT: Nancy Decker, AD/CVD Operations, Office VII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–0196.

SUPPLEMENTARY INFORMATION:

Background

On June 3, 2015, AK Steel Corporation, ArcelorMittal USA LLC, Nucor Corporation, Steel Dynamics, Inc., and the United States Steel Corporation (collectively, Petitioners) filed petitions seeking the imposition of antidumping and countervailing duties on imports of CORE from India, Italy, the Republic of Korea, PRC, and Taiwan. Following the Department's affirmative determinations of dumping and countervailable subsidies,[1] and the U.S. International Trade Commission (ITC) finding of material injury,[2] the Department issued antidumping duty and countervailing duty *Orders*[3] on imports of CORE from the PRC.

On September 22, 2016, pursuant to section 781(b) of the Tariff Act of 1930, as amended (the Act), and 19 CFR 351.225(h), Steel Dynamics, Inc. and California Steel Industries submitted requests for the Department to initiate anti-circumvention inquiries to determine whether producers in Vietnam of CORE are circumventing the *Order*s on CORE from the PRC by exporting to the United States CORE products completed or assembled in various Vietnamese facilities, from inputs of HRS and CRS sourced from the PRC.[4] On September 23, 2016, pursuant to section 781(b) of the Act and 19 CFR 351.225(h), ArcelorMittal USA LLC, Nucor Corporation, United States Steel Corporation, and AK Steel Corporation, collectively, submitted a request for the Department to initiate anti-circumvention inquiries and to issue in conjunction with initiation of the inquiries preliminary determinations of circumvention of the *Orders* to suspend liquidation of imports of CORE from Vietnam.[5]

On October 17, 2016, we received comments objecting to the allegations from Domestic Producers from Metallia U.S.A., LLC, Metallia, A Division of Hartree Partners, LP, Nippon Steel and Sumiken Bussan Americas Inc., Mitsui & Co. (U.S.A.), Inc., and Marubeni-Itochu Steel America Inc. (collectively, Metallia).[6] Also on October 17, 2016, we received comments objecting to the allegations from Minmetals, Inc. (Minmetals).[7] On October 20, 2016, we received comments objecting to the allegations from China Steel Sumikin Vietnam Joint Stock Company (CSVC)[8] and from Duferco Steel Inc. (Duferco).[9] On October 21, 2016, we received comments objecting to the allegations from T.Co Metals LLC (TCO).[10] On October 26, 2016, we received comments objecting to the allegations from Summit Global Trading, a subsidiary of Sumitomo Corporation of

Americas (Sumitomo).[11] On October 28, 2016, we received comments objecting to the allegations from thyssenkrupp Materials NA, Inc.[12] On October 31, 2016, we received comments objecting to the allegations from Hoa Sen Group (HSG) [13] and from Maruichi Sun Steel Joint Stock Company (Maruichi).[14] Also on October 31, 2016, we received a letter objecting to the allegations from Vietnam Competition Authority under the Ministry of Industry and Trade of Vietnam.[15] On November 3, 2016, we received comments objecting to the allegations from Ton Dong A Company.[16]

On October 13, 2016, we received comments supporting the allegations from the United Steel Workers.[17]

Scope of the Orders

The products covered by these orders are certain flat-rolled steel products, either clad, plated, or coated with corrosion-resistant metals such as zinc, aluminum, or zinc-, aluminum-, nickel- or iron-based alloys, whether or not corrugated or painted, varnished, laminated, or coated with plastics or other non-metallic substances in addition to the metallic coating. The products covered include coils that have a width of 12.7 mm or greater, regardless of form of coil (*e.g.,* in successively superimposed layers, spirally oscillating, *etc.*). The products covered also include products not in coils (*e.g.,* in straight lengths) of a thickness less than 4.75 mm and a width that is 12.7 mm or greater and that measures at least 10 times the thickness. The products covered also include products not in coils (*e.g.,* in straight lengths) of a thickness of 4.75 mm or more and a width exceeding 150 mm and measuring at least twice the thickness. The products described above may be rectangular, square, circular, or other shape and include products of either rectangular or non-rectangular cross-section where such cross-section is achieved subsequent to the rolling process, *i.e.,* products which have been ''worked after rolling'' (*e.g.,* products which have been beveled or rounded at the edges). For purposes of the width and thickness requirements referenced above:

(1) Where the nominal and actual measurements vary, a product is within the scope if application of either the nominal or actual measurement would place it within the scope based on the definitions set forth above, and

(2) where the width and thickness vary for a specific product (*e.g.,* the thickness of certain products with non-rectangular cross-section, the width of certain products with non-rectangular shape, *etc.*), the measurement at its greatest width or thickness applies.

Steel products included in the scope of these orders are products in which: (1) Iron predominates, by weight, over each of the other contained elements; (2) the carbon content is 2 percent or less, by weight; and (3) none of the elements listed below exceeds the quantity, by weight, respectively indicated:

- 2.50 percent of manganese, or
- 3.30 percent of silicon, or
- 1.50 percent of copper, or
- 1.50 percent of aluminum, or
- 1.25 percent of chromium, or
- 0.30 percent of cobalt, or
- 0.40 percent of lead, or
- 2.00 percent of nickel, or
- 0.30 percent of tungsten (also called wolfram), or
- 0.80 percent of molybdenum, or
- 0.10 percent of niobium (also called columbium), or
- 0.30 percent of vanadium, or
- 0.30 percent of zirconium

Unless specifically excluded, products are included in this scope regardless of levels of boron and titanium.

For example, specifically included in this scope are vacuum degassed, fully stabilized (commonly referred to as interstitial-free (IF)) steels and high strength low alloy (HSLA) steels. IF steels are recognized as low carbon steels with micro-alloying levels of elements such as titanium and/or niobium added to stabilize carbon and nitrogen elements. HSLA steels are recognized as steels with micro-alloying levels of elements such as chromium, copper, niobium, titanium, vanadium, and molybdenum.

Furthermore, this scope also includes Advanced High Strength Steels (AHSS) and Ultra High Strength Steels (UHSS), both of which are considered high tensile strength and high elongation steels.

Subject merchandise also includes corrosion-resistant steel that has been further processed in a third country, including but not limited to annealing, tempering, painting, varnishing, trimming, cutting, punching and/or slitting or any other processing that would not otherwise remove the merchandise from the scope of the orders if performed in the country of manufacture of the in-scope corrosion resistant steel.

All products that meet the written physical description, and in which the chemistry quantities do not exceed any one of the noted element levels listed above, are within the scope of these orders unless specifically excluded. The following products are outside of and/or specifically excluded from the scope of these orders:

- Flat-rolled steel products either plated or coated with tin, lead, chromium, chromium oxides, both tin and lead (''terne plate''), or both chromium and chromium oxides (''tin free steel''), whether or not painted, varnished or coated with plastics or other non-metallic substances in addition to the metallic coating;
- Clad products in straight lengths of 4.7625 mm or more in composite thickness and of a width which exceeds 150 mm and measures at least twice the thickness; and
- Certain clad stainless flat-rolled products, which are three-layered corrosion-resistant flat-rolled steel products less than 4.75 mm in composite thickness that consist of a flat-rolled steel product clad on both sides with stainless steel in a 20%-60%-20% ratio.

The products subject to the orders are currently classified in the Harmonized Tariff Schedule of the United States (HTSUS) under item numbers: 7210.30.0030, 7210.30.0060, 7210.41.0000, 7210.49.0030, 7210.49.0091, 7210.49.0095, 7210.61.0000, 7210.69.0000, 7210.70.6030, 7210.70.6060, 7210.70.6090, 7210.90.6000,

The products subject to the orders may also enter under the following HTSUS item numbers: 7210.90.1000, 7215.90.1000, 7215.90.3000, 7215.90.5000, 7217.20.1500, 7217.30.1530, 7217.30.1560, 7217.90.1000, 7217.90.5030, 7217.90.5060, 7217.90.5090, 7225.91.0000, 7225.92.0000, 7225.99.0090, 7226.99.0110, 7226.99.0130, 7226.99.0180, 7228.60.6000, 7228.60.8000, and 7229.90.1000.

The HTSUS subheadings above are provided for convenience and customs purposes only. The written description of the scope of the orders is dispositive.

Merchandise Subject to the Anti-Circumvention Inquiries

These anti-circumvention inquiries cover CORE exported from Vietnam produced from HRS or CRS manufactured in the PRC.

Domestic Producers request that the Department treat CORE imports from Vietnam as subject merchandise under the scope of the *Orders* and impose cash deposit requirements for estimated AD and CVD duties on all imports of CORE from Vietnam.[18]

Initiation of Anti-Circumvention Inquiries

Section 781(b)(1) of the Act provides that the Department may find circumvention of an AD or CVD order when merchandise of the same class or kind subject to the order is completed or assembled in a foreign country other than the country to which the order applies. In conducting an anti-circumvention inquiry, under section 781(b)(1) of the Act, the Department will rely on the following criteria: (A) Merchandise imported into the United States is of the same class or kind as any merchandise produced in a foreign country that is subject of an antidumping or countervailing duty order or finding; (B) before importation into the United States, such imported merchandise is completed or assembled in another foreign country from merchandise which is subject to the order or merchandise which is produced in the foreign country that is subject to the order; (C) the process of assembly or completion in the foreign country referred to in section (B) is minor or insignificant; (D) the value of the merchandise produced in the foreign country to which the AD or CVD order applies is a significant portion of the total value of the merchandise exported to the United States; and (E) the administering authority determines that action is appropriate to prevent evasion of such order or finding. As discussed below, Domestic Producers provided evidence with respect to these criteria.

A. Merchandise of the Same Class or Kind

The Domestic Producers claim that CORE exported to the United States is the same class or kind as the CORE covered by the *Orders* in these inquiries.[19] Domestic Producers provided evidence to show that the merchandise from Vietnam enters the United States under the same tariff classification as the subject merchandise.[20]

B. Completion of Merchandise in a Foreign Country

Section 78l(b)(l)(B)(ii) of the Act requires the Department to determine if, ''before import into the United States, such imported merchandise is completed or assembled in another foreign country from merchandise which is produced in the foreign country with respect to which such order or finding applies.'' Domestic Producers presented evidence demonstrating how CORE in Vietnam is produced from HRS or CRS manufactured and imported from the PRC. Additionally, Domestic Producers provided evidence that there is currently no capacity in Vietnam to produce HRS, and thus any CORE manufactured in Vietnam must use imported HRS.[21] Domestic Producers stated that while imports of CORE from the PRC into the United States significantly decreased after the imposition of the *Orders,* imports of CORE from Vietnam into the United States have increased significantly. All the while, imports of Chinese HRS and CRS into Vietnam have also increased significantly.[22] Finally, Domestic Producers state that China Minmetals Corporation, the state-owned Chinese trading company, currently has arrangements to ship HRS and/or CRS from the PRC to Vietnam, and to convert the PRC-sourced HRS or CRS to CORE for export to the United States with the purpose of evading the *Orders*.[23]

C. Minor or Insignificant Process

Under section 781(b)(2) of the Act, the Department is required to consider five factors to determine whether the process of assembly or completion is minor or insignificant. Domestic Producers alleged that the production of HRS and CRS in the PRC, which is subsequently further processed into CORE in Vietnam, comprises the majority of the value associated with the merchandise imported from Vietnam into the United States, and that the processing of HRS and CRS into CORE which occurs in Vietnam adds relatively little to the overall value.

(1) Level of Investment

Domestic Producers argue that the level of investment necessary to construct a factory which can produce CORE from CRS or HRS in Vietnam is insignificant. In support of their contention, Domestic Producers compare the investment necessary to install re-rolling and coating facilities with the investment necessary to produce HRS or CRS using a fully-integrated production process for melting iron and casting steel.[24] Domestic Producers estimate that the investment necessary to construct re-rolling and coating (in some cases including a CRS mill) facilities in Vietnam that uses HRS and/or CRS substrate to produce CORE would be between $70 million and $90 million, with possible expansions of $150 million.[25] In contrast, Domestic Producers estimate that the investment necessary to construct a fully integrated steel production facility, including a blast furnace or basic oxygen furnace in the PRC that produces HRS and/or CRS would be between $295 million and $10.1 billion.[26] Domestic Producers also argue that using investment levels in the PRC for basic steel making including a blast furnace or basic oxygen furnace, as opposed to an electric arc furnace which relies on scrap steel, is appropriate as approximately 90 percent of the steel production in the PRC comes from a fully integrated steel mill.[27]

[25] *See* Schagrin Request at 19–20 and Exhibits 15, 16, and 19, Petitioners Request at 14 and Attachment 10.

[26] *See* Schagrin Request at 19 and Exhibit 14, Petitioners Request at 13–14 and Attachment 7–9.

[27] *See* Petitioners Request at 13 at Attachment 8.

(2) Level of Research and Development

Domestic Producers assert that the level of research and development in Vietnam to produce CORE from substrate is either minimal or non-existent. Domestic Producers state that Vietnam is importing technology from other sources and countries, rather than developing its own technology.[28]

(3) Nature of Production Process in Vietnam

According to Domestic Producers, the additional processing undertaken by Vietnamese producers of CORE is minimal.[29] Conversely, the manufacturing process to produce HRS is complex. Specifically, the manufacturing processes for HRS consist of three stages: melting and refining, casting molten steel into semi-finished forms, and hot-rolling the semi-finished forms into HRS.[30] In contrast, the processing of CORE from HRS involves only unrolling, descaling, cold-reducing (if HRS), and coating or plating, all of which is done by continuous processing lines.[31]

(4) Extent of Production in Vietnam

Domestic Producers argue that production facilities in Vietnam are more limited compared to facilities in the PRC. This is because Vietnam has fewer than a dozen large producers of flat steel products.[32] Moreover, Domestic Producers cite information indicating Vietnam had no HRS capacity, only a few cold-rolling facilities, and limited CORE production facilities, with only one coating facility that produces galvannealed steel sheet.[33]

(5) Value of Processing in Vietnam

Domestic Producers assert that production of HRS or CRS in the PRC accounts for a large percentage of the total value of CORE that is produced in Vietnam. Using information from the recent CORE investigation by the ITC, Domestic Producers state that the price of HRS is between 69 percent and 79 percent of the price of CORE, and CRS is between 84 percent and 90 percent of the price of CORE.[34] Thus, the value added in Vietnam is estimated to be between 10 percent and 31 percent, depending on whether the underlying substrate is already cold-rolled. Using a different approach focusing solely on the cost of production in Vietnam, Domestic Producers estimate that the cost of manufacture for the CORE operations in Vietnam, including both cold-rolling and coating, is a small portion of the export value.[35]

D. Value of Merchandise Produced in the PRC

As Domestic Producers argued previously (and noted above), the price of HRS is between 69 percent and 79 percent of the price of CORE and the price of CRS is between 84 percent and 90 percent.[36] Alternatively, using the other method (comparing the cost of manufacture of CORE in Vietnam to the export value of CORE), the value of the Chinese inputs constitute a significant portion of the total value of the merchandise exported to the United States.[37]

E. Additional Factors To Consider in Determining Whether Inquiry Is Warranted

Section 781(b)(3) of the Act directs the Department to consider additional factors in determining whether to include merchandise assembled or completed in a foreign country within the scope of the *Orders,* such as: ''(A) the pattern of trade, including sourcing patterns, (B) whether the manufacturer or exporter of the merchandise . . . is affiliated with the person who uses the merchandise . . . to assemble or complete in the foreign country the merchandise that is subsequently imported into the United States, and (C) whether imports into the foreign country of the merchandise . . . have increased after the initiation of the investigation which resulted in the issuance of such order or finding.''

(1) Pattern of Trade

Domestic Producers note that at the time the petition was filed for the original investigation of CORE from the PRC, Vietnam was a very small source of U.S. CORE imports (in 2014), and that the volume of imports from Vietnam from January 2015 to July of 2015 was low.[38] However, subsequent to the preliminary injury determination by the ITC, the last five months of 2015 saw imports of CORE from Vietnam increase.[39] After the preliminary affirmative determination by the Department for countervailing duties on CORE from the PRC in November 2015, Domestic Producers note that imports of CORE from Vietnam surged dramatically.[40] Domestic Producers further note that imports of CORE from the PRC decreased substantially over the same time period.[41] No other factual information on the record contradicts this claim.

(2) Affiliation

Domestic Producers have provided no information regarding the affiliation between producers of HRS or CRS in the PRC and producers of CORE in Vietnam. However, Domestic Producers assert that China Minmetals Corporation, which as noted above currently has arrangements to ship HRS or CRS from the PRC to Vietnam and convert the HRS or CRS to CORE for export to the United States, is affiliated with a major Chinese steel producer.[42]

(3) Increase of HRS and CRS Shipments From the PRC to Vietnam After Initiation of the AD and CVD Investigation of CORE From the PRC

Domestic Producers presented evidence indicating that shipments of HRS and CRS from the PRC to Vietnam have increased since the initiation of the CORE investigations.[43] No other factual information contradicts this claim.

Analysis of the Allegation

Based on our analysis of Domestic Producers' anti-circumvention inquiry allegation, the Department determines that the Domestic Producers have satisfied the criteria under section 781(b)(1) of the Act to warrant an initiation of anti-circumvention inquiries of the AD and CVD *Orders* on CORE from the PRC.

With regard to whether the merchandise from Vietnam is of the same class or kind as the merchandise produced in the RC, Domestic Producers presented information to the Department indicating that, pursuant to section 781(b)(1)(A) of the Act, the merchandise being produced in and/or exported from Vietnam may be of the

same class or kind as CORE produced in the PRC, which is subject to the *Orders.*[44] Consequently, the Department finds that Domestic Producers provided sufficient information in their request regarding the class or kind of merchandise to support the initiation of these anti-circumvention inquiries.

With regard to completion or assembly of merchandise in a foreign country, pursuant to section 781(b)(1)(B) of the Act, Domestic Producers also presented information to the Department indicating that the CORE exported from Vietnam to the United States is produced in Vietnam using HRS or CRS from the PRC that accounts for a significant portion of the total costs related to the production of CORE.[45] We find that the information presented by Domestic Producers regarding this criterion supports their request to initiate these anti-circumvention inquiries.

The Department finds that Domestic Producers sufficiently addressed the factors described in section 781(b)(1)(C) and 781(b)(2) of the Act regarding whether the assembly or completion of CORE in Vietnam is minor or insignificant. In particular, Domestic Producers' submission asserts that: (1) The level of investment of CORE facilities is minimal when compared with the level of investment for basic steel-making facilities; (2) research and development is not taking place in Vietnam; (3) the production process involves the simple processing of HRS or CRS from a country subject to the *Orders;* (4) the production facilities in Vietnam are more limited compared to facilities in the PRC; and (5) the value of the processing performed in Vietnam is minimal, as the production of HRS and CRS in the PRC accounts for 68 to 90 percent of the value of finished CORE.[46]

With respect to the value of the merchandise produced in the PRC, pursuant to section 781(b)(1)(D) of the Act, Domestic Producers relied on published sources, a simulated cost structure for producing CORE in Vietnam, and arguments in the ''minor or insignificant process'' portion of their anti-circumvention allegations to indicate that the value of the major inputs, HRS or CRS, produced in the PRC may be significant relative to the total value of the CORE exported from Vietnam to the United States.[47] We find that this information adequately meets the requirements of this factor, as discussed above, for the purposes of initiating these anti-circumvention inquiries.

With respect to the additional factors listed under section 781(b)(3) of the Act, we find that Domestic Producers presented evidence indicating that shipments of CORE from Vietnam to the United States increased since the imposition of the *Orders* and that shipments of HRS and CRS from the PRC to Vietnam also increased since the *Orders* took effect, further supporting initiation of these anti-circumvention inquiries.[48]

Accordingly, we are initiating a formal anti-circumvention inquiry concerning the AD and CVD Orders on CRS from the PRC, pursuant to section 781(b) of the Act.

In connection with these anti-circumvention inquiries, in order to determine, (1) the extent to which PRC-sourced HRS or CRS is further processed into CORE in Vietnam before shipment to the United States, (2) the extent to which a country-wide finding applicable to all exports might be warranted, as alleged by Domestic Producers, and (3) whether the process of turning PRC-sourced HRS or CRS into CORE is minor or insignificant, the Department will issue questionnaires to Vietnamese producers or exporters of CORE to the United States. The Domestic Producers did not identify any Vietnamese producers or exporters in their allegations.[49] The Department will issue questionnaires to solicit information from the Vietnamese producers and exporters concerning their shipments of CORE to the United States and the origin of the imported HRS or CRS being processed into CORE. Companies failing to respond completely and timely to the Department's questionnaire may be deemed uncooperative and an adverse inference may be applied in determining whether such companies are circumventing the *Orders. See* section 776 of the Act.

Finally, while we believe sufficient factual information has been submitted by Domestic Producers supporting their request for an inquiry, we do not find that the record supports the simultaneous issuance of a preliminary ruling. Such inquiries are by their nature complicated and require additional information regarding production in both the country subject to the order and the third country completing the product. As noted above, the Department intends to request additional information regarding the statutory criteria to determine whether shipments of CORE from Vietnam are circumventing the AD and CVD *Orders* on CORE from the PRC. Thus, further development of the record is required before a preliminary ruling can be issued.

Notification to Interested Parties

In accordance with 19 CFR 351.225(e), the Department finds that the issue of whether a product is included within the scope of an order cannot be determined based solely upon the application and the descriptions of the merchandise. Accordingly, the Department will notify by mail all parties on the Department's scope service list of the initiation of anti-circumvention inquiries. In addition, in accordance with 19 CFR 351.225(f)(1)(i) and (ii), in this notice of initiation issued under 19 CFR 351.225(e), we have included a description of the product that is the subject of these anti-circumvention inquiries (*i.e.,* CORE that contains the characteristics as provided in the scope of the *Orders*), and an explanation of the reasons for the Department's decision to initiate these anti-circumvention inquiries, as provided above.

In accordance with 19 CFR 351.225(l)(2), if the Department issues affirmative preliminary determinations, we will then instruct CBP to suspend liquidation and require cash deposits of estimated antidumping and countervailing duties, at the applicable rates, for each unliquidated entry of the merchandise at issue, entered or withdrawn from warehouse for consumption on or after the date of initiation of the inquiries. The Department will establish a schedule for questionnaires and comments for these inquiries. In accordance with section 781(f) of the Act and 19 CFR 351.225(f)(5), the Department intends to issue its final determinations within 300 days of the date of publication of this initiation.

This notice is published in accordance with 19 CFR 351.225(f).

Dated: November 4, 2016.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

Open Meeting of the Commission on Enhancing National Cybersecurity

AGENCY: National Institute of Standards and Technology, Commerce.

ACTION: Notice.

SUMMARY: The Commission on Enhancing National Cybersecurity will meet Monday, November 21, 2016 from 8:00 a.m. until 10:00 a.m. Eastern Time as a virtual meeting with dial-in audio conferencing participation only. The primary purpose of the meeting is to discuss the challenges and opportunities for organizations and consumers in securing the digital economy. In particular, the meeting will address: (1) Approval of public meeting minutes; (2) briefing and readout of working group meeting minutes; and (3) public comment.

The meeting will support detailed recommendations to strengthen cybersecurity in both the public and private sectors while protecting privacy, ensuring public safety and economic and national security, fostering discovery and development of new technical solutions, and bolstering partnerships between Federal, State, local, tribal and territorial governments and the private sector in the development, promotion, and use of cybersecurity technologies, policies, and best practices. Interested members of the public will be able to participate in the meeting from remote locations by calling into a central phone number.

DATES: The meeting will be held on Monday, November 21, 2016 from 8:00 a.m. until 10:00 a.m. Eastern Time.

ADDRESSES: The meeting will be a virtual meeting with dial-in audio participation only. The meeting is open to the public and interested parties are requested to contact Sara Kerman at the contact information indicated in the **FOR FURTHER INFORMATION CONTACT** section of this notice in advance of the meeting for dial-in instructions.

Written comments may be submitted by mail to Commission Executive Director, National Institute of Standards and Technology, 100 Bureau Drive, Mail Stop 2000, Gaithersburg, Maryland 20899–8900, or by email to *cybercommission@nist.gov.* Please use subject line ''Open Meeting of the Commission on Enhancing National Cybersecurity''.

FOR FURTHER INFORMATION CONTACT: Sara Kerman, Information Technology Laboratory, National Institute of Standards and Technology, 100 Bureau Drive, Stop 2000, Gaithersburg, MD 20899–8900, telephone: 301–975–4634, or by email at: *eo-commission@nist.gov.* Please use subject line ''*Open Meeting of the Commission on Enhancing National Cybersecurity*''.

SUPPLEMENTARY INFORMATION: Pursuant to the Federal Advisory Committee Act, as amended, 5 U.S.C. App., notice is hereby given that the Commission on Enhancing National Cybersecurity (''the Commission'') will meet Monday, November 21, 2016 from 8:00 a.m. until 10:00 a.m. Eastern Time. All sessions will be open to the public. The Commission is authorized by Executive Order 13718, Commission on Enhancing National Cybersecurity.[1] The Commission was established by the President and will make detailed recommendations to strengthen cybersecurity in both the public and private sectors while protecting privacy, ensuring public safety and economic and national security, fostering discovery and development of new technical solutions, and bolstering partnerships between Federal, State, local, tribal and territorial governments and the private sector in the development, promotion, and use of cybersecurity technologies, policies, and best practices.

The agenda is expected to include the following items:

—Introductions
—Approval of public meeting minutes
—Briefing and readout of working group meeting minutes
—Public comment
—Conclusion

Note that agenda items may change without notice. The final agenda will be posted on *http://www.nist.gov/cybercommission.* Attendees are asked to self-identify when they dial-in and lines will be available on a first-come, first-served basis.

Public Participation: Individuals and representatives of organizations who would like to offer comments and suggestions related to the Committee's affairs are invited to request an opportunity to speak and detailed instructions on how to join the call from a remote location in order to participate by submitting their request to Sara Kerman at the contact information indicated in the **FOR FURTHER INFORMATION CONTACT** section of this notice, no later than 5:00 p.m. Eastern Time on November 17, 2016.

Approximately 15 minutes will be reserved from 9:45 a.m. until 10:00 a.m. Eastern Time for public comments; speaking times will be assigned on a first-come, first-served basis. The amount of time per speaker will be determined by the number of requests received, but is likely to be about three minutes each. Questions from the public will not be considered during this period. Speakers who wish to expand upon their oral statements, those who had wished to speak but could not be accommodated, and those who were unable to participate are invited to submit written statements by mail to Commission Executive Director, National Institute of Standards and Technology, 100 Bureau Drive, Mail Stop 2000, Gaithersburg, Maryland 20899–8900, or by email to *cybercommission@nist.gov.* Please use subject line ''*Open Meeting of the Commission on Enhancing National Cybersecurity.*''

All participants of the meeting are required to pre-register. Anyone wishing to participate must register by 5:00 p.m. Eastern Time, November 17, 2016, in order to be included. Please submit your full name, email address, and phone number Sara Kerman, National Institute of Standards and Technology, 100 Bureau Drive, Mail Stop 2000, Gaithersburg, Maryland 20899 or 301–975–4634, or electronically by email to *eo-commission@nist.gov.* After pre-registering, participants will be provided with detailed instructions on how to join the call from a remote location in order to participate.

Pursuant to 41 CFR 102–3.150(b), this **Federal Register** notice for this meeting is being published fewer than 15 calendar days prior to the meeting as exceptional circumstances exist. It is imperative that the meeting be held on November 21, 2016 to accommodate the scheduling priorities of the key participants, who must maintain a strict schedule of meetings in order to complete the Commission's report by December 1, 2016, as required by Executive Order 13718 § 3(e) (February 9, 2016). Notice of the meeting is also posted on the National Institute of Standards and Technology's Web site at *http://www.nist.gov/cybercommission.*

Kevin Kimball,

Chief of Staff.

National Oceanic and Atmospheric Administration

RIN 0648–XF020

Pacific Fishery Management Council; Public Workshop

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of a public workshop.

SUMMARY: The Pacific Fishery Management Council (Pacific Council) is sponsoring a workshop to review methods used to model productivity in stock assessments. The workshop is open to the public.

DATES: The Productivity Workshop will commence at 9 a.m. PST, Tuesday, December 6, 2016 and continue until 5 p.m. or as necessary to complete business for the day. The workshop will reconvene on Wednesday, December 7 and Thursday, December 8, starting at 9 a.m. PST each day and continuing as necessary to complete business for the day.

ADDRESSES: The Productivity Workshop will be held at the National Marine Fishery Service Western Regional Center's Sand Point facility, Alaska Fisheries Science Center, 7600 Sand Point Way NE., Seattle, WA 98115; telephone: (206) 526–4000. The meeting will be held in Building 4, Traynor Room 2076.

Council address: Pacific Fishery Management Council, 7700 NE Ambassador Place, Suite 101, Portland, OR 97220–1384; telephone: (503) 820–2280.

FOR FURTHER INFORMATION CONTACT: Mr. John DeVore, Pacific Council; telephone: (503) 820–2413.

SUPPLEMENTARY INFORMATION: The purpose of the Productivity Workshop is to review proposed methods for modeling stock productivity in assessments for groundfish and coastal pelagic species. Public comments during the workshop will be received from attendees at the discretion of the chair.

Although non-emergency issues not identified in the workshop agenda may come before the workshop participants for discussion, those issues may not be the subject of formal action during this workshop. Formal action at the workshop will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under Section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the workshop participants' intent to take final action to address the emergency.

All visitors to the National Marine Fisheries Service Western Regional Center's Sand Point facility should bring one of the following forms of identification:

- Enhanced Driver's License from the states of Washington, Minnesota, or New York
- U.S. Passport
- U.S. Passport Card
- U.S. Department of Defense CAC
- U.S. Federal agency HSPD–12 compliant ID cards
- U.S. Veterans ID
- U.S. Military Dependent's ID Card
- U.S. Trusted Traveler Card—Global Entry, SENTRI, or NEXUS
- U.S. Transportation Workers Identification Credential (TWIC)
- State issued Real ID Compliant Driver's Licenses and Identification Cards

Visitors who are foreign nationals (defined as a person who is not a citizen or national of the United States) will require additional security clearance to access the Western Regional Center's Sand Point facility. Foreign national visitors should contact Dr. Martin Dorn at (206) 526–6548 at least two weeks prior to the meeting date to initiate the security clearance process.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for auxiliary aids should be directed to Mr. Kris Kleinschmidt at (503) 820–2425 at least 10 working days prior to the workshop date.

Dated: November 8, 2016.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

General Advisory Committee to the United States Section to the Inter-American Tropical Tuna Commission; Statement of Organization, Practices, and Procedures

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice.

SUMMARY: On May 27, 2016, the General Advisory Committee to the United States Section to the Inter-American Tropical Tuna Commission adopted the Statement of Organization, Practices, and Procedures (SOPP) as set forth. The General Advisory Committee may revise or amend the SOPP in future meetings.

FOR FURTHER INFORMATION CONTACT: Rachael Wadsworth, NMFS, West Coast Region, (562) 980–4036.

Statement of Organization, Practices, and Procedures

I. Authority

The General Advisory Committee (Committee) to the U.S. Section to the Inter-American Tropical Tuna Commission (IATTC) is established pursuant to Section 4 of the Tuna Conventions Act (TCA; 16 U.S.C. 953).

II. Committee Organization

A. Objectives and Scope of Activities

The purpose of the Committee shall be to serve in an advisory capacity to the U.S. National Section of the IATTC (U.S. Section) with respect to the U.S. participation in the work of the IATTC, with particular reference to development of U.S. policies, positions, and negotiating tactics. The U.S. Section consists of the four U.S. Commissioners to the IATTC, who represent the United States with advisors from the U.S. Department of State, the National Marine Fisheries Service (NMFS), and other agencies of the U.S. Government. NMFS and U.S. Department of State representatives will be acting for the Secretaries of Commerce and State, respectively, to fulfill duties described in this Statement of Organization, Practices, and Procedures.

B. Support Services

NMFS and the Secretary of State shall furnish the Committee with relevant information concerning fisheries and international fishery agreements. NMFS shall provide to the Committee in a timely manner such administrative and technical support services as are necessary for its effective functioning.

Executive Secretariat. NMFS shall provide an Executive Secretariat for each meeting of the Committee. The Executive Secretariat shall approve and attend all meetings and shall advise the Chair to adjourn, or shall herself/himself adjourn, any meeting when in the public interest. The Executive Secretariat will prepare an agenda and circulate it amongst Committee members in advance of the meeting for feedback and approve the agenda. The Executive Secretariat shall ensure that the minutes of each meeting are prepared, of which the accuracy shall be certified by the Chair. The Executive Secretariat will also maintain copies of all reports the Committee receives, issues, or approves.

C. Procedures

The Committee shall determine its organization and prescribe its practices and procedures for carrying out its functions under the TCA, the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*), and the Antigua Convention. The Committee shall publish and make available to the public a statement of its organization, practices, and procedures.

D. Agency or Official to Whom the Committee Reports

The Committee shall report, either orally or in writing, to NMFS, U.S. Department of State, and to the U.S. Section.

III. Membership and Terms

A. Membership

The Secretary of Commerce, in consultation with the Secretary of State, shall appoint the members of the Committee.

Committee composition. The Committee shall have no fewer than 5, or no more than 25, individuals, and the ex-officio members will be counted towards the total number of individuals. The Committee shall be representative of the various groups concerned with the fisheries covered by the Antigua Convention, including nongovernmental conservation organizations, providing an equitable balance among such groups to the maximum extent practicable.

Ex-officio members. The Chair of the Pacific Fishery Management Council's Advisory Subpanel for Highly Migratory Fisheries and the Chair of the Western Pacific Regional Fishery Management Council's Advisory Panel shall be ex-officio members of the Committee by virtue of their positions with those Councils.

B. Appointment Terms

Each member of the Committee shall serve for a term of three years and is eligible for reappointment.

IV. Officers and Terms of Office

A. Committee Chair and Vice-Chair

Every 3 years, the Committee will appoint its Chair for a term of 3 years. Every 3 years, the Committee will appoint its Vice-Chair for a term of 3 years. Each Chair shall be eligible for reappointment for up to 2 terms as Chair. Similarly, each Vice-Chair shall be eligible for reappointment for up to 2 terms as Vice-Chair. If a vacancy occurs, the Committee shall appoint a Chair or Vice-Chair to serve the remainder of the term; such service shall not count toward the term limits.

V. Subcommittee

A. Subcommittee

NMFS shall appoint a Scientific Advisory Subcommittee to advise the Committee, pursuant to Section 4 of the TCA.

VI. Administrative Matters

A. Meetings

All meetings of the Committee shall be open to the public, except when in executive session, which shall be closed to the public. Officers of the U.S. Department of State, U.S. Department of Commerce, the U.S. Coast Guard, and representatives of any other agencies of the U.S. Government responsible for matters pertaining to fisheries in the eastern Pacific Ocean may attend and participate in all meetings of the Committee.

Sensitive information, including discussion of the U.S. negotiating position for upcoming IATTC meetings, other than input from the public, may be discussed in executive session. NMFS shall be responsible for providing notice of meetings to the public in a timely fashion. The Committee is not subject to the Federal Advisory Committee Act (5 U.S.C. App.).

B. Number and Frequency of Meetings

The Committee shall meet at least once per year. If sufficient funds are available, one of the Committee meetings shall be an in-person meeting. All meetings shall be called by the Executive Secretariat, subject to the approval of the Commissioner who is also a full-time employee of the U.S. Government. There shall be no requirement of a quorum.

C. Attendance in U.S. Delegation

The Committee shall be invited to attend all non-executive meetings of the U.S. delegation and at such meetings shall be given opportunity to examine and to be heard on all proposed programs of investigation, reports, recommendations, and regulations of the IATTC. Participation as a member of the U.S. delegation shall be subject to such limits as may be placed on the size of the delegation.

D. Closed Meetings

Executive sessions of the Committee shall be closed to the public, and all discussion occurring in these sessions shall not be disclosed publicly unless otherwise specified by an appropriate U.S. Government official. The Committee may choose to invite the Subcommittee members that are not also Committee members to executive sessions of the Committee. Below are examples of when the Committee may go into executive sessions:

a. The Committee is considering the U.S. negotiating position prior or subsequent to international meetings.

b. The Committee is being briefed on litigation in which the Committee is interested.

c. The Committee is discussing internal operational matters.

To the extent practicable, notice of closed sessions on matters of substance should be included in the **Federal Register** notice announcing the Committee meeting.

E. Duration

The Committee is a statutory body and may be terminated only by law.

F. Recordkeeping

The Executive Secretariat shall prepare the minutes of each meeting, which shall at a minimum contain: (1) A record of all persons present; (2) the names of persons from the public who attend the meeting and their interests or affiliations; (3) a description of matters and materials discussed and conclusions reached and the rationale for same; and (4) copies of all reports received, issued, or approved by the Committee. The Executive Secretariat shall distribute the minutes to the Committee members for their review. The Chair of the Committee shall certify the accuracy of all minutes of the Committee.

The Executive Secretariat shall endeavor to provide any draft U.S. IATTC proposals to the Committee members at least five days prior to the meeting of the Committee. The Executive Secretariat shall provide a summary of any available information from bilateral or multilateral meetings between the United States and other nations to the Committee members.

The records for the Committee and any working group will be handled in accordance with NOAA Administrative Order 205–1 governing the NOAA Records Management Program. Such records will be available for public inspection and copying, to the extent required by 5 U.S.C. 552. The Executive Secretariat shall ensure that all records and other written materials are maintained and available for inspection to the extent required by law.

Authority: 16 U.S.C. 951 *et seq.*

Dated: November 8, 2016.

Jennifer M. Wallace,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XE984

Fisheries of the South Atlantic; Southeast Data, Assessment, and Review (SEDAR); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of SEDAR 50 Pre-Data Workshop Webinar.

SUMMARY: The SEDAR 50 assessment of the Atlantic and Gulf of Mexico stock of Blueline Tilefish will consist of a series of workshops and webinars: Stock Identification (ID) Work Group Meeting; Data Workshop; Assessment Workshop and Webinars; and a Review Workshop. See **SUPPLEMENTARY INFORMATION.**

DATES: The SEDAR 50 Pre-Data Workshop Webinar will be held on Tuesday, December 13, 2016, from 1 p.m. to 4 p.m.

ADDRESSES:

Meeting address: The meetings will be held via webinar. The webinar is open to members of the public. Those interested in participating should contact Julia Byrd at SEDAR (see **FOR FURTHER INFORMATION CONTACT** below) to request an invitation providing webinar access information. Please request webinar invitations at least 24 hours in advance of each webinar.

SEDAR address: South Atlantic Fishery Management Council, 4055 Faber Place Drive, Suite 201, N. Charleston, SC 29405; *www.sedarweb.org.*

FOR FURTHER INFORMATION CONTACT: Julia Byrd, SEDAR Coordinator, 4055 Faber Place Drive, Suite 201, North Charleston, SC 29405; phone: (843) 571–4366; email*: julia.byrd@safmc.net.*

SUPPLEMENTARY INFORMATION: The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions, have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a three-step process including: (1) Data Workshop; (2) Assessment Process utilizing webinars; and (3) Review Workshop. The product of the Data Workshop is a data report which compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. The product of the Assessment Process is a stock assessment report which describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. The assessment is independently peer reviewed at the Review Workshop. The product of the Review Workshop is a Summary documenting panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office, Highly Migratory Species Management Division, and Southeast Fisheries Science Center. Participants include: data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and non-governmental organizations (NGOs); international experts; and staff of Councils, Commissions, and state and federal agencies.

The items of discussion at the SEDAR 50 Pre-Data Workshop webinar are as follows: Participants will continue to discuss data needs and treatments in order to prepare for the Data Workshop.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues

arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

This meeting is accessible to people with disabilities. Requests for auxiliary aids should be directed to the SAFMC office (see **ADDRESSES**) at least 10 business days prior to the meeting.

Note: The times and sequence specified in this agenda are subject to change.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 8, 2016.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DEPARTMENT OF DEFENSE

Office of the Secretary

[Docket ID DOD–2016–OS–0111]

Privacy Act of 1974; System of Records

AGENCY: Defense Threat Reduction Agency/USSTRATCOM Center for Combating Weapons of Mass Destruction (DTRA/SCC–WMD), DoD.

ACTION: Notice to alter a system of records.

SUMMARY: Pursuant to the Privacy Act of 1974, and Office of Management and Budget (OMB) Circular No. A–130, notice is hereby given that the DTRA/SCC–WMD proposes to alter a system of records, HDTRA 028, entitled ''AtHoc Emergency Mass-Notification System,'' last published at 81 FR 9174, February 24, 2016. This system of records exists to notify the workforce quickly with information in times of emergency (snow, fire, hurricane, or other unforeseen situations that cause the Fort Belvoir/McNamara Complex to be closed). This alteration incorporates the applicable DoD Routine Uses in the notice to provide clarity for the public. The authorities were also updated to remove extraneous references. Lastly, the system name was updated to provide a title that defines its use and purpose.

DATES: Comments will be accepted on or before December 14, 2016. This proposed action will be effective the date following the end of the comment period unless comments are received which result in a contrary determination.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

* *Federal Rulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.

* *Mail:* Department of Defense, Office of the Deputy Chief Management Officer, Directorate of Oversight and Compliance, 4800 Mark Center Drive, Mailbox #24, Alexandria, VA 22350–1700.

Instructions: All submissions received must include the agency name and docket number for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the Internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: Pamela Andrews, Senior Analyst Freedom of Information/Privacy Act Office, 8725 John J. Kingman Road, Fort Belvoir, VA, 22060, 703–767–1792.

SUPPLEMENTARY INFORMATION: The DTRA/SCC–WMD's notices for systems of records subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended, have been published in the **Federal Register** and are available from the address in the **FOR FURTHER INFORMATION CONTACT** or from the Defense Privacy, Civil Liberties, and Transparency Division Web site at *http://dpcld.defense.gov/.*

The proposed systems reports, as required by 5 U.S.C. 552a(r) of the Privacy Act, as amended, were submitted on October 19, 2016, to the

House Committee on Oversight and Government Reform, the Senate Committee on Homeland Security and Governmental Affairs, and the Office of Management and Budget (OMB) pursuant to paragraph 4 of Appendix I to OMB Circular No. A–130, ''Federal Agency Responsibilities for Maintaining Records About Individuals,'' revised November 28, 2000 (December 12, 2000 65 FR 77677).

Dated: November 8, 2016.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

HDTRA 028

SYSTEM NAME:

AtHoc Emergency Mass-Notification System (February 24, 2016, 81 FR 9174)

CHANGES:

* * * * *

SYSTEM NAME:

Delete entry and replace with ''DTRA Mass Notification System.''

* * * * *

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Delete entry and replace with ''10 U.S.C. 136, Under Secretary of Defense for Personnel and Readiness; DoD Directive 5124.02, Under Secretary of Defense for Personnel and Readiness (USD (P&R); DoD Instruction (DoDI) 3020.42, Defense Continuity Plan Development; DoDI 3020.52, DoD Installation Chemical, Biological, Radiological, Nuclear, and High-Yield Explosive (CBRNE) Preparedness Standards; and DoDI 6055.17, DoD Installation Emergency Management (IEM) Program.''

* * * * *

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Delete entry and replace with ''In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act of 1974, as amended, the records contained herein may be disclosed outside the DoD as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

Law Enforcement Routine Use: If a system of records maintained by a DoD Component to carry out its functions indicates a violation or potential violation of law, whether civil, criminal, or regulatory in nature, and whether arising by general statute or by regulation, rule, or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the agency concerned, whether federal, state, local, or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation, or order issued pursuant thereto.

Congressional Inquiries Disclosure Routine Use: Disclosure from a system of records maintained by a DoD Component may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

Disclosure to the Department of Justice for Litigation Routine Use: A record from a system of records maintained by a DoD Component may be disclosed as a routine use to any component of the Department of Justice for the purpose of representing the Department of Defense, or any officer, employee or member of the Department in pending or potential litigation to which the record is pertinent.

Disclosure of Information to the National Archives and Records Administration Routine Use: A record from a system of records maintained by a DoD Component may be disclosed as a routine use to the National Archives and Records Administration for the purpose of records management inspections conducted under authority of 44 U.S.C. 2904 and 2906.

Data Breach Remediation Purposes Routine Use: A record from a system of records maintained by a Component may be disclosed to appropriate agencies, entities, and persons when (1) The Component suspects or has confirmed that the security or confidentiality of the information in the system of records has been compromised; (2) the Component has determined that as a result of the suspected or confirmed compromise there is a risk of harm to economic or property interests, identity theft or fraud, or harm to the security or integrity of this system or other systems or programs (whether maintained by the Component or another agency or entity) that rely upon the compromised information; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with the Components efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm.''

BILLING CODE 5001–06–P

DEPARTMENT OF EDUCATION

[Docket No. ED–2016–ICCD–0124]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Application for Grants Under the Upward Bound Math and Science Program

AGENCY: Office of Postsecondary Education (OPE), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 3501 *et seq.*), ED is proposing a reinstatement of a previously approved information collection.

DATES: Interested persons are invited to submit comments on or before December 14, 2016.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use *http://www.regulations.gov* by searching the Docket ID number ED–2016–ICCD–0124. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at *http://www.regulations.gov* by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. *Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted.* Written requests for information or comments submitted by postal mail or delivery should be addressed to the Director of the Information Collection Clearance Division, U.S. Department of Education, 400 Maryland Avenue SW., LBJ, Room 2E–347, Washington, DC 20202–4537.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Sharon Easterling, 202–453–7425.

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is

soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Application for Grants under the Upward Bound Math and Science Program.

OMB Control Number: 1840–0824.

Type of Review: A reinstatement of a previously approved information collection.

Respondents/Affected Public: State, Local, and Tribal Governments; Private Sector.

Total Estimated Number of Annual Responses: 475.

Total Estimated Number of Annual Burden Hours: 15,830.

Abstract: The purpose of the Upward Bound Math and Science (UBMS) Program is to generate in program participants the skills and motivation necessary to complete a program of secondary education and to enter and succeed in a program of postsecondary education that lead to careers in the fields of math and science.

Authority for this program is contained in Title IV, Part A, Subpart 2, Chapter 1, Section 402C of the Higher Education Act of 1965, as amended by the Higher Education Opportunity Act of 2008. Eligible applicants include institutions of higher education, public or private agencies or organizations, including community-based organizations with experience in serving disadvantaged youth, secondary schools, and combinations of institutions, agencies, organizations, and secondary schools.

The Department is requesting a reinstatement, with change, of the application for grants under the UBMS Program. The Department is requesting a reinstatement with change because the previous UBMS application was discontinued in October 2014 and the application will be needed for a Fiscal Year (FY) 2017 competition for new awards. The FY 2017 application incorporates a competitive preference priority and an invitational priority and removes previously-used competitive preference priorities. The changes do not affect burden hours.

Dated: November 8, 2016.

Kate Mullan,

Acting Director, Information Collection Clearance Division, Office of the Chief Privacy Officer, Office of Management.

[FR Doc. 2016–27284 Filed 11–10–16; 8:45 am]

DEPARTMENT OF EDUCATION

[Docket No. ED–2016–ICCD–0096]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Student Assistance General Provisions—Subpart K—Cash Management

AGENCY: Federal Student Aid (FSA), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 3501 *et seq.*), ED is proposing a revision of an existing information collection.

DATES: Interested persons are invited to submit comments on or before December 14, 2016.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use *http://www.regulations.gov* by searching the Docket ID number ED–2016–ICCD–0096. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at *http://www.regulations.gov* by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. *Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted.* Written requests for information or comments submitted by postal mail or delivery should be addressed to the Director of the Information Collection Clearance Division, U.S. Department of Education, 400 Maryland Avenue SW., LBJ, Room 2E–347, Washington, DC 20202–4537.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Beth Grebeldinger, 202–377–4018.

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Student Assistance General Provisions—Subpart K—Cash Management.

OMB Control Number: 1845–0038.

Type of Review: A revision of an existing information collection.

Respondents/Affected Public: State, Local, and Tribal Governments; Individuals or Households; Private Sector.

Total Estimated Number of Annual Responses: 26,266,031.

Total Estimated Number of Annual Burden Hours: 1,194,318.

Abstract: This request is for a revision to the current information collection 1845–0038 that is expiring. This collection pertains to the recordkeeping requirements contained in the regulations related to the administration of the Subpart K—Cash Management section of the Student Assistance General Provisions. The regulatory language has not changed. These program regulations are designed to provide benefits to Title IV, HEA applicants, and protect the taxpayers' interest. The information collection requirements in these regulations are necessary to provide students with required information about their eligibility to receive funding under the federal student financial aid programs and to prevent fraud and abuse of program funds by allowing students to reduce or reject aid being offered as well as being made aware of when such funding can be expected to be available.

Dated: November 8, 2016.

Kate Mullan,

Acting Director, Information Collection Clearance Division, Office of the Chief Privacy Officer, Office of Management.

Filed Date: 11/7/16.

Accession Number: 20161107–5205.

Comments Due: 5 p.m. ET 11/28/16.

Docket Numbers: ER17–313–000.

Applicants: AEP Texas Central Company.

Description: § 205(d) Rate Filing: TCC-Patriot Wind Farm Second Amend & Restated IA to be effective 10/13/2016.

Filed Date: 11/7/16.

Accession Number: 20161107–5149.

Comments Due: 5 p.m. ET 11/28/16.

Docket Numbers: ER17–314–000.

Applicants: PJM Interconnection, L.L.C.

Description: § 205(d) Rate Filing: Amendment to ISA SA No. 3333; Queue No. W3–003 to be effective 6/24/2014.

Filed Date: 11/7/16.

Accession Number: 20161107–5154.

Comments Due: 5 p.m. ET 11/28/16.

Take notice that the Commission received the following PURPA 210(m)(3) filings:

Docket Numbers: QM17–2–000.

Applicants: East Kentucky Power Cooperative, Inc.

Description: Application of East Kentucky Power Cooperative, Inc. for the termination of the obligation to purchase power from qualifying facilities.

Filed Date: 11/4/16.

Accession Number: 20161104–5214.

Comments Due: 5 p.m. ET 12/2/16.

Take notice that the Commission received the following electric reliability filings

Docket Numbers: RD16–6–001.

Applicants: North American Electric Reliability Corporation.

Description: Revisions of the North American Electric Reliability Corporation to the Violations Risk Factors for Reliability Standards IRO–018–1 and TOP–010–1.

Filed Date: 11/7/16.

Accession Number: 20161107–5195.

Comments Due: 5 p.m. ET 12/7/16.

The filings are accessible in the Commission's eLibrary system by clicking on the links or querying the docket number.

Any person desiring to intervene or protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Regulations (18 CFR 385.211 and 385.214) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: *http://www.ferc.gov/docs-filing/efiling/filing-req.pdf.* For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Dated: November 7, 2016.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Notice of Petition for Enforcement

	Docket Nos.
Otter Creek Solar LLC ..... Allco Finance Limited PLH LLC.	EL17–16–000
Otter Creek Solar LLC	QF13–402–006
Otter Creek Solar LLC	QF16–353–001
Otter Creek Solar LLC	QF16–354–001
Otter Creek Solar LLC	QF16–355–001
Otter Creek Solar LLC	QF16–356–001

Take notice that on November 4, 2016, pursuant to section 210(h)(2)(B) of the Public Utility Regulatory Policies Act of 1978 (PURPA), Otter Creek Solar LLC, Allco Finance Limited, and PLH LLC (Petitioners) filed a Petition for Enforcement, requesting the Federal Energy Regulatory Commission (Commission) to exercise its authority and initiate enforcement action against the Vermont Public Service Board to remedy their alleged improper implementation of PURPA, all as more fully explained in the petition.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. On or before the comment date, it is not necessary to serve motions to intervene or protests on persons other than the Petitioners.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and 5 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

This filing is accessible on-line at *http://www.ferc.gov,* using the ''eLibrary'' link and is available for review in the Commission's Public Reference Room in Washington, DC. There is an ''eSubscription'' link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email *FERCOnlineSupport@ferc.gov,* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Comment Date: 5:00 p.m. Eastern Time on November 25, 2016.

Dated: November 7, 2016.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 12635–002]

Moriah Hydro Corporation; Notice of Scoping Meetings and Environmental Site Review and Soliciting Scoping Comments

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. *Type of Application:* Original Major License.

b. *Project No.:* P–12635–002.

c. *Date filed:* February 13, 2015.

d. *Applicant:* Moriah Hydro Corporation.

e. *Name of Project:* Mineville Energy Storage Project.

f. *Location:* The project would be located in an abandoned subterranean mine complex [1] in the town of Moriah, Essex County, New York. No federal lands are occupied by project works or located within the project boundary.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* James A. Besha, President, Moriah Hydro Corporation, c/o Albany Engineering Corporation, 5 Washington Square, Albany, New York 12205, (518) 456–7712.

i. *FERC Contact:* Chris Millard (202) 502–8256 or *christopher.millard@ferc.gov.*

j. *Deadline for filing scoping comments:* January 7, 2016.

The Commission strongly encourages electronic filing. Please file scoping comments using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *http://www.ferc.gov/docs-filing/ecomment.asp.* You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, please send a paper copy to: Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426. The first page of any filing should include docket number P–12635–002.

The Commission's Rules of Practice and Procedures require all intervenors filing documents with the Commission to serve a copy of that document on each person on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. This application has been accepted for filing, but is not ready for environmental analysis at this time.

l. The proposed project consists of: (1) An upper reservoir located within the upper portion of the mine between elevations 495 and 1,095 feet above mean seal level (msl), with a surface area of 4 acres and a storage capacity of 2,448 acre-feet; (2) a lower reservoir in the lower portion of the mine between elevations −1,075 and −1,555 feet msl, with a surface area of 5.1 acres and a storage capacity of 2,448 acre-feet; (3) a 14-foot-diameter and 2,955-foot-long upper reservoir shaft connecting the upper reservoir to the high-pressure penstock located below the powerhouse chamber floor; (4) a 14-foot-diameter and 2,955-foot-long lower reservoir shaft connecting the lower reservoir and the lower reservoir ventilation tunnel; (5) two 6-foot-diameter emergency evacuation shafts located between the powerhouse chamber and the electrical equipment chamber; (6) a 25-foot-diameter main shaft extending 2,955 feet from the surface down to the powerhouse chamber; (7) 15-foot-diameter high- and low-pressure steel penstocks embedded beneath the powerhouse chamber floor; (8) a 320-foot-long by 80-foot-wide powerhouse chamber, containing 100 reversible pump-turbine units, each with a nameplate generating capacity of 2.4 megawatts; (9) a 274-foot-long by 36-foot-wide underground electrical equipment chamber adjacent to the powerhouse chamber; (10) an inclined electrical tunnel connecting the electrical equipment chamber to a new 115-kilovolt (kV) substation constructed adjacent to an existing single circuit 115-kV transmission line located about one horizontal mile from the underground powerhouse chamber; and (11) appurtenant facilities. The project would operate as a closed-loop system to meet energy demands and grid control requirements. The project would have an average annual generation of 421 gigawatt-hours (GWh). The average pumping power used by the project would be 554 GWh.

m. A copy of the application is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC Online Support. A copy is also available for inspection and reproduction at the address in item h above.

Register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

n. Scoping Process

The Commission intends to prepare an Environmental Assessment (EA) on the project in accordance with the National Environmental Policy Act. The EA will consider both site-specific and cumulative environmental impacts and reasonable alternatives to the proposed action.

[1] The existing mine complex is composed of the interconnected Old Bed, Bonanza open pit, and Harmony mines.

Scoping Meetings

FERC staff will conduct one agency scoping meeting and one public meeting. The agency scoping meeting will focus on resource agency and non-governmental organization (NGO) concerns, while the public scoping meeting is primarily for public input. All interested individuals, organizations, and agencies are invited to attend one or both of the meetings, and to assist the staff in identifying the scope of the environmental issues that should be analyzed in the EA. The times and locations of these meetings are as follows:

Agency Scoping Meeting

Date: Wednesday, December 7, 2016
Time: 10:00 a.m.
Place: New York State Department of Environmental Conservation, Region 5 Sub-Office, Conference Room A
Address: 232 Golf Course Road, Warrensburg, New York 12885

Public Scoping Meeting

Date: Thursday, December 8, 2016
Time: 7:00 p.m.
Place: Moriah Central School Auditorium
Address: Moriah Central School, 39 Viking Lane, Port Henry, New York 12974

Copies of the Scoping Document (SD1) outlining the subject areas to be addressed in the EA were distributed to the parties on the Commission's mailing list. Copies of the SD1 will be available at the scoping meeting or may be viewed on the web at *http://www.ferc.gov* using the ''eLibrary'' link (see item m above).

Environmental Site Review

The Applicant and FERC staff will conduct a project Environmental Site Review beginning at 2:00 p.m. on December 8, 2016. All interested individuals, organizations, and agencies are invited to attend. All participants should meet at the informal parking area of the Moriah Highway Department at 30 Joyce Rd, Mineville, New York. Anyone with questions about the Environmental Site Review should contact Wendy Carey, consultant for Moriah Hydro Corporation at (518) 456–7712.

Objectives

At the scoping meetings, the staff will: (1) Summarize the environmental issues tentatively identified for analysis in the EA; (2) solicit from the meeting participants all available information, especially quantifiable data, on the resources at issue; (3) encourage statements from experts and the public on issues that should be analyzed in the EA, including viewpoints in opposition to, or in support of, the staff's preliminary views; (4) determine the resource issues to be addressed in the EA; and (5) identify those issues that require a detailed analysis, as well as those issues that do not require a detailed analysis.

Procedures

The meetings will be recorded by a stenographer and become part of the formal record of the Commission proceeding on the project.

Individuals, organizations, and agencies with environmental expertise and concerns are encouraged to attend the meeting and to assist the staff in defining and clarifying the issues to be addressed in the EA.

Dated: November 4, 2016.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. AD16–25–000]

Utilization in the Organized Markets of Electric Storage Resources as Transmission Assets Compensated Through Transmission Rates, for Grid Support Services Compensated in Other Ways, and for Multiple Services; Further Supplemental Notice of Technical Conference

As announced in the Notice of Technical Conference issued on September 30, 2016 and the Supplemental Notice of Technical Conference issued on November 1, 2016, the Federal Energy Regulatory Commission (Commission) staff will convene a technical conference on November 9, 2016, at the Commission's offices at 888 First Street NE., Washington, DC 20426 beginning at approximately 10:00 a.m. and ending at approximately 3:00 p.m. (Eastern Time). Commission staff will lead the conference, and Commissioners may attend.

The purpose of the technical conference is to discuss the utilization of electric storage resources as transmission assets compensated through transmission rates, for grid support services that are compensated in other ways, and for multiple services.

This technical conference will be transcribed and webcast. Transcripts of the technical conference will be available for a fee from Ace-Federal Reporters, Inc. at (202) 347–3700. A free webcast of this event will be available through *www.ferc.gov.* Anyone with internet access who wants to view this event can do so by navigating to the Calendar of Events at *www.ferc.gov* and locating this event in the Calendar. The event will contain a link to its webcast. The Capitol Connection provides technical support for webcasts and offers the option of listening to the workshop via phone-bridge for a fee. If you have any questions, visit *www.CapitolConnection.org* or call (703) 993–3100.

Those interested in attending the technical conference or viewing the webcast are encouraged to register at *https://www.ferc.gov/whats-new/registration/11-09-16-form.asp.*

Commission technical conferences are accessible under section 508 of the Rehabilitation Act of 1973. For accessibility accommodations, please send an email to *accessibility@ferc.gov,* call (866) 208–3372 (toll free) or (202) 208–8659 (TTY), or send a FAX to (202) 208–2106 with the required accommodations.

While this conference is not for the purpose of discussing specific cases, we note that the discussions at the conference may address matters at issue in the following Commission proceedings that are either pending or within their rehearing period:

	Docket Nos.
Electric Storage Participation in Regions with Organized Wholesale Electric Markets.	AD16–20.
ISO New England Inc.	ER17–68.
Indianapolis Power & Light Company v. Midcontinent Independent System Operator, Inc.	EL17–8.
New York Independent System Operator, Inc.	ER13–102.
New York Independent System Operator, Inc.	ER15–2059.
New York Independent System Operator, Inc.	ER16–120.
New York Independent System Operator, Inc.	ER16–1404.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER17–306–000]

Beacon Solar 3, LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding of Beacon Solar 3, LLC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is November 25, 2016.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 5 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

The filings in the above-referenced proceeding are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for electronic review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email *FERCOnlineSupport@ferc.gov* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Dated: November 4, 2016.

Comments Due: 5 p.m. ET 11/25/16.

Docket Numbers: ER17–287–000.

Applicants: Southern California Edison Company.

Description: Supplement to November 1, 2016 Southern California Edison Company tariff filing (Revised Executed Filing Letter, Exhibits A and B).

Filed Date: 11/2/16.

Accession Number: 20161102–5176.

Comments Due: 5 p.m. ET 11/23/16.

Docket Numbers: ER17–308–000.

Applicants: PacifiCorp.

Description: Tariff Cancellation: Termination of UAMPS E&P Agreement—Lehi to be effective 1/4/2017.

Filed Date: 11/4/16.

Accession Number: 20161104–5141.

Comments Due: 5 p.m. ET 11/25/16.

Docket Numbers: ER17–309–000.

Applicants: PacifiCorp.

Description: Tariff Cancellation: Termination of WAPA Spence & Thermopolis Agreements to be effective 10/14/2016.

Filed Date: 11/4/16.

Accession Number: 20161104–5145.

Comments Due: 5 p.m. ET 11/25/16.

Docket Numbers: ER17–310–000.

Applicants: Southwest Power Pool, Inc.

Description: § 205(d) Rate Filing: Attachment AE Revisions—Clarify TCR Electrically Equivalent Settlement Location to be effective 1/5/2017.

Filed Date: 11/4/16.

Accession Number: 20161104–5156.

Comments Due: 5 p.m. ET 11/25/16.

Docket Numbers: ER17–311–000.

Applicants: SR South Loving LLC.

Description: Baseline eTariff Filing: Market-Based Rate Tariff to be effective 12/5/2016.

Filed Date: 11/4/16.

Accession Number: 20161104–5157.

Comments Due: 5 p.m. ET 11/25/16.

Docket Numbers: ER17–312–000.

Applicants: PJM Interconnection, L.L.C.

Description: § 205(d) Rate Filing: Revisions to RAA Article 1—Clean-Up to Definition of Capacity Import Limit to be effective 6/27/2016.

Filed Date: 11/4/16.

Accession Number: 20161104–5163.

Comments Due: 5 p.m. ET 11/25/16.

The filings are accessible in the Commission's eLibrary system by clicking on the links or querying the docket number.

Any person desiring to intervene or protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Regulations (18 CFR 385.211 and 385.214) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: *http://www.ferc.gov/docs-filing/efiling/filing-req.pdf.* For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Dated: November 7, 2016.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Combined Notice of Filings #1

Take notice that the Commission received the following electric rate filings:

Docket Numbers: ER15–1976–002.

Applicants: Southwest Power Pool, Inc.

Description: Compliance filing: East River Electric Power Cooperative Formula Rate Compliance Filing to be effective 10/1/2015.

Filed Date: 11/3/16.

Accession Number: 20161103–5122.

Comments Due: 5 p.m. ET 11/25/16.

Docket Numbers: ER16–2725–000.

Applicants: PSEG Energy Solutions LLC.

Description: Errata (Appendix B and E) to the October 27, 2016 Amendment to September 30, 2016 PSEG Energy Solutions LLC tariff filing.

Filed Date: 11/3/16.

Accession Number: 20161103–5111.

Comments Due: 5 p.m. ET 11/25/16.

Docket Numbers: ER17–305–000.

Applicants: Midcontinent Independent System Operator, Inc., Ameren Illinois Company, Ameren Transmission Company of Illinois, Northern States Power Company, a Minnesota corporation.

Description: § 205(d) Rate Filing: 2016–11–03_AIC–ATXI–NSP Attachment O revisions related to ADIT calculations to be effective 1/1/2017.

Filed Date: 11/3/16.

Accession Number: 20161103–5127.

Comments Due: 5 p.m. ET 11/25/16.

Docket Numbers: ER17–306–000.

Applicants: Beacon Solar 3, LLC.

Description: Baseline eTariff Filing: Beacon Solar 3, LLC MBR Tariff to be effective 11/4/2016.

Filed Date: 11/3/16.

Accession Number: 20161103–5128.

Comments Due: 5 p.m. ET 11/25/16.

Docket Numbers: ER17–307–000.

Applicants: PECO Energy Company.

Description: Notice of cancellation of Interconnection Service Agreement No. 791 of PECO Energy Company.

Filed Date: 11/3/16.

Accession Number: 20161103–5167.

Comments Due: 5 p.m. ET 11/25/16.

Take notice that the Commission received the following qualifying facility filings:

Docket Numbers: QF16–806–000.

Applicants: Bi-County Gas Producers, LLC.

Description: Refund Report of Bi-County Gas Producers, LLC.

Filed Date: 11/2/16.

Accession Number: 20161102–5199.

Comments Due: 5 p.m. ET 11/23/16.

The filings are accessible in the Commission's eLibrary system by clicking on the links or querying the docket number.

Any person desiring to intervene or protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Regulations (18 CFR 385.211 and 385.214) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

BILLING CODE 6717–01–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–1148]

Information Collection Being Reviewed by the Federal Communications Commission Under Delegated Authority

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as

required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written PRA comments should be submitted on or before January 13, 2017. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Cathy Williams, FCC, via email *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Cathy Williams at (202) 418–2918.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–1148.

Title: Section 79.3, Video Description of Video Programming.

Form Number: Not Applicable.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities, Not for profit entities and Individual or households.

Number of Respondents and Responses: 50 respondents, 54 responses.

Estimated Time per Response: 1–5 hours.

Frequency of Response: On occasion reporting requirement.

Total Annual Burden: 115 hours.

Total Annual Costs: $22,140.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this collection is contained in 47 U.S.C. 151, 152, 154(i), 303 and 613.

Nature and Extent of Confidentiality: There is no need for confidentiality with this collection of information.

Privacy Impact Assessment: No impact(s).

Needs and Uses: On March 3, 2011, the Commission released a Notice of Proposed Rulemaking (NPRM), FCC 11–36, in the Communications and Video Accessibility Act (CVAA) Video Description proceeding, MB Docket No. 11–43. The NPRM proposed to reinstate the Commission's video description rules adopted in 2000. On April 22, 2011, the Office of Management and Budget (OMB) pre-approved the information collection requirements contained in the proposed rules. On August 25, 2011, the Commission released a Report and Order, FCC 11–126, in the CVAA Video Description proceeding, MB Docket No. 11–43. The Reported and Order adopted the proposed information collection requirements without change. The final rules were codified at 47 CFR 79.3. On September 8, 2011, OMB issued its final approval for the information collection requirements. As discussed below, the information collection requirements include (1) video programming provider petitions for exemption based on ''economic burden'' and (2) non-form consumer complaints alleging violations of the video description rules. On June 25, 2012, the Commission received OMB approval for the removal of a portion of the burden hours and costs that were approved under3060–1148 and placed into collection 3060–0874 (relating to the FCC Form 2000). This modification was due to the filing of complaints alleging violations of the video description rules now being filed via FCC Form 2000C.

Video description is the insertion of audio narrated descriptions of a television program's key visual elements into natural pauses in the program's dialogue, makes video programming more accessible to individuals who are blind or visually impaired. In 2000, the Commission adopted rules requiring certain broadcasters and MVPDs to carry programming with video description. The United States Court of Appeals for the District of Columbia Circuit vacated the rules due to insufficient authority soon after their initial adoption. As directed by the CVAA, the Commission's Report and Order reinstated the video description rules, with certain modifications, effective October 8, 2011. The reinstated rules require large-market broadcast affiliates of the top four national networks and multichannel video programming distributor (''MVPD'') systems with more than 50,000 subscribers to provide video description.

Federal Communications Commission.

Marlene H. Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–0311]

Information Collection Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written PRA comments should be submitted on or before January 13, 2017. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should

advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Cathy Williams, FCC, via email *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Cathy Williams at (202) 418–2918.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–0311.

Title: 47 CFR 76.54, Significantly Viewed Signals; Method to be followed for Special Showings.

Form Number: Not applicable.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents and Responses: 500 respondents, 1,274 responses.

Frequency of Response: On occasion reporting and third party disclosure requirements.

Estimated Time per Response: 1–15 hours (average).

Total Annual Burden: 20,610 hours.

Total Annual Cost: $200,000.

Nature of Response: Required to obtain or retain benefits. The statutory authority for this information collection is contained in Section 4(i) and 340 of the Communications Act of 1934, as amended.

Nature and Extent of Confidentiality: There is no need for confidentiality with this collection of information.

Privacy Impact Assessment: No impact(s).

Needs and Uses: 47 CFR 76.54(b) states significant viewing in a cable television or satellite community for signals not shown as significantly viewed under 47 CFR 76.54(a) or (d) may be demonstrated by an independent professional audience survey of over-the-air television homes that covers at least two weekly periods separated by at least thirty days but no more than one of which shall be a week between the months of April and September. If two surveys are taken, they shall include samples sufficient to assure that the combined surveys result in an average figure at least one standard error above the required viewing level.

47 CFR 76.54(c) is used to notify interested parties, including licensees or permittees of television broadcast stations, about audience surveys that are being conducted by an organization to demonstrate that a particular broadcast station is eligible for significantly viewed status under the Commission's rules. The notifications provide interested parties with an opportunity to review survey methodologies and file objections.

47 CFR 76.54(e) and (f), are used to notify television broadcast stations about the retransmission of significantly viewed signals by a satellite carrier into these stations' local market.

Federal Communications Commission.

Marlene H. Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6712–01–P

FEDERAL DEPOSIT INSURANCE CORPORATION

Sunshine Act Meeting

Pursuant to the provisions of the ''Government in the Sunshine Act'' (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 10:00 a.m. on Tuesday, November 15, 2016, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Disposition of minutes of previous Board of Directors' Meetings.

Memorandum and resolution re: Notice of Proposed Rulemaking: Removing Former OTS Rule Part 390 Subpart I and Revising FDIC Rule Part 343 (Consumer Protections in the Sale of Insurance).

Memorandum and resolution re: Interim Final Rule Amending the FDIC's Freedom of Information Act Regulations at 12 CFR 309.2 (Definitions), 12 CFR 309.4 (Publicly available records) and 12 CFR 309.5 (Procedures for requesting records).

Reports of the Office of Inspector General.

Discussion Agenda:

Memorandum and resolution re: Final Rule—Recordkeeping for Timely Deposit Insurance Determination.

The meeting will be held in the Board Room located on the sixth floor of the FDIC Building located at 550 17th Street NW., Washington, DC.

This Board meeting will be Webcast live via the Internet and subsequently made available on-demand approximately one week after the event. Visit *http://fdic.windrosemedia.com* to view the event. If you need any technical assistance, please visit our Video Help page at: *https://www.fdic.gov/video.html.*

The FDIC will provide attendees with auxiliary aids (*e.g.,* sign language interpretation) required for this meeting. Those attendees needing such assistance should call 703–562–2404 (Voice) or 703–649–4354 (Video Phone) to make necessary arrangements.

Requests for further information concerning the meeting may be directed to Mr. Robert E. Feldman, Executive Secretary of the Corporation, at 202–898–7043.

Dated: November 8, 2016.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Executive Secretary.

BILLING CODE P

FEDERAL FINANCIAL INSTITUTIONS EXAMINATION COUNCIL

[Docket No. FFIEC–2016–0003]

Uniform Interagency Consumer Compliance Rating System

AGENCY: Federal Financial Institutions Examination Council (FFIEC).

ACTION: Notice; final guidance.

SUMMARY: The Federal Financial Institutions Examination Council (FFIEC), on behalf of its members, is revising the Uniform Interagency Consumer Compliance Rating System, more commonly known as the CC Rating System. The agencies comprising the FFIEC are the Board of Governors of the Federal Reserve System (FRB), the Consumer Financial Protection Bureau (CFPB), the Federal Deposit Insurance Corporation (FDIC), the National Credit Union Administration (NCUA), the Office of the Comptroller of the Currency (OCC), and the State Liaison Committee (SLC) (Agencies). The FFIEC promotes compliance with federal consumer protection laws and regulations through each agency's supervisory and outreach programs.

The CC Rating System revisions reflect the regulatory, examination (supervisory), technological, and market changes that have occurred in the years since the original rating system was established in 1980. The revisions are designed to better reflect current consumer compliance supervisory approaches and to more fully align the CC Rating System with the Agencies' current risk-based, tailored examination processes. The CC Rating System is being published after consideration of comments received from the public.

DATES: Effective March 31, 2017.

FOR FURTHER INFORMATION CONTACT:

Board: Lanette Meister, Senior Supervisory Consumer Financial Services Analyst, Board of Governors of the Federal Reserve System, 20th and C Streets NW., Washington, DC 20551, (202) 452–2705.

CFPB: Cassandra Huggins, Attorney-Advisor, Consumer Financial Protection Bureau, 1700 G Street NW., Washington, DC 20552, (202) 435–9177.

FDIC: Ardie Hollifield, Senior Policy Analyst, Federal Deposit Insurance Corporation, 550 17th Street NW., Washington, DC 20429–0002, (202) 898–6638; John Jackwood, Senior Policy Analyst, (202) 898–3991; or Faye Murphy, Chief, Consumer Compliance and UDAP Examination Section, (202) 898–6613.

NCUA: Matthew J. Biliouris, Deputy Director, Office of Consumer Financial Protection and Access, National Credit Union Administration, 1775 Duke Street, Alexandria, VA 22314–3428, (703) 518–1161.

OCC: Kimberly Hebb, Director of Compliance Policy, Office of the Comptroller of the Currency, 400 7th Street SW., Washington, DC 20219, (202) 649–5470; or Michael S. Robertson, Compliance Specialist, (202) 649–5470.

SLC: Matthew Lambert, Policy Counsel, Conference of State Bank Supervisors, 1129 20th Street NW., 9th Floor, Washington, DC 20036, (202) 407–7130.

SUPPLEMENTARY INFORMATION:

Background

Pursuant to 12 U.S.C. 3301 *et seq.,* the FFIEC, established in 1979, is a formal interagency body empowered to prescribe principles and standards for the federal examination of financial institutions and to make recommendations to promote consistency and coordination in the supervision of institutions.

The FFIEC promotes compliance with federal consumer protection laws and regulations through each agency's supervisory and outreach programs. Through compliance supervision, the Agencies determine whether an institution is meeting its responsibility to comply with applicable requirements.

On May 3, 2016, the FFIEC published a notice and request for comment in the **Federal Register** (May Proposal), 81 FR 26553, requesting comment on proposed revisions to the CC Rating System. The CC Rating System is a supervisory policy for evaluating financial institutions' [1] adherence to consumer compliance requirements. It provides a general framework for evaluating compliance assessment factors in order to assign a consumer compliance rating to each federally regulated financial institution.[2] The primary purpose of the CC Rating System is to ensure that regulated financial institutions are evaluated in a comprehensive and consistent manner and that supervisory resources are appropriately focused on areas exhibiting risk of consumer harm and on institutions that warrant elevated supervisory attention. The revised CC Rating System emphasizes the importance of institutions' compliance management systems (CMS), with emphasis on compliance risk management practices designed to manage consumer compliance risk, support compliance, and prevent consumer harm.

The CC Rating System is based upon a scale of 1 through 5, in increasing order of supervisory concern. Thus, 1 represents the highest rating and consequently the lowest level of supervisory concern, while 5 represents the lowest rating and consequently the most critically deficient level of performance and the highest degree of supervisory concern. When using the CC Rating System to assess an institution, the Agencies do not consider an institution's record of performance under the Community Reinvestment Act (CRA) because institutions are evaluated separately for CRA.

Purpose of the Revisions

The CC Rating System revisions are designed to better reflect current consumer compliance supervisory approaches and to more fully align the rating system with the Agencies' current risk-based, tailored examination processes. The revisions to the CC Rating System were not developed to set new or higher supervisory expectations for financial institutions and their adoption will represent no additional regulatory burden.

When the original CC Rating System was adopted in 1980, examinations focused more on transaction testing for regulatory compliance rather than evaluating the sufficiency of an institution's CMS to ensure compliance with regulatory requirements and to prevent consumer harm. In the intervening years, each of the Agencies has adopted a risk-based consumer compliance examination approach to promote strong compliance risk management practices and consumer protection within supervised financial institutions. Risk-based consumer compliance supervision evaluates whether an institution's CMS effectively manages the compliance risk in the products and services offered to its customers. Under risk-based supervision, examiners tailor supervisory activities to the size, complexity, and risk profile of each institution and adjust these activities over time. While compliance management programs vary based on the size, complexity, and risk profile of supervised institutions, all institutions should maintain an effective CMS. The sophistication and formality of the CMS typically will increase commensurate with the size, complexity, and risk profile of the entity.

As the Agencies drafted the new rating system definitions, one objective was to develop a rating system appropriate for evaluating institutions of all sizes. Therefore, the revised CC Rating System conveys that the system is risk-based to recognize and communicate clearly that compliance management programs vary based on the size, complexity, and risk profile of supervised institutions. This concept is reinforced in the Consumer Compliance Rating Definitions by conveying to examiners that assessment factors associated with an institution's CMS should be evaluated commensurate with the institution's size, complexity, and risk profile.

In developing the revised CC Rating System, the Agencies believed it was also important for the new rating system to establish incentives for institutions to promote consumer protection by preventing, self-identifying, and addressing compliance issues in a proactive manner. Therefore, the revised rating system recognizes institutions that consistently adopt these compliance strategies.

Another benefit of the new CC Rating System is to promote coordination, communication, and consistency among the Agencies, consistent with the Agencies' respective supervisory authorities. Each of the Agencies will use the CC Rating System to assign a consumer compliance rating to supervised institutions, including banks and nonbanks, as appropriate, consistent with the agency's supervisory authority. Further, revising the rating system definitions responds to requests

[1] The term *financial institutions* is defined in 12 U.S.C. 3302(3).

[2] NCUA integrates the principles and standards of the current CC Rating System into the existing CAMEL rating structure, in place of a separate rating. When finalized, the revised CC Rating System will be incorporated into NCUA's risk-focused examination program. Using the principles and standards contained in the revised CC Rating System, NCUA examiners will assess a credit union's ability to effectively manage its compliance risk and reflect that ability in the Management component rating and the overall CAMEL rating used by NCUA.

from industry representatives who have asked that the CC Rating System be updated.

Summary of Comments Received

The FFIEC received 17 comments regarding the proposed revisions to the CC Rating System. Eight of the comments were from financial institution trade associations, three from consumer and community advocacy organizations, two from trade consultants, one from a financial holding company, one from an individual, and two from anonymous sources.

Commenters generally favored the changes to the CC Rating System, commending the Agencies':

1. Recognition of the need for the CC Rating System to be risk-based and focus more on the sufficiency of the CMS;

2. inclusion of incentives to support institutions' establishment of effective consumer compliance programs;

3. consideration of violations of consumer laws based on root cause, severity, duration, and pervasiveness;

4. inclusion of third-party relationships; and

5. application of the same rating system across providers of consumer financial services under the Agencies' jurisdictions.

Some commenters recommended clarifying changes to various aspects of the revised rating system, as described below. After consideration of all comments, the FFIEC is issuing this final CC Rating System substantially as proposed, but with some changes for clarification purposes. The following discussion describes the comments received and changes made to the CC Rating System in response. The final updated CC Rating System is included at the end of this Notice.

Principles of the Interagency CC Rating System

The Agencies developed four principles to serve as a foundation for the CC Rating System. Under those principles, the rating system must be risk-based, transparent, actionable, and should incent compliance.

The Agencies received comments concerning the first principle, which states that the CC Rating System must be risk-based. One commenter encouraged the Agencies to adopt standards that are risk-based to ensure that small institutions are not overwhelmed by unwieldy regulatory burden. The Agencies agree. As explained above, the revisions to the CC Rating System were not developed to set new or higher supervisory expectations for financial institutions and their adoption will not increase regulatory burden. Additionally, the CC Rating System directs examiners to assess an institution's CMS commensurate with the institution's size, complexity, and risk profile.

Five-Level Rating Scale

Commenters recommended that descriptive language be added to each of the five levels of the CC Rating System and to certain assessment factors, and that specific examples be provided to clarify what is required under the new rating system. One commenter stated that the distinction between the assessment factor levels is subjective. Another commenter suggested that the CC Rating System use descriptive adjectives instead of numbers to portray examination ratings. The Agencies believe that the adjectives used in each of the assessment factors under the numerical ratings contained in the Consumer Compliance Rating Definitions, as well as the description of the numerical ratings contained in the Guidance, provide useful terms and clear distinctions between the rating levels. The rating levels and categories will allow examiners to distinguish between varying degrees of supervisory concern when rating institutions. Therefore, the Agencies concluded that the addition of descriptive terms to the numerical rating in the CC Rating System would not be necessary.

A commenter suggested that each of the three categories of assessment factors should be assigned a numerical average or weight of importance. The consumer compliance rating reflects a comprehensive evaluation of a financial institution's performance by considering the categories and assessment factors in the context of the size, complexity, and risk profile of the institution. Thus, the rating is not based on a numeric average or any other quantitative calculation. The relative importance of each category or assessment factor may differ based on the size, complexity, and risk profile of an individual institution. Accordingly, one or more category or assessment factor may be more or less relevant at one financial institution as compared to another institution. An examiner must balance conclusions about the effectiveness of the financial institution's CMS over the individual products, services, and activities of the organization when arriving at a consumer compliance rating. Therefore, the Agencies do not believe it would be appropriate to implement a numerical average or weighting within the final CC Rating System.

Board and Management Oversight

Commenters recommended that the Agencies incorporate discussion of the *Culture of Compliance* into the Board and Management Oversight category. Commenters provided components of a compliance culture such as the Board and Management's commitment to the existence and effectiveness of policies, procedures, risk assessments, due diligence, training, accountability, and an environment in which staff can report compliance issues and receive a positive response from management. The Agencies believe that the details defined in the Consumer Compliance Rating Definitions under Board and Management Oversight address the concerns stated by the commenters by making clear that management teams that achieve satisfactory or better performance exhibit a commitment to each of those areas.

Corrective Action and Self-Identification

A commenter observed that the CC Rating System appropriately encourages a financial institution to proactively correct violations and to provide remediation to affected consumers. However, that commenter suggested the Agencies provide more guidance to make clear that an entity's subsequent corrective action would not compensate for a consistent pattern of non-compliance and weak management. The Agencies agree and believe that this point is reflected in the guidance. The Violations and Consumer Harm category ensures that examiners consider noncompliance and resulting consumer harm when assigning a rating. The other categories require examiners to evaluate the effectiveness of the institution's management and compliance program to identify and manage compliance risk in the institution's products and services and to prevent violations of law and consumer harm.

One commenter expressed concern that the concept of *self-identification* was presented inconsistently in the May Proposal. The commenter noted that the Corrective Action and Self-Identification assessment factor was described only as, any corrective action undertaken as consumer compliance issues are identified within the proposed CC Rating System guidance. The commenter noted that elsewhere in the proposal, discussion of this assessment factor appropriately incorporates the concept of *self-identification.* The Agencies have updated language in the Guidance to clarify discussion of this assessment factor by adding reference to self-identification of consumer compliance

issues to the description of the Corrective Action and Self-Identification assessment factor.

Training

One commenter recommended that the CC Rating System require training programs to adequately train employees on compliance with fair lending and consumer protection laws. The Agencies believe that the definitions included in the Training assessment factor appropriately describe the Agencies' expectations that compliance training programs encompass consumer protection laws and regulations and do not believe that more specificity would be helpful.

Third-Party Relationships

One commenter supported the assessment of third-party relationship management within the CC Rating System. The commenter stated that regulatory oversight of third-party relationships is critical to ensure that financial institutions do not use those relationships to avoid compliance with consumer protection and fair lending laws.

Another commenter suggested the CC Rating System should clarify that the evaluation of an institution's third-party relationships will be limited to relationships between the financial institutions and vendors that impact consumer financial products and services. Specifically, the commenter suggested the Agencies should clarify that the CC Rating System does not extend to the financial institutions' broad third-party relationship management program. The Agencies note that the CC Rating System requires examiners to review a financial institution's management of third-party relationships and servicers as part of its overall consumer compliance program. The CC Rating System does not impose specific expectations for management of third-party relationships. Such expectations are provided in separate guidance issued by each of the Agencies.[3]

Violations of Law and Consumer Harm

Commenters expressed conflicting concerns over the Violations of Law and Consumer Harm category. Some noted that the category is defined too narrowly in that it does not appropriately consider practices that present a risk of harm to consumers that are not clear violations of law. The Agencies believe that management of compliance risk is appropriately considered in the other two categories. Specifically, the first two categories, ''Board and Management Oversight and Compliance Program include, for example, consideration of how effectively institutions identify and manage compliance risks, including emerging risks; assessment of whether institutions evaluate product changes before and after implementing the changes; and evaluation of the sufficiency of the institution's procedures, training, and monitoring practices to manage compliance risk in the products, services, and activities of the institution. Others commented that the CC Rating System should be narrowed to address only violations of law that result in consumer harm. These commenters believe that a CMS deficiency exists only when a legal violation occurs that results in sufficient consumer harm. The Agencies disagree that a CMS can only be judged to be deficient when violations of law occur. The CC Rating System incents institutions to implement a CMS that effectively prevents, identifies, and addresses CMS deficiencies and any violations of laws or regulations.

One commenter noted that the Rating Categories should be weighted, with Violations of Law and Consumer Harm carrying the most weight because the commenter believes that prevention of violations and consumer harm is the entire purpose of the CC Rating System. While preventing consumer harm is critically important and integral to the CC Rating System, the Agencies disagree that the best way to achieve this purpose would be by requiring that this category always be weighted more than the others. The Agencies believe that CMS plays a critical role in prevention of violations and consumer harm. Thus, while the Violations of Law and Consumer Harm category evaluates violations and harm that have occurred, the other two categories evaluate the effectiveness of the CMS to prevent consumer violations and harm.

Severity

One commenter stated that the severity of a violation should not be based solely on the dollar amount of consumer harm. The revised CC Rating System does not base severity solely on a dollar amount of harm. The CC Rating system acknowledges that while many instances of consumer harm can be quantified as a dollar amount associated with financial loss, such as charging higher fees for a product than was initially disclosed, consumer harm may also result from a denial of an opportunity.

Assignment of Ratings by Supervisors

Several commenters encouraged the Agencies to implement a rating system with a single consumer compliance rating for all institutions, including those with assets greater than $10 billion. Commenters noted concerns with reconciling different ratings issued by two agencies and questioned whether two consumer compliance ratings could provide actionable feedback and effective incentives to supervised institutions. The Agencies believe that the detail that examiners provide regarding the scope of the compliance areas and products reviewed in arriving at a consumer compliance rating furnishes sufficient context to support effective financial institution response to rating conclusions. The CFPB will continue to issue consumer compliance ratings to providers of consumer financial products and services under its supervisory jurisdiction.

Comments Out of Scope of the CC Rating System

Commenters also submitted comments that, while broadly related to consumer compliance ratings, fall outside the scope of the CC Rating System. For example, some commenters identified specific consumer protection issues, such as overdraft practices and bank partnerships with non-bank lenders, that they believe should merit heightened consideration within the examination process. While these issues may be important, the CC Rating System does not provide guidance to examiners regarding specific consumer compliance issues. The Agencies provide such issue-oriented guidance and guidance on risk-focused supervision in separate official letters and bulletins.

Three commenters suggested that the CC Rating System require examiners to provide a summary of the institution's

[3] Guidance from the Agencies addressing third-party relationships is generally available on their respective Web sites. See, *e.g.,* CFPB Bulletin 2012–03, ''Service Providers'' (April. 13, 2012), available at *http://files.consumerfinance.gov/f/201204_cfpb_bulletin_service-providers.pdf;* FDIC FIL 44–2208, ''Managing Third-Party Risk'' (June 6, 2008), available at *http://www.fdic.gov/news/news/financial/2008/fil08044a.html;* NCUA Letter to Credit Unions 07–CU–13, ''Evaluating Third Party Relationships'' (December 2007), available at *http://www.ncua.gov/Resources/Documents/LCU2007-13.pdf;* OCC Bulletin OCC 2013–29, ''Third-Party Relationship: Risk Management Guidances'' (October 30, 2013), available at *http://www.occ.gov/news-issuances/bulletins/2013/bulletin-2013-29.html;* Interagency Guidance, ''Weblinking: Identifying Risks and Risk Management Techniques'' (2003), available at *http://www.occ.treas.gov/news-issuances/bulletins/2003/bulletin-2003-15a.pdf.;* NCUA Letter to Credit Unions 03–CU–08, ''Weblinking: Identifying Risks & Risk Management Techniques'' (April 2003), available at *http://ithandbook.ffiec.gov/media/resources/3315/ncu-03-cu-08_weblinking_tech.pdf.* See SR 13–19/CA 13–21, ''Guidance on Managing Outsourcing Risk'' (December 5, 2013) available at *http://www.federalreserve.gov/bankinforeg/srletters/sr1319.htm.*

performance within each category. Historically, examiners at each agency have articulated factors contributing to the consumer compliance rating within the Report of Examination. Financial institutions will continue to receive this information through that report.

One commenter suggested mandatory penalties for less-than-satisfactory performance. The CC Rating System does not address the Agencies' supervisory response to consumer compliance ratings.

Two commenters also suggested that the FFIEC should conduct an assessment of examination results across the Agencies to evaluate the success of the CC Rating System implementation. Each agency maintains formal training and comprehensive quality assurance processes to ensure consistent application of policy changes and uses these tools on an ongoing basis.

Another commenter emphasized that the Agencies should promote transparency through public release of ratings. Ratings are confidential supervisory information that are prohibited from disclosure except as authorized by federal laws and regulations.

Two commenters supported the NCUA's approach to integrate the principles and standards of the CC Rating System into the existing CAMEL rating structure, in place of a separate or stand-alone CC rating. Using the principles and standards contained in the revised CC Rating System, NCUA examiners will incorporate their assessment of a credit union's ability to effectively manage its compliance risk into the Management component rating and the overall CAMEL rating used by NCUA.

Implementation Date

The FFIEC recommends that the Agencies implement the updated CC Rating System for consumer compliance examinations that begin on or after March 31, 2017.[4]

FFIEC Guidance on the Uniform Interagency Consumer Compliance Rating System

Uniform Interagency Consumer Compliance Rating System

The Federal Financial Institutions Examination Council (FFIEC) member agencies (Agencies) promote compliance with federal consumer protection laws and regulations through supervisory and outreach programs.[5] The Agencies engage in consumer compliance supervision to assess whether a financial institution is meeting its responsibility to comply with these requirements.

This Uniform Interagency Consumer Compliance Rating System (CC Rating System) provides a general framework for assessing risks during the supervisory process using certain compliance factors and assigning an overall consumer compliance rating to each federally regulated financial institution.[6] The primary purpose of the CC Rating System is to ensure that regulated financial institutions are evaluated in a comprehensive and consistent manner, and that supervisory resources are appropriately focused on areas exhibiting risk of consumer harm and on institutions that warrant elevated supervisory attention.

The CC Rating System is composed of guidance and definitions. The guidance provides examiners with direction on how to use the definitions when assigning a consumer compliance rating to an institution. The definitions consist of qualitative descriptions for each rating category and include compliance management system (CMS) elements reflecting risk control processes designed to manage consumer compliance risk and considerations regarding violations of laws, consumer harm, and the size, complexity, and risk profile of an institution. The consumer compliance rating reflects the effectiveness of an institution's CMS to ensure compliance with consumer protection laws and regulations and reduce the risk of harm to consumers.

Principles of the Interagency CC Rating System

The Agencies developed the following principles to serve as a foundation for the CC Rating System.

Risk-based. Recognize and communicate clearly that CMS vary based on the size, complexity, and risk profile of supervised institutions.

Transparent. Provide clear distinctions between rating categories to support consistent application by the Agencies across supervised institutions. Reflect the scope of the review that formed the basis of the overall rating.

Actionable. Identify areas of strength and direct appropriate attention to specific areas of weakness, reflecting a risk-based supervisory approach. Convey examiners' assessment of the effectiveness of an institution's CMS, including its ability to prevent consumer harm and ensure compliance with consumer protection laws and regulations.

Incent Compliance. Incent the institution to establish an effective consumer compliance system across the institution and to identify and address issues promptly, including self-identification and correction of consumer compliance weaknesses. Reflect the potential impact of any consumer harm identified in examination findings.

Five-Level Rating Scale

The CC Rating System is based upon a numeric scale of 1 through 5 in increasing order of supervisory concern. Thus, 1 represents the highest rating and consequently the lowest degree of supervisory concern, while 5 represents the lowest rating and the most critically deficient level of performance, and therefore, the highest degree of supervisory concern.[7] Ratings of 1 or 2 represent satisfactory or better performance. Ratings of 3, 4, or 5 indicate performance that is less than satisfactory. Consistent with the previously described Principles, the rating system incents a financial institution to establish an effective CMS across the institution, to self-identify risks, and to take the necessary actions to reduce the risk of non-compliance and consumer harm.

- The highest rating of 1 is assigned to a financial institution that maintains a strong CMS and takes action to prevent violations of law and consumer harm.
- A rating of 2 is assigned to a financial institution that maintains a CMS that is satisfactory at managing consumer compliance risk in the institution's products and services and at substantially limiting violations of law and consumer harm.
- A rating of 3 reflects a CMS deficient at managing consumer

[4] For institutions with continuous target supervisory activities during a 12-month supervisory cycle, the Consumer Compliance Rating System Guidance will be used when the supervisory cycle for that institution ends on or after March 31, 2017.

[5] The FFIEC members are the Board of Governors of the Federal Reserve System, the Consumer Financial Protection Bureau (CFPB), the Federal Deposit Insurance Corporation, the National Credit Union Administration, the Office of the Comptroller of the Currency, and the State Liaison Committee.

[6] The Federal Financial Institutions Examination Council Act of 1978 (12 U.S.C. 3302(3)) defines *financial institution.* Additionally, as a member of the FFIEC, the CFPB will also use the CC Rating System to assign a consumer compliance rating, as appropriate for nonbanks, for which it has jurisdiction regarding the enforcement of *Federal consumer financial laws* as defined under the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) (12 U.S.C. 5481 *et seq.).*

[7] The Agencies do not consider an institution's record of performance under the Community Reinvestment Act (CRA) in conjunction with assessing an institution under the CC Rating System since institutions are evaluated separately under the CRA.

compliance risk in the institution's products and services and at limiting violations of law and consumer harm.

• A rating of 4 reflects a CMS seriously deficient at managing consumer compliance risk in the institution's products and services and/or at preventing violations of law and consumer harm. *Seriously deficient* indicates fundamental and persistent weaknesses in crucial CMS elements and severe inadequacies in core compliance areas necessary to operate within the scope of statutory and regulatory consumer protection requirements and to prevent consumer harm.

• A rating of 5 reflects a CMS critically deficient at managing consumer compliance risk in the institution's products and services and/or at preventing violations of law and consumer harm. *Critically deficient* indicates an absence of crucial CMS elements and a demonstrated lack of willingness or capability to take the appropriate steps necessary to operate within the scope of statutory and regulatory consumer protection requirements and to prevent consumer harm.

CC Rating System Categories and Assessment Factors

CC Rating System—Categories

The CC Rating System is organized under three broad categories:

1. Board and Management Oversight,
2. Compliance Program, and
3. Violations of Law and Consumer Harm.

The Consumer Compliance Rating Definitions below list the assessment factors considered within each category, along with narrative descriptions of performance.

The first two categories, Board and Management Oversight and Compliance Program, are used to assess a financial institution's CMS. As such, examiners should evaluate the assessment factors within these two categories commensurate with the institution's size, complexity, and risk profile. All institutions, regardless of size, should maintain an effective CMS. The sophistication and formality of the CMS typically will increase commensurate with the size, complexity, and risk profile of the entity.

Additionally, compliance expectations contained within the narrative descriptions of these two categories extend to third-party relationships into which the financial institution has entered. There can be certain benefits to financial institutions engaging in relationships with third parties, including gaining operational efficiencies or an ability to deliver additional products and services, but such arrangements also may expose financial institutions to risks if not managed effectively. The prudential agencies, the CFPB, and some states have issued guidance describing expectations regarding oversight of third-party relationships. While an institution's management may make the business decision to outsource some or all of the operational aspects of a product or service, the institution cannot outsource the responsibility for complying with laws and regulations or managing the risks associated with third-party relationships.

As noted in the Consumer Compliance Rating Definitions, examiners should evaluate activities conducted through third-party relationships as though the activities were performed by the institution itself. Examiners should review a financial institution's management of third-party relationships and servicers as part of its overall compliance program.

The third category, Violations of Law and Consumer Harm, includes assessment factors that evaluate the dimensions of any identified violation or consumer harm. Examiners should weigh each of these four factors—root cause, severity, duration, and pervasiveness—in evaluating relevant violations of law and any resulting consumer harm.

Board and Management Oversight—Assessment Factors

Under Board and Management Oversight, the examiner should assess the financial institution's board of directors and management, as appropriate for their respective roles and responsibilities, based on the following assessment factors:

• Oversight of and commitment to the institution's CMS;

• effectiveness of the institution's change management processes, including responding timely and satisfactorily to any variety of change, internal or external, to the institution;

• comprehension, identification, and management of risks arising from the institution's products, services, or activities; and

• self-identification of consumer compliance issues and corrective action undertaken as such issues are identified.

Compliance Program—Assessment Factors

Under Compliance Program, the examiner should assess other elements of an effective CMS, based on the following assessment factors:

• Whether the institution's policies and procedures are appropriate to the risk in the products, services, and activities of the institution;

• the degree to which compliance training is current and tailored to risk and staff responsibilities;

• the sufficiency of the monitoring and, if applicable, audit to encompass compliance risks throughout the institution; and

• the responsiveness and effectiveness of the consumer complaint resolution process.

Violations of Law and Consumer Harm—Assessment Factors

Under Violations of Law and Consumer Harm, the examiner should analyze the following assessment factors:

• the root cause, or causes, of any violations of law identified during the examination;

• the severity of any consumer harm resulting from violations;

• the duration of time over which the violations occurred; and

• the pervasiveness of the violations.

As a result of a violation of law, consumer harm may occur. While many instances of consumer harm can be quantified as a dollar amount associated with financial loss, such as charging higher fees for a product than was initially disclosed, consumer harm may also result from a denial of an opportunity. For example, a consumer could be harmed when a financial institution denies the consumer credit or discourages an application in violation of the Equal Credit Opportunity Act,[8] whether or not there is resulting financial harm.

This category of the Consumer Compliance Rating Definitions defines four factors by which examiners can assess violations of law and consumer harm.

Root Cause. The Root Cause assessment factor analyzes the degree to which weaknesses in the CMS gave rise to the violations. In many instances, the root cause of a violation is tied to a weakness in one or more elements of the CMS. Violations that result from critical deficiencies in the CMS evidence a critical absence of management oversight and are of the highest supervisory concern.

Severity. The Severity assessment factor of the Consumer Compliance Rating Definitions weighs the type of consumer harm, if any, that resulted from violations of law. More severe harm results in a higher level of supervisory concern under this factor.

[8] 15 U.S.C. 1691 *et seq.*

For example, some consumer protection violations may cause significant financial harm to a consumer, while other violations may cause negligible harm, based on the specific facts involved.

Duration. The Duration assessment factor considers the length of time over which the violations occurred. Violations that persist over an extended period of time will raise greater supervisory concerns than violations that occur for only a brief period of time. When violations are brought to the attention of an institution's management and management allows those violations to remain unaddressed, such violations are of the highest supervisory concern.

Pervasiveness. The Pervasiveness assessment factor evaluates the extent of the violation(s) and resulting consumer harm, if any. Violations that affect a large number of consumers will raise greater supervisory concern than violations that impact a limited number of consumers. If violations become so pervasive that they are considered to be widespread or present in multiple products or services, the institution's performance under this factor is of the highest supervisory concern.

Self-Identification of Violations of Law and Consumer Harm

Strong compliance programs are proactive. They promote consumer protection by preventing, self-identifying, and addressing compliance issues in a proactive manner. Accordingly, the CC Rating System provides incentives for such practices through the definitions associated with a 1 rating.

The Agencies believe that self-identification and prompt correction of violations of law reflect strengths in an institution's CMS. A robust CMS appropriate for the size, complexity and risk profile of an institution's business often will prevent violations or will facilitate early detection of potential violations. This early detection can limit the size and scope of consumer harm. Moreover, self-identification and prompt correction of serious violations represents concrete evidence of an institution's commitment to responsibly address underlying risks. In addition, appropriate corrective action, including both correction of programmatic weaknesses and full redress for injured parties, limits consumer harm and prevents violations from recurring in the future. Thus, the CC Rating System recognizes institutions that consistently adopt these strategies as reflected in the Consumer Compliance Rating Definitions.

Evaluating Performance Using the CC Rating Definitions

The consumer compliance rating is derived through an evaluation of the financial institution's performance under each of the assessment factors described above. The consumer compliance rating reflects the effectiveness of an institution's CMS to identify and manage compliance risk in the institution's products and services and to prevent violations of law and consumer harm, as evidenced by the financial institution's performance under each of the assessment factors.

The consumer compliance rating reflects a comprehensive evaluation of the financial institution's performance under the CC Rating System by considering the categories and assessment factors in the context of the size, complexity, and risk profile of an institution. It is not based on a numeric average or any other quantitative calculation. Specific numeric ratings will not be assigned to any of the 12 assessment factors. Thus, an institution need not achieve a satisfactory assessment in all categories in order to be assigned an overall satisfactory rating. Conversely, an institution may be assigned a less than satisfactory rating even if some of its assessments were satisfactory.

The relative importance of each category or assessment factor may differ based on the size, complexity, and risk profile of an individual institution. Accordingly, one or more category or assessment factor may be more or less relevant at one financial institution as compared to another institution. While the expectations for compliance with consumer protection laws and regulations are the same across institutions of varying sizes, the methods for accomplishing an effective CMS may differ across institutions.

The evaluation of an institution's performance within the Violations of Law and Consumer Harm category of the CC Rating Definitions considers each of the four assessment factors: Root Cause, Severity, Duration, and Pervasiveness. At the levels of 4 and 5 in this category, the distinctions in the definitions are focused on the root cause assessment factor rather than Severity, Duration, and Pervasiveness. This approach is consistent with the other categories where the difference between a 4 and a 5 is driven by the institution's capacity and willingness to maintain a sound consumer compliance system.

In arriving at the final rating, the examiner must balance potentially differing conclusions about the effectiveness of the financial institution's CMS over the individual products, services, and activities of the organization. Depending on the relative materiality of a product line to the institution, an observed weakness in the management of that product line may or may not impact the conclusion about the institution's overall performance in the associated assessment factor(s). For example, serious weaknesses in the policies and procedures or audit program of the mortgage department at a mortgage lender would be of greater supervisory concern than those same gaps at an institution that makes very few mortgage loans and strictly as an accommodation. Greater weight should apply to the financial institution's management of material products with significant potential consumer compliance risk.

An institution may receive a less than satisfactory rating even when no violations were identified, based on deficiencies or weaknesses identified in the institution's CMS. For example, examiners may identify weaknesses in elements of the CMS in a new loan product. Because the presence of those weaknesses left unaddressed could result in future violations of law and consumer harm, the CMS deficiencies could impact the overall consumer compliance rating, even if no violations were identified.

Similarly, an institution may receive a 1 or 2 rating even when violations were present, if the CMS is commensurate with the risk profile and complexity of the institution. For example, when violations involve limited impact on consumers, were self-identified, and resolved promptly, the evaluation may result in a 1 or 2 rating. After evaluating the institution's performance in the two CMS categories, Board and Management Oversight and Compliance Program, and the dimensions of the violations in the third category, the examiner may conclude that the overall strength of the CMS and the nature of observed violations viewed together do not present significant supervisory concerns.

Assignment of Ratings by Supervisor(s)

The prudential regulators will continue to assign and update, as appropriate, consumer compliance ratings for institutions they supervise, including those with total assets of more than $10 billion.[9] As a member of the

[9] Section 1025 of the Dodd-Frank Act (12 U.S.C. 5515) applies to federally insured institutions with more than $10 billion in total assets. This section granted the CFPB exclusive authority to examine insured depository institutions and their affiliates for compliance with Federal consumer financial

Continued

FFIEC, the CFPB will also use the CC Rating System to assign a consumer compliance rating, as appropriate, for institutions with total assets of more than $10 billion, as well as for nonbanks for which it has jurisdiction regarding the enforcement of *Federal consumer financial laws* as defined under the Dodd-Frank Act.[10] The prudential regulators will take into consideration any material supervisory information provided by the CFPB, as that information relates to covered supervisory activities or covered examinations.[11] Similarly, the CFPB will take into consideration any material supervisory information provided by prudential regulators in appropriate supervisory situations.

State regulators maintain supervisory authority to conduct examinations of state-chartered depository institutions and licensed entities. As such, states may assign consumer compliance ratings to evaluate compliance with both state and federal laws and regulations. States will collaborate and consider material supervisory information from other state and federal regulatory agencies during the course of examinations.

CONSUMER COMPLIANCE RATING DEFINITIONS

Assessment factors to be considered	1	2	3	4	5
Board and Management Oversight Board and management oversight factors should be evaluated commensurate with the institution's size, complexity, and risk profile. Compliance expectations below extend to third-party relationships.					
Oversight and Commitment.	Board and management demonstrate strong commitment and oversight to the financial institution's compliance management system.	Board and management provide satisfactory oversight of the financial institution's compliance management system.	Board and management oversight of the financial institution's compliance management system is deficient.	Board and management oversight, resources, and attention to the compliance management system are seriously deficient.	Board and management oversight, resources, and attention to the compliance management system are critically deficient.
	Substantial compliance resources are provided, including systems, capital, and human resources commensurate with the financial institution's size, complexity, and risk profile. Staff is knowledgeable, empowered and held accountable for compliance with consumer laws and regulations.	Compliance resources are adequate and staff is generally able to ensure the financial institution is in compliance with consumer laws and regulations.	Compliance resources and staff are inadequate to ensure the financial institution is in compliance with consumer laws and regulations.	Compliance resources and staff are seriously deficient and are ineffective at ensuring the financial institution's compliance with consumer laws and regulations.	Compliance resources are critically deficient in supporting the financial institution's compliance with consumer laws and regulations, and management and staff are unwilling or incapable of operating within the scope of consumer protection laws and regulations.
	Management conducts comprehensive and ongoing due diligence and oversight of third parties consistent with agency expectations to ensure that the financial institution complies with consumer protection laws, and exercises strong oversight of third parties' policies, procedures, internal controls, and training to ensure consistent oversight of compliance responsibilities.	Management conducts adequate and ongoing due diligence and oversight of third parties to ensure that the financial institution complies with consumer protection laws, and adequately oversees third parties' policies, procedures, internal controls, and training to ensure appropriate oversight of compliance responsibilities.	Management does note adequately conduct due diligence and oversite of third parties to ensure that the financial institution complies with consumer protection laws, nor does it adequately oversees third parties' policies, procedures, internal controls, and training to ensure appropriate oversight of compliance responsibilities.	Management oversight and due diligence over third-party performance, as well as management's ability to adequately identify, measure, monitor, or manage compliance risks, is seriously deficient.	Management oversight and due diligence of third-party performance is critically deficient.

laws. The prudential regulators retained authority for examining insured depository institutions with more than $10 billion in total assets for compliance with certain other laws related to consumer financial protection, including the Fair Housing Act, the Servicemembers Civil Relief Act, and section 5 of the Federal Trade Commission Act.

[10] 12 U.S.C. 5481 *et seq.* A financial institution with assets over $10 billion may receive a consumer compliance rating by both its primary prudential regulator and the CFPB. The rating is based on each agency's review of the institution's CMS and compliance with the federal consumer protection laws falling under each agency's jurisdiction.

[11] The prudential regulators and the CFPB signed a Memorandum of Understanding on Supervisory Coordination dated May 16, 2012 (MOU) intended to facilitate the coordination of supervisory activities involving financial institutions with more than $10 billion in assets as required under the Dodd-Frank Act.

CONSUMER COMPLIANCE RATING DEFINITIONS—Continued

Assessment factors to be considered	1	2	3	4	5
Change Management	Management anticipates and responds promptly to changes in applicable laws and regulations, market conditions and products and services offered by evaluating the change and implementing responses across impacted lines of business. Management conducts due diligence in advance of product changes, considers the entire life cycle of a product or service in implementing change, and reviews the change after implementation to determine that actions taken have achieved planned results.	Management responds timely and adequately to changes in applicable laws and regulations, market conditions, products and services offered by evaluating the change and implementing responses across impacted lines of business. Management evaluates product changes before and after implementing the change.	Management does not respond adequately and/or timely in adjusting to changes in applicable laws and regulations, market conditions, and products and services offered.	Management's response to changes in applicable laws and regulations, market conditions, or products and services offered is seriously deficient.	Management fails to monitor and respond to changes in applicable laws and regulations, market conditions, or products and services offered.
Comprehension, Identification and Management of Risk.	Management has a solid comprehension of and effectively identifies compliance risks, including emerging risks, in the financial institution's products, services, and other activities. Management actively engages in managing those risks, including through comprehensive self-assessments.	Management comprehends and adequately identifies compliance risks, including emerging risks, in the financial institution's products, services, and other activities. Management adequately manages those risks, including through self-assessments.	Management has an inadequate comprehension of and ability to identify compliance risks, including emerging risks, in the financial institution's products, services, and other activities.	Management exhibits a seriously deficient comprehension of and ability to identify compliance risks, including emerging risks, in the financial institution.	Management does not comprehend nor identify compliance risks, including emerging risks, in the financial institution.
Corrective Action and Self-Identification.	Management proactively identifies issues and promptly responds to compliance risk management deficiencies and any violations of laws or regulations, including remediation.	Management adequately responds to and corrects deficiencies and/or violations, including adequate remediation, in the normal course of business.	Management does not adequately respond to compliance deficiencies and violations including those related to remediation.	Management response to deficiencies, violations and examination findings is seriously deficient.	Management is incapable, unwilling and/or fails to respond to deficiencies, violations or examination findings.

CONSUMER COMPLIANCE RATING DEFINITIONS—Continued

Assessment factors to be considered	1	2	3	4	5
Compliance Program Compliance Program factors should be evaluated commensurate with the institution's size, complexity, and risk profile. Compliance expectations below extend to third-party relationships.					
Policies and Procedures.	Compliance policies and procedures and third-party relationship management programs are strong, comprehensive and provide standards to effectively manage compliance risk in the products, services and activities of the financial institution.	Compliance policies and procedures and third-party relationship management programs are adequate to manage the compliance risk in the products, services and activities of the financial institution.	Compliance policies and procedures and third-party relationship management programs are inadequate at managing the compliance risk in the products, services and activities of the financial institution.	Compliance policies and procedures and third-party relationship management programs are seriously deficient at managing compliance risk in the products, services and activities of the financial institution.	Compliance policies and procedures and third-party relationship management programs are critically absent.
Training	Compliance training is comprehensive, timely, and specifically tailored to the particular responsibilities of the staff receiving it, including those responsible for product development, marketing and customer service. The compliance training program is updated proactively in advance of the introduction of new products or new consumer protection laws and regulations to ensure that all staff are aware of compliance responsibilities before rolled out.	Compliance training outlining staff responsibilities is adequate and provided timely to appropriate staff. The compliance training program is updated to encompass new products and to comply with changes to consumer protection laws and regulations.	Compliance training is not adequately comprehensive, timely, updated, or appropriately tailored to the particular responsibilities of the staff.	Compliance training is seriously deficient in its comprehensiveness, timeliness, or relevance to staff with compliance responsibilities, or has numerous major inaccuracies.	Compliance training is critically absent.
Monitoring and/or Audit.	Compliance monitoring practices, management information systems, reporting, compliance audit, and internal control systems are comprehensive, timely, and successful at identifying and measuring material compliance risk management throughout the financial institution. Programs are monitored proactively to identify procedural or training weaknesses to preclude regulatory violations. Program modifications are made expeditiously to minimize compliance risk.	Compliance monitoring practices, management information systems, reporting, compliance audit, and internal control systems adequately address compliance risks throughout the financial institution.	Compliance monitoring practices, management information systems, reporting, compliance audit, and internal control systems do not adequately address risks involving products, services or other activities including, timing and scope.	Compliance monitoring practices, management information systems, reporting, compliance audit, and internal controls are seriously deficient in addressing risks involving products, services or other activities.	Compliance monitoring practices, management information systems, reporting, compliance audit, or internal controls are critically absent.

CONSUMER COMPLIANCE RATING DEFINITIONS—Continued

Assessment factors to be considered	1	2	3	4	5
Consumer Complaint Response.	Processes and procedures for addressing consumer complaints are strong. Consumer complaint investigations and responses are prompt and thorough.	Processes and procedures for addressing consumer complaints are adequate. Consumer complaint investigations and responses are generally prompt and thorough.	Processes and procedures for addressing consumer complaints are inadequate. Consumer complaint investigations and responses are not thorough or timely.	Processes and procedures for addressing consumer complaints and consumer complaint investigations are seriously deficient.	Processes and procedures for addressing consumer complaints are critically absent. Meaningful investigations and responses are absent.
	Management monitors consumer complaints to identify risks of potential consumer harm, program deficiencies, and customer service issues and takes appropriate action.	Management adequately monitors consumer complaints and responds to issues identified.	Management does not adequately monitor consumer complaints.	Management monitoring of consumer complaints is seriously deficient.	Management exhibits a disregard for complaints or preventing consumer harm.
Violations of Law and Consumer Harm					
Root Cause	The violations are the result of minor weaknesses, if any, in the compliance risk management system.	Violations are the result of modest weaknesses in the compliance risk management system.	Violations are the result of material weaknesses in the compliance risk management system.	Violations are the result of serious deficiencies in the compliance risk management system.	Violations are the result of critical deficiencies in the compliance risk management system.
Severity	The type of consumer harm, if any, resulting from the violations would have a minimal impact on consumers.	The type of consumer harm resulting from the violations would have a limited impact on consumers.	The type of consumer harm resulting from the violations would have a considerable impact on consumers.	The type of consumer harm resulting from the violations would have a serious impact on consumers.	
Duration	The violations and resulting consumer harm, if any, occurred over a brief period of time.	The violations and resulting consumer harm, if any, occurred over a limited period of time.	The violations and resulting consumer harm, if any, occurred over an extended period of time.	The violations and resulting consumer harm, if any, have been long-standing or repeated.	
Pervasiveness	The violations and resulting consumer harm, if any, are isolated in number.	The violations and resulting consumer harm, if any, are limited in number.	The violations and resulting consumer harm, if any, are numerous.	The violations and resulting consumer harm, if any, are widespread or in multiple products or services.	

[End of proposed text.]

Dated: November 7, 2016.

FEDERAL RESERVE SYSTEM

Agency Information Collection Activities: Announcement of Board Approval Under Delegated Authority and Submission to OMB

AGENCY: Board of Governors of the Federal Reserve System.

SUMMARY: The Board of Governors of the Federal Reserve System (Board or Federal Reserve) is adopting a proposal to revise, with extension, the mandatory Uniform Interagency Transfer Agent Registration and Amendment Form. The revisions to this mandatory information are effective December 31, 2016.

On June 15, 1984, the Office of Management and Budget (OMB) delegated to the Board authority under the Paperwork Reduction Act (PRA) to approve of and assign OMB control numbers to collection of information requests and requirements conducted or sponsored by the Board. In exercising this delegated authority, the Board is directed to take every reasonable step to solicit comment. In determining whether to approve a collection of information, the Board will consider all comments received from the public and other agencies.

FOR FURTHER INFORMATION CONTACT:

Federal Reserve Board Clearance Officer—Nuha Elmaghrabi—Office of the Chief Data Officer, Board of Governors of the Federal Reserve System, Washington, DC 20551, (202) 452–3829. Telecommunications Device for the Deaf (TDD) users may contact (202) 263–4869, Board of Governors of the Federal Reserve System, Washington, DC 20551.

OMB Desk Officer—Shagufta Ahmed—Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 10235, 725 17th Street NW., Washington, DC 20503.

Final approval under OMB delegated authority of the extension for three years, with revision, of the following report:

Report Title: Uniform Interagency Transfer Agent Registration and Amendment Form.

OMB Control Number: 7100–0099.

Agency Form Number: Form TA–1.

Frequency: On occasion.

Reporters: State member banks (''SMBs'') and their subsidiaries, bank holding companies (''BHCs''), certain nondeposit trust company subsidiaries of BHCs, and savings and loan holding companies (''SLHCs'').

Effective Date: December 31, 2016.

Estimated Number of Respondents: Registrations: 2; amendments: 4.

Estimated Average Hours per Response: Registrations: 1.25 hours; amendments: 10 minutes.

Estimated Annual Burden Hours: 4 hours.

General Description of Report: The Securities Exchange Act of 1934 (the Act) requires any person acting as a transfer agent to register as such and to amend registration information when it changes. State member banks (SMBs) and their subsidiaries, bank holding companies (BHCs), savings and loan holding companies (SLHCs), and certain nondeposit trust company and other subsidiaries of BHCs register with the Federal Reserve System by submitting Form TA–1. The information collected is available to the public upon request and includes the company name, all business addresses, and answers to three questions about the registrant's proposed activities as a transfer agent. The Federal Reserve uses the information to act upon registration applications and to aid in performing its supervisory duties.

Current Actions: On June 10, 2016, the Board, FDIC, and OCC jointly published an initial notice in the **Federal Register** [1] requesting public comment for 60 days on the extension, with revision, of Form TA–1. The Board proposed to revise the Form TA–1 to require submission of the form to a designated Federal Reserve Board email address, as well as certain other instructional clarifications.[2] The comment period for this notice expired on August 9, 2016. The Board did not receive any comments. The revisions will be implemented as proposed.

Legal Authorization and Confidentiality: The Form TA–1 is mandatory and its collection is authorized by sections 17A(c), 17(a)(3), and 23(a)(1) of the Act, as amended (15 U.S.C. 78q–1(c), 78q(a)(3), and 78w(a)(1)). Additionally, section 3(a)(34)(B)(ii) of the Act (15 U.S.C. 78c(a)(34)(B)(ii)) provides that the Board is the appropriate regulatory agency for purposes of various filings by SMBs and their subsidiaries, BHCs, SLHCs, and certain nondepository trust company subsidiaries of BHCs that act as a clearing agency or transfer agent. The registrations are public filings and are not considered confidential.

Board of Governors of the Federal Reserve System, November 8, 2016.

Robert deV. Frierson,

Secretary of the Board.

[FR Doc. 2016–27298 Filed 11–10–16; 8:45 am]

BILLING CODE 6210–01–P

[1] See 81 FR 37665.

[2] The proposed revisions remove references to the Office of Thrift Supervision, clarify the definition of a 'qualifying security' pursuant to regulatory changes, and alter the number of Form TA–1 copies registrants are required to file with the Federal Reserve Board.

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisitions of Shares of a Bank or Bank Holding Company

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire shares of a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. The notices also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than November 29, 2016.

A. Federal Reserve Bank of Minneapolis (Jacquelyn K. Brunmeier, Assistant Vice President) 90 Hennepin Avenue, Minneapolis, Minnesota 55480–0291:

1. *Michael L. Frei, Wagner,* South Dakota, individually and with power to vote the shares held in the Jill M. Frei Trust, to retain control of 25 percent or more of the shares of Commercial Holding Company, Wagner, South Dakota, and thereby indirectly control of Commercial State Bank of Wagner, Wagner, South Dakota.

Board of Governors of the Federal Reserve System, November 8, 2016.

Robert deV. Frierson,

Secretary of the Board.

BILLING CODE 6210–01–P

FEDERAL RESERVE SYSTEM

Agency Information Collection Activities: Announcement of Board Approval Under Delegated Authority and Submission to OMB

AGENCY: Board of Governors of the Federal Reserve System.

SUMMARY: Notice is hereby given of the final approval of a proposal to extend for three years, with revision, the debit card issuer survey (FR 3064a; OMB No. 7100–0344) and to extend for three years, without revision, the payment card network survey (FR 3064b; OMB No. 7100–0344) by the Board of Governors of the Federal Reserve System (Board) under OMB delegated authority, as per 5 CFR 1320.16 (OMB Regulations on Controlling Paperwork Burdens on the Public). Board-approved collections of information are incorporated into the official OMB inventory of currently approved collections of information. Copies of the Paperwork Reduction Act Submission, supporting statements and approved collection of information instrument(s) are placed into OMB's public docket files. The Federal Reserve may not conduct or sponsor, and the respondent is not required to respond to, an information collection that has been extended, revised, or implemented on or after October 1, 1995, unless it displays a currently valid OMB control number.

FOR FURTHER INFORMATION CONTACT:

Federal Reserve Board Clearance Officer —Nuha Elmaghrabi—Office of the Chief Data Officer, Board of Governors of the Federal Reserve System, Washington, DC 20551, (202) 452–3829. Telecommunications Device for the Deaf (TDD) users may contact (202) 263–4869, Board of Governors of the Federal Reserve System, Washington, DC 20551.

OMB Desk Officer—Shagufta Ahmed—Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 10235, 725 17th Street NW., Washington, DC 20503.

Final approval under OMB delegated authority of the extension for three years, with revision, of the following report:

Report Title: Interchange Transaction Fees Surveys.

Agency Form Number: FR 3064a (Extended with revision) and FR 3064b (Extended without revision).

OMB Control Number: 7100–0344.

Frequency: FR 3064a—Biennial; FR 3064b—Annual.

Respondents: Issuers of debit cards (FR 3064a) and payment card networks (FR 3064b).

Estimated Annual Burden Hours: FR 3064a: 89,280 hours; FR 3064b: 1,275 hours.

Estimated Average Hours per Response: FR 3064a: 160 hours; FR 3064b: 75 hours.

Number of Respondents: FR 3064a: 558; FR 3064b: 17.

General description of report: The FR 3064a and 3064b surveys are authorized by subsection 920(a) of the Electronic Fund Transfer Act, which was amended by section 1075(a) of the Dodd-Frank Act.[1] This statutory provision requires the Federal Reserve, at least once every two years,[2] to disclose aggregate or summary information concerning the costs incurred and interchange transaction fees charged or received by issuers or payment card networks in connection with the authorization, clearance or settlement of electronic debit transaction, as the Federal Reserve considers appropriate and in the public interest.[3] It also provides the Federal Reserve with authority to require issuers and payment card networks to provide information to enable the Federal Reserve to carry out the provisions of the subsection.[4] The obligation to respond to these surveys is mandatory.

In accordance with the statutory requirement, the Federal Reserve will release aggregate or summary information from the survey responses. In addition, the Federal Reserve will release, at the network level, the percentage of total number of transactions, the percentage of total value of transactions, and the average transaction value for exempt and not-exempt issuers obtained on the FR 3064b. The Federal Reserve has determined to release this information both because it can already be determined mathematically based on the information the Federal Reserve currently releases on average interchange fees and because the Federal Reserve believes the release of such information may be useful to issuers and merchants in choosing payment card networks in which to participate and to policymakers in assessing the effect of Regulation II on the level of interchange fees received by issuers over time.

However, the remaining individual issuer and payment card information collected on these surveys can be kept confidential under exemption (b)(4) of the Freedom of Information Act (FOIA) because staff has advised that, if released, this information would cause substantial harm to the competitive position of the survey respondents.[5]

Abstract: The Wall Street Reform and Consumer Protection Act of 2010 (Dodd-Frank Act) requires the Federal Reserve to disclose, at least every two years, such aggregate or summary information concerning the costs incurred for, and interchange transaction fees received by, issuers with respect to debit card transactions, as the Federal Reserve considers appropriate or in the public interest. The data from these surveys are used in fulfilling that disclosure requirement. In addition, the Federal Reserve uses data from the payment card network survey (FR 3064b) to publicly report on an annual basis the extent to which networks have established separate interchange fees for exempt and covered issuers. Finally, the Federal Reserve uses the data from these surveys in determining whether to propose revisions to the interchange fee standards in Regulation II (12 CFR part 235). The Dodd-Frank Act provides the Federal Reserve with authority to require debit card issuers and payment card networks to submit information in order to carry out provisions of the Dodd-Frank Act regarding interchange fee standards.

Current Actions: On August 9, 2016 the Federal Reserve published a notice in the **Federal Register** (81 FR 52689) requesting public comment for 60 days on the extension, with revision, of the Interchange Transaction Fees Surveys. The comment period for this notice expired on October 11, 2016. The Federal Reserve received one joint comment letter addressing this collection, which are summarized and addressed below.

Summary Discussion of Public Comments and Recommended Responses [6]

The Federal Reserve received one joint comment letter from eight banking industry associations, which concerned the debit card issuer survey (FR 3064a). The commenters in this letter commended the Federal Reserve for proposing a full 90-day period for respondents to complete the survey, but suggested that the 90-day period commence in mid-February rather than mid-January, because respondents generally cannot begin collecting the requested data until February. The commenters suggested several changes to the online reporting tool which they argued would facilitate completion of the survey. The commenters also suggested that the survey no longer ask respondents to provide information on interchange fees repaid as a result of chargebacks and, separately, interchange fees repaid as a result of returns, but instead ask respondents to provide a single number that is interchange fees repaid as a result of chargebacks or returns. In addition, the commenters argued that the survey's definition of ''costs of authorization, clearance, and settlement'' fails to include all costs related to a debit card issuer's authorization, clearance, and settlement activities, and they recommended expanding the definition to include additional cost items. Lastly, the commenters suggested that international fraud losses be included as part of reported fraud losses.

In addition to revisions that were already suggested and were supported by the commenters, the Federal Reserve revised the debit card issuer survey to incorporate certain additional suggestions from the commenters. In particular, the Federal Reserve is commencing the survey at the beginning of February, providing a total line for interchange fees repaid as a result of chargebacks or returns, and making certain technical changes to the reporting tool for the survey. The Federal Reserve is not expanding the survey to include international fraud losses or additional cost elements.

[1] 15 U.S.C. 1693o–2.

[2] The subsection refers to biannual disclosures and the Federal Reserve interprets this to mean once every two years. *See* 76 FR 43458 (July 20, 2011).

[3] 15 U.S.C. 1693o–2(a)(3)(B).

[4] *Id.*

[5] 5 U.S.C. 552(b)(4) (exempting from disclosure ''trade secrets and commercial or financial information obtained from a person and privileged or confidential'').

[6] On August 2, 2016, the Federal Reserve Board granted initial approval of these surveys. Notice of the proposed action was published in the **Federal Register** on August 9, 2016; the comment period ended on October 11, 2016. The Federal Reserve received one comment letter addressing the proposed revisions to the FR 3064 information collection.

Detailed Discussion of Public Comments and Recommended Responses

Debit Card Issuer Survey (FR 3064a)

Section-by-Section Analysis

Section II: All Debit Card Transactions, Section III: All Single-Message (PIN) Debit Card Transactions, Section IV: All Dual-Message (Signature) Debit Card Transactions, and Section V: General-Use Prepaid Card Transactions

Question 3: Cost of authorization, clearance, and settlement—The Federal Reserve proposed to delete questions 3e and 3f which break out the fixed and variable cost components for line items *3b.1 In-house costs and 3b.2 Third-party processing fees,* respectively. The commenters strongly supported this proposal. They argued that the allocation of costs to fixed and variable components places an undue burden on respondents by forcing them to categorize costs in an artificial manner outside of respondents' standard cost accounting practices. The Federal Reserve believes that the commenters' support for this change validates the Federal Reserve's proposal to remove these items.

The commenters further believe that the definition of ''costs of authorization, clearance, and settlement'' fails to include all costs related to a debit card issuer's authorization, clearance, and settlement activities. The commenters provided a list of categories of costs that should be included and recommended that these categories be reported as individual cost items, if they are not already. Specifically, the commenters recommended expanding the definition to include the following items: costs associated with receiving, responding to, and resolving customer inquiries with respect to debit card transactions; debit card transaction compliance costs; debit card transaction non-sufficient funds handing costs; card production and delivery costs; and a portion of costs related to establishing and maintaining debit account relationships.

The Federal Reserve is keeping the set of data elements as proposed. Some of the proposed categories of costs (*e.g.,* cardholder inquiry and non-sufficient funds handling costs) are already included in the survey, and all of the proposed categories are costs that the Federal Reserve determined would not be considered as part of the interchange fee standard in Regulation II. Including these additional cost categories and requiring issuers to report at a more detailed level would not significantly enhance the Federal Reserve's understanding of the relevant costs for Regulation II and would represent a significant burden to respondents.

The commenters suggested that international fraud losses be included as part of reported fraud losses. The commenters argued that international fraud losses should be considered as part of the fraud losses associated with domestic transactions for U.S.-issued debit cards because the data compromise leading to the fraudulent debit card activity frequently occurs in the United States and generates fraudulent international transactions even if the cardholder never leaves the United States. The commenters likened this to the Federal Reserve allowing respondents to include costs from international transaction processing centers when reporting the costs associated with U.S.-issued debit cards. The commenters acknowledge that the Federal Reserve's authority to regulate debit card activity is restricted to the United States, but argued that this does not preclude the Federal Reserve from considering costs that occurred outside of the United States, if those costs could not have been incurred but for the issuance of a U.S. debit card.

International fraud losses arise from international transactions, not domestic transactions, and are therefore outside the scope of Regulation II.[7] As such, international fraud losses are analogous to ATM fraud losses, which are also not included. The commenters noted that costs incurred at international transaction processing centers are included, but that is because costs incurred at those processing centers are still associated with domestic transactions, whereas international fraud losses are not associated with domestic transactions. Thus, international fraud losses will not be reported.

Question 6: Interchange fee revenue—The commenters suggested that the survey no longer ask respondents to provide information on interchange fees repaid as a result of chargebacks and, separately, interchange fees repaid as a result of returns. The commenters argued that payment networks providing interchange fee information do not readily provide a breakdown of chargebacks and returns, such that respondents are often forced to make arbitrary allocations. The commenters suggested that the survey instead ask respondents to provide a single value consisting of interchange fees repaid as a result of chargebacks or returns.

The Federal Reserve added a line item in which respondents are asked to provide the value that commenters argue is readily available: interchange fees repaid as a result of chargebacks or returns. However, the Federal Reserve will continue to also ask respondents to provide a breakdown of this total number into interchange fees repaid as a result of chargebacks and, separately, interchange fees repaid as a result of returns. Respondents will, as always, have the option of entering ''not reported'' for those items.

General Instructions

The Federal Reserve proposed to make the survey available in mid-January, with a deadline in mid-April, thereby giving respondents a full 90 days in which to provide responses. The commenters commended the Federal Reserve for proposing a 90-day completion period, but suggested that the 90-day period begin in mid-February rather than in mid-January. The commenters noted that issuers will not have the required data to respond to the survey before mid-February; for instance, processors and networks often do not provide invoices to issuers until mid-January or later. Also, commenters argued that the necessary personnel are unavailable to begin completing the survey until other end-of-year closing activities are complete.

The Federal Reserve is making the survey available at the beginning of February instead of mid-January, and due in early May rather than mid-April, in order to address the timing concerns raised by the commenters.

The commenters also proposed three changes to the online reporting tool for the survey. First, commenters recommended that the online survey round entries to the nearest whole dollar. Second, commenters recommended that entries be right-justified. Third, commenters suggested that there be a way for respondents to consolidate all of entries, across all sections, into a single editable spreadsheet. The Federal Reserve is making all of these changes, subject to any unanticipated technical difficulties that may arise in the current interface.

Payment Card Network Survey (FR 3064b)

The Federal Reserve received no comments on the Payment Card Network survey (FR 3064b).

[7] Regulation II applies only to electronic debit transactions that are initiated at a merchant located in the United States. *See* paragraph 235.2(h)–5 of the Official Commentary on Regulation II.

Board of Governors of the Federal Reserve System, November 8, 2016.

BILLING CODE 6210–01–P

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The applications will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than December 12, 2016.

A. Federal Reserve Bank of Chicago (Colette A. Fried, Assistant Vice President) 230 South LaSalle Street, Chicago, Illinois 60690–1414:

1. *United Community Bancorp, Inc.*, Chatham, Illinois; to merge with Liberty Bancshares, Inc., Alton, Illinois and thereby indirectly acquire Liberty Bank, Alton, Illinois.

B. Federal Reserve Bank of Dallas (Robert L. Triplett III, Senior Vice President) 2200 North Pearl Street, Dallas, Texas 75201–2272:

1. *BankCap Equity Fund LLC, BankCap Partners GP L.P., and BankCap Partners Fund I, L.P.*, both of Dallas, Texas; to acquire up to 24.73 percent of voting shares of Silvergate Capital Corporation, La Jolla, California through BankCap Partners Opportunity Fund, L.P., Dallas, Texas. Silvergate Capital Corporation controls Silvergate Bank, La Jolla, California.

Board of Governors of the Federal Reserve System, November 7, 2016.

Robert deV. Frierson,

Secretary of the Board.

BILLING CODE 6210–01–P

FEDERAL TRADE COMMISSION

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Extension

AGENCY: Federal Trade Commission (''Commission'' or ''FTC'').

ACTION: Notice.

SUMMARY: The information collection requirements described below will be submitted to the Office of Management and Budget (''OMB'') for review, as required by the Paperwork Reduction Act (''PRA''). The FTC is seeking public comments on its proposal to extend for an additional three years the current PRA clearance for reporting requirements in its Antitrust Improvements Act Rules (''HSR Rules'') and corresponding Notification and Report Form for Certain Mergers and Acquisitions (''Notification and Report Form''). That clearance expires on December 31, 2016.

DATES: Comments must be filed by December 14, 2016.

ADDRESSES: Interested parties may file a comment online or on paper, by following the instructions in the Request for Comment part of the **SUPPLEMENTARY INFORMATION** section below. Write ''HSR PRA Clearance Extension, P169300'' on your comment and file your comment online at *https://ftcpublic.commentworks.com/ftc/hsrrulespra2,* by following the instructions on the web-based form. If you prefer to file your comment on paper, mail your comment to the following address: Federal Trade Commission, Office of the Secretary, 600 Pennsylvania Avenue NW., Suite CC–5610 (Annex J), Washington, DC 20580, or deliver your comment to the following address: Federal Trade Commission, Office of the Secretary, Constitution Center, 400 7th Street SW., 5th Floor, Suite 5610 (Annex J), Washington, DC 20024.

FOR FURTHER INFORMATION CONTACT: Robert L. Jones, Assistant Director, Premerger Notification Office, Bureau of Competition, Federal Trade Commission, Room CC–5301, 600 Pennsylvania Ave. NW., Washington, DC 20580, or by telephone to (202) 326–2740.

SUPPLEMENTARY INFORMATION: On August 12, 2016, the Commission sought comment on the reporting requirements associated with the HSR Rules and corresponding Notification and Report Form. 81 FR 53484. No relevant comments were received. Pursuant to the OMB regulations, 5 CFR part 1320, that implement the PRA, 44 U.S.C. 3501 *et seq.,* the FTC is providing this second opportunity for public comment while seeking OMB approval to renew the pre-existing clearance for those information collection requirements. For more details about the requirements of the HSR Rules, the background behind these information collection provisions, and the basis for the calculations summarized below, see 81 FR 53484.

Burden Statement

The following burden estimates are primarily based on FTC data concerning the number of HSR filings and staff's informal consultations with HSR counsel; the explanations behind them appear in the August 12, 2016 **Federal Register** Notice alluded to above. Minor revisions below to some of the prior calculations reflect the assumption that a transaction withdrawn and later refiled will entail two filings per transaction.

Estimated total annual hours: 168,486 hours.

[(4,553 non-index filings × 37 hours/each) + (10 index filings × 2 hours/each) + (1 withdrawn transaction later restarted × 5 hours))]

Estimated total annual labor cost: $77,503,560.

Estimated total annual non-labor cost: $0.

Request for Comment: You can file a comment online or on paper. For the Commission to consider your comment, we must receive it on or before December 14, 2016. Write ''HSR PRA Clearance Extension, P169300'' on your comment. Your comment—including your name and your state—will be placed on the public record of this proceeding, including to the extent practicable, on the public Commission Web site, at *http://www.ftc.gov/os/publiccomments.shtm.* As a matter of discretion, the Commission tries to remove individuals' home contact information from comments before placing them on the Commission Web site.

Because your comment will be made public, you are solely responsible for making sure that your comment does

not include any sensitive personal information, like anyone's Social Security number, date of birth, driver's license number or other state identification number or foreign country equivalent, passport number, financial account number, or credit or debit card number. You are also solely responsible for making sure that your comment does not include any sensitive health information, like medical records or other individually identifiable health information. In addition, do not include any ''[t]rade secret or any commercial or financial information which is . . . privileged or confidential'' as provided in Section 6(f) of the FTC Act 15 U.S.C. 46(f), and FTC Rule 4.10(a)(2), 16 CFR 4.10(a)(2). In particular, do not include competitively sensitive information such as costs, sales statistics, inventories, formulas, patterns devices, manufacturing processes, or customer names.

If you want the Commission to give your comment confidential treatment, you must file it in paper form, with a request for confidential treatment, and you have to follow the procedure explained in FTC Rule 4.9(c).[1] Your comment will be kept confidential only if the FTC General Counsel grants your request in accordance with the law and the public interest.

Postal mail addressed to the Commission is subject to delay due to heightened security screening. As a result, we encourage you to submit your comments online. To make sure that the Commission considers your online comment, you must file it at your comment and file your comment online at *https://ftcpublic.commentworks.com/ftc/hsrrulespra2* by following the instructions on the web-based form. When this Notice appears at *http://www.regulations.gov/#!home,* you also may file a comment through that Web site.

If you file your comment on paper, write ''HSR PRA Clearance Extension, P169300'' on your comment and on the envelope, mail your comment to the following address: Federal Trade Commission, Office of the Secretary, 600 Pennsylvania Avenue NW., Suite CC–5610 (Annex J), Washington, DC 20580, or deliver your comment to the following address: Federal Trade Commission, Office of the Secretary, Constitution Center, 400 7th Street SW., 5th Floor, Suite 5610 (Annex J), Washington, DC 20024. If possible, submit your paper comment to the Commission by courier or overnight service.

Comments on the disclosure requirements subject to review under the PRA should additionally be submitted to OMB. If sent by U.S. mail, they should be addressed to Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for the Federal Trade Commission, New Executive Office Building, Docket Library, Room 10102, 725 17th Street NW., Washington, DC 20503. Comments sent to OMB by U.S. postal mail, however, are subject to delays due to heightened security precautions. Thus, comments instead should be sent by facsimile to (202) 395–5806.

The FTC Act and other laws that the Commission administers permit the collection of public comments to consider and use in this proceeding as appropriate. The Commission will consider all timely and responsive public comments that it receives on or before December 14, 2016. For information on the Commission's privacy policy, including routine uses permitted by the Privacy Act, see *http://www.ftc.gov/ftc/privacy.htm.*

David C. Shonka,

Acting General Counsel.

BILLING CODE 6750–01–P

[1] In particular, the written request for confidential treatment that accompanies the comment must include the factual and legal basis for the request, and must identify the specific portions of the comment to be withheld from the public record. *See* FTC Rule 4.9(c), 16 CFR 4.9(c).

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day–17–17BM; Docket No. CDC–2016–0102]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing efforts to reduce public burden and maximize the utility of government information, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995. This notice invites comment on Measuring Worker Well-being for Total Worker Health®. This project will provide a tool to measure worker well-being across a range of important domains. Measuring worker well-being is an important initial step towards improving workplace policies, programs, and practices to promote safety and health and prevent disease for employees.

DATES: Written comments must be received on or before January 13, 2017.

ADDRESSES: You may submit comments, identified by Docket No. CDC–2016–0102 by any of the following methods:

- *Federal eRulemaking Portal: Regulations.gov*. Follow the instructions for submitting comments.
- *Mail:* Leroy A. Richardson, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE., MS–D74, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. All relevant comments received will be posted without change to *Regulations.gov*, including any personal information provided. For access to the docket to read background documents or comments received, go to *Regulations.gov*.

Please note: All public comment should be submitted through the Federal eRulemaking portal (*Regulations.gov*) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact the Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE., MS–D74, Atlanta, Georgia 30329; phone: 404–639–7570; Email: *omb@cdc.gov.*

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance

of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information, to search data sources, to complete and review the collection of information; and to transmit or otherwise disclose the information.

Proposed Project

Measuring Worker Well-being for Total Worker Health—New—National Institute for Occupational Safety and Health (NIOSH)—Centers for Disease Control and Prevention (CDC).

Background and Brief Description

As described in the Occupational Safety and Health Act of 1970 (PL 91–596), the mission of NIOSH is to conduct research and investigations on work-related disease and injury and to disseminate information for preventing identified workplace hazards (Sections 20 (a) (1) and (d), Attachment 1). NIOSH is requesting a one-year approval for this data collection.

Measuring worker well-being is the first step towards improving workplace policies, programs, and practices to promote prevention of disease and injury.

The Total Worker Health® Program within NIOSH has made worker well-being a key aspect of its mission. The Total Worker Health (TWH) Program encompasses policies, programs, and practices that integrate protection from work-related safety and health hazards with promotion of injury and illness prevention efforts to advance worker well-being. The goal of TWH is not only to prevent disease or injury, but also to promote a culture of safety and health and an enhancement of overall well-being.

In order to promote and enhance worker well-being it is first necessary to develop and validate instruments aimed at measuring the concept. This study is intended to generate data that can be used to validate a worker well-being survey instrument through testing of its psychometric properties. The survey includes questions on five domains of worker well-being including: worker evaluation and experiences with work; workplace physical environment and safety climate; organizational policies and culture; worker health status; and experiences outside of work (external context).

For this study, the survey instrument will be programmed into a web-based survey that will be administered online to an existing nationwide survey panel of employed adults (KnowledgePanel®) hosted by our vendor, GfK. De-identified data will be transmitted securely to RAND, and RAND researchers will analyze the data as a CDC contractor.

The survey will be fielded to approximately 1,025 respondents in the GFK panel, and the expected burden per respondent for reading the email and completing the survey is 15 minutes or 0.25 hours of their time. This will be a one-time survey and panelists will not be asked to respond to this survey again in the future. The total estimated burden hours are 385 for reading the recruitment email and responding to the survey. There are no costs to the respondent other than their time.

ESTIMATED ANNUALIZED BURDEN HOURS

Respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hrs.)	Total burden (in hrs.)
GFK Panelists	Recruitment email	1,540	1	5/60	128
GFK Panelists	Worker Well-being survey	1,025	1	15/60	257
Total					385

Leroy A. Richardson,

Chief, Information Collection Review Office, Office of Scientific Integrity, Office of the Associate Director for Science, Office of the Director, Centers for Disease Control and Prevention.

Medicare and Medicaid Programs; Quarterly Listing of Program Issuances—July Through September 2016

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Notice.

SUMMARY: This quarterly notice lists CMS manual instructions, substantive and interpretive regulations, and other **Federal Register** notices that were published from July through September 2016, relating to the Medicare and Medicaid programs and other programs administered by CMS.

FOR FURTHER INFORMATION CONTACT: It is possible that an interested party may need specific information and not be able to determine from the listed information whether the issuance or regulation would fulfill that need. Consequently, we are providing contact persons to answer general questions concerning each of the addenda published in this notice.

Addenda	Contact	Phone number
I CMS Manual Instructions	Ismael Torres	(410) 786–1864
II Regulation Documents Published in the **Federal Register**	Terri Plumb	(410) 786–4481
III CMS Rulings	Tiffany Lafferty	(410) 786–7548
IV Medicare National Coverage Determinations	Wanda Belle, MPA	(410) 786–7491
V FDA-Approved Category B IDEs	John Manlove	(410) 786–6877

All Other Information	Annette Brewer	(410) 786–6580

I. Background

The Centers for Medicare & Medicaid Services (CMS) is responsible for administering the Medicare and Medicaid programs and coordination and oversight of private health insurance. Administration and oversight of these programs involves the following: (1) Furnishing information to Medicare and Medicaid beneficiaries, health care providers, and the public; and (2) maintaining effective communications with CMS regional offices, state governments, state Medicaid agencies, state survey agencies, various providers of health care, all Medicare contractors that process claims and pay bills, National Association of Insurance Commissioners (NAIC), health insurers, and other stakeholders. To implement the various statutes on which the programs are based, we issue regulations under the authority granted to the Secretary of the Department of Health and Human Services under sections 1102, 1871, 1902, and related provisions of the Social Security Act (the Act) and Public Health Service Act. We also issue various manuals, memoranda, and statements necessary to administer and oversee the programs efficiently.

Section 1871(c) of the Act requires that we publish a list of all Medicare manual instructions, interpretive rules, statements of policy, and guidelines of general applicability not issued as regulations at least every 3 months in the **Federal Register**.

II. Format for the Quarterly Issuance Notices

This quarterly notice provides only the specific updates that have occurred in the 3-month period along with a hyperlink to the full listing that is available on the CMS Web site or the appropriate data registries that are used as our resources. This is the most current up-to-date information and will be available earlier than we publish our quarterly notice. We believe the Web site list provides more timely access for beneficiaries, providers, and suppliers. We also believe the Web site offers a more convenient tool for the public to find the full list of qualified providers for these specific services and offers more flexibility and ''real time'' accessibility. In addition, many of the Web sites have listservs; that is, the public can subscribe and receive immediate notification of any updates to the Web site. These listservs avoid the need to check the Web site, as notification of updates is automatic and sent to the subscriber as they occur. If assessing a Web site proves to be difficult, the contact person listed can provide information.

III. How To Use the Notice

This notice is organized into 15 addenda so that a reader may access the subjects published during the quarter covered by the notice to determine whether any are of particular interest. We expect this notice to be used in concert with previously published notices. Those unfamiliar with a description of our Medicare manuals should view the manuals at *http://www.cms.gov/manuals.*

Dated: November 7, 2016.

Kathleen Cantwell,

Director, Office of Strategic Operations and Regulatory Affairs.

BILLING CODE 4120–01–P

Publication Dates for the Previous Four Quarterly Notices

We publish this notice at the end of each quarter reflecting information released by CMS during the previous quarter. The publication dates of the previous four Quarterly Listing of Program Issuances notices are: November 13, 2015 (80 FR 70218), February 4, 2016 (81 FR 6009), May 9, 2016 (81 FR 28072) and August 5, 2016 (81 FR 51901). We are providing only the specific updates that have occurred in the 3-month period along with a hyperlink to the website to access this information and a contact person for questions or additional information.

Addendum I: Medicare and Medicaid Manual Instructions (July through September 2016)

The CMS Manual System is used by CMS program components, partners, providers, contractors, Medicare Advantage organizations, and State Survey Agencies to administer CMS programs. It offers day-to-day operating instructions, policies, and procedures based on statutes and regulations, guidelines, models, and directives. In 2003, we transformed the CMS Program Manuals into a web user-friendly presentation and renamed it the CMS Online Manual System.

How to Obtain Manuals

The Internet-only Manuals (IOMs) are a replica of the Agency's official record copy. Paper-based manuals are CMS manuals that were officially released in hardcopy. The majority of these manuals were transferred into the Internet-only manual (IOM) or retired. Pub 15-1, Pub 15-2 and Pub 45 are exceptions to this rule and are still active paper-based manuals. The remaining paper-based manuals are for reference purposes only. If you notice policy contained in the paper-based manuals that was not transferred to the IOM, send a message via the CMS Feedback tool.

Those wishing to subscribe to old versions of CMS manuals should contact the National Technical Information Service, Department of Commerce, 5301 Shawnee Road, Alexandria, VA 22312 Telephone (703-605-6050). You can download copies of the listed material free of charge at: http://cms.gov/manuals.

How to Review Transmittals or Program Memoranda

Those wishing to review transmittals and program memoranda can access this information at a local Federal Depository Library (FDL). Under the FDL program, government publications are sent to approximately 1,400 designated libraries throughout the United States. Some FDLs may have arrangements to transfer material to a local library not designated as an FDL. Contact any library to locate the nearest FDL. This information is available at http://www.gpo.gov/libraries/

In addition, individuals may contact regional depository libraries that receive and retain at least one copy of most federal government publications, either in printed or microfilm form, for use by the general public. These libraries provide reference services and interlibrary loans; however, they are not sales outlets. Individuals may obtain information about the location of the nearest regional depository library from any library. CMS publication and transmittal numbers are shown in the listing entitled Medicare and Medicaid Manual Instructions. To help FDLs locate the materials, use the CMS publication and transmittal numbers. For example, to find the manual for Medicare Internet Only Manual Publication Quarterly Update to the Correct Coding Initiative (CCI) Edits, Version 22.3, Effective October 1, 2016 use (CMS-Pub. 100-04) Transmittal No. 3561.

Addendum I lists a unique CMS transmittal number for each instruction in our manuals or program memoranda and its subject number. A transmittal may consist of a single or multiple instruction(s). Often, it is necessary to use information in a transmittal in conjunction with information currently in the manual. For the purposes of this quarterly notice, we list only the specific updates to the list of manual instructions that have occurred in the 3-month period. This information is available on our website at www.cms.gov/Manuals.

Addendum II: Regulation Documents Published in the Federal Register (July through September 2016)

Regulations and Notices

Regulations and notices are published in the daily **Federal Register**. To purchase individual copies or subscribe to the **Federal Register,** contact GPO at www.gpo.gov/fdsys. When ordering individual

copies, it is necessary to cite either the date of publication or the volume number and page number.

The **Federal Register** is available as an online database through GPO Access. The online database is updated by 6 a.m. each day the **Federal Register** is published. The database includes both text and graphics from Volume 59, Number 1 (January 2, 1994) through the present date and can be accessed at http://www.gpoaccess.gov/fr/index.html. The following website http://www.archives.gov/federal-register/ provides information on how to access electronic editions, printed editions, and reference copies.

This information is available on our website at: http://www.cms.gov/quarterlyproviderupdates/downloads/Regs-3Q16QPU.pdf

For questions or additional information, contact Terri Plumb (410-786-4481).

Addendum III: CMS Rulings (July through September 2016)

CMS Rulings are decisions of the Administrator that serve as precedent final opinions and orders and statements of policy and interpretation. They provide clarification and interpretation of complex or ambiguous provisions of the law or regulations relating to Medicare, Medicaid, Utilization and Quality Control Peer Review, private health insurance, and related matters.

The rulings can be accessed at http://www.cms.gov/Regulations-and-Guidance/Guidance/Rulings. For questions or additional information, contact Tiffany Lafferty (410-786-7548).

Addendum IV: Medicare National Coverage Determinations (July through September 2016)

Addendum IV includes completed national coverage determinations (NCDs), or reconsiderations of completed NCDs, from the quarter covered by this notice. Completed decisions are identified by the section of the NCD Manual (NCDM) in which the decision appears, the title, the date the publication was issued, and the effective date of the decision. An NCD is a determination by the Secretary for whether or not a particular item or service is covered nationally under the Medicare Program (title XVIII of the Act), but does not include a determination of the code, if any, that is assigned to a particular covered item or service, or payment determination for a particular covered item or service. The entries below include information concerning completed decisions, as well as sections on program and decision memoranda, which also announce decisions or, in some cases, explain why it was not appropriate to issue an NCD. Information on completed decisions as well as pending decisions has also been posted on the CMS website. There were no updates that occurred in the 3-month period. This information is available at: www.cms.gov/medicare-coverage-database/. For questions or additional information, contact Wanda Belle, MPA (410-786-7491).

Addendum V: FDA-Approved Category B Investigational Device Exemptions (IDEs) (July through September 2016)

Addendum V includes listings of the FDA-approved investigational device exemption (IDE) numbers that the FDA assigns. The listings are organized according to the categories to which the devices are assigned (that is, Category A or Category B), and identified by the IDE number. For the purposes of this quarterly notice, we list only the specific updates to the Category B IDEs as of the ending date of the period covered by this notice and a contact person for questions or additional information. For questions or additional information, contact John Manlove (410-786-6877).

Under the Food, Drug, and Cosmetic Act (21 U.S.C. 360c) devices fall into one of three classes. To assist CMS under this categorization process, the FDA assigns one of two categories to each FDA-approved investigational device exemption (IDE). Category A refers to experimental IDEs, and Category B refers to non-experimental IDEs. To obtain more information about the classes or categories, please refer to the notice published in the April 21, 1997 **Federal Register** (62 FR 19328).

IDE	Device	Start Date
G160070	Plasma Delipidation System	07/06/2016

G160190	AMPLATZER Duct Occluder II Additional Sizes	09/30/2016

Addendum VI: Approval Numbers for Collections of Information (July through September 2016)

All approval numbers are available to the public at Reginfo.gov. Under the review process, approved information collection requests are assigned OMB control numbers. A single control number may apply to several related information collections. This information is available at www.reginfo.gov/public/do/PRAMain. For questions or additional information, contact William Parham (410-786-4669).

Addendum VII: Medicare-Approved Carotid Stent Facilities, (July through September 2016)

Addendum VII includes listings of Medicare-approved carotid stent facilities. All facilities listed meet CMS standards for performing carotid artery stenting for high risk patients. On March 17, 2005, we issued our decision memorandum on carotid artery stenting. We determined that carotid artery stenting with embolic protection is reasonable and necessary only if performed in facilities that have been determined to be competent in performing the evaluation, procedure, and follow-up necessary to ensure optimal patient outcomes. We have created a list of minimum standards for facilities modeled in part on professional society statements on competency. All facilities must at least meet our standards in order to receive coverage for carotid artery stenting for high risk patients. For the purposes of this quarterly notice, we are providing only the specific updates that have occurred in the 3-month period. This information is available at: http://www.cms.gov/MedicareApprovedFacilitie/CASF/list.asp#TopOfPage For questions or additional information, contact Sarah Fulton, MHS (410-786-2749).

Addendum VIII:
American College of Cardiology's National Cardiovascular Data Registry Sites (July through September 2016)

Addendum VIII includes a list of the American College of Cardiology's National Cardiovascular Data Registry Sites. We cover implantable cardioverter defibrillators (ICDs) for certain clinical indications, as long as information about the procedures is reported to a central registry. Detailed descriptions of the covered indications are available in the NCD. In January 2005, CMS established the ICD Abstraction Tool through the Quality Network Exchange (QNet) as a temporary data collection mechanism. On October 27, 2005, CMS announced that the American College of Cardiology's National Cardiovascular Data Registry (ACC-NCDR) ICD Registry satisfies the data reporting requirements in the NCD. Hospitals needed to transition to the ACC-NCDR ICD Registry by April 2006.

Effective January 27, 2005, to obtain reimbursement, Medicare NCD policy requires that providers implanting ICDs for primary prevention clinical indications (that is, patients without a history of cardiac arrest or spontaneous arrhythmia) report data on each primary prevention ICD procedure. Details of the clinical indications that are covered by Medicare and their respective data reporting requirements are available in the Medicare NCD Manual, which is on the CMS website at http://www.cms.hhs.gov/Manuals/IOM/itemdetail.asp?filterType=none&filterByDID=99&sortByDID=1&sortOrder=ascending&itemID=CMS014961

A provider can use either of two mechanisms to satisfy the data reporting requirement. Patients may be enrolled either in an Investigational Device Exemption trial studying ICDs as identified by the FDA or in the ACC-NCDR ICD registry. Therefore, for a beneficiary to receive a Medicare-covered ICD implantation for primary prevention, the beneficiary must receive the scan in a facility that participates in the ACC-NCDR ICD registry. The entire list of facilities that participate in the ACC-NCDR ICD registry can be found at www.ncdr.com/webncdr/common

For the purposes of this quarterly notice, we are providing only the specific updates that have occurred in the 3-month period. This information is available by accessing our website and clicking on the link for the

American College of Cardiology's National Cardiovascular Data Registry at: www.ncdr.com/webncdr/common. For questions or additional information, contact Sarah Fulton, MHS (410 786 2749).

Facility	City	State
The following facilities are new listings for this quarter.		
New York Community Hospital	Brooklyn	NY
Capital Medical Center	Olympia	WA
Bartow Regional Medical Center	Bartow	FL
Central Carolina (LifePoint)	Sanford	NC
CHI St. Luke's Health Memorial Livingston	Livingston	TX
Skypark Surgery Center	Torrance	CA
Victor Valley Global Medical Center	Victorville	CA
Chambersburg Hospital	Chambersburg	PA
Northeastern Nevada Regional Hospital	Elko	NV
Doctors Hospital of Manteca	Manteca	CA
North Hawaii Community Hospital	Kameula	HI

Facility	City	State
St. Luke's Monroe Hospital	Stroudsburg	PA
Heart and Rhythm Institute of Trinity	Elfers	FL
Olean General Hospital	Olean	NY
Monongahela Valley Hospital	Monongahela	PA
Kaiser Permanente Vallejo Cath Lab	Vallejo	CA
Sonora Regional Medical Center	Sonora	CA
Norton Women's and Kosair Children's Hospital	Louisville	KY

Addendum IX: Active CMS Coverage-Related Guidance Documents (July through September 2016)

CMS issued a guidance document on November 20, 2014 titled "Guidance for the Public, Industry, and CMS Staff: Coverage with Evidence Development Document". Although CMS has several policy vehicles relating to evidence development activities including the investigational device exemption (IDE), the clinical trial policy, national coverage determinations and local coverage determinations, this guidance document is principally intended to help the public understand CMS's implementation of coverage with evidence development (CED) through the national coverage determination process. The document is available at http://www.cms.gov/medicare-coverage-database/details/medicare-coverage-document-details.aspx?MCDId=27. There are no additional Active CMS Coverage-Related Guidance Documents for the 3-month period. For questions or additional information, contact JoAnna Baldwin, MS (410-786-7205).

Addendum X: List of Special One-Time Notices Regarding National Coverage Provisions (July through September 2016)

There were no special one-time notices regarding national coverage provisions published in the 3-month period. This information is available at www.cms.hhs.gov/coverage. For questions or additional information, contact JoAnna Baldwin, MS (410-786 7205).

Addendum XI: National Oncologic PET Registry (NOPR) (July through September 2016)

Addendum XI includes a listing of National Oncologic Positron Emission Tomography Registry (NOPR) sites. We cover positron emission tomography (PET) scans for particular oncologic indications when they are performed in a facility that participates in the NOPR.

In January 2005, we issued our decision memorandum on **positron emission tomography** (PET) scans, which stated that CMS would cover PET scans for particular oncologic indications, as long as they were performed in the context of a clinical study. We have since recognized the National Oncologic PET Registry as one of these clinical studies. Therefore, in order for a beneficiary to receive a Medicare-covered PET scan, the beneficiary must receive the scan in a facility that participates in the registry. There were no additions, deletions, or editorial changes to the listing of National Oncologic Positron Emission Tomography Registry (NOPR) in the 3-month period. This information is available at http://www.cms.gov/MedicareApprovedFacilitie/NOPR/list.asp#TopOfPage. For questions or additional information, contact Stuart Caplan, RN, MAS (410-786-8564).

Addendum XII: Medicare-Approved Ventricular Assist Device (Destination Therapy) Facilities (July through September 2016)

Addendum XII includes a listing of Medicare-approved facilities that receive coverage for ventricular assist devices (VADs) used as destination therapy. All facilities were required to meet our standards in order to receive coverage for VADs implanted as destination therapy. On October 1, 2003, we issued our decision memorandum on VADs for the clinical indication of destination therapy. We determined that VADs used as destination therapy are reasonable and necessary only if performed in facilities that have been determined to have the experience and infrastructure to ensure optimal patient outcomes. We established facility standards and an application process. All facilities were required to meet our standards in order to receive coverage for VADs implanted as destination therapy.

We are providing only the specific updates to the list of Medicare-approved facilities that meet our standards that have occurred in the 3-month period. This information is available at http://www.cms.gov/MedicareApprovedFacilitie/VAD/list.asp#TopOfPage. For questions or additional information, contact Linda Gousis, JD, (410-786-8616).

Facility	Provider Number	Date Approved	State
The following facilities are new listings for this quarter.			
University Hospitals and Health System 2500 North State Street Jackson, MS 39216	25-0001	08/17/2016	MS
Cleveland Clinic Florida 3100 Weston Road Weston, FL 33331	10-0289	05/27/2015	FL

Kaiser Sunnyside Medical Center 10180 SE Sunnyside Road Clackamas, OR 97015-9303	38-0091	09/14/2016	OR
The University of Kansas Hospital Authority 3901 Rainbow Boulevard Kansas City, KS 66160	17-0040	04/06/2016	KS
North Shore University Hospital 300 Community Drive Manhasset, NY 11030	33-0106	09/28/2016	NY

Addendum XIII: Lung Volume Reduction Surgery (LVRS) (July through September 2016)

Addendum XIII includes a listing of Medicare-approved facilities that are eligible to receive coverage for lung volume reduction surgery. Until May 17, 2007, facilities that participated in the National Emphysema Treatment Trial were also eligible to receive coverage. The following three types of facilities are eligible for reimbursement for Lung Volume Reduction Surgery (LVRS):

- National Emphysema Treatment Trial (NETT) approved (Beginning 05/07/2007, these will no longer automatically qualify and can qualify only with the other programs);
- Credentialed by the Joint Commission (formerly, the Joint Commision on Accreditation of Healthcare Organizations (JCAHO)) under their Disease Specific Certification Program for LVRS; and
- Medicare approved for lung transplants.

Only the first two types are in the list. There were no updates to the listing of facilities for lung volume reduction surgery published in the 3-month period. This information is available at www.cms.gov/MedicareApprovedFacilitie/LVRS/list.asp#TopOfPage. For questions or additional information, contact Sarah Fulton, MHS (410-786-2749).

Addendum XIV: Medicare-Approved Bariatric Surgery Facilities (July through September 2016)

Addendum XIV includes a listing of Medicare-approved facilities that meet minimum standards for facilities modeled in part on professional society statements on competency. All facilities must meet our standards in order to receive coverage for bariatric surgery procedures. On February 21, 2006, we issued our decision memorandum on bariatric surgery procedures. We determined that bariatric surgical procedures are reasonable and necessary for Medicare beneficiaries who have a body-mass index (BMI) greater than or equal to 35, have at least one co-morbidity related to obesity and have been previously unsuccessful with medical treatment for obesity. This decision also stipulated that covered bariatric surgery procedures are reasonable and necessary only when performed at facilities that are: (1) certified by the American College of Surgeons (ACS) as a Level 1 Bariatric Surgery Center (program standards and requirements in effect on February 15, 2006); or (2) certified by the American Society for Bariatric Surgery (ASBS) as a Bariatric Surgery Center of Excellence (BSCOE) (program standards and requirements in effect on February 15, 2006).

There were no additions, deletions, or editorial changes to Medicare-approved facilities that meet CMS's minimum facility standards for bariatric surgery that have been certified by ACS and/or ASMBS in the 3-month period. This information is available at www.cms.gov/MedicareApprovedFacilitie/BSF/list.asp#TopOfPage. For questions or additional information, contact Sarah Fulton, MHS (410-786-2749).

Addendum XV: FDG-PET for Dementia and Neurodegenerative Diseases Clinical Trials (July through September 2016)

There were no FDG-PET for Dementia and Neurodegenerative Diseases Clinical Trials published in the 3-month period.

This information is available on our website at www.cms.gov/MedicareApprovedFacilitie/PETDT/list.asp#TopOfPage. For questions or additional information, contact Stuart Caplan, RN, MAS (410-786-8564).

Administration for Children and Families

Agency Information Collection: Comprehensive Child Welfare Information System

Notice

The Office of Management and Budget (OMB) has assigned approval number 0970–0463 to the Comprehensive Child Welfare Information System (CCWIS) Final Rule (81 FR 35450, published June 2, 2016) information collection. The CCWIS Final Rule describes an optional child welfare information system. States and tribes electing to build a CCWIS must collect and report certain information to the Administration for Children and Families regarding their CCWIS plans. The information collection described in the Final Rule includes:

- The automated function list (45 CFR 1355.52(i)(1)(ii)–(iii) and (i)(2))
- The data quality plan (45 CFR 1355.52(d)(5))
- The Notice of Intent (45 CFR 1355.52(i)(1))

The authority for the information collection expires on 10/31/2019 12:00:00 a.m.

Authority: 42 U.S.C. 620 *et seq.,* 42 U.S.C. 670 *et seq.;* 42 U.S.C. 1301 and 1302.

Robert Sargis,

Reports Clearance Officer.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2015–N–4169]

Edward Manookian (Also Known as Ed Manning): Debarment Order

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The U.S. Food and Drug Administration (FDA or Agency) is issuing an order under the Federal Food, Drug, and Cosmetic Act (the FD&C Act) permanently debarring Edward Manookian from providing services in any capacity to a person that has an approved or pending drug product application. FDA bases this order on a finding that Mr. Manookian was convicted of felonies under Federal law for conduct relating to the regulation of a drug product under the FD&C Act. Mr. Manookian was given notice of the proposed permanent debarment and an opportunity to request a hearing within the timeframe prescribed by regulation. Mr. Manookian failed to request a hearing. Mr. Manookian's failure to request a hearing constitutes a waiver of his right to a hearing concerning this action.

DATES: This order is effective November 14, 2016.

ADDRESSES: Submit applications for special termination of debarment to the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Kenny Shade, Division of Enforcement, Food and Drug Administration, 12420 Parklawn Dr. (ELEM–4144), Rockville, MD 20857, 301–796–4640.

SUPPLEMENTARY INFORMATION:

I. Background

Section 306(a)(2)(B) of the FD&C Act (21 U.S.C. 335a(a)(2)(B)) requires debarment of an individual if FDA finds that the individual has been convicted of a felony under Federal law for conduct relating to the regulation of any drug product under the FD&C Act. On August 28, 2015, the U.S. District Court for the Middle District of Tennessee entered judgment against Mr. Manookian for two counts of conspiracy to commit an offense against the United States, in violation of 18 U.S.C. 371.

FDA's finding that the debarment is appropriate is based on the felony convictions referenced herein. The factual basis for these convictions is as follows: Mr. Manookian was the President and owner of Melanocorp, Inc. (Melanocorp), a for-profit corporation that conducted operations in the Middle District of Tennessee, and his duties included overseeing the employees and operations of Melanocorp.

Melanotan II (MII) was a peptide, or series of amino acids, that was marketed, sold, and shipped by Melanocorp to customers in the United States and abroad. Mr. Manookian's company advertised MII, an unapproved new drug, as an injectable tanning product through an internet Web site. The Melanocorp Web site also advertised MII as being 100 percent U.S. made, whereas in fact some of the MII sold by Melanocorp was manufactured in and imported from China.

On or about August 30, 2007, Melanocorp received a warning letter from FDA expressing concern about Melanocorp's marketing of MII. The warning letter noted that, based on information and statements on the Melanocorp Web site, MII constituted a new drug under the FD&C Act that could not be introduced or delivered for introduction into interstate commerce without an FDA approved application. The warning letter concluded that the sale of MII without an FDA approved application violated the FD&C Act and instructed Mr. Manookian's company to take prompt action to correct the violations cited in the warning letter.

On or about September 17, 2007, after consulting with counsel, Mr. Manookian sent a letter to FDA stating that Melanocorp had stopped all promotion and sale of MII in the United States and had stopped taking orders for MII from U.S. residents.

On or about November 29, 2007, FDA sent a letter to an attorney representing Melanocorp, which reiterated that MII was considered by FDA to be an unapproved drug and warned that its introduction or delivery for introduction into interstate commerce would be a violation of the FD&C Act. The letter specifically stated that the sale of MII outside of the United States violated the FD&C Act.

On or about December 14, 2007, Mr. Manookian had a letter sent to FDA from his attorney confirming that Melanocorp had stopped taking orders for MII from U.S. residents. This letter also stated that Melanocorp did not disagree that FDA considered MII to be an unapproved new drug, but Mr. Manookian's position was that Melanocorp could lawfully export MII, regardless of its status as an unapproved new drug.

On or about December 28, 2007, FDA sent a letter to Mr. Manookian's attorney which reiterated that unapproved new drugs do not qualify for export.

Following receipt of the December 28, 2007, correspondence from FDA, Melanocorp continued to ship MII in interstate commerce. Melanocorp primarily sold MII to customers located abroad, but also shipped MII domestically on a more limited basis.

From on or about September 17, 2007, and continuing through in or about April 2009, Mr. Manookian conspired with others to defraud the United States by causing Melanocorp to ship MII to customers in the United States despite telling FDA that Melanocorp would not distribute or market MII in the United States.

As a result of these convictions, FDA sent Mr. Manookian by certified mail on

August 29, 2016, a notice proposing to permanently debar him from providing services in any capacity to a person that has an approved or pending drug product application. The proposal was based on a finding, under section 306(a)(2)(B) of the FD&C Act, that Mr. Manookian was convicted of felonies under Federal law for conduct relating to the regulation of a drug product under the FD&C Act. FDA determined that Mr. Manookian's felony convictions were related to the regulation of drug products because the conduct underlying his convictions undermined FDA's regulatory oversight over drug products marketed in the United States—Mr. Manookian knowingly sold unapproved drugs and put patients at risk. The proposal also offered Mr. Manookian an opportunity to request a hearing, providing him 30 days from the date of receipt of the letter in which to file the request, and advised him that failure to request a hearing constituted a waiver of the opportunity for a hearing and of any contentions concerning this action. The proposal was received on September 2, 2016. Mr. Manookian did not request a hearing and has, therefore, waived his opportunity for a hearing and any contentions concerning his debarment (21 CFR part 12).

II. Findings and Order

Therefore, the Director, Office of Enforcement and Import Operations, Office of Regulatory Affairs, under section 306(a)(2)(B) of the FD&C Act, under authority delegated to him (Staff Manual Guide 1410.35), finds that Edward Manookian has been convicted of felonies under Federal law for conduct relating to the regulation of a drug product under the FD&C Act. Section 306(c)(2)(A)(ii) of the FD&C Act requires that Mr. Manookian's debarment be permanent.

As a result of the foregoing finding, Edward Manookian is permanently debarred from providing services in any capacity to a person with an approved or pending drug product application under section 505, 512, or 802 of the FD&C Act (21 U.S.C. 355, 360b, or 382), or under section 351 of the Public Health Service Act (42 U.S.C. 262), effective (see **DATES**) (see sections 201(dd) (21 U.S.C. 321(dd), 306(c)(1)(B), and (c)(2)(A)(ii) of the FD&C Act). Any person with an approved or pending drug product application who knowingly employs or retains as a consultant or contractor, or otherwise uses the services of Edward Manookian, in any capacity during his debarment, will be subject to civil money penalties (section 307(a)(6) of the FD&C Act (21 U.S.C. 335b(a)(6))). If Mr. Manookian provides services in any capacity to a person with an approved or pending drug product application during his period of debarment he will be subject to civil money penalties (section 307(a)(7) of the FD&C Act). In addition, FDA will not accept or review any abbreviated new drug applications from Edward Manookian during his period of debarment (section 306(c)(1)(B) of the FD&C Act).

Any application by Mr. Manookian for special termination of debarment under section 306(d)(4) of the FD&C Act should be identified with Docket No. FDA–2015–N–4169 and sent to the Division of Dockets Management (see **ADDRESSES**). All such submissions are to be filed in four copies. The public availability of information in these submissions is governed by 21 CFR 10.20.

Publicly available submissions will be placed in the docket, and will be viewable at *http://www.regulations.gov* or at the Division of Dockets Management (see **ADDRESSES**) between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 7, 2016.

Armando Zamora,

Deputy Director, Office of Enforcement and Import Operations, Office of Regulatory Affairs.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2011–N–0144]

Voluntary Qualified Importer Program; Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or we) is announcing the availability of a guidance for industry entitled ''FDA's Voluntary Qualified Importer Program.'' The guidance describes the Voluntary Qualified Importer Program (VQIP), which provides for expedited review and importation of food offered for importation by importers who voluntarily agree to participate in the program. The guidance describes the eligibility criteria for, and benefits of, participation in VQIP. The guidance also provides information on submitting an application for VQIP participation, obtaining a facility certification for the foreign supplier of a food imported under VQIP, the VQIP user fee, conditions that might result in the revocation of VQIP eligibility, and criteria for reinstatement of eligibility.

DATES: Submit either electronic or written comments on FDA guidances at any time.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *http://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *http://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed below (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2011–N–0144 for ''FDA's Voluntary Qualified Importer Program.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *http://www.regulations.gov* or at the Division of Dockets

Management between 9 a.m. and 4 p.m., Monday through Friday.

• *Confidential Submissions*—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *http://www.regulations.gov.* Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *http://www.fda.gov/regulatoryinformation/dockets/default.htm.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *http://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Submit written requests for a single hard copy of the guidance to the Office of Enforcement and Import Operations (ELEM–3108), Office of Regulatory Affairs, Food and Drug Administration, 12420 Parklawn Dr., Element Bldg., Rockville, MD 20857. Send two self-addressed adhesive labels to assist that office in processing your request. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the guidance.

FOR FURTHER INFORMATION CONTACT: *Regarding the guidance:* Office of Enforcement and Import Operations (ELEM–3108), Office of Regulatory Affairs, Food and Drug Administration, 12420 Parklawn Dr., Element Bldg., Rockville, MD 20857, 301–796–0356.

Regarding the information collection: FDA PRA Staff, Office of Operations, Food and Drug Administration, Three White Flint North, 11601 Landsdown St., 10A–12M, North Bethesda, MD 20852, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

Section 302 of the FDA Food Safety Modernization Act (FSMA) (Pub. L. 111–353) amended the Federal Food, Drug, and Cosmetic Act (the FD&C Act) by adding section 806, Voluntary Qualified Importer Program (21 U.S.C. 384b). Section 806(a)(1) of the FD&C Act directs FDA to establish a voluntary program for the expedited review and importation of food, and to establish a process for the issuance of a facility certification to accompany food offered for importation by importers participating in VQIP. Section 806(a)(2) of the FD&C Act directs FDA to issue a guidance document related to participation in, revocation of such participation in, reinstatement in, and compliance with VQIP.

We are announcing the availability of a guidance for industry entitled ''FDA's Voluntary Qualified Importer Program.'' We are issuing this guidance consistent with our good guidance practices regulation (21 CFR 10.115). The guidance represents the current thinking of FDA on this topic. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

In the **Federal Register** of June 5, 2015 (80 FR 32136), we made available a draft guidance for industry on VQIP for importers of human or animal food and gave interested parties an opportunity to submit comments by August 19, 2015, for us to consider before beginning work on the final version of the guidance. We received numerous comments on the draft guidance and have modified the final guidance where appropriate. Changes to the guidance include:

• Clarifying that, during the VQIP fiscal year, a VQIP importer may add additional food from a foreign supplier from which the importer already imports food under VQIP;

• clarifying that VQIP applicants will not be required to upload food labels for foods included in the VQIP application, but FDA may request a copy of food labels for the foods included in the application to determine if there are labeling violations relating to the risk of the food during a VQIP inspection or audit examinations;

• providing examples of how to ensure that the Foreign Supplier Verification Program (FSVP) or the Hazard Analysis and Critical Control Point (HACCP) importer of the food (when it is not the VQIP applicant) is in compliance with the applicable FSVP or HACCP regulations; and

• revising the '3-year import history' eligibility criteria to provide for use of shared importation history of previous or parent companies.

We also made editorial changes and changes to improve clarity. The guidance announced in this notice finalizes the draft guidance dated June 2015.

VQIP begins on January 1, 2018, which is the first date FDA will begin accepting applications to participate in VQIP for the fiscal year 2019 beginning October 1, 2018. We encourage food importers with robust supplier verification programs to apply for participation in VQIP. We anticipate that VQIP will allow FDA to focus its resources on food shipments that pose a higher risk to public health and will facilitate risk-based admissibility practices. We anticipate that we will approve approximately 200 applications for the first year of the program. We established this limit based on consideration of the demands on Agency resources necessary to establish and implement VQIP. We will review applications in the order that we receive them.

II. Paperwork Reduction Act of 1995

This guidance contains information collection provisions that are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). Under the PRA, Federal Agencies must obtain approval from OMB for each collection of information they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3 and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information before submitting the collection to OMB for approval. To comply with this requirement, in the **Federal Register** of June 5, 2015, we gave interested persons 60 days to comment on the information collection provisions in the draft guidance (80 FR 32136 at 32138).

Currently FDA is finalizing the VQIP application and will be submitting the proposed collection for OMB review and clearance under 44 U.S.C. 3507. An

Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. FDA is issuing this final guidance subject to OMB approval of the collection of information. Before the Agency begins collecting information for the VQIP program, FDA will publish a notice in the **Federal Register** announcing OMB's decision to approve, modify, or disapprove the information collection provisions in the guidance.

The guidance also refers to previously approved collections of information found in FDA regulations. The collections of information regarding food labeling have been approved under OMB control number 0910–0381; the collections of information regarding Low Acid Canned Food have been approved under OMB control number 0910–0037; the collections of information regarding Third-Party Certification Bodies to Conduct Food Safety Audits and to Issue Certifications have been approved under OMB control number 0910–0750; the collections of information regarding Current Good Manufacturing Practice and Hazard Analysis and Risk-Based Preventive Controls for Human Food have been approved under OMB control number 0910–0751; the collections of information regarding Current Good Manufacturing Practice and Hazard Analysis and Risk-Based Preventive Controls for Food for Animals have been approved under OMB control number 0910–0789; the collections of information regarding the Foreign Supplier Verification Program have been approved under OMB control number 0910–0752; the collections of information regarding the Sanitary Transportation of Human and Animal Food have been approved under OMB control number 0910–0773; and the collections of information regarding Focused Mitigation Strategies to Protect Food Against Intentional Adulteration have been approved under OMB control number 0910–0812.

III. Electronic Access

Persons with access to the Internet may obtain the guidance at either *http://www.fda.gov/RegulatoryInformation/Guidances* or *http://www.regulations.gov.* Use the FDA Web site listed in the previous sentence to find the most current version of the guidance.

IV. Other Issues for Consideration

FSMA directs FDA to collect user fees to fund VQIP. Consistent with section 743(b)(2)(B)(iii) of the FD&C Act, we set forth a proposed set of guidelines in consideration of the burden of user fee amounts on small businesses in the **Federal Register** of June 5, 2015 (80 FR 32136), which also announced the draft guidance for industry on VQIP. We are considering comments we received on the VQIP user fee. We will publish the actual fee in a **Federal Register** notice in accordance with section 743(b)(1) of the FD&C Act prior to the fiscal year when we begin program benefits.

Dated: November 7, 2016.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2013–N–0579]

Agency Information Collection Activities; Submission for Office of Management and Budget Review; Comment Request; Biological Products: Reporting of Biological Product Deviations and Human Cells, Tissues, and Cellular and Tissue-Based Deviations in Manufacturing

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or we) is announcing that a proposed collection of information has been submitted to the Office of Management and Budget (OMB) for review and clearance under the Paperwork Reduction Act of 1995 (the PRA).

DATES: Fax written comments on the collection of information by December 14, 2016.

ADDRESSES: To ensure that comments on the information collection are received, OMB recommends that written comments be faxed to the Office of Information and Regulatory Affairs, OMB, Attn: FDA Desk Officer, FAX: 202–395–7285, or emailed to *oira_submission@omb.eop.gov.* All comments should be identified with the OMB control number 0910–0458. Also include the FDA docket number found in brackets in the heading of this document.

FOR FURTHER INFORMATION CONTACT: FDA PRA Staff, Office of Operations, Food and Drug Administration, Three White Flint North, 10A63, 11601 Landsdown St., North Bethesda, MD 20852, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: In compliance with 44 U.S.C. 3507, FDA has submitted the following proposed collection of information to OMB for review and clearance.

Biological Products: Reporting of Biological Product Deviations and Human Cells, Tissues, and Cellular and Tissue-Based Product Deviations in Manufacturing; Forms FDA 3486 and 3486A.

OMB Control Number 0910–0458—Extension

Under section 351 of the Public Health Service Act (PHS Act) (42 U.S.C. 262), all biological products, including human blood and blood components, offered for sale in interstate commerce must be licensed and meet standards, including those prescribed in FDA regulations, designed to ensure the continued safety, purity, and potency of such products. In addition under section 361 of the PHS Act (42 U.S.C. 264), FDA may issue and enforce regulations necessary to prevent the introduction, transmission, or spread of communicable diseases between the States or possessions or from foreign countries into the States or possessions. Further, section 501 of the Federal Food, Drug, and Cosmetic Act (the FD&C Act) (21 U.S.C. 351) provides that drugs and devices (including human blood and blood components) are adulterated if they do not conform with current good manufacturing practice (CGMP) assuring that they meet the requirements of the FD&C Act. Establishments manufacturing biological products, including human blood and blood components, must comply with the applicable CGMP regulations (21 CFR parts 211, 606, and 820)) and current good tissue practice (CGTP) regulations (part 1271 (21 CFR part 1271)) as appropriate. FDA regards biological product deviation (BPD) reporting and human cells, tissues, and cellular and tissue-based product (HCT/P) deviation reporting to be an essential tool in its directive to protect public health by establishing and maintaining surveillance programs that provide timely and useful information.

Section 600.14 (21 CFR 600.14), in brief, requires the manufacturer who holds the biological product license, for other than human blood and blood components, and who had control over a distributed product when the deviation occurred, to report to the Center for Biologics Evaluation and Research (CBER) or to the Center for Drugs Evaluation and Research (CDER) as soon as possible but at a date not to exceed 45 calendar days after acquiring information reasonably suggesting that a

reportable event has occurred. Section 606.171 (21 CFR 606.171), in brief, requires licensed manufacturers of human blood and blood components, including Source Plasma, unlicensed registered blood establishments, and transfusion services, who had control over a distributed product when the deviation occurred, to report to CBER as soon as possible but at a date not to exceed 45 calendar days after acquiring information reasonably suggesting that a reportable event has occurred. Similarly, § 1271.350(b) (21 CFR 1271.350(b)), in brief, requires HCT/P establishments that manufacture non-reproductive HCT/Ps described in § 1271.10 to investigate and report to CBER all HCT/P deviations relating to a distributed HCT/P that relates to the core CGTP requirements, if the deviation occurred in the establishment's facility or in a facility that performed a manufacturing step for the establishment under contract, agreement, or other arrangement. Form FDA 3486 is used to submit BPD reports and HCT/P deviation reports.

Respondents to this collection of information are (1) licensed manufacturers of biological products other than human blood and blood components, (2) licensed manufacturers of blood and blood components including Source Plasma, (3) unlicensed registered blood establishments, (4) transfusion services, and (5) establishments that manufacture non-reproductive HCT/Ps regulated solely under section 361 of the PHS Act as described in § 1271.10. The number of respondents and total annual responses are based on the BPD reports and HCT/P deviation reports FDA received in fiscal year 2015. The number of licensed manufacturers and total annual responses under § 600.14 include the estimates for BPD reports submitted to both CBER and CDER. Based on the information from industry, the estimated average time to complete a deviation report is 2 hours, which includes a minimal one-time burden to create a user account for those reports submitted electronically. The availability of the standardized report form, Form FDA 3486, and the ability to submit this report electronically to CBER (CDER does not currently accept electronic filings) further streamlines the report submission process.

CBER has developed a Web-based addendum to Form FDA 3486 (Form FDA 3486A) to provide additional information when a BPD report has been reviewed by FDA and evaluated as a possible recall. The additional information requested includes information not contained in the Form FDA 3486 such as: (1) Distribution pattern; (2) method of consignee notification; (3) consignee(s) of products for further manufacture; (4) additional product information; (5) updated product disposition; and (6) industry recall contacts. This information is requested by CBER through email notification to the submitter of the BPD report. This information is used by CBER for recall classification purposes. At this time, Form FDA 3486A is being used only for those BPD reports submitted under § 606.171. CBER estimates that 5 percent of the total BPD reports submitted to CBER under § 606.171 would need additional information submitted in Form FDA 3486A. CBER further estimates that it would take between 10 to 20 minutes to complete Form FDA 3486A. For calculation purposes, CBER is using 15 minutes.

Activities such as investigating, changing standard operating procedures or processes, and followup are currently required under 21 CFR parts 211 (approved under OMB control number 0910–0139), 606 (approved under OMB control number 0910–0116), 820 (approved under OMB control number 0910–0073) and 1271 (approved under OMB control number 0910–0543) and, therefore, are not included in the burden calculation for the separate requirement of submitting a deviation report to FDA.

In the **Federal Register** of June 7, 2016 (81 FR 36550), we published a 60-day notice requesting public comment on the proposed extension of this collection of information. One comment was submitted in response to the notice concerning potential ways to minimize the burden associated with the information collection. The commenter encouraged FDA to permit the use of attachments to Forms FDA 3486 and 3486A when reporting multiple biological product deviations from a single starting source rather than retype the information. The comment suggested, alternatively, that respondents' burden might be reduced by ''capping the forms at a much lower number of products/lots than the current maximum of 100.'' Finally, the comment suggested Forms FDA 3486 and 3486A incorporate technology that would permit barcode scanning for relevant fields.

FDA is appreciative of this feedback. At this time, however, we are unable to make the suggested revisions to the information collection. Currently, product information can readily be imported from a Microsoft Excel file (in XLS format) into the eBPD report without having to be retyped (up to 100 units/lots). In addition, the product information entered on Form FDA 3486 automatically populates Form FDA 3486A minimizing the need to manually reenter required information. While we will consider future enhancements that allow for attachments and integrate barcode or other technologies that facilitate or otherwise improve reporting, we must ensure that upgrades are compatible with our existing system.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATE ANNUAL REPORTING BURDEN [1]

21 CFR section; activity	FDA Form No.	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
600.14; Reporting of BPDs by licensed manufacturers.	3486	102	5.99	611	2	1,222
606.171; Reporting of product deviations by licensed manufacturers, unlicensed registered blood establishments, and transfusion services.	3486	1,738	26.34	45,774	2	91,548
1271.350(b); HCT/P deviations	3486	97	2.64	256	2	512
Web-based Addendum	[2] 3486A	87	26.31	2,289	0.25 (15 minutes)	572
Total						93,854

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

[2] Five percent of the number of respondents (1,738 × 0.05 = 87) and total annual responses to CBER (45,774 × 0.05 = 2,289).

Dated: November 7, 2016.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Agency Information Collection Activities: Proposed Collection: Public Comment Request; National Hospital Organ Donation Campaign Activity

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice.

SUMMARY: In compliance with the requirement for opportunity for public comment on proposed data collection projects (Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995), HRSA announces plans to submit an Information Collection Request (ICR), described below, to the Office of Management and Budget (OMB). Prior to submitting the ICR to OMB, HRSA seeks comments from the public regarding the burden estimate, below, or any other aspect of the ICR.

DATES: Comments on this ICR must be received no later than January 13, 2017.

ADDRESSES: Submit your comments to *paperwork@hrsa.gov* or mail the HRSA Information Collection Clearance Officer, Room 14N–39, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the data collection plans and draft instruments, email *paperwork@hrsa.gov* or call the HRSA Information Collection Clearance Officer at (301) 443–1984.

SUPPLEMENTARY INFORMATION: When submitting comments or requesting information, please include the information request collection title for reference.

Information Collection Request Title: National Hospital Organ Donation Campaign Activity Scorecard OMB No. 0915–0373, Revision

Abstract: HRSA's Hospital Campaign, a special initiative of the Workplace Partnership for Life program, enlists the help of hospitals nationwide to increase the number of registered organ, eye, and tissue donors by hosting education and registry events in their hospitals and communities. The Activity Scorecard provides activity ideas to participating hospitals and assigns points to each activity. Hospitals that earn a certain number of points annually are recognized by HRSA and the campaign's national partners.

Need and Proposed Use of the Information: There is a substantial imbalance in the U.S. between the number of people whose life depends on an organ transplant (currently about 120,000) and the annual number of organ donors (approximately 14,000 living and deceased donors). In response to the need for increased donation, HRSA conducts public outreach initiatives to encourage the American public to enroll in their state donor registry as future organ donors. As part of this initiative, HRSA supports this National Hospital Organ Donation Campaign to involve hospitals throughout the nation as partners in the national effort to educate their staff and communities about the urgent need for donors and encourage donor registry enrollments.

The activity scorecard serves two key campaign functions: (1) It motivates and facilitates hospitals' participation in this campaign, and (2) it provides the basis for rewarding hospitals for their accomplishments. In providing more than 40 actionable donation promotion strategies hospitals can choose to implement, it eases the process of planning and participation for hospital teams. In addition, by attaching point levels to each activity, HRSA uses the information collected to recognize hospital achievements at bronze, silver, gold, and platinum point equivalents and provides certificates for all hospitals achieving any recognition level.

A list of recognized hospitals is shared with all campaign participants during monthly webinars, in campaign e-newsletters, and in communication pieces sent out by the campaign's national partners, which include the American Hospital Association and the American Society of Transplantation. In addition, local donation organizations and participating state hospital associations use the results to pay tribute to HRSA-recognized hospitals in their local service areas. The information collected also helps HRSA identify best practices that are then shared with all hospital partners on the monthly webinars. This version of the scorecard contains two new opportunities for hospitals to earn points: A point is awarded for each donor registration a hospital motivates and points are awarded for reaching the hospital's donor registration goal.

Likely Respondents: Hospital development and public relations staff of organ procurement and other donation organizations, hospital staff such as nurses or public relations/communications professionals, and volunteers that work with the hospitals on organ donation initiatives.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this Information Collection Request are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
Activity Scorecard (electronic PDF)	1,000	1	1,000	.125	125
Total	1,000		1,000		125

HRSA specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Jason E. Bennett,

Director, Division of the Executive Secretariat.

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Announcement of Inaugural Meeting of the Secretary's Advisory Committee on National Health Promotion and Disease Prevention Objectives for 2030

AGENCY: Office of Disease Prevention and Health Promotion, Office of the Assistant Secretary for Health, Office of the Secretary, Department of Health and Human Services.

ACTION: Notice.

SUMMARY: The U.S. Department of Health and Human Services (HHS) announces the first in a series of federal advisory committee meetings regarding the national health promotion and disease prevention objectives for 2030. The first meeting will be held in the Washington, DC metropolitan area. These meetings will be open to the public. The Committee will review the nation's health promotion and disease prevention objectives and accomplishments and will recommend goals and objectives to improve the health status and reduce health risks for Americans by the year 2030. The Committee will advise the Secretary on the Healthy People 2030 mission statement, vision statement, framework, and organizational structure. The Committee will provide advice regarding developing criteria for identifying a more focused set of measurable, nationally representative objectives. The Committee's advice must assist the Secretary in reducing the number of objectives while ensuring that the selection criteria identifies the most critical public health issues that are high-impact priorities supported by current national data sets.

DATES: The Committee will meet for two days, December 1, 2016, from 9:00 a.m. to 5:00 p.m. and December 2, 2016, from 8:30 a.m. to 3:00 p.m. Eastern Time.

ADDRESSES: The meeting will be held at the 20 F Street Conference Center located at 20 F Street NW., Washington, DC 20001, Conference Rooms A and B.

FOR FURTHER INFORMATION CONTACT: Emmeline Ochiai, Designated Federal Officer, Secretary's Advisory Committee on National Health Promotion and Disease Prevention Objectives for 2030, U.S. Department of Health and Human Services, Office of the Assistant Secretary for Health, Office of Disease Prevention and Health Promotion, 1101 Wootton Parkway, Room LL–100, Rockville, MD 20852, (240) 453–8280 (telephone), (240) 543–8281 (fax). Additional information is available on the Healthy People Web site at *http://www.healthypeople.gov.*

SUPPLEMENTARY INFORMATION: The names of the 13 members of the Secretary's Advisory Committee on National Health Promotion and Disease Prevention Objectives for 2030 are available at *http://www.healthypeople.gov.*

Purpose of Meeting: Every 10 years, through the Healthy People initiative, the HHS leverages scientific insights and lessons from the past decade, along with the new knowledge of current data, trends, and innovations, to develop the next iteration of national health promotion and disease prevention objectives. Healthy People provides science-based, 10-year national objectives for promoting health and preventing disease. Since 1979, Healthy People has established and monitored national health objectives to meet a broad range of health needs, encourage collaborations across sectors, guide individuals toward making informed health decisions, and measure the impact of disease prevention and health promotion activities. Healthy People 2030 will reflect assessments of major risks to health and wellness, changing public health priorities, and emerging technologies related to our nation's health preparedness and prevention.

Public Participation at Meeting: Members of the public are invited to observe the Committee meeting. Please note that there will be no opportunity for oral public comments during the inaugural meeting of the Committee. However, written comments are welcomed throughout the development process of the national health promotion and disease prevention objectives for 2030 and may be emailed to *HP2030@hhs.gov.*

To observe the Committee meeting, individuals must pre-register at the Healthy People Web site at *http://www.healthypeople.gov.* Registrations must be completed by close of business Eastern Time on November 28, 2016. Space for the meeting is limited and registration will be accepted until maximum room capacity is reached. A waiting list will be maintained should registrations exceed room capacity. Individuals on the waiting list will be contacted as additional space for the meeting becomes available. Registration questions may be directed to: Jim Nakayama at *events@nakamotogroup.com,* or (240) 672–4011.

Authority: 42 U.S.C. 217a. The Secretary's Advisory Committee on National Health Promotion and Disease Prevention Objectives for 2030 (Committee) is governed by provisions of the Federal Advisory Committee Act (FACA), Public Law 92–463, as amended (5 U.S.C., App.) which sets forth standards for the formation and use of federal advisory committees.

Dated: November 4, 2016.

Don Wright,

Deputy Assistant Secretary for Health, Disease Prevention and Health Promotion.

National Institutes of Health

National Center for Advancing Translational Sciences; Notice of Meeting

Pursuant to section 10(a) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of a meeting of the Cures Acceleration Network Review Board.

The meeting will be open to the public, viewing virtually by WebEx.

Individuals can register to view and access the meeting by the link below. *https://nih.webex.com/nih/onstage/g.php?MTID=ef62f37f80e52de02d5c5f72a5f19aace.*

1. Click ''Register''. On the registration form, enter your information and then click ''Submit'' to complete the required registration.

2. You will receive a personalized email with the live event link.

Name of Committee: Cures Acceleration Network Review Board.

Date: December 9, 2016.

Time: 10:00 a.m. to 3:00 p.m.

Agenda: The CAN Review Board will meet virtually to discuss updates regarding CAN programs and next steps.

Place: National Institutes of Health, One Democracy Plaza, 6701 Democracy Boulevard, Bethesda, MD 20892 (Virtual Meeting).

Contact Person: Anna L. Ramsey-Ewing, Ph.D., Executive Secretary, National Center

for Advancing Translational Sciences, 1 Democracy Plaza, Room 1072, Bethesda, MD 20892, 301–435–0809, *anna.ramseyewing@nih.gov*.

Government-Owned Inventions; Availability for Licensing

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: The inventions listed below are owned by an agency of the U.S. Government and are available for licensing in the U.S. in accordance with 35 U.S.C. 209 and 37 CFR part 404 to achieve expeditious commercialization of federally-funded research and development. Foreign patent applications are filed on selected inventions to extend market coverage for companies and may also be available for licensing.

FOR FURTHER INFORMATION CONTACT: Licensing information and copies of the U.S. patent applications listed below may be obtained by writing to the indicated licensing contact at the National Heart, Lung and Blood Institute, Office of Technology Transfer and Development, National Institutes of Health, 31 Center Drive, Room 4A29, MSC2479, Bethesda, MD 20892–2479; telephone: 301–402–5579. A signed Confidential Disclosure Agreement may be required to receive copies of the patent applications.

SUPPLEMENTARY INFORMATION: Technology descriptions follow.

Immortalized Organ of Corti Cell Line OC-k3 Description of Technology

Available for nonexclusive licensing as a research material is a conditionally immortalized Organ of Corti cell line called OC-k3. Sensory cells from the auditory organ, the Organ of Corti, are terminally differentiated and cannot be cultured. Moreover, few of them can be isolated per cochlea and survive only few hours after isolation making impossible to use on them many biochemical and molecular biology techniques. OC-k3, expresses many markers of sensory cells and it has already been used as an in vitro model for a variety of studies.

Potential Commercial Applications

- Research
- Hearing research
- Susceptibility to ototoxic drugs

Development Stage

- Materials

Inventors: Gilda Mabel Canseco de Kalinec and Federico Kalinec (both of NIDCD).

BILLING CODE 4140–01–P

DEPARTMENT OF HOMELAND SECURITY

Office of the Secretary

[Docket No. DHS–2016–0083]

Privacy Act of 1974; Computer Matching Program

AGENCY: U.S. Citizenship and Immigration Services, Department of Homeland Security.

ACTION: Notice of Recertification.

SUMMARY: This document provides notice of the existence of a computer matching program between the Department of Homeland Security, U.S. Citizenship and Immigration Services and the New Jersey Department of Labor and Workforce Development, titled ''Verification Division DHS–USCIS/NJ–LWD.''

SUPPLEMENTARY INFORMATION: The Department of Homeland Security, U.S. Citizenship and Immigration Services provides this notice in accordance with the Privacy Act of 1974 (5 U.S.C. 552a), as amended by the Computer Matching and Privacy Protection Act of 1988 (Public Law 100–503) and the Computer Matching and Privacy Protection Amendments of 1990 (Public Law 101–508) (Privacy Act); Office of Management and Budget (OMB) Final Guidance Interpreting the Provisions of Public Law 100–503, the Computer Matching and Privacy Protection Act of 1988, 54 FR 25818 (June 19, 1989); and appendix I to OMB's Revision of Circular No. A–130 (November 28, 2000), ''Transmittal Memorandum No. 4, Management of Federal Information Resources.''

Participating Agencies: The Department of Homeland Security, U.S. Citizenship and Immigration Services (DHS–USCIS) is the source agency and the New Jersey Department of Labor and Workforce Development (NJ–LWD) is the recipient agency.

Purpose of the Match: The purpose of this Agreement is to establish the terms and conditions governing NJLWD's access to, and use of, the DHS–USCIS Systematic Alien Verification for Entitlements (SAVE) Program, which provides immigration status information from Federal immigration records to authorized users, and to comply with the Computer Matching and Privacy Protection Act of 1988.

New Jersey Department of Labor and Workforce Development will use the SAVE Program to verify the immigration status of non U.S. citizens who apply for benefits (Benefit Applicants) under the Unemployment Compensation (UC) benefits that it administers. Under Federal law, immigrant workers must be in particular immigration categories to qualify for UC benefits. NJLWD will use the information obtained through the SAVE Program to determine whether Benefit Applicants possess the requisite immigration status to be eligible for the UC benefits administered by NJLWD.

Authority for Conducting the Matching Program: Section 121 of the Immigration Reform and Control Act (IRCA) of 1986, Public Law 99–603, as amended by the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (PRWORA), Public Law 104–193, 110 Stat. 2168 (1996), requires DHS to establish a system for the verification of immigration status of alien applicants for, or recipients of, certain types of benefits as specified within IRCA, and to make this system available to state agencies that administer such benefits. Section 121(c) of IRCA amends sec. 1137 of the Social Security Act and certain other sections

of law that pertain to federal entitlement benefit programs. Section 121(c) requires state agencies administering these programs to use DHS–USCIS's verification system to make eligibility determinations in order to prevent the issuance of benefits to ineligible alien applicants. The SAVE Program is the DHS–USCIS system available to the NJLWD and other covered agencies for use in making these eligibility determinations.

The Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (IIRIRA), Public Law 104–208, 110 Stat. 3009 (1996) grants Federal, State, or local government agencies seeking to verify or ascertain the citizenship or immigration status of any individual within the jurisdiction of the agency with the authority to request such information from DHS–USCIS for any purpose authorized by law.

New Jersey Department of Labor and Workforce Development will access information contained in the SAVE Program for the purpose of confirming the immigration status of alien applicants for, or recipients of, benefits it administers to discharge its obligation to conduct such verifications pursuant to sec. 1137 of the Social Security Act (42 U.S.C. 1320b–7(a) *et seq.*) and New Jersey Statute 43:21–4.

Categories of Records and individuals covered: DHS–USCIS will provide the following to NJ–LWD: Records in the DHS–USCIS VIS database containing information related to the status of aliens and other persons on whom DHS–USCIS has a record as an applicant, petitioner, or beneficiary. See DHS/USCIS–004 Systematic Alien Verification for Entitlements Program System of Records Notice, 77 FR 47415 (August 8, 2012).

New Jersey Department of Labor and Workforce Development will provide the following to DHS–USCIS: NJ–LWD records pertaining to alien and naturalized/derived United States citizen applicants for, or recipients of, entitlement benefit programs administered by the State.

New Jersey Department of Labor and Workforce Development will match the following records with DHS–USCIS records:

- Alien Registration Number
- I–94 Number
- Last Name
- First Name
- Middle Name
- Date of Birth
- Nationality
- Social Security number (SSN)

DHS–USCIS will match the following records with NJ–LWD records:

- Alien Registration Number
- I–94 Number
- Last Name
- First Name
- Middle Name
- Date of Birth
- Country of Birth (not nationality)
- SSN (if available)
- Date of Entry
- Immigration Status Data
- Sponsorship Information (sponsor's full name, SSN, and address)

System of Records: DHS/USCIS–004 Systematic Alien Verification for Entitlements Program System of Records Notice, 77 FR 47415 (August 8, 2012).

Inclusive Dates of the Matching Program: The inclusive dates of the matching program are from December 29, 2016, and continuing for 18 months through June 28, 2018. The matching program may be extended for up to an additional 12 months thereafter, if certain conditions are met.

Address for Receipt of Public Comments or Inquires: Individuals wishing to comment on this matching program or obtain additional information about the program, including requesting a copy of the Computer Matching Agreement between DHS–USCIS and NJ–LWD, may contact:

For general questions please contact: Donald K. Hawkins, 202–272–8030, Privacy Officer, U.S. Citizenship and Immigration Services, Department of Homeland Security, 20 Massachusetts Avenue NW., Washington, DC 20529.

For privacy questions please contact: Jonathan R. Cantor (202–343–1717), Acting Chief Privacy Officer, Privacy Office Department of Homeland Security, Washington, DC 20528.

Dated: November 1, 2016.

Jonathan R. Cantor,

Acting Chief Privacy Officer, Department of Homeland Security.

DEPARTMENT OF HOMELAND SECURITY

Office of the Secretary

[Docket No. DHS–2016–0082]

Privacy Act of 1974; Computer Matching Program

AGENCY: U.S. Citizenship and Immigration Services, Department of Homeland Security.

ACTION: Notice of Recertification.

SUMMARY: This document provides notice of the existence of a computer matching program between the Department of Homeland Security, U.S. Citizenship and Immigration Services and the New York State Department of Labor, titled ''Verification Division DHS–USCIS/NYSDOL.''

SUPPLEMENTARY INFORMATION: The Department of Homeland Security, U.S. Citizenship and Immigration Services provides this notice in accordance with the Privacy Act of 1974 (5 U.S.C. 552a), as amended by the Computer Matching and Privacy Protection Act of 1988 (Pub. L. 100–503) and the Computer Matching and Privacy Protection Amendments of 1990 (Pub. L. 101–508) (Privacy Act); Office of Management and Budget (OMB) Final Guidance Interpreting the Provisions of Public Law 100–503, the Computer Matching and Privacy Protection Act of 1988, 54 FR 25818 (June 19, 1989); and appendix I to OMB's Revision of Circular No. A–130 (November 28, 2000), ''Transmittal Memorandum No. 4, Management of Federal Information Resources.''

Participating Agencies: The Department of Homeland Security, U.S. Citizenship and Immigration Services (DHS–USCIS) is the source agency and the New York State Department of Labor (NYSDOL) is the recipient agency.

Purpose of the Match: The purpose of this Agreement is to establish the terms and conditions governing NY–DOL's access to, and use of, the DHS–USCIS Systematic Alien Verification for Entitlements (SAVE) Program, which provides immigration status information from Federal immigration records to authorized users, and to comply with the Computer Matching and Privacy Protection Act of 1988.

New York State Department of Labor will use the SAVE Program to verify the immigration status of non U.S. citizens who apply for benefits (Benefit Applicants) under the Unemployment Compensation (UC) benefits that it administers. Under Federal law, immigrant workers must be in particular immigration categories to qualify for UC benefits. NY–DOL will use the information obtained through the SAVE Program to determine whether Benefit Applicants possess the requisite immigration status to be eligible for the UC benefits administered by NY–DOL.

Authority for Conducting the Matching Program: Section 121 of the Immigration Reform and Control Act (IRCA) of 1986, Public Law 99–603, as amended by the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (PRWORA), Public Law 104–193, 110 Stat. 2168 (1996), requires DHS to establish a system for the verification of immigration status of noncitizen applicants for, or recipients

of, certain types of benefits as specified within IRCA, and to make this system available to state agencies that administer such benefits. Section 121(c) of IRCA amends sec. 1137 of the Social Security Act and certain other sections of law that pertain to Federal entitlement benefit programs. Section 121(c) requires state agencies administering these programs to use DHS–USCIS's verification system to make eligibility determinations to prevent the issuance of benefits to ineligible noncitizen applicants. The SAVE Program is the DHS–USCIS system available to the NY–DOL and other covered agencies for use in making these eligibility determinations. The eligibility of Benefit Applicants is also established in New York State Unemployment Insurance Law, Article 18, Title 7, sec. 590.

The Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (IIRIRA), Public Law 104–208, 110 Stat. 3009 (1996) grants Federal, State, or local government agencies seeking to verify or ascertain the citizenship or immigration status of any individual within the jurisdiction of the agency with the authority to request such information from DHS–USCIS for any purpose authorized by law.

Categories of Records and Individuals Covered: The SAVE Program uses records in the DHS–USCIS Verification Information System (VIS) database to verify immigration status; it contains information related to the status of noncitizens, naturalized citizens, and to the extent they have applied for Certificates of Citizenship, derived U.S. citizens, on whom DHS–USCIS has a record as an applicant, petitioner, sponsor, or beneficiary. See DHS/USCIS–004 Systematic Alien Verification for Entitlements (SAVE) Systems of Records Notice, 77 FR 47415 (August 8, 2012).

New York State Department of Labor records pertaining to non-citizen Benefit Applicants for, or recipients of, UC benefits administered by NY–DOL.

New York State Department of Labor will match the following records with DHS–USCIS records:

- Alien Registration Number
- I–94 Number
- Last Name
- First Name
- Middle Name
- Date of Birth
- Nationality
- Social Security number (SSN)

DHS–USCIS will match the following records with NYSDOL records:

- Alien Registration Number
- I–94 Number
- Last Name
- First Name
- Middle Name
- Date of Birth
- Country of Birth (not nationality)
- SSN (if available)
- Date of Entry
- Immigration Status Data
- Sponsorship Data

System of Records: DHS/USCIS–004 Systematic Alien Verification for Entitlements Program System of Records Notice, 77 FR 47415 (August 8, 2012).

Inclusive Dates of the Matching Program: The inclusive dates of the matching program are from December 29, 2016, and continuing for 18 months through June 28, 2018. The matching program may be extended for up to an additional 12 months thereafter, if certain conditions are met.

Address for Receipt of Public Comments or Inquires: Individuals wishing to comment on this matching program or obtain additional information about the program, including requesting a copy of the computer matching agreement between DHS–USCIS and NYSDOL, may contact.

For general questions please contact: Donald K. Hawkins, 202–272–8030, Privacy Officer, U.S. Citizenship and Immigration Services, Department of Homeland Security, 20 Massachusetts Avenue NW., Washington, DC 20529.

For privacy questions please contact: Jonathan R. Cantor, 202–343–1717, Acting Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528.

Dated: November 1, 2016.

Jonathan R. Cantor,

Acting Chief Privacy Officer, Department of Homeland Security.

[Docket No. DHS–2016–0080]

Privacy Act of 1974; Computer Matching Program

AGENCY: U.S. Citizenship and Immigration Services, Department of Homeland Security.

ACTION: Notice of Recertification.

SUMMARY: This document provides notice of the existence of a computer matching program between the Department of Homeland Security/U.S. Citizenship and Immigration Services and the Texas Workforce Commission.

SUPPLEMENTARY INFORMATION: The Department of Homeland Security/U.S. Citizenship and Immigration Services provides this notice in accordance with the Privacy Act of 1974 (5 U.S.C. 552a), as amended by the Computer Matching and Privacy Protection Act of 1988 (Pub. L. 100–503) and the Computer Matching and Privacy Protection Amendments of 1990 (Pub. L. 101–508) (Privacy Act); Office of Management and Budget (OMB) Final Guidance Interpreting the Provisions of Public Law 100–503, the Computer Matching and Privacy Protection Act of 1988, 54 FR 25818 (June 19, 1989); and appendix I to OMB's Revision of Circular No. A–130 (November 28, 2000), ''Transmittal Memorandum No. 4, Management of Federal Information Resources.''

Participating Agencies: The Department of Homeland Security/U.S. Citizenship and Immigration Services (DHS/USCIS) is the source agency and the Texas Workforce Commission (TWC) is the recipient agency.

Purpose of the Match: The purpose of this Agreement is to establish the terms and conditions governing TWC's access to, and use of, the DHS–USCIS Systematic Alien Verification for Entitlements (SAVE) Program, which provides immigration status information from federal immigration records to authorized users, and to comply with the Computer Matching and Privacy Protection Act of 1988.

Texas Workforce Commission will use the SAVE Program to verify the immigration status of non U.S. citizens who apply for benefits (Benefit Applicants) under the Unemployment Compensation (UC) benefits that it administers. Under Federal law, immigrant workers must be in particular immigration categories to qualify for UC benefits. Texas Workforce Commission will use the information obtained through the SAVE Program to determine whether Benefit Applicants possess the requisite immigration status to be eligible for the UC benefits administered by TWC.

Authority for Conducting the Matching Program: Section 121 of the Immigration Reform and Control Act (IRCA) of 1986, Public Law 99–603, as amended by the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (PRWORA), Public Law 104–193, 110 Stat. 2168 (1996), requires DHS to establish a system for the verification of immigration status of noncitizen applicants for, or recipients of, certain types of benefits as specified within IRCA, and to make this system available to state agencies that administer such benefits. Section 121(c) of IRCA amends sec. 1137 of the Social

Security Act and certain other sections of law that pertain to Federal entitlement benefit programs. Section 121(c) requires state agencies administering these programs to use DHS–USCIS's verification system to make eligibility determinations to prevent the issuance of benefits to ineligible noncitizen applicants. The SAVE Program is the DHS–USCIS system available to the TWC and other covered agencies for use in making these eligibility determinations.

Section 642(a) of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (IIRIRA), Public Law 104–208, 110 Stat. 3009 (1996) (8 U.S.C. 1373(a)) grants Federal, State, or local government agencies seeking to verify or ascertain the citizenship or immigration status of any individual within the jurisdiction of the agency with the authority to request such information from DHS–USCIS for any purpose authorized by law.

Texas Workforce Commission will access to the SAVE Program for the purpose of confirming the immigration status of noncitizen applicants for, or recipients of, benefits it administers to discharge its obligation to conduct such verifications pursuant to sec. 1137 of the Social Security Act (42 U.S.C. 1320b–7(a) *et seq.*) and Texas Labor Code 207.043.

Categories of Records and Individuals Covered: The SAVE Program uses the records in the DHS–USCIS Verification Information System (VIS) database to verify immigration status; it contains information related to the status of noncitizens, naturalized citizens, and to the extent they have applied for Certificates of Citizenship, derived U.S. citizens, on whom DHS–USCIS has a record as an applicant, petitioner, sponsor, or beneficiary. See DHS/USCIS–004 Systematic Alien Verification for Entitlements (SAVE) Systems of Records Notice, 77 FR 47415 (August 8, 2012).

TWC records pertaining to noncitizen Benefit Applicants for, or recipients of, UC benefits administered by TWC.

TWC will match the following records with DHS/USCIS records:

- Alien Registration Number
- I–94 Number
- Last Name
- First Name
- Middle Name
- Date of Birth
- Nationality
- Social Security number

DHS/USCIS will match the following records with TWC records:

- Alien Registration Number
- Last Name
- First Name
- Middle Name
- Date of Birth
- Country of Birth (not nationality)
- Social Security number (if available)
- Date of Entry
- Immigration Status Data
- Employment Eligibility Data

System of Records: DHS/USCIS–004 Systematic Alien Verification for Entitlements Program System of Records Notice, 77 FR 47415 (August 8, 2012).

Inclusive Dates of the Matching Program: The inclusive dates of the matching program are from December 8, 2016, and continuing for 18 months through June 7, 2018. The matching program may be extended for an additional 12 months thereafter, if certain conditions are met.

Address for Receipt of Public Comments or Inquires: Individuals wishing to comment on this matching program or obtain additional information about the program, including requesting a copy of the computer matching agreement between DHS–USCIS and TWC.

For general questions please contact: Donald K. Hawkins, 202–272–8030, Privacy Officer, U.S. Citizenship and Immigration Services, Department of Homeland Security, 20 Massachusetts Avenue NW., Washington, DC 20529.

For privacy questions please contact: Jonathan R. Cantor, 202–343–1717, Acting Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528.

Dated: November 1, 2016.

Jonathan R. Cantor,

Acting Chief Privacy Officer, Department of Homeland Security.

BILLING CODE 9110–9L–P

DEPARTMENT OF HOMELAND SECURITY

Office of the Secretary

[Docket No. DHS–2016–0081]

Privacy Act of 1974; Computer Matching Program

AGENCY: Department of Homeland Security, U.S. Citizenship and Immigration Services.

ACTION: Notice of Recertification.

SUMMARY: This document provides notice of the existence of a computer matching program between the Department of Homeland Security, U.S. Citizenship and Immigration Services and the Massachusetts Division of Unemployment Assistance, titled ''Verification Division DHS–USCIS/MA–DUA.''

SUPPLEMENTARY INFORMATION: The Department of Homeland Security, U.S. Citizenship and Immigration Services provides this notice in accordance with The Privacy Act of 1974 (5 U.S.C. 552a), as amended by the Computer Matching and Privacy Protection Act of 1988 (Pub. L. 100–503) and the Computer Matching and Privacy Protection Amendments of 1990 (Pub. L. 101–508) (Privacy Act); Office of Management and Budget (OMB) Final Guidance Interpreting the Provisions of Public Law 100–503, the Computer Matching and Privacy Protection Act of 1988, 54 FR 25818 (June 19, 1989); and appendix I to OMB's Revision of Circular No. A–130 (November 28, 2000), ''Transmittal Memorandum No. 4, Management of Federal Information Resources.''

Participating Agencies: The Department of Homeland Security, U.S. Citizenship and Immigration Services (DHS–USCIS) is the source agency and the Massachusetts Division of Unemployment Assistance (MA–DUA) is the recipient agency.

Purpose of the Match: The purpose of this Agreement is to establish the terms and conditions governing MA–DUA's access to, and use of, the DHS–USCIS Systematic Alien Verification for Entitlements (SAVE) Program, which provides immigration status information from Federal immigration records to authorized users, and to comply with the Computer Matching and Privacy Protection Act of 1988.

Massachusetts Division of Unemployment Assistance will use the SAVE Program to verify the immigration status of non-U.S. citizens who apply for benefits (Benefit Applicants) under the Unemployment Compensation (UC) benefits that it administers. Under Federal law, immigrant workers must be in particular immigration categories to qualify for UC benefits. Massachusetts Division of Unemployment Assistance will use the information obtained through the SAVE Program to determine whether Benefit Applicants possess the requisite immigration status to be eligible for the UC benefits administered by MA–DUA.

Authority for Conducting the Matching Program: Section 121 of the Immigration Reform and Control Act (IRCA) of 1986, Public Law 99–603, as amended by the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (PRWORA), Public Law 104–193, 110 Stat. 2168 (1996), requires DHS to establish a system for the verification of immigration status of alien applicants for, or recipients of,

certain types of benefits as specified within IRCA, and to make this system available to state agencies that administer such benefits. Section 121(c) of IRCA amends sec. 1137 of the Social Security Act and certain other sections of law that pertain to federal entitlement benefit programs. Section 121(c) requires State agencies administering these programs to use DHS–USCIS's verification system to make eligibility determinations in order to prevent the issuance of benefits to ineligible alien applicants. The SAVE Program is the DHS–USCIS system available to the MA–DUA and other covered agencies for use in making these eligibility determinations.

The Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (IIRIRA), Public Law 104–208, 110 Stat. 3009 (1996) grants Federal, State, or local government agencies seeking to verify or ascertain the citizenship or immigration status of any individual within the jurisdiction of the agency with the authority to request such information from DHS–USCIS for any purpose authorized by law.

Massachusetts Division of Unemployment Assistance will access information contained in the SAVE Program for the purpose of confirming the immigration status of alien applicants for, or recipients of, benefits it administers to discharge its obligation to conduct such verifications pursuant to sec. 1137 of the Social Security Act (42 U.S.C. 1320b–7(a) *et seq.*) and Massachusetts Gen. Laws ch. 151A, sec. 25(h).

Categories of Records and Individuals Covered: The SAVE Program uses the DHS–USCIS Verification Information System (VIS) database to verify immigration status, which contains information related to the status of aliens, and naturalized citizens, and to the extent they have applied for Certificates of Citizenship, derived U.S. citizens, on whom DHS–USCIS has a record as an applicant, petitioner, sponsor, or beneficiary. See DHS/USCIS–004 Systematic Alien Verification for Entitlements (SAVE) Systems of Records Notice, 77 FR 47415 (August 8, 2012).

Massachusetts Division of Unemployment Assistance records pertaining to non-citizen Benefit Applicants for, or recipients of, UC benefits administered by MA–DUA.

Massachusetts Division of Unemployment Assistance will match the following records with DHS–USCIS records:

- Alien Registration Number
- 1–94 Number
- Last Name
- First Name
- Middle Name
- Date of Birth
- Nationality
- Social Security number (SSN)

DHS–USCIS will match the following records with MA–DUA records:

- Alien Registration Number
- Last Name
- First Name
- Middle Name
- Date of Birth
- Country of Birth (not nationality)
- SSN (if available)
- Date of Entry
- Immigration Status Data
- Sponsorship Information (sponsor's full name, SSN, and address)

System of Records: DHS/USCIS–004 Systematic Alien Verification for Entitlements Program System of Records Notice, 77 FR 47415 (August 8, 2012).

Inclusive Dates of the Matching Program: The inclusive dates of the matching program are from December 14, 2016, and continuing for 18 months through June 13, 2018. The matching program may be extended for up to an additional 12 months thereafter, if certain conditions are met.

Address for Receipt of Public Comments or Inquires: Individuals wishing to comment on this matching program or obtain additional information about the program, including requesting a copy of the computer matching agreement between DHS–USCIS and MA–DUA, may contact:

For general questions please contact: Donald K. Hawkins, 202–272–8030, Privacy Officer, U.S. Citizenship and Immigration Services, Department of Homeland Security, 20 Massachusetts Avenue NW., Washington, DC 20529.

For privacy questions please contact: Jonathan R. Cantor, 202–343–1717, Acting Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528.

Dated: November 1, 2016.

Jonathan R. Cantor,

Acting Chief Privacy Officer, Department of Homeland Security.

[FR Doc. 2016–27132 Filed 11–10–16; 8:45 am]

BILLING CODE 9110–9L–P

DEPARTMENT OF HOMELAND SECURITY

Office of the Secretary

[Docket No. DHS–2016–0079]

Privacy Act of 1974; Computer Matching Program

AGENCY: U.S. Citizenship and Immigration Services, Department of Homeland Security.

ACTION: Notice of Recertification.

SUMMARY: This document provides notice of the existence of a computer matching program between the Department of Homeland Security, U.S. Citizenship and Immigration Services and the California Department of Health Care Services, titled ''Verification Division DHS–USCIS/CA–DHCS.''

SUPPLEMENTARY INFORMATION: The Department of Homeland Security, U.S. Citizenship and Immigration Services provides this notice in accordance with the Privacy Act of 1974 (5 U.S.C. 552a), as amended by the Computer Matching and Privacy Protection Act of 1988 (Pub. L. 100–503) and the Computer Matching and Privacy Protection Amendments of 1990 (Pub. L. 101–508) (Privacy Act); Office of Management and Budget (OMB) Final Guidance Interpreting the Provisions of Public Law 100–503, the Computer Matching and Privacy Protection Act of 1988, 54 FR 25818 (June 19, 1989); and appendix I to OMB's Revision of Circular No. A–130 (November 28, 2000), ''Transmittal Memorandum No. 4, Management of Federal Information Resources.''

Participating Agencies: The Department of Homeland Security, U.S. Citizenship and Immigration Services (DHS–USCIS) is the source agency and the California Department of Health Care Services (CA–DHCS) is the recipient agency.

Purpose of the Match: This Computer Matching Agreement allows DHS–USCIS to provide CA–DHCS with electronic access to immigration status information contained within the DHS–USCIS Systematic Alien Verification for Entitlements (SAVE). The immigration status information will enable CA–DHCS to determine whether an applicant is eligible for benefits under Medicaid Programs administered by CA–DHCS.

Authority for Conducting the Matching Program: Section 121 of the Immigration Reform and Control Act (IRCA) of 1986, Public Law 99–603, as amended by the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (PRWORA), Public Law 104–193, 110 Stat. 2168 (1996), requires

DHS to establish a system for the verification of immigration status of alien applicants for, or recipients of, certain types of benefits as specified within IRCA, and to make this system available to state agencies that administer such benefits. Section 121(c) of IRCA amends section 1137 of the Social Security Act and certain other sections of law that pertain to federal entitlement benefit programs. Section 121(c) requires state agencies administering these programs to use DHS–USCIS's verification system to make eligibility determinations in order to prevent the issuance of benefits to ineligible alien applicants. The SAVE Program is the DHS–USCIS system available to the CA–DHCS and other covered agencies for use in making these eligibility determinations.

The Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (IIRIRA), Public Law 104–208, 110 Stat. 3009 (1996) grants Federal, State, or local government agencies seeking to verify or ascertain the citizenship or immigration status of any individual within the jurisdiction of the agency with the authority to request such information from DHS–USCIS for any purpose authorized by law.

California Department of Health Care Services will access information contained in the SAVE Program for the purpose of confirming the immigration status of alien applicants for, or recipients of, benefits it administers to discharge its obligation to conduct such verifications pursuant to sec. 1137 of the Social Security Act (42 U.S.C. 1320b–7(a) *et seq.*) and California Welfare and Institution Code secs. 11104.1, 14007.5 and 14011.2.

Categories of Records and Individuals Covered: The SAVE Program uses the DHS–USCIS Verification Information System (VIS) database to verify immigration status; it contains information related to the status of aliens, naturalized citizens, and to the extent they have applied for Certificates of Citizenship, derived U.S. citizens, on whom DHS–USCIS has a record as an applicant, petitioner, sponsor, or beneficiary. See DHS/USCIS–004 Systematic Alien Verification for Entitlements (SAVE) Systems of Records Notice, 77 FR 47415 (August 8, 2012).

California Department of Health Care Services records pertaining to noncitizen Benefit Applicants for, or recipients of, Medicaid benefits administered by CA–DHCS. CA–DHCS will match the following records with DHS–USCIS records:

- Alien Registration Number
- I–94 Number
- Last Name
- First Name
- Middle Name
- Date of Birth
- Nationality
- Social Security number (SSN)

DHS–USCIS will match the following records with CA–DHCS records:

- Alien Registration Number
- Last Name
- First Name
- Middle Name
- Date of Birth
- Country of Birth (not nationality)
- SSN (if available)
- Date of Entry
- Immigration Status Data
- Sponsorship Information (sponsor's full name, SSN, and address)

System of Records: DHS/USCIS–004 Systematic Alien Verification for Entitlements Program System of Records Notice, 77 FR 47415 (August 8, 2012).

Inclusive Dates of the Matching Program: The inclusive dates of the matching program are from December 8, 2016, and continuing for 18 months through June 7, 2018. The matching program may be extended for up to an additional 12 months thereafter, if certain conditions are met.

Address for Receipt of Public Comments or Inquires: Individuals wishing to comment on this matching program or obtain additional information about the program, including requesting a copy of the Computer Matching Agreement between DHS–USCIS and CA–DHCS, may contact:

For general questions please contact: Donald K. Hawkins, 202–272–8030, Privacy Officer, U.S. Citizenship and Immigration Services, Department of Homeland Security, 20 Massachusetts Avenue NW., Washington, DC 20529.

For privacy questions please contact: Jonathan R. Cantor 202–343–1717, Acting Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528.

Dated: November 1, 2016.

Jonathan R. Cantor,

Acting Chief Privacy Officer, Department of Homeland Security.

BILLING CODE 9110–9L–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR- 5849–N–09]

Notice of a Federal Advisory Committee Manufactured Housing Consensus Committee Regulatory Subcommittee Teleconference

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, Department of Housing and Urban Development (HUD).

ACTION: Notice of a Federal Advisory Meeting: Manufactured Housing Consensus Committee (MHCC).

SUMMARY: This notice sets forth the schedule and proposed agenda for a teleconference meeting of the MHCC, Regulatory Subcommittee. The teleconference meeting is open to the public. The agenda provides an opportunity for citizens to comment on the business before the MHCC.

DATES: The teleconference meeting will be held on November 28, 2016, 1:00 p.m. to 4:00 p.m. Eastern Standard Time (EST). The teleconference numbers are: US toll-free: 1–866–622–8461, and Participant Code: 4325434.

FOR FURTHER INFORMATION CONTACT: Pamela Beck Danner, Administrator and Designated Federal Official (DFO), Office of Manufactured Housing Programs, Department of Housing and Urban Development, 451 Seventh Street SW., Room 9166, Washington, DC 20410, telephone 202–708–6423 (this is not a toll-free number). Persons who have difficulty hearing or speaking may access this number via TTY by calling the toll-free Federal Information Relay Service at 800–877–8339.

SUPPLEMENTARY INFORMATION: Notice of this meeting is provided in accordance with the Federal Advisory Committee Act, 5. U.S.C. App. 10(a)(2) through implementing regulations at 41 CFR 102–3.150. The MHCC was established by the National Manufactured Housing Construction and Safety Standards Act of 1974, 42 U.S.C. 5403(a)(3), as amended by the Manufactured Housing Improvement Act of 2000 (Pub. L. 106–569). According to 42 U.S.C. 5403, as amended, the purposes of the MHCC are to:

- Provide periodic recommendations to the Secretary to adopt, revise, and interpret the Federal manufactured housing construction and safety standards in accordance with this subsection;
- Provide periodic recommendations to the Secretary to adopt, revise, and interpret the procedural and enforcement regulations, including

regulations specifying the permissible scope and conduct of monitoring in accordance with subsection (b);

• Be organized and carry out its business in a manner that guarantees a fair opportunity for the expression and consideration of various positions and for public participation.

The MHCC is deemed an advisory committee not composed of Federal employees.

Public Comment: Citizens wishing to make oral comments on the business of the MHCC are encouraged to register by or before November 22, 2016, by contacting Home Innovation Labs, Attention: Kevin Kauffman, 400 Prince Georges Boulevard, Upper Marlboro, MD 20774; or email to: *MHCC@HomeInnovation.com* or call 1–888–602–4663. Written comments are encouraged. The MHCC strives to accommodate citizen comments to the extent possible within the time constraints of the meeting agenda. Advance registration is strongly encouraged. The MHCC will also provide an opportunity for public comment on specific matters before the Regulatory Subcommittee.

Tentative Agenda

November 28, 2016, from 1:00 p.m. to 4:00 p.m. Eastern Standard Time (EST)

I. Call to Order—Chair & DFO

II. Opening Remarks: Subcommittee Chair

III. Roll Call—Administering Organization (AO)

IV. Administrative Announcements—DFO & AO

V. Approval of minutes from October 27, 2016, Meeting

VI. New Business

a. Action Item 8: Foundation Systems Requirements in Freezing Climates

VII. Open Discussion

VIII. Public Comments

IX. Wrap-Up—DFO & AO

X. Adjourn

Dated: November 8, 2016.

Pamela Beck Danner,

Administrator, Office of Manufactured Housing Programs.

BILLING CODE 4210–67–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–5630–N–08]

Rental Assistance Demonstration (RAD) Notice Regarding Fair Housing and Civil Rights Requirements and Relocation Requirements Applicable to RAD First Component—Public Housing Conversions: Solicitation of Comment

AGENCY: Office of the Assistant Secretary for Housing, HUD.

ACTION: Notice.

SUMMARY: HUD has posted, on its RAD Web page, a notice providing guidance regarding fair housing, civil rights, and relocation requirements applicable to the first component of RAD, which were previously addressed by HUD in a notice issued on June 15, 2015. The first component of RAD pertains only to the conversion of public housing units. The purpose of the Civil Rights and Relocations Requirements notice is to provide greater guidance for the application of these important requirements governing RAD. While the updated requirements are available and became effective upon posting, HUD solicits comment on today's notice, with respect primarily to the clarity and comprehensibility of the requirements.

DATES: *Comment Due Date:* December 14, 2016.

ADDRESSES: Interested persons are invited to submit comments regarding this notice. Communications must refer to the above docket number and title. There are two methods for submitting public comments.

1. Submission of Comments by Mail. Comments may be submitted by mail to the Regulations Division, Office of General Counsel, Department of Housing and Urban Development, 451 7th Street SW., Room 10276, Washington, DC 20410–0500.

2. Electronic Submission of Comments. Interested persons may submit comments electronically through the Federal eRulemaking Portal at *www.regulations.gov.* HUD strongly encourages commenters to submit comments electronically. Electronic submission of comments allows the commenter maximum time to prepare and submit a comment, ensures timely receipt by HUD, and enables HUD to make them immediately available to the public. Comments submitted electronically through the *www.regulations.gov* Web site can be viewed by other commenters and interested members of the public. Commenters should follow the instructions provided on that site to submit comments electronically.

No Facsimile Comments. Facsimile (FAX) comments are not acceptable.

Public Inspection of Public Comments. All properly submitted comments and communications submitted to HUD will be available for public inspection and copying between 8 a.m. and 5 p.m. weekdays at the above address. Due to security measures at the HUD Headquarters building, an advance appointment to review the public comments must be scheduled by calling the Regulations Division at 202–708–3055 (this is not a toll-free number). Individuals who are deaf or hard of hearing and individuals with speech impairments may access this number via TTY by calling the Federal Relay Service toll-free at 800–877–8339. Copies of all comments submitted are also available for inspection and downloading at *www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Claude Dickson, Office of Recapitalization, Office of Multifamily Housing, Office of Housing, U.S. Department of Housing and Urban Development, Room 6230, email *RAD@HUD.gov,* telephone 202–708–0001 (this is not a toll-free number). For information about this rule, persons with hearing- or speech-impairments may access this number through TTY by calling the Federal Relay Service toll-free at 800–877–8339.

SUPPLEMENTARY INFORMATION:

I. Background

RAD was created in order to give public housing agencies (PHAs) a tool to preserve and improve assisted housing and address the multi-billion dollar nationwide backlog of deferred maintenance. RAD allows public housing agencies to leverage public and private debt and equity in order to reinvest in the public housing stock. In RAD, units move from the public housing program to a Section 8 platform with a long-term contract that, by law, must be renewed. This ensures that the units remain permanently affordable to low-income households. Once transferred to the Section 8 platform, residents continue to pay 30 percent of their income towards the rent and they maintain the same basic rights as they would possess in the public housing program.

On June 15, 2015, HUD issued a comprehensive notice that provided program instructions for RAD, including addressing eligibility and selection criteria. (See *http://portal.hud.gov/hudportal/documents/huddoc?id=PIHNotice_2012–32_*

062015.pdf.) The June 15, 2015 notice itself was an update of prior RAD program notices issued on July 26, 2012, July 2, 2013, and February 6, 2014. The June 15, 2015 notice covered both of the RAD program's two components. (Component 1 applies only to public housing units that may convert to RAD. Component 2 applies to Section 8 Moderate Rehabilitation, Rent Supplement, and Rental Assistance Payment properties that may convert to RAD.) The June 15, 2015 notice addressed fair housing, civil rights, and relocation requirements among the other program instructions. However, given the importance of these requirements, especially as they apply to the types of transactions common in public housing conversions, HUD determined that a notice dedicated solely to fair housing, civil rights, and relocation requirements was appropriate.

Today's relocation notice only addresses RAD Component 1. The notice explains the situations in which HUD is requiring front-end fair housing and civil rights reviews, and provides information regarding the types of information that must be submitted to facilitate HUD's review of certain fair housing and civil rights requirements in connection with public housing conversions under RAD Component 1. The notice also includes guidance regarding relocation requirements under RAD and reiterates key civil rights- and relocation-related statutory and regulatory requirements.

II. Solicitation of Comment

As noted in the Summary of this notice, today's notice is posted and effective but HUD welcomes comments on the notice. The purpose of the notice is to provide greater guidance on compliance with fair housing, civil rights, and relocation requirements. HUD specifically solicits comment on the clarity of the information provided in the notice. In the event HUD makes any changes in response to public comment, HUD will revise the notice and advise the public of any changes made.

Dated: *November 8, 2016.*

Edward L. Golding,

Principal Deputy Assistant, Secretary for Housing.

BILLING CODE 4210–67–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[FWS–R4–ES–2016–N124; FXES1130400000C2–167–FF04E00000]

Endangered and Threatened Wildlife and Plants; Final Recovery Plan for the Laurel Dace

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability.

SUMMARY: We, the Fish and Wildlife Service (Service), announce the availability of the final recovery plan for the endangered laurel dace, a small fish native to the Tennessee River Basin in Tennessee. The recovery plan includes specific recovery objectives and criteria that must be met in order for us to downlist the fish to threatened status or delist it under the Endangered Species Act of 1973, as amended.

ADDRESSES: You may obtain a copy of the recovery plan from our Web site at *http://www.fws.gov/endangered/species/recovery-plans.html* or the Tennessee Field Office Web site at *http://www.fws.gov/cookeville.* You may also request a copy of the recovery plan by contacting Geoff Call, by U.S. mail at U.S. Fish and Wildlife Service, Tennessee Field Office, 446 Neal Street, Cookeville, TN 38501 (telephone 931–525–4983).

FOR FURTHER INFORMATION CONTACT: Geoff Call (see **ADDRESSES**).

SUPPLEMENTARY INFORMATION:

Background

Recovery Plans Under the Endangered Species Act

Recovery of endangered or threatened animals and plants to the point where they are again secure, self-sustaining members of their ecosystems is a primary goal of our endangered species program and the Endangered Species Act of 1973, as amended (Act; 16 U.S.C. 1531 *et seq.*). Recovery means improvement of the status of listed species to the point at which listing is no longer needed under any criteria specified in section 4(a)(1) of the Act. To help guide the recovery effort, we prepare recovery plans for most listed species. Recovery plans describe actions considered necessary for conservation of the species, establish criteria for downlisting or delisting, and estimate time and cost for implementing recovery measures. The Act requires the development of recovery plans for listed species, unless such a plan would not promote the conservation of a particular species.

About the Species

We listed the laurel dace (*Chrosomus saylori*) as an endangered species under the Act on August 9, 2011 (76 FR 48722), and designated critical habitat for the species on October 16, 2012 (77 FR 63604). The laurel dace is a small fish native to the Tennessee River Basin in Tennessee. This fish, from the family Cyprinidae, is found or collected from pools or slow runs from undercut banks or under slab boulders in headwater tributaries. The vegetation surrounding the first or second order streams where laurel dace occur includes mountain laurel, rhododendron, and hemlocks.

Historically, laurel dace is known from seven streams, and it currently occupies six of these, in three creek systems on the Walden Ridge of the Cumberland Plateau. Only a few individuals have been collected from headwaters of the two creek systems in the southern part of their range, Soddy and Sale Creeks, although laurel dace are more abundant in headwaters of the Piney River system in their northern range. Threats to the laurel dace include land use activities that affect silt levels, temperature, or hydrologic processes of these small tributaries; invasive species, including sunfishes, basses, and hemlock woolly adelgid; the species' naturally small population size and geographic range; and climate change.

Recovery Plan Development

Section 4(f) of the Act requires us to provide public notice and an opportunity for public review and comment prior to final approval of recovery plans. We and other Federal agencies will take these public comments into account in the course of implementing approved recovery plans.

The Technical/Agency Draft Recovery Plan for the Laurel Dace was developed by the Tennessee Field Office. This draft plan was published on January 14, 2015, and made available for public comment through March 16, 2015 (79 FR 1933). We received no comments from the general public on the draft plan.

The Service also asked four peer reviewers to review and provide comments on the draft plan. We received comments from all four peer reviewers: Dr. J. Brian Alford of University of Tennessee, Dr. Hayden T. Mattingly of Tennessee Tech University, Dr. Christopher E. Skelton of Georgia College and State University, and Mr. Mark Thurman of the Tennessee Wildlife Resources Agency. All of the peer reviewers offered general support and praise for the draft plan. For a summary of our responses to peer review comments, see Appendix A in

the final recovery plan. We considered the information we received from peer reviewers in our preparation and approval of this final recovery plan. Specifically, we made a slight modification to recovery criteria (see below) by adding the clarification of 500 individuals in the definition of a viable population. We also adjusted budgets of recovery actions in the implementation schedule.

Recovery Plan Components

Objectives for Reclassification to Threatened and Delisting

The goal of this recovery plan is to conserve populations of laurel dace and enable the species to recover to the point that listing under the Act is no longer necessary. Because recovery and delisting will take a long time to achieve, and may be unachievable, an intermediate goal of this recovery plan is to reduce threats to the point that the species could be reclassified from endangered to threatened.

Reclassification to Threatened

Reclassification of the laurel dace to threatened status will be possible when habitat conditions in occupied streams are suitable for the conservation of the species, and viable populations are present throughout suitable habitat in five of the six currently occupied streams.

Delisting

In order for the laurel dace to recover to the point that listing under the Act is no longer necessary, it will be necessary to conserve all existing populations by maintaining, and in some cases restoring, suitable habitat conditions in all streams where the species currently occurs. It will also be necessary to discover or establish one additional population.

Criteria for Reclassification From Endangered to Threatened or Delisting

The following criteria will be used to determine whether the objectives for reclassification and delisting described above have been met. The criteria will be achieved by reducing or removing threats to the species' habitat and conserving or establishing viable populations throughout the species' range, as determined by monitoring of demographic and genetic parameters.

Criteria for Reclassification From Endangered to Threatened

Criterion 1: Suitable instream habitat, flows, and water quality for laurel dace, as defined by Recovery Tasks in the recovery plan, exist in occupied streams.

Criterion 2: Viable populations * are present throughout suitable habitat in Bumbee, Moccasin, and Youngs Creeks, and at least two of the following streams: Soddy Creek, Cupp Creek or Horn Branch.

Criteria for Delisting

Criterion 1: Suitable instream habitat, flows, and water quality for laurel dace exist in all occupied streams, and mechanisms exist to ensure that land use activities (including road maintenance) in catchments of streams inhabited by laurel dace will be compatible with the species' conservation for the foreseeable future. Such mechanisms could include, but are not necessarily limited to, conservation agreements, conservation easements, land acquisition, and habitat conservation plans.

Criterion 2: Viable populations * are present throughout suitable habitat in Bumbee, Moccasin, Youngs, Soddy, and Cupp Creeks and Horn Branch, and one additional viable population, created either through reintroduction into Laurel Branch or by discovery of an additional wild population.

* Populations will be considered viable when the following demographic and genetic conditions exist:

- Demographics—Monitoring data demonstrate that (a) populations are stable or increasing, (b) average census size is at least 500 individuals and two or more age-classes are consistently present over a period of time encompassing five generations (*i.e.,* 15 years), and (c) evidence of recruitment is not absent in more than 3 years or during consecutive years at any point within that period of time.

- Genetics—Populations will be considered to have sufficient genetic variation to be viable if measurements of observed number of alleles and estimates of heterozygosity and effective population size have remained stable or increased during the five generations used to establish demographic viability.

Authority

The authority for this action is section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Dated: August 22, 2016.

Mike Oetker,

Acting Regional Director, Southeast Region.

National Elk Refuge, Teton County, Wyoming; Final Comprehensive Conservation Plan and Finding of No Significant Impact for Environmental Assessment

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), announce the availability of a final comprehensive conservation plan (CCP) and finding of no significant impact (FONSI) for the environmental assessment (EA) for the National Elk Refuge (Refuge, NWR). In this final CCP, we describe how we intend to manage the refuge for the next 15 years.

ADDRESSES: You will find the final CCP, a summary of the final CCP, and the EA/FONSI on the planning Web site: *http://www.fws.gov/mountain-prairie/refuges/wy_ner.php.* A limited number of hard copies and CD–ROMs are available. You may request one by any of the following methods:

- *Email: nationalelkrefuge@fws.gov.* Include ''National Elk Refuge CCP'' in the subject line of the message.
- *U.S. Mail:* National Elk Refuge, P.O. Box 510, Jackson, WY, 83001.

FOR FURTHER INFORMATION CONTACT: Steve Kallin, Refuge Manager, at 307–733–9212 (phone), or Toni Griffin, Planning Team Leader, 303–236–4378 (phone) or *toni_griffin@fws.gov* (email).

SUPPLEMENTARY INFORMATION:

Introduction

With this notice, we continue the CCP process for the National Elk Refuge, which we began by publishing a notice of intent in the **Federal Register** (75 FR 65370) on October 22, 2010. For more about the initial process and the history of this refuge, see that notice. We released the draft CCP and EA to the public, announcing and requesting comments in a notice of availability (79 FR 53440) on September 9, 2014. The 45-day comment period ended on October 24, 2014. A summary of public comments and the agency responses is included in the final CCP.

Background

The National Wildlife Refuge System Administration Act of 1966, as amended by the National Wildlife Refuge System Improvement Act of 1997 (16 U.S.C. 668dd–668ee) (Administration Act),

requires us to develop a CCP for each national wildlife refuge. The purpose in developing a CCP is to provide refuge managers with a 15-year strategy for achieving refuge purposes and contributing toward the mission of the National Wildlife Refuge System (NWRS), consistent with sound principles of fish and wildlife management, conservation, legal mandates, and Service policies. In addition to outlining broad management direction on conserving wildlife and their habitats, CCPs identify wildlife-dependent recreational opportunities available to the public, including opportunities for hunting, fishing, wildlife observation and photography, and environmental education and interpretation. We will review and update the CCP at least every 15 years in accordance with the Administration Act.

Each unit of the NWRS was established for specific purposes. We use these purposes as the foundation for developing and prioritizing the management goals and objectives for each refuge within the NWRS mission, and to determine how the public can use each refuge. The planning process is a way for us and the public to evaluate management goals and objectives that will ensure the best possible approach to wildlife, plant, and habitat conservation, while providing for wildlife-dependent recreation opportunities that are compatible with each refuge's establishing purposes and the mission of the NWRS.

Additional Information

The final CCP may be found at *http://www.fws.gov/mountain-prairie/refuges/wy_ner.php*. The final CCP includes detailed information about the planning process, refuge, issues, and management alternative selected. The Web site also includes an EA, prepared in accordance with the National Environmental Policy Act (NEPA) (43 U.S.C. 4321 *et seq.*). The EA includes discussion of four alternative refuge management options. The Service's selected alternative is reflected in the final CCP, and also in the FONSI.

The selected alternative focuses on habitat and wildlife management that allow for natural processes to promote habitats. Some habitats, such as wetlands, will be managed to enhance swan habitat and improve forage quantity and quality for elk and bison. The refuge will increase opportunities for wildlife-dependent public uses such as hunting, fishing, wildlife observation and photography, and environmental education. We will keep some areas undeveloped, return some areas to a natural state, and increase development in other areas to enhance visitor services. A detailed description of objectives and actions included in this selected alternative is found in chapter 4 of the final CCP.

Dated: September 23, 2016.

Noreen Walsh,

Regional Director, Mountain-Prairie Region, U.S. Fish and Wildlife Service.

DEPARTMENT OF THE INTERIOR

Geological Survey

[GX17EE000101100]

Announcement of National Geospatial Advisory Committee Meeting

AGENCY: U.S. Geological Survey, Interior.

ACTION: Notice of meeting

SUMMARY: The National Geospatial Advisory Committee (NGAC) will meet on December 14, 2016, from 12:30 p.m. to 4:00 p.m. EST. The meeting will be held via web conference and teleconference.

The NGAC, which is composed of representatives from governmental, private sector, non-profit, and academic organizations, has been established to advise the Chair of the Federal Geographic Data Committee on management of Federal geospatial programs, the development of the National Spatial Data Infrastructure, and the implementation of Office of Management and Budget (OMB) Circular A–16. Topics to be addressed at the meeting include:

—FGDC Update
—NGAC Subcommittee Reports
—Review of NGAC Papers
—Transition Planning
—Planning for 2017 NGAC Activities

Members of the public who wish to attend the meeting must register in advance. Please register by contacting Lucia Foulkes at the Federal Geographic Data Committee (703–648–4142, *lfoulkes@usgs.gov*). Meeting registrations are due by December 9, 2016. Meeting information (web conference and teleconference instructions) will be provided to registrants prior to the meeting. While the meeting will be open to the public, attendance may be limited due to web conference and teleconference capacity.

The meeting will include an opportunity for public comment. Attendees wishing to provide public comment should register by December 9. Please register by contacting Lucia Foulkes at the Federal Geographic Data Committee (703–648–4142, *lfoulkes@usgs.gov*). Comments may also be submitted to the NGAC in writing.

DATES: The meeting will be held on December 14, 2016, from 12:30 p.m. to 4:00 p.m. EST.

FOR FURTHER INFORMATION CONTACT: John Mahoney, U.S. Geological Survey (206–220–4621).

SUPPLEMENTARY INFORMATION: Meetings of the National Geospatial Advisory Committee are open to the public. Additional information about the NGAC and the meeting are available at *www.fgdc.gov/ngac.*

Kenneth Shaffer,

Deputy Executive Director, Federal Geographic Data Committee.

Bureau of Land Management

[LLCO956000 L71300000.BJ0000 LVTSC1600100 16X]

Notice of Filing of Plats of Survey; Colorado

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of filing of plats of survey; Colorado.

SUMMARY: The Bureau of Land Management (BLM) Colorado State Office is publishing this notice to inform the public of the official filing of the survey plat listed below. The plat will be available for viewing in the BLM Colorado State Office.

DATES: The plat described in this notice was filed on November 4, 2016.

ADDRESSES: BLM Colorado State Office, Cadastral Survey, 2850 Youngfield Street, Lakewood, CO 80215–7093.

FOR FURTHER INFORMATION CONTACT: Randy Bloom, Chief Cadastral Surveyor for Colorado, (303) 239–3856.

Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service (FRS) at 1–800–877–8339 to contact the above individual during normal business hours. The FRS is available 24 hours a day, seven days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The supplemental plat in Township 11 South, Range 69 West, Sixth Principal

Meridian, Colorado, was accepted on October 27, 2016, and filed on November 4, 2016.

Randy A. Bloom,

Chief Cadastral Surveyor for Colorado.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–1028]

Certain Mobile Device Holders and Components Thereof; Institution of Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on October 6, 2016, under section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, on behalf of Nite Ize, Inc. of Boulder, Colorado. Supplements to the complaint were filed on October 21, 2016 and October 26, 2016. The complaint, as supplemented, alleges violations of section 337 based upon the importation into the United States, the sale for importation, and the sale within the United States after importation of certain mobile device holders and components thereof by reason of infringement of certain claims of U.S. Patent No. 8,602,376 (''the '376 patent''); U.S. Patent No. 8,870,146 (''the '146

patent''); U.S. Patent No. D734,746 (''the '746 patent''); and U.S. Patent No. D719,959 (''the '959 patent''). The complaint further alleges that an industry in the United States exists as required by subsection (a)(2) of section 337.

The complainant requests that the Commission institute an investigation and, after the investigation, issue a general exclusion order, or in the alternative a limited exclusion order, and cease and desist orders.

ADDRESSES: The complaint, except for any confidential information contained therein, is available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street, SW., Room 112, Washington, DC 20436, telephone (202) 205–2000. Hearing impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at (202) 205–2000. General information concerning the Commission may also be obtained by accessing its internet server at *https://www.usitc.gov.* The public record for this investigation may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.*

FOR FURTHER INFORMATION CONTACT: The Office of Unfair Import Investigations, U.S. International Trade Commission, telephone (202) 205–2560.

AUTHORITY: The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930, as amended, and in section 210.10 of the Commission's Rules of Practice and Procedure, 19 CFR 210.10 (2016).

SCOPE OF INVESTIGATION: Having considered the complaint, the U.S. International Trade Commission, on November 7, 2016, ORDERED THAT—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, as amended, an investigation be instituted to determine whether there is a violation of subsection (a)(1)(B) of section 337 in the importation into the United States, the sale for importation, or the sale within the United States after importation of certain mobile device holders and components thereof by reason of infringement of one or more of claims 1, 11, and 12 of the '376 patent; claims 1, 11, and 12 of the '146 patent; claim 1 of the '746 patent; claim 1 of the '959 patent, and whether an industry in the United States exists as required by subsection (a)(2) of section 337;

(2) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainant is: Nite Ize, Inc., 5660 Central Avenue, Boulder, CO 80301.

(3) For the investigation so instituted, the Chief Administrative Law Judge, U.S. International Trade Commission, shall designate the presiding Administrative Law Judge.

Responses to the complaint and the notice of investigation must be submitted by the named respondents in accordance with section 210.13 of the Commission's Rules of Practice and Procedure, 19 CFR 210.13. Pursuant to 19 CFR 201.16(e) and 210.13(a), such responses will be considered by the Commission if received not later than 20 days after the date of service by the Commission of the complaint and the notice of investigation. Extensions of time for submitting responses to the complaint and the notice of investigation will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the administrative law judge and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter an initial determination and a final determination containing such findings, and may result in the issuance of an exclusion order or a cease and desist order or both directed against the respondent.

By order of the Commission.

Issued: November 7. 2016.

Lisa R. Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree Under the Comprehensive Environmental Response, Compensation, and Liability Act

On November 1, 2016, the Department of Justice lodged a proposed consent decree with the United States District Court for the District of Arizona in the lawsuit entitled *United States* v. *WestRock CP, LLC,* Civil Action No. CV–16–08247–PCT–PGR.

The United States alleged that WestRock CP, LLC—as the successor to Southwest Forest Industries, Inc.—is liable under Section 107 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), 42 U.S.C. 9607, for reimbursement of response costs incurred or to be incurred by the U.S. Environmental Protection Agency in connection with releases or threatened releases of hazardous substances into the environment at or from land associated with a former wood-treating facility located approximately 1 mile northeast of Prescott, Arizona and on the Yavapai-Prescott Indian reservation. To date, unreimbursed response costs have totaled approximately $6.2 million. Under the proposed consent decree and consistent with an earlier bankruptcy settlement agreement, the United States will be allowed a general unsecured claim in the sum of $2.8 million in the Chapter 11 bankruptcy case involving WestRock CP, LLC's predecessor Smurfit-Stone Container Corporation. The allowed claim will be satisfied as a cash distribution of $1,602,877.46; 56,064 shares of WestRock Company stock; and 9,344 shares of Ingevity Corporation stock. In return, the United States covenants not to sue or take administrative action against WestRock CP, LLC pursuant to Sections 106 and 107(a) of CERCLA, 42 U.S.C. 9606 and 9607(a), and Section 7003 of the Resource Conservation and Recovery Act (RCRA), 42 U.S.C. 6973, regarding the site.

The publication of this notice opens a period for public comment on the consent decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States* v. *WestRock CP, LLC,* D.J. Ref. No. 90–11–3–09733/3. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

To submit comments:	*Send them to:*
By email	*pubcomment-ees.enrd@usdoj.gov.*
By mail	Assistant Attorney General, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

Under section 7003(d) of RCRA, a commenter may request an opportunity for a public meeting in the affected area.

During the public comment period, the consent decree may be examined and downloaded at this Justice Department Web site: *https://www.justice.gov/enrd/consent-decrees.* We will provide a paper copy of the consent decree upon written request and payment of reproduction costs. Please mail your request and payment to: Consent Decree Library, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

Please enclose a check or money order for $6.00 (25 cents per page reproduction cost) payable to the United States Treasury.

Henry Friedman,

Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–15–P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Petitions for Modification of Application of Existing Mandatory Safety Standards

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice.

SUMMARY: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and Title 30 of the Code of Federal Regulations Part 44 govern the application, processing, and disposition of petitions for modification. This notice is a summary of petitions for modification submitted to the Mine Safety and Health Administration (MSHA) by the parties listed below.

DATES: All comments on the petitions must be received by MSHA's Office of Standards, Regulations, and Variances on or before December 14, 2016.

ADDRESSES: You may submit your comments, identified by ''docket number'' on the subject line, by any of the following methods:

1. *Electronic Mail: zzMSHA-comments@dol.gov*. Include the docket number of the petition in the subject line of the message.
2. *Facsimile:* 202–693–9441.
3. *Regular Mail or Hand Delivery:* MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, Virginia 22202–5452, Attention: Sheila McConnell, Director, Office of Standards, Regulations, and Variances. Persons delivering documents are required to check in at the receptionist's desk in Suite 4E401. Individuals may inspect copies of the petitions and comments during normal business hours at the address listed above.

MSHA will consider only comments postmarked by the U.S. Postal Service or proof of delivery from another delivery service such as UPS or Federal Express on or before the deadline for comments.

FOR FURTHER INFORMATION CONTACT: Barbara Barron, Office of Standards, Regulations, and Variances at 202–693–9447 (Voice), *barron.barbara@dol.gov* (Email), or 202–693–9441 (Facsimile). [These are not toll-free numbers.]

SUPPLEMENTARY INFORMATION:

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or
2. That the application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, the regulations at 30 CFR 44.10 and 44.11 establish the requirements and procedures for filing petitions for modification.

II. Petitions for Modification

Docket Number: M–2016–028–C.
Petitioner: River View Coal, LLC, 835 State Route 1179, Waverly, Kentucky 42462.
Mine: River View Mine, MSHA I.D. No. 15–19374, located in Union County, Kentucky.
Regulation Affected: 30 CFR 75.500(d) (Permissible electric equipment).
Modification Request: The petitioner requests a modification of the existing standard to permit the use of nonpermissible electronic testing or diagnostic equipment inby the last open crosscut. The petitioner states that:

(1) Nonpermissible electronic testing and diagnostic equipment to be used includes: Laptop computers, oscilloscopes, vibration analysis machines, cable fault detectors, point temperature and distance probes, infrared temperature devices, insulation testers (meggers), voltage, current, resistance meters and power testers, electronic tachometers, signal analyzer devices, and ultrasonic measuring devices. Other testing and diagnostic equipment may be used if approved in advance by the MSHA District Manager.

(2) All nonpermissible testing and diagnostic equipment used in or inby the last open crosscut will be examined by a qualified person (as defined in 30 CFR 75.153) prior to use to ensure the equipment is being maintained in a safe operating condition. The examination results will be recorded weekly in the examination book and will be made available to MSHA and the miners at the mine.

(3) A qualified person as defined in existing 30 CFR 75.151 will continuously monitor for methane immediately before and during the use of nonpermissible electronic testing and diagnostic equipment in or inby the last open crosscut.

(4) Nonpermissible electronic testing and diagnostic equipment will not be used if methane is detected in concentrations at or above 1.0 percent. When 1.0 percent or more methane is detected while the nonpermissible electronic equipment is being used, the equipment will be deenergized immediately and withdrawn outby the last open crosscut.

(5) All hand-held methane detectors will be MSHA-approved and maintained in permissible and proper operating condition as defined in 30 CFR 75.320.

(6) Except for time necessary to troubleshoot under actual mining conditions, coal production in the section will cease. However, coal may remain in or on the equipment to test and diagnose the equipment under ''load.''

(7) All electronic testing and diagnostic equipment will be used in accordance with the manufacturer's recommendations.

(8) Qualified personnel who use electronic testing and diagnostic equipment will be properly trained to recognize the hazards and limitations associated with use of the equipment.

The petitioner asserts that under the terms and conditions of the petition for modification, the use of nonpermissible electronic testing and diagnostic equipment will at all times guarantee no less than the same measure of protection afforded by the existing standard.

Docket Number: M–2016–029–C.
Petitioner: River View Coal, LLC, 835 State Route 1179, Waverly, Kentucky 42462.
Mine: River View Mine, MSHA I.D. No. 15–19374, located in Union County, Kentucky.
Regulation Affected: 30 CFR 75.507–1(a) (Electric equipment other than power-connection points; outby the last open crosscut; return air; permissibility requirements).
Modification Request: The petitioner requests a modification of the existing standard to permit the use of nonpermissible electronic testing or diagnostic equipment in return air outby the last open crosscut. The petitioner states that:

(1) Nonpermissible electronic testing and diagnostic equipment to be used includes: Laptop computers, oscilloscopes, vibration analysis machines, cable fault detectors, point temperature and distance probes, infrared temperature devices, insulation testers (meggers), voltage, current, resistance meters and power testers, electronic tachometers, signal analyzer devices, and ultrasonic measuring devices. Other testing and diagnostic equipment may be used if approved in advance by the MSHA District Manager.

(2) All nonpermissible testing and diagnostic equipment used in return air outby the last open crosscut will be examined by a qualified person (as defined in 30 CFR 75.153) prior to use to ensure the equipment is being maintained in a safe operating condition. The examination results will be recorded weekly in the examination book and will be made available to MSHA and the miners at the mine.

(3) A qualified person as defined in existing 30 CFR 75.151 will continuously monitor for methane immediately before and during the use of nonpermissible electronic testing and diagnostic equipment in return air outby the last open crosscut.

(4) Nonpermissible electronic testing and diagnostic equipment will not be used if methane is detected in concentrations at or above 1.0 percent. When 1.0 percent or more methane is detected while the nonpermissible electronic equipment is being used, the equipment will be deenergized immediately and withdrawn from the return air outby the last open crosscut.

(5) All hand-held methane detectors will be MSHA-approved and maintained in permissible and proper operating condition as defined in 30 CFR 75.320.

(6) All electronic testing and diagnostic equipment will be used in accordance with the manufacturer's recommendations.

(7) Qualified personnel who use electronic testing and diagnostic equipment will be properly trained to recognize the hazards and limitations associated with use of the equipment.

The petitioner asserts that under the terms and conditions of the petition for modification, the use of nonpermissible electronic testing and diagnostic equipment will at all times guarantee no less than the same measure of protection afforded by the existing standard.

Docket Number: M–2016–030–C.

Petitioner: Pennyrile Energy, LLC, 7386 State Route 593, Calhoun, Kentucky 42327.

Mine: Riveredge Mine, MSHA I.D. No. 15–19424, located in Mclean County, Kentucky.

Regulation Affected: 30 CFR 75.313(c)(2) (Main mine fan stoppage with persons underground).

Modification Request: The petitioner requests a modification of the existing standard to prevent excessive levels of water from building up in the mine in the event of a long term electrical power outage due to uncontrollable circumstances. The petitioner states that:

(1) The mine has water that comes in continuously from the slope and would build up to dangerous levels if not maintained properly in a power outage. The only deviation to the standard would be to power the main sump pump with a generator through a long-term electrical outage. This electrical power would not need to be used when miners are underground and would be removed after restoration of power to the main fan and not switch back to regular power until an examination of the area is conducted. This could cause a diminution of safety to the miners when returning underground after a long-term power outage because of water levels reaching the mine roof causing unstable roof conditions. Water entering some of the main electrical substations and high voltage power feeds could cause an electrical explosion or possible electrocution.

(2) The pump to be used is a permissible Stancor MSHA-approved P series portable electric submersible pump (Product #P–70CE–HH). The pump is a 460VAC three-phase motor, FLC 39 amperes, 28Hp with two overload thermal switches incorporated in the stator and short circuit, locked rotor overload protection. The cable powering the pump will start in the hoist house branching from the 480VAC in the hoist house through a Fused Disconnect Switch with 60 ampere fuses. The fused Disconnect Switch will be connected to a Ground Check Enclosure mounted in the Hoist House to monitor the Grounding Conductor. Approximately 80 feet of #6 G–GC cable will be installed to power the permissible Stancor pump control box mounted at the Fan House. The pump control box will feed into the return airshaft with #6 G–GC cable for 444 feet to a permissible Disconnect Switch and from the permissible Disconnect Switch through #6 G–GC cable 40 feet to the 28Hp pump.

(3) The controller will be located on the side of the main fan house on the surface and will have a 45 ampere circuit breaker for short circuit protection and a Stancor model 821 liquid controller and motor protection unit for overload protection. The pump will be started and stopped from the Stancor model protection relay. There will be an electrical disconnect located underground at the pump location to aid in servicing the pump. The pump will be operated by the pump current control system.

(4) If mine power is down and fan off, the pump will run on a generator that is grounded with two 8-foot grounding rods attached with #4 bare copper. All persons will be kept 100 feet away from the slope entrance while the generator and pump are in operation. After power is restored, areas around the immediate bottom (sump pump and power centers) will be examined as required. The Sump Pump and power cable will be included as part of this examination. Weekly and monthly examinations will be conducted on the pump, controller, and generator as required.

The petitioner asserts that application of the existing standard will result in a diminution of safety to the miners.

Sheila McConnell,

Director, Office of Standards, Regulations, and Variances.

BILLING CODE 4520–43–P

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

[NARA–2017–006]

Records Schedules; Availability and Request for Comments

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice of availability of proposed records schedules; request for comments.

SUMMARY: The National Archives and Records Administration (NARA) publishes notice at least once monthly of certain Federal agency requests for records disposition authority (records schedules). Once approved by NARA, records schedules provide mandatory instructions on what happens to records when agencies no longer need them for current Government business. The records schedules authorize agencies to preserve records of continuing value in the National Archives of the United States and to destroy, after a specified period, records lacking administrative, legal, research, or other value. NARA publishes notice in the **Federal Register** for records schedules in which agencies propose to destroy records not previously authorized for disposal or reduce the retention period of records already authorized for disposal. NARA invites public comments on such records schedules, as required by 44 U.S.C. 3303a(a).

DATES: NARA must receive requests for copies in writing by December 14, 2016. Once NARA finishes appraising the records, we will send you a copy of the schedule you requested. We usually prepare appraisal memoranda that contain additional information concerning the records covered by a proposed schedule. You may also request these. If you do, we will also provide them once we have completed the appraisal. You have 30 days after we send to you these requested documents in which to submit comments.

ADDRESSES: You may request a copy of any records schedule identified in this notice by contacting Records Appraisal and Agency Assistance (ACRA) using one of the following means:

Mail: NARA (ACRA); 8601 Adelphi Road; College Park, MD 20740–6001.

Email: request.schedule@nara.gov.

FAX: 301–837–3698.

You must cite the control number, which appears in parentheses after the name of the agency that submitted the schedule, and a mailing address. If you would like an appraisal report, please include that in your request.

FOR FURTHER INFORMATION CONTACT: Margaret Hawkins, Director, by mail at

Records Appraisal and Agency Assistance (ACRA); National Archives and Records Administration; 8601 Adelphi Road, College Park, MD 20740–6001, by phone at 301–837–1799, or by email at *request.schedule@nara.gov.*

SUPPLEMENTARY INFORMATION: Each year, Federal agencies create billions of records on paper, film, magnetic tape, and other media. To control this accumulation, agency records managers prepare schedules proposing records retention periods and submit these schedules for NARA's approval. These schedules provide for timely transfer into the National Archives of historically valuable records and authorize the agency to dispose of all other records after the agency no longer needs them to conduct its business. Some schedules are comprehensive and cover all the records of an agency or one of its major subdivisions. Most schedules, however, cover records of only one office or program or a few series of records. Many of these update previously approved schedules, and some include records proposed as permanent.

The schedules listed in this notice are media neutral unless otherwise specified. An item in a schedule is media neutral when an agency may apply the disposition instructions to records regardless of the medium in which it creates or maintains the records. Items included in schedules submitted to NARA on or after December 17, 2007, are media neutral unless the item is expressly limited to a specific medium. (See 36 CFR 1225.12(e).)

Agencies may not destroy Federal records without Archivist of the United States' approval. The Archivist approves destruction only after thoroughly considering the records' administrative use by the agency of origin, the rights of the Government and of private people directly affected by the Government's activities, and whether or not the records have historical or other value.

In addition to identifying the Federal agencies and any subdivisions requesting disposition authority, this notice lists the organizational unit(s) accumulating the records (or notes that the schedule has agency-wide applicability when schedules cover records that may be accumulated throughout an agency); provides the control number assigned to each schedule, the total number of schedule items, and the number of temporary items (the records proposed for destruction); and includes a brief description of the temporary records. The records schedule itself contains a full description of the records at the file unit level as well as their disposition. If NARA staff has prepared an appraisal memorandum for the schedule, it also includes information about the records. You may request additional information about the disposition process at the addresses above.

Schedules Pending

1. Department of Defense, Defense Threat Reduction Agency (DAA–0374–2014–0022, 1 item, 1 temporary item). Records relating to plans and studies regarding responses to weapons accidents.
2. Department of Defense, Office of the Secretary of Defense (DAA–0330–2015–0011, 1 item, 1 temporary item). Master files of an electronic information system used to identify gaps in workforce competency.
3. Department of Defense, Office of the Secretary of Defense (DAA–0330–2016–0017, 1 item, 1 temporary item). Records relating to the issuance of firearms identification cards to retired law enforcement officers.
4. Department of Homeland Security, Immigration and Customs Enforcement (DAA–0567–2015–0016, 5 items, 5 temporary items). Records related to fugitive operations, including operational worksheets, reports, and briefing information.
5. Department of Justice, Executive Office for Immigration Review (DAA–0582–2016–0001, 3 items, 3 temporary items). Records related to pro bono legal representation including provider lists and provider list applicant files.
6. Department of the Navy, Agency-wide (DAA–NU–2015–0010, 11 items, 10 temporary items). Materials management records including routine correspondence, receipts for clothing, and records relating to provisions and rations, electronics repair, daily operations, and related matters. Proposed for permanent retention are records relating to flags and pennants.
7. Department of Transportation, Federal Motor Carrier Safety Administration (DAA–0557–2015–0002, 1 item, 1 temporary item). Master files of an electronic information system relating to audits and field inspections.
8. Department of Transportation, Federal Motor Carrier Safety Administration (DAA–0557–2015–0009, 1 item, 1 temporary item). Master files of an electronic information system relating to vehicle crash data and safety inspections.
9. Department of Transportation, Federal Motor Carrier Safety Administration (DAA–0557–2016–0001, 2 items, 2 temporary items). Master files of an electronic information system relating to employment drug screenings.
10. Department of Transportation, Pipeline and Hazardous Materials Safety Administration (DAA–0571–2014–0004, 3 items, 1 temporary item). Public affairs administrative records. Proposed for permanent retention are Congressional records and press releases.
11. Department of Veterans Affairs, Veterans Health Administration (DAA–0015–2016–0006, 8 items, 8 temporary items). Records are databases tracking patient eligibility for surgical procedures, and analysis of procedural outcomes.
12. National Aeronautics and Space Administration, Agency-wide (DAA–0255–2016–0003, 1 item, 1 temporary item). Safety and Mission Assurance records to include routine audit support documents of NASA installations.
13. National Aeronautics and Space Administration, Agency-wide (DAA–0255–2016–0004, 2 items, 2 temporary items). Employee awards case files and awards tracking database.
14. National Aeronautics and Space Administration, Agency-wide (DAA–0255–2016–0005, 2 items, 2 temporary items). Electronic software usage agreements and duplicate paper copies.
15. National Archives and Records Administration, Office of the Chief Records Officer (DAA–0064–2016–0010, 2 items, 2 temporary items). Records management training records, including course outlines, handouts, reference files, student transcripts, certificates, and test data.
16. National Archives and Records Administration, Office of Human Capital (DAA–0064–2016–0014, 3 items, 3 temporary items). Internal agency training records, including course plans, instructional and presentation materials, manuals, syllabi, textbooks, source material, and videos.
17. National Archives and Records Administration, Office of Inspector General (DAA–0064–2016–0011, 2 items, 2 temporary items). Audit

reports and audit resolution case files.

Laurence Brewer,

Chief Records Officer for the U.S. Government.

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

[NARA–2017–007]

Advisory Committee on the Records of Congress; Meeting

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice of advisory committee meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, the National Archives and Records Administration (NARA) announces a meeting of the Advisory Committee on the Records of Congress. The committee advises NARA on the full range of programs, policies, and plans for the Center for Legislative Archives in the Office of Legislative Archives, Presidential Libraries, and Museum Services (LPM).

DATES: The meeting will be on Monday, December 5, 2016 from 10:00 a.m. to 11:30 a.m.

ADDRESSES: The United States Capitol, 1st Street, Washington, DC 20515, Room S–211 (The LBJ Room).

FOR FURTHER INFORMATION CONTACT: Center for Legislative Archives at 202.357.5350, or Sharon Fitzpatrick at *sharon.fitzpatrick@nara.gov.*

SUPPLEMENTARY INFORMATION:

Agenda

(1) Chair's Opening Remarks—Secretary of the U.S. Senate
(2) Recognition of co-chair—Clerk of the U.S. House of Representatives
(3) Recognition of the Archivist of the United States
(4) Approval of the minutes of the last meeting
(5) Senate Archivist's report
(6) House Archivist's report
(7) Center update
(8) Other current issues and new business

The meeting is open to the public.

Patrice Murray,

Committee Management Officer.

[FR Doc. 2016–27276 Filed 11–10–16; 8:45 am]

BILLING CODE 7515–01–P

NATIONAL COUNCIL ON DISABILITY

Sunshine Act Meetings

TIME AND DATES: The Members of the National Council on Disability (NCD) will hold a quarterly meeting on Friday, December 2, 2016 via teleconference from 12:00 p.m.–2:15 p.m., Eastern.

PLACE: The meeting will occur by phone. NCD staff will participate in the call from the NCD office at 1331 F Street NW., Suite 850, Washington, DC 20004. Interested parties may join the meeting in person at the NCD office or may join the phone line in a listening-only capacity (other than the period allotted for public comment noted below) using the following call-in information:

Teleconference number: 888–221–9508; Conference ID: 3506445; Conference Title: NCD Meeting; Host Name: Clyde Terry.

MATTERS TO BE CONSIDERED: The Council will receive an update on the Council's ongoing policy projects; the agency's finances; legislative activity; and the agency's annual progress report. The Council will also vote on a change to its bylaws. The Council will receive public comment on poverty and disability.

AGENDA: The times provided below are approximations for when each agenda item is anticipated to be discussed (all times Eastern):

Friday, December 2

12:00–12:05 p.m.—Welcome and Call to Order
12:05–12:10 p.m.—Attendance and Roll Call
12:10–12:15 p.m.—Approval of July Minutes
12:15–12:25 p.m.—Chairperson's Report
12:25–12:35 p.m.—Executive Director's Report
12:35–12:45 p.m.—Policy Update
12:45–1:05 p.m.—Finance Update
1:05–1:15 p.m.—Legislative Update
1:15–1:20 p.m.—Vote on Bylaw Change
1:20–1:35 p.m.—Progress Report Update
1:35–2:05 p.m.—Public Comment
2:05–2:15 p.m.—Council Discussion
2:15 p.m.—Adjournment

PUBLIC COMMENT: To better facilitate NCD's public comment, any individual interested in providing public comment is asked to register his or her intent to provide comment in advance by sending an email to *PublicComment@ncd.gov* with the subject line ''Public Comment'' with your name, organization, state, and topic of comment included in the body of your email. Full-length written public comments may also be sent to that email address. All emails to register for public comment at the quarterly meeting must be received by Wednesday, November 30, 2016. Priority will be given to those individuals who are in-person to provide their comments during the town hall portions of the agenda. Those commenters on the phone will be called on according to the list of those registered via email. Due to time constraints, NCD asks all commenters to limit their comments to three minutes. Comments received at the quarterly meeting will be limited to the topic of disability and poverty.

CONTACT PERSON: Anne Sommers, NCD, 1331 F Street NW., Suite 850, Washington, DC 20004; 202–272–2004 (V), 202–272–2074 (TTY).

ACCOMMODATIONS: A CART streamtext link has been arranged for this teleconference meeting. The Web link to access CART on Friday, December 2, 2016 is: *https://www.streamtext.net/player?event=NCD.*

Those who plan to attend the meeting in-person and require accommodations should notify NCD as soon as possible to allow time to make arrangements. To help reduce exposure to fragrances for those with multiple chemical sensitivities, NCD requests that all those attending the meeting in person refrain from wearing scented personal care products such as perfumes, hairsprays, and deodorants.

Dated: November 9, 2016.

Rebecca Cokley,

Executive Director.

NATIONAL SCIENCE FOUNDATION

Sunshine Act Meetings; National Science Board

The National Science Board, pursuant to NSF regulations (45 CFR part 614), the National Science Foundation Act, as amended, (42 U.S.C. 1862n–5), and the Government in the Sunshine Act (5 U.S.C. 552b), hereby gives notice of a revised schedule of meetings for the transaction of National Science Board business. This notice amends the notice that was published on November 7, 2016, at 81 FR 78212.

CHANGE TO START TIME OF COMMITTEE MEETING: Joint Session of CSB Subcommittee on Facilities (SCF) and CPP Open session: 4:00–4:50 p.m.

- Committee Chairs' Opening Remarks
- Approval of Prior Minutes
- Discussion of Facilities-related Information Products
- Discussion of the Annual Facility Plan

The meeting had previously been scheduled to start at 4:20 p.m. EST.

UPDATES: Please refer to the National Science Board Web site for additional information. Meeting information and schedule updates (time, place, subject matter, and status of meeting) may be found at *http://www.nsf.gov/nsb/meetings/notices.jsp.*

AGENCY CONTACT: John Veysey, *jveysey@nsf.gov,* 703–292–7000.

PUBLIC AFFAIRS CONTACT: Nadine Lymn, *nlymn@nsf.gov,* 703–292–2490.

Chris Blair,

Executive Assistant, National Science Board Office.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–335 and 50–389; NRC–2011–0302]

Florida Power and Light Company; St. Lucie Plant, Unit Nos. 1 and 2

AGENCY: Nuclear Regulatory Commission.

ACTION: Environmental assessment and finding of no significant impact; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of amendments to Renewed Facility Operating License Nos. DPR–67 and NPF–16, issued on October 2, 2003, and held by Florida Power and Light Company (FPL or the licensee) for the operation of St. Lucie Plant, Unit Nos. 1 and 2 (St. Lucie), located on Hutchinson Island in St. Lucie County, Florida. The proposed amendments would revise the Environmental Protection Plans (Non-Radiological) (EPPs), contained in Appendix B to the St. Lucie renewed facility operating licenses. The NRC is issuing a final environmental assessment (EA) and finding of no significant impact (FONSI) associated with the proposed license amendments.

DATES: The EA and FONSI referenced in this document is available on November 14, 2016.

ADDRESSES: Please refer to Docket ID NRC–2011–0302 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

- *Federal Rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2011–0302. Address questions about NRC dockets to Carol Gallagher; telephone: 301–415–3463; email: *Carol.Gallagher@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the NRC Public Documents collection at *http://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''*ADAMS Public Documents*'' and then select ''*Begin Web-based ADAMS Search.*'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.* The ADAMS accession number for each document referenced in this notice (if that document is available in ADAMS) is provided the first time that a document is referenced. For the convenience of the reader, the ADAMS accession numbers are also provided in a table in the ''Availability of Documents'' section of this document.
- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Perry Buckberg, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–1383; email: *Perry.Buckberg@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is considering issuance of amendments to Renewed Facility Operating License Nos. DPR–67 and NPF–16 issued to FPL for operation of St. Lucie, located on Hutchinson Island in St. Lucie County, Florida. The licensee submitted its license amendment request by letter dated April 29, 2016 (ADAMS Accession No. ML16125A253), as amended by letter dated August 11, 2016 (ADAMS Accession No. ML16238A190). If approved, the license amendments would revise language in Section 4.2, ''Terrestrial/Aquatic Issues,'' of the St. Lucie EPPs to require FPL to adhere to the specific requirements within the Incidental Take Statement (ITS) of the ''currently applicable'' biological opinion. The NRC prepared an EA to document its findings related to the proposed license amendments in accordance with § 51.21 of title 10 of the *Code of Federal Regulations* (10 CFR). Based on the results of the EA documented herein, the NRC did not identify any significant environmental impacts associated with the proposed amendments and is, therefore, issuing a FONSI in accordance with 10 CFR 51.32.

II. Environmental Assessment

Plant Site and Environs

St. Lucie is a two-unit plant with pressurized water reactors and a once-through cooling system that withdraws water from and discharges heated water to the Atlantic Ocean. St. Lucie lies on Hutchinson Island in an unincorporated portion of St. Lucie County, Florida approximately 7 miles (11 kilometers) southeast of Fort Pierce, 4.5 miles (7 kilometers) east of Port St. Lucie, and 8 miles (13 kilometers) north of Stuart. The facility occupies approximately 1,130 acres (457 hectares) on the widest portion of the island. The Atlantic Ocean borders the site to the east, and the Indian River Lagoon, a tidally influenced estuary, lies to the west.

The U.S. Atomic Energy Commission, the NRC's predecessor agency, and the NRC have previously conducted environmental reviews of St. Lucie operations in several documents, which contain more detailed descriptions of the plant site and environs. Those documents include several Final Environmental Statements related to construction and initial operation of St. Lucie; the NRC's May 2003 Generic Environmental Impact Statement for License Renewal of Nuclear Plants: Regarding St. Lucie Units 1 and 2—Final Report (NUREG–1437, Supplement 11) (ADAMS Accession No. ML031360709); and the NRC's June 2012 EA for the St. Lucie Extended Power Uprate (ADAMS Accession No. ML12165A511).

Description of the Proposed Action

The proposed action would revise language in Section 4.2, ''Terrestrial/Aquatic Issues,'' of the St. Lucie EPPs to require FPL to adhere to the specific requirements within the ITS of the ''currently applicable'' biological opinion. The proposed amendments would remove language specifically referencing the National Marine Fisheries Service's (NMFS) previous biological opinion, which was issued in 2001. The proposed action would be in accordance with the licensee's application dated April 29, 2016 (ADAMS Accession No. ML16125A253), as amended by letter dated August 11, 2016 (ADAMS Accession No. ML16238A190).

By amending Section 4.2 of the EPPs to clarify that FPL must adhere to the ITS of the ''currently applicable'' biological opinion, the proposed action

would require FPL's compliance with the NMFS' March 24, 2016, biological opinion (ADAMS Accession No. ML16084A616). This biological opinion applies to smalltooth sawfish (*Pristis pectinata*) and five species of sea turtles (*Caretta carreta, Chelonia mydas, Lepidochelys kempii, Eretmochelys imbricata,* and *Dermochelys coriacea*), and concludes that the continued operation of St. Lucie is not likely to jeopardize the continued existence of these species or destroy or adversely modify the designated critical habitat of the loggerhead Northwest Atlantic distinct population segment. The ITS exempts the incidental take of these species from the prohibitions of Section 9 of the Endangered Species Act of 1973, as amended, provided that the specified Reasonable and Prudent Measures (RPMs) are implemented. The RPMs are:

(1) Avoid and minimize entrainment into the St. Lucie intake canal.

(2) Avoid and minimize injurious or lethal take from entrainment into, entrapment in, capture in, and release from the St. Lucie intake canal or from impingement at intake wells.

In order to implement the RPMs, the biological opinion prescribes a number of Terms and Conditions (T&Cs). The T&Cs require FPL to design, test, construct, and implement excluder devices for the St. Lucie intake pipe velocity caps that will minimize the number of nesting or egg-bearing female sea turtles that enter the intake pipes. Following testing, in-water construction of the excluder devices must begin no later than the first half of 2018. The licensee must also develop monitoring and maintenance plans to inspect routinely and remove debris and biofouling organisms from the excluder devices and the intake pipes and to inspect, repair, and replace, as necessary, the 8-inch mesh barrier net in the intake canal.

The T&Cs specify how FPL personnel should capture and relocate smalltooth sawfish and sea turtles that enter the intake canal. Additionally, the T&Cs specify various monitoring and reporting requirements, including how FPL should record the number and condition of turtles captured in the intake canal; the periodicity at which FPL personnel should inspect the banks of the intake canal for turtle tracks or signs of nesting; how FPL personnel should monitor the release site for possible delayed lethal impacts to captured smalltooth sawfish; how FPL must notify NMFS of lethal smalltooth sawfish or sea turtle takes; and the information that FPL should include in monthly and annual reports. The T&Cs also require FPL to continue to participate in the Florida Sea Turtle Stranding and Salvage Network; to continue to conduct the ongoing sea turtle nesting program and public service turtle walks; and to consult with the Florida Fish and Wildlife Conservation Commission (FWC) in accordance with FPL's FWC Marine Turtle Permit. Finally, the T&Cs require FPL contracted biologists to receive training on smalltooth sawfish and sea turtle handling.

Notably, because the proposed amendments would require FPL's compliance with the ''currently applicable'' biological opinion, if NMFS were to issue a new biological opinion in the future, the proposed amendments would require FPL to adhere to the specific requirements in the ITS of that new biological opinion, and FPL would no longer be required to adhere to the March 24, 2016, biological opinion upon issuance of a new biological opinion.

Need for the Proposed Action

The proposed action is needed to reflect the new biological opinion issued by NMFS on March 24, 2016, and to require FPL's compliance with the ITS and related RPMs and T&Cs contained therein. The proposed action is administrative in nature.

Environmental Impacts of the Proposed Action

The NRC has completed its evaluation of the proposed action and concludes that the proposed changes are administrative in nature, would have no direct effects on plant equipment or plant operation, and would not involve any changes to the design bases for St. Lucie.

With regard to potential radiological impacts, the proposed action would not increase the probability or consequences of accidents, would not change the types or increase the amount of effluent that may be released offsite, and would result in no increase in occupational or public radiation exposure. Therefore, there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential non-radiological impacts, because the proposed action is administrative in nature, it would not have any direct impacts on land, air, or water resources, including impacts to biota. In addition, the NRC staff identified no socioeconomic or environmental justice impacts associated with the proposed action. Therefore, there are no significant non-radiological environmental impacts associated with the proposed action.

An indirect effect of the proposed action is that FPL will design, test, construct, and implement excluder devices for the St. Lucie intake pipe velocity caps to minimize the number of nesting or egg-bearing female sea turtles that enter the intake pipes in accordance with the March 24, 2016, biological opinion. The biological opinion stipulates that in-water construction of the excluder devices must begin no later than the first half of 2018. The excluder devices will be prefabricated offsite and will only require limited construction equipment for the cleaning and attachment of the excluder devices to the velocity caps. The excluder devices will be installed within the boundaries of the existing concrete velocity cap structures located approximately 1,500 feet (460 meters) offshore. The velocity caps and associated functions are not safety related and would, therefore, not require any physical changes to systems, structures, or components intended for the prevention of accidents. The licensee may need to perform some localized cleaning of marine growth on the concrete surfaces of the velocity caps prior to attaching the excluder devices to the velocity caps. During such cleaning, there is potential for minor water turbidity, which FPL would monitor in accordance with the biological opinion, FWC Marine Turtle Permit, Army Corps of Engineers National Wide Permit, and Florida Department of Environmental Protection Environmental Source Permit, as applicable. Installation would not require dredging, sediment disturbance, or construction on the ocean floor, and would also not result in any land disturbances. The NRC staff concludes that the indirect effects of installation of the turtle excluder devices will not result in significant environmental impacts to the radiological or non-radiological environment.

Based on the foregoing analysis, the NRC concludes that there are no significant environmental impacts associated with the proposed action.

Environmental Impacts of the Alternatives to the Proposed Action

As an alternative to the proposed action, the NRC staff considered denial of the proposed license amendments (*i.e.,* the ''no-action'' alternative). Denial of the application would result in no change in current environmental conditions or impacts. Accordingly, the environmental impacts of the proposed action and the no-action alternative are similar.

Alternative Use of Resources

The proposed action does not involve the use of any different resources than those previously considered in NUREG–1437, Supplement 11, prepared for the license renewal of St. Lucie.

Agencies and Persons Consulted

The NRC did not enter into consultation with any other Federal Agency or with the State of Florida regarding the environmental impact of the proposed action. However, on August 29, 2016, the NRC notified the Florida state official, Cynthia Becker, Bureau of Radiation Control, of the proposed amendments. The state official had no comments.

III. Finding of No Significant Impact

The NRC is considering issuing amendments for Renewed Facility Operating License Nos. DPR–67 and NPF–16 issued to FPL for operation of St. Lucie. The proposed amendments would revise the St. Lucie EPPs to require FPL to adhere to the specific requirements within the ITS of the ''currently applicable'' biological opinion. On the basis of the EA included in Section II of this document and incorporated by reference into this finding, the NRC concludes that the proposed action would not have significant effects on the quality of the human environment. The NRC's evaluation considered information provided in the licensee's application, as supplemented, as well as the NRC's independent review of other relevant environmental documents. Section IV of this document lists the environmental documents related to the proposed action and includes information on the availability of these documents. Based on its findings, the NRC has determined not to prepare an environmental impact statement for the proposed action.

IV. Availability of Documents

The documents identified in the following table are available to interested persons through ADAMS.

Document	ADAMS Accession No.
Florida Power and Light Company, License Amendment Request to Update Appendix B to the Renewed Facility Operating Licenses to Incorporate the 2016 Biological Opinion, Dated April 29, 2016	ML16125A253
Florida Power and Light Company, Response to Request for Additional Information Regarding License Amendment Request for Biological Opinion License Changes, Dated August 11, 2016	ML16238A190
National Marine Fisheries Service, Biological Opinion for Continued Operation of St. Lucie Nuclear Power Plant, Units 1 and 2 in St. Lucie County, Florida, Dated March 24, 2016	ML16084A616
U.S. Nuclear Regulatory Commission, Generic Environmental Impact Statement for License Renewal of Nuclear Plants: Regarding St. Lucie Units 1 and 2—Final Report (NUREG–1437, Supplement 11), Dated May 2003	ML031360709
U.S. Nuclear Regulatory Commission, St. Lucie Plant, Units 1 and 2—Environmental Assessment and Finding of No Significant Impact Related to the Proposed Extended Power Uprate, Dated June 25, 2012	ML12165A511

Dated at Rockville, Maryland, this 3rd day of November 2016.

For The Nuclear Regulatory Commission.

Perry H. Buckberg,

Senior Project Manager, Plant Licensing Branch II–2, Division of Operating Reactor Licensing, Office of Nuclear Reactor Regulation.

NUCLEAR REGULATORY COMMISSION

[NRC–2016–0001]

Sunshine Act Meeting Notice

DATE: November 14, 21, 28, December 5, 12, 19, 2016.

PLACE: Commissioners' Conference Room, 11555 Rockville Pike, Rockville, Maryland.

STATUS: Public and Closed.

Week of November 14, 2016

There are no meetings scheduled for the week of November 14, 2016.

Week of November 21, 2016—Tentative

There are no meetings scheduled for the week of November 21, 2016.

Week of November 28, 2016—Tentative

Tuesday, November 29, 2016

9:00 a.m. Briefing on Uranium Recovery (Public Meeting); (Contact: Samantha Crane: 301–415–6380).

This meeting will be webcast live at the Web address—*http://www.nrc.gov/.*

Week of December 5, 2016—Tentative

There are no meetings scheduled for the week of December 5, 2016.

Week of December 12, 2016—Tentative

Thursday, December 15, 2016

9:30 a.m. Briefing on Equal Employment Opportunity, Affirmative Employment, and Small Business (Public Meeting); (Contact: Larniece McKoy Moore: 301–415–1942).

This meeting will be webcast live at the Web address—*http://www.nrc.gov/.*

Week of December 19, 2016—Tentative

There are no meetings scheduled for the week of December 19, 2016.

* * * * *

The schedule for Commission meetings is subject to change on short notice. For more information or to verify the status of meetings, contact Denise McGovern at 301–415–0981 or via email at *Denise.McGovern@nrc.gov.*

* * * * *

The NRC Commission Meeting Schedule can be found on the Internet at: *http://www.nrc.gov/public-involve/public-meetings/schedule.html.*

* * * * *

The NRC provides reasonable accommodation to individuals with disabilities where appropriate. If you need a reasonable accommodation to participate in these public meetings, or need this meeting notice or the transcript or other information from the public meetings in another format (*e.g.*, braille, large print), please notify Kimberly Meyer, NRC Disability Program Manager, at 301–287–0739, by videophone at 240–428–3217, or by email at *Kimberly.Meyer-Chambers@nrc.gov.* Determinations on requests for reasonable accommodation will be made on a case-by-case basis.

* * * * *

Members of the public may request to receive this information electronically. If you would like to be added to the distribution, please contact the Nuclear Regulatory Commission, Office of the Secretary, Washington, DC 20555 (301–415–1969), or email *Brenda.Akstulewicz@nrc.gov* or *Patricia.Jimenez@nrc.gov.*

Dated: November 9, 2016.

Denise McGovern,

Policy Coordinator, Office of the Secretary.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[NRC–2016–0077]

Information Collection: Policy Statement for the ''Criteria for Guidance of States and NRC in Discontinuance of NRC Regulatory Authority and Assumption Thereof by States Through Agreement,'' Maintenance of Existing Agreement State Programs, Request for Information Through the Integrated Materials Performance Evaluation Program (IMPEP) Questionnaire, and Agreement State Participation in IMPEP

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of submission to the Office of Management and Budget; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has recently submitted a request for renewal of an existing collection of information to the Office of Management and Budget (OMB) for review. The information collection is entitled, ''Policy Statement for the 'Criteria for Guidance of States and NRC in Discontinuance of NRC Regulatory Authority and Assumption Thereof By States Through Agreement,' Maintenance of Existing Agreement State Programs, Request for Information Through the Integrated Materials Performance Evaluation Program (IMPEP) Questionnaire, and Agreement State Participation in IMPEP.''

DATES: Submit comments by December 14, 2016.

ADDRESSES: Submit comments directly to the OMB reviewer at: Vlad Dorjets, Desk Officer, Office of Information and Regulatory Affairs (3150–0183), NEOB–10202, Office of Management and Budget, Washington, DC 20503; telephone: 202–395–7315, email: *oira_submission@omb.eop.gov.*

FOR FURTHER INFORMATION CONTACT: David Cullison, NRC Clearance Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email: *INFOCOLLECTS.Resource@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2016–0077 when contacting the NRC about the availability of information for this action. You may obtain publicly-available information related to this action by any of the following methods:

- *Federal Rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2016–0077. A copy of the collection of information and related instructions may be obtained without charge by accessing Docket ID NRC–2016–0077 on this Web site.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at *http://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''*ADAMS Public Documents*'' and then select ''*Begin Web-based ADAMS Search.*'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.* A copy of the collection of information and related instructions may be obtained without charge by accessing ADAMS Accession No. ML16099A056. The supporting statement is available in ADAMS under Accession No. ML16266A477.
- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.
- *NRC's Clearance Officer:* A copy of the collection of information and related instructions may be obtained without charge by contacting the NRC's Clearance Officer, David Cullison, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email: *INFOCOLLECTS.Resource@nrc.gov.*

B. Submitting Comments

The NRC cautions you not to include identifying or contact information in comment submissions that you do not want to be publicly disclosed in your comment submission. All comment submissions are posted at *http://www.regulations.gov* and entered into ADAMS. Comment submissions are not routinely edited to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the OMB, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that comment submissions are not routinely edited to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, ''Policy Statement for the 'Criteria for Guidance of States and NRC in Discontinuance of NRC Regulatory Authority and Assumption Thereof By States Through Agreement,' Maintenance of Existing Agreement State Programs, Request for Information Through the Integrated Materials Performance Evaluation Program (IMPEP) Questionnaire, and Agreement State Participation in IMPEP.'' The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on July 13, 2016 (81 FR 45309).

1. *The title of the information collection:* ''Policy Statement for the 'Criteria for Guidance of States and NRC in Discontinuance of NRC Regulatory Authority and Assumption Thereof By States Through Agreement,' Maintenance of Existing Agreement State Programs, Request for Information Through the Integrated Materials Performance Evaluation Program (IMPEP) Questionnaire, and Agreement State Participation in IMPEP.''
2. *OMB approval number:* 3150–0183.
3. *Type of submission:* Extension.
4. *The form number if applicable:* Not applicable.
5. *How often the collection is required or requested:* Every four years for completion of the IMPEP questionnaire in preparation for an IMPEP review. One time for new Agreement State applications. For participation by Agreement States' staff in all IMPEP reviews and fulfilling requirements for Agreement States to maintain their programs.
6. *Who will be required or asked to respond:* All Agreement States (37 Agreement States who have signed Agreements with NRC under Section 274b. of the Atomic Energy Act (Act))

and any non-Agreement State seeking to sign an Agreement with the Commission. On average, the staff of 11 Agreement States per year will be requested to provide completed questionnaires for regularly and non-regularly scheduled IMPEP reviews.

7. *The estimated number of annual responses:* 59

8. *The estimated number of annual respondents:* 39 (37 existing Agreement States plus 2 applicants).

9. *An estimate of the total number of hours needed annually to comply with the information collection requirement or request:* 287,893 hours (an average of 7,382 hours per respondent). This includes 477 hours to complete the IMPEP questionnaires; 5,500 hours to prepare two new Agreement State applications, 396 hours for Agreement State staff participation in IMPEP reviews; and 281,520 hours for maintaining Existing Agreement State programs.

10. *Abstract:* The States wishing to become Agreement States are requested to provide certain information to the NRC as specified by the Commission's Policy Statement, ''Criteria for Guidance of States and NRC in Discontinuance of NRC Regulatory Authority and Assumption Thereof By States Through Agreement.'' The Agreement States need to ensure that the radiation control program under the Agreement remains adequate and compatible with the requirements of Section 274 of the Act and must maintain certain information.

The NRC conducts periodic evaluations through IMPEP to ensure that these programs are compatible with the NRC's program, meet the applicable parts of the Act, and are adequate to protect public health and safety.

Dated at Rockville, Maryland, this 4th day of November 2016.

For the Nuclear Regulatory Commission.

David Cullison,

NRC Clearance Officer, Office of the Chief Information Officer.

[FR Doc. 2016–27224 Filed 11–10–16; 8:45 am]

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[NRC–2016–0140]

Information Collection: Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of submission to the Office of Management and Budget; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has recently submitted a request for renewal of an existing collection of information to the Office of Management and Budget (OMB) for review. The information collection is entitled, ''Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery.''

DATES: Submit comments by December 14, 2016.

ADDRESSES: Submit comments directly to the OMB reviewer at: Vlad Dorjets, Desk Officer, Office of Information and Regulatory Affairs (3150–0217), NEOB–10202, Office of Management and Budget, Washington, DC 20503; telephone: 202–395–7315, email: *oira_submission@omb.eop.gov.*

FOR FURTHER INFORMATION CONTACT: David Cullison, NRC Clearance Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email: *INFOCOLLECTS.Resource@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2016–0140 when contacting the NRC about the availability of information for this action. You may obtain publicly-available information related to this action by any of the following methods:

- *Federal Rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2016–0140.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at *http://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''*ADAMS Public Documents*'' and then select ''*Begin Web-based ADAMS Search.*'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.* The supporting statement is available in ADAMS under Accession No. ML16285A384.
- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.
- *NRC's Clearance Officer:* A copy of the collection of information and related instructions may be obtained without charge by contacting the NRC's Clearance Officer, David Cullison, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email: *INFOCOLLECTS.Resource@nrc.gov.*

B. Submitting Comments

The NRC cautions you not to include identifying or contact information in comment submissions that you do not want to be publicly disclosed in your comment submission. All comment submissions are posted at *http://www.regulations.gov* and entered into ADAMS. Comment submissions are not routinely edited to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the OMB, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that comment submissions are not routinely edited to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, ''Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery.'' The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on July 22, 2016 (81 FR 47839).

1. *The title of the information collection:* Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery.

2. *OMB approval number:* 3150–0217.

3. *Type of submission:* Extension.

4. *The form number if applicable:* Not Applicable.

5. *How often the collection is required or requested:* On occasion and annually.

6. *Who will be required or asked to respond:* Individuals and households; businesses and organizations; State, Local, or Tribal governments.

7. *The estimated number of annual responses:* 4,200.

8. *The estimated number of annual respondents:* 4,200.

9. *An estimate of the total number of hours needed annually to comply with the information collection requirement or request:* 1,087.5.

10. *Abstract:* The information collection activity will garner qualitative customer and stakeholder feedback in an efficient, timely manner, for the purpose of improving service delivery. By qualitative feedback we mean information that provides useful insights on perceptions and opinions, but are not statistical surveys that yield quantitative results that can be generalized to the population of study. This feedback will provide insights into customer or stakeholder perceptions, experiences and expectations, provide an early warning of issues with service, or focus attention on areas where communication, training or changes in operations might improve delivery of products or services. These collections will allow for ongoing, collaborative and actionable communications between the Agency and its customers and stakeholders. It will also allow feedback to contribute directly to the improvement of program management. Feedback collected under this generic clearance will provide useful information, but it will not yield data that can be generalized to the overall population. This type of generic clearance for qualitative information will not be used for quantitative information collections that are designed to yield reliably actionable results, such as monitoring trends over time or documenting program performance. Such data uses require more rigorous designs that address: The target population to which generalizations will be made, the sampling frame, the sample design (including stratification and clustering), the precision requirements or power calculations that justify the proposed sample size, the expected response rate, methods for assessing potential nonresponse bias, the protocols for data collection, and any testing procedures that were or will be undertaken prior to fielding the study. Depending on the degree of influence the results are likely to have, such collections may still be eligible for submission for other generic mechanisms that are designed to yield quantitative results.

Dated at Rockville, Maryland, this 4th day of November 2016.

For the Nuclear Regulatory Commission.

David Cullison,

NRC Clearance Officer, Office of the Chief Information Officer.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 72–1050; NRC–2016–0231]

Waste Control Specialists LLC's Consolidated Interim Spent Fuel Storage Facility Project

AGENCY: Nuclear Regulatory Commission.

ACTION: Intent to prepare an environmental impact statement and conduct a scoping process; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) received a license application by letter dated April 28, 2016, from Waste Control Specialists LLC (WCS). By this application, WCS is requesting authorization to construct and operate a Consolidated Interim Storage Facility (CISF) for spent nuclear fuel at WCS's facility in Andrews County, Texas (the proposed action). The WCS intends to store up to 40,000 metric tons uranium in the CISF. The NRC will prepare an environmental impact statement (EIS) to document the potential environmental impacts from the proposed action. As part of the EIS development process, the NRC is seeking comments on the scope of its environmental review.

DATES: The scoping period begins on November 14, 2016, and, if the application is docketed, will end 45 days after publication of a notice of docketing the WCS application.

ADDRESSES: You may submit scoping comments by any of the following methods (unless this document describes a different method for submitting comments on a specific subject):

- *Federal Rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2016–0231. Address questions about NRC dockets to Carol Gallagher; telephone: 301–415–3463; email: *Carol.Gallagher@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *Mail comments to:* Cindy Bladey, Office of Administration, Mail Stop: OWFN–12–H08, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.
- *Email Comments to:* You may email scoping comments to the Project's email address: *WCS_CISF_EIS@nrc.gov.* Comments must be submitted by the closing date of the scoping period to ensure consideration.

For additional direction on obtaining information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: James Park, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington DC, 20555–0001; telephone: 301–415–6954; email: *James.Park@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2016–0231 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this action by the following methods:

- *Federal Rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2016–0231.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at *http://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''ADAMS Public Documents'' and then select ''*Begin Web-based ADAMS Search.*'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.* In addition, for the convenience of the reader, instructions about obtaining materials referenced in this document are provided in a table in Section VII of this notice entitle, Availability of Documents.
- *NRC'S PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.
- *Project Web page:* Information related to the WCS CISF project can be accessed on the NRC's WCS CISF Web page at: *http://www.nrc.gov/waste/spent-fuel-storage/cis/waste-control-specialist.html.*

B. Submitting Comments

Please include Docket ID NRC–2016–0231 in your comment submission. Written comments may be submitted

during the scoping period as described in the **ADDRESSES** section of the document.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC posts all comment submissions at *http://www.regulations.gov* as well as entering the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment submissions into ADAMS.

II. Background

By letter dated April 28, 2016, WCS submitted an application to the NRC for a specific license, pursuant to part 72 of title 10 of the *Code of Federal Regulations* (10 CFR), ''Licensing Requirements for the Independent Storage of Spent Nuclear Fuel, High-Level Radioactive Waste, and Reactor-Related Greater Than Class C Waste.'' The WCS is seeking to construct and operate a consolidated interim storage facility (CISF) for spent nuclear fuel at WCS's facility in Andrews County, Texas. As proposed by WCS, the CISF would store up to 40,000 metric tons uranium (MTU) for a 40-year license period. The WCS site is located on Texas Highway 176 West, approximately 32 miles west of Andrews, Texas and 5 miles east of Eunice, New Mexico.

The NRC staff is conducting an acceptance review of WCS's license application to determine if it contains sufficient information for NRC to conduct a detailed technical review. By letter dated June 22, 2016, the NRC staff provided the results of its acceptance review to WCS and requested supplemental information in order to accept the application for detailed review. WCS, by letter dated July 6, 2016, provided its schedule for submitting the supplemental information, noting that it would provide information related to its environmental report (ER) by July 20, 2016. The WCS provided the supplemental information related to its ER and a revised ER on July 20, 2016. The ER can be found on the NRC's project-specific Web page at: *http://www.nrc.gov/waste/spent-fuel-storage/cis/wcs/wcs-app-docs.html.*

In its July 6, 2016, letter, WCS also stated its intent to provide supplemental information for the safety analysis report (SAR), physical security plan (PSP), and emergency response plan (ERP) portions of the license application. If, after receiving and reviewing that supplemental information for the SAR, PSP, and ERP portions of the application, the NRC staff determines that it is sufficient to conduct the detailed technical review, the NRC will publish in the **Federal Register** a notice of docketing of WCS's license application and a notice of opportunity to request a hearing. Accordingly, no requests for hearing should be filed unless and until the NRC has accepted WCS's complete application for detailed review.

By letter dated July 21, 2016, WCS requested that the NRC begin its EIS process as soon as practicable. In an October 7, 2016 response, the NRC staff stated that it would begin the EIS process in advance of its decision on whether to accept the WCS application, because it would further the purposes of the staff's NEPA review. The NRC staff also stated that this decision does not presuppose the outcome of its ongoing acceptance review of the WCS application.

The purpose of this notice is to: (1) Inform the public that the NRC staff will prepare an EIS as part of its review of WCS's license application in accordance with 10 CFR part 51 ''Environmental Protection Regulations for Domestic Licensing and Related Regulatory Functions,'' and (2) provide the public with an opportunity to participate in the environmental scoping process as defined in 10 CFR 51.29. In addition, as outlined in 36 CFR 800.8, ''Coordination with the National Environmental Policy Act,'' the NRC plans to coordinate compliance with Section 106 of the National Historic Preservation Act in meeting the requirements of the National Environmental Policy Act of 1969 (NEPA). The NRC staff also will document its compliance with other applicable federal statutes, such as the Endangered Species Act, in the EIS.

III. Environmental Review

The EIS prepared by the NRC staff will examine the potential environmental impacts of the proposed action. The NRC staff will evaluate the potential impacts to various environmental resources, such as air quality, surface and ground water, transportation, geology and soils, and socioeconomics. The EIS will analyze potential impacts of WCS's proposed facility on historic and cultural resources and on threatened and endangered species. Additionally, the economic, technical, and other benefits and costs of the proposed action and alternatives will be considered in the EIS.

If the application is accepted for a detailed technical review, the NRC staff will also conduct a safety review to determine WCS's compliance with NRC's regulations, including 10 CFR part 20, ''Standards for Protection Against Radiation'' and 10 CFR part 72. The NRC staff's findings would be published in a safety evaluation report.

IV. CISF Construction and Operation

The NRC's Federal action is to either grant or deny WCS's request for a license. If the NRC approves WCS's request, then WCS could proceed with the proposed project—the construction and operation of the CISF—as described in its application and summarized here.

The WCS proposes to construct the CISF on its approximately 60.3 square kilometer (14,900 acre) site in western Andrews County, Texas. On this site, WCS currently operates facilities that process and store certain types of radioactive material, mainly Low-Level Waste (LLW) and Mixed Waste (*i.e.,* waste that is both hazardous waste and LLW). The facility also disposes of hazardous and toxic waste.

The WCS plans to construct the CISF in eight phases. Phase one of the CISF would be designed to provide storage for up to 5,000 MTU of spent nuclear fuel received from commercial nuclear power reactors across the United States. The WCS proposes that small amounts of mixed oxide spent fuels and Greater Than Class C (GTCC) LLW wastes also be stored at the CISF. The WCS stated that it would design each subsequent phase of the CISF to store up to an additional 5,000 MTU for a total of up to 40,000 MTU being stored at the site by the completion of the final phase. Each phase would require NRC review and approval.

The WCS would receive canisters containing spent nuclear fuel from the reactor sites, and once accepted at its site, WCS would transfer them into onsite dry cask storage systems. The WCS stated that it would employ dry cask storage system technology that has been licensed by the NRC pursuant to 10 CFR part 72 at various commercial nuclear reactors across the country. The WCS stated that the dry cask storage systems proposed for use at the CISF would be passive systems (*i.e.,* not

relying on any moving parts) and would provide physical protection, containment, nuclear criticality controls and radiation shielding required for the safe storage of the spent nuclear fuel. The WCS also stated that the dry cask storage systems would be located on top of the concrete pads constructed at the CISF. The WCS is requesting a license for a term of 40 years.

V. Alternatives To Be Evaluated

The EIS will analyze the environmental impacts of the proposed action, the no-action alternative, and reasonable alternatives. A brief description of each is provided below.

No-Action Alternative—The no-action alternative would be to deny the license application. Under this alternative, the NRC would not issue the license and WCS would not construct nor operate the CISF at its site in west Texas. Existing waste handling, storage, and disposal operations at the WCS site unrelated to storage of spent nuclear fuel would continue. This alternative serves as a baseline for the comparison of environmental impacts of the proposed action and the reasonable alternatives.

Proposed action—The proposed Federal action is to issue a license to WCS authorizing the company to construct and operate the CISF. If the NRC approves the license application, it would issue WCS a specific license under the provisions of 10 CFR part 72, and WCS would proceed with the proposed activities.

Alternatives to the Proposed Action—Other alternatives not listed here may be identified during scoping or through the environmental review process.

VI. Scope of the Environmental Review

The NRC staff is conducting a scoping process for the WCS EIS, which begins on the day this notice appears in the **Federal Register**. In accordance with 10 CFR 51.29, the NRC seeks public input to help the NRC determine the appropriate scope of the EIS, including significant environmental issues to be analyzed in depth, as well as those that should be eliminated from detailed study because they are peripheral or are not significant. The NRC staff is planning to publish information related to this action in newspapers serving communities near the WCS site, requesting information and comments during the scoping period from the public. Additionally, if WCS's application is found acceptable for detailed review, the NRC may hold public scoping meetings to receive comments in person in accordance with 10 CFR 51.26. The dates, times, and locations for any meetings will be provided in a future **Federal Register** notice.

After the close of the scoping period, the NRC will prepare a concise summary of its scoping process, the comments received, as well as the NRC's responses. The Scoping Summary Report will be included in NRC's draft EIS as an appendix and sent to each participant in the scoping process for whom the staff has an address.

The WCS EIS will address the potential impacts from the proposed action. The anticipated scope of the EIS will consider both radiological and non-radiological (including chemical) impacts associated with the proposed project and its alternatives. The EIS will also consider unavoidable adverse environmental impacts, the relationship between short-term uses of resources and long-term productivity, and irreversible and irretrievable commitments of resources. The following resource areas have been tentatively identified for analysis in the WCS EIS: Land use, transportation, geology and soils, water resources, ecological resources, air quality and climate change, noise, historical and cultural resources, visual and scenic resources, socioeconomics, public and occupational health, waste management, environmental justice, and cumulative impacts. This list is not intended to be exhaustive, nor is it a predetermination of potential environmental impacts. The EIS will describe the NRC staff's approach and methodology undertaken to determine the resource areas that will be studied in detail and the NRC staff's evaluation of potential impacts to those resource areas.

The NRC encourages members of the public, local, State, Tribal, and Federal government agencies to participate in the scoping process. Written comments may be submitted during the scoping period as described in the **ADDRESSES** and **SUPPLEMENTARY INFORMATION** section of this document. Participation in the scoping process for the WCS EIS does not entitle participants to become parties to any proceeding to which the EIS relates.

In addition to requesting scoping comments through this **Federal Register** notice, the NRC staff also intends to reach out to interested stakeholders, including other Federal and State agencies and Indian Tribes. The NRC staff seeks to identify, among other things, all review and consultation requirements related to the proposed action, and agencies with jurisdiction by law or special expertise with respect to any environmental impact involved or which is authorized to develop and enforce relevant environmental standards. The NRC invites such agencies to participate in the scoping process and, as appropriate, cooperate in the preparation of the EIS.

The NRC staff will continue its environmental review of WCS's license application, and with its contractor, prepare a draft EIS and, as soon as practicable, publish it for public comment. The NRC staff plans to have a public comment period for the draft EIS. Availability of the draft EIS and the dates of the public comment period will be announced in a future **Federal Register** notice. The final EIS will include NRC's responses to public comments received on the draft EIS.

VII. Availability of Documents

The documents identified in this **Federal Register** notice are accessible to interested persons by the means indicated in either the **SUPPLEMENTARY INFORMATION** section of this notice or in the table below.

Document	ADAMS Accession No.
WCS's CISF license application, with Environmental Report	ML16133A070
NRC request for supplemental information	ML16175A277
WCS letter with schedule for response to NRC request for supplemental information	ML16193A314
WCS submittal of initial responses to NRC request for supplemental information	ML16229A537
WCS request for NRC to begin EIS process as soon as practicable	ML16229A340
WCS submittal of second responses to NRC request for supplemental information	ML16265A454
NRC response to WCS request to begin EIS process as soon as practicable	ML16285A317
WCS submittal of third responses to NRC request for supplemental information	ML16294A134

Dated at Rockville, Maryland, this 4th day of November, 2016.

For the U.S. Nuclear Regulatory Commission.

Brian W. Smith,

Deputy Director, Division of Fuel Cycle Safety, Safeguards, and Environmental Review, Office of Nuclear Material Safety and Safeguards.

POSTAL REGULATORY COMMISSION

[Docket No. CP2017–33]

New Postal Product

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing recent Postal Service filings for the Commission's consideration concerning negotiated service agreements. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* November 15, 2016

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *http://www.prc.gov.* Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction

The Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to negotiated service agreement(s). The request(s) may propose the addition or removal of a negotiated service agreement from the market dominant or the competitive product list, or the modification of an existing product currently appearing on the market dominant or the competitive product list.

Section II identifies the docket number(s) associated with each Postal Service request, the title of each Postal Service request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 (Public Representative). Section II also establishes comment deadline(s) pertaining to each request.

The public portions of the Postal Service's request(s) can be accessed via the Commission's Web site (*http://www.prc.gov*). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3007.40.

The Commission invites comments on whether the Postal Service's request(s) in the captioned docket(s) are consistent with the policies of title 39. For request(s) that the Postal Service states concern market dominant product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3622, 39 U.S.C. 3642, 39 CFR part 3010, and 39 CFR part 3020, subpart B. For request(s) that the Postal Service states concern competitive product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3015, and 39 CFR part 3020, subpart B. Comment deadline(s) for each request appear in section II.

II. Docketed Proceeding(s)

1. *Docket No(s).:* CP2017–33; *Filing Title:* Notice of United States Postal Service of Filing a Functionally Equivalent Global Expedited Package Services 3 Negotiated Service Agreement and Application for Non-Public Treatment of Materials Filed Under Seal; *Filing Acceptance Date:* November 4, 2016; *Filing Authority:* 39 CFR 3015.5; *Public Representative:* Lawrence Fenster; *Comments Due:* November 15, 2016.

This notice will be published in the **Federal Register**.

Stacy L. Ruble,

Secretary.

BILLING CODE 7710–FW–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79241; File No. SR–BX–2016–056]

Self-Regulatory Organizations; NASDAQ BX, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Rule 9400 To Include a Cross-Reference

November 4, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 [2] thereunder, notice is hereby given that, on October 25, 2016, NASDAQ BX, Inc. (''BX'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 9400, entitled ''Expedited Client Suspension Proceeding'' to include a cross-reference for clarification.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

The text of the proposed rule change is available on the Exchange's Web site at *http://nasdaq.cchwallstreet.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange is filing this proposal to amend Rule 9400, entitled ''Expedited Client Suspension Proceeding'' to include a cross-reference Chapter III, Section 16, entitled ''Disruptive Quoting and Trading Activity Prohibited'' within Rule 9400. The Exchange filed a rule change to adopt an options rule, identical to Rule 2170, which relates to disruptive quoting and trading activity.[3] In that rule change, it stated that ''[t]he Exchange will initiate disciplinary action for violations of Chapter III, Section 16, pursuant to Rule 9400.'' [4] At that time, the Exchange inadvertently did not include the cross-references to Chapter III, Section 16 within Rule 9400. The Exchange proposes to add references to Chapter III, Section 16 within Rule 9400 for clarity. This rule change is non-controversial.

Background

The Exchange filed a rule change to adopt an options rule to clearly prohibit disruptive quoting and trading activity on the Exchange and to permit the Exchange to take prompt action to suspend members or their clients that violate such rule pursuant to Rule 9400.[5] The Exchange had previously adopted Rule 9400 to set forth procedures for issuing suspension orders, immediately prohibiting a member from conducting continued disruptive quoting and trading activity on the Exchange.[6] Rule 9400 provides the Exchange the authority to order a member to cease and desist from providing access to the Exchange to a client of the member that is conducting disruptive quoting and trading activity in violation of Rule 2170. The Exchange also previously adopted Rule 2400 to specifically define and prohibit disruptive equities quoting and trading activity on the Exchange.[7] Chapter III, Section 16 is identical to Rule 2400, however applicable to options. Similarly, Chapter III, Section 16 prohibits members from engaging in or facilitating disruptive options quoting and trading activity on the Exchange.

The Exchange proposes to simply add the cross-references for the options rules alongside the equity rule for clarity. This rule change is consistent with the intent of the rule proposal which adopted Chapter III, Section 16.[8]

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[9] in general, and furthers the objectives of Section 6(b)(5) of the Act,[10] in particular, in that the rules of the Exchange are designed to prevent fraudulent and manipulative acts and practices, it [sic] is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest by making clear within Rule 9400 that violations of Chapter III, Section 16 are subject to disciplinary action pursuant to Rule 9400 as stated in the Exchange's rule filing.[11] This cross-reference will provide clarity to members and ease of reference to the corresponding options rule. The proposed rule change is non-controversial. The addition of the cross-reference is for clarity.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. This non-controversial rule change will merely add the reference to the options rule next to the current reference for the equity rule to make clear, as noted in the rule changes, that violations of either rule relating to disruptive quoting and trading activity, will be disciplined pursuant to Rule 9400.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act [12] and Rule 19b–4(f)(6) thereunder.[13]

A proposed rule change filed pursuant to Rule 19b–4(f)(6) under the Act [14] normally does not become operative for 30 days after the date of its filing. However, Rule 19b–4(f)(6) [15] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest because it would allow the Exchange to immediately add the cross-reference within Rule 9400 which would provide clarity to members. The Exchange notes that a rule change to permit Rule 9400 to apply to violations of Chapter III, Section 16 was previously filed with the Commission. However, that filing failed to amend the rule text of Rule 9400 and only discussed the intended application of Rule 9400 to violations of Chapter III, Section 16 in the purpose section of the Form 19b–4.

The text of the rule governs what actions the Exchange can take.[16] However, because the description in the original filing sets forth what the Exchange intended the rule to cover, and this proposed rule change corrects an oversight by the Exchange in the

[3] *See* Securities and Exchange Release No. 78107 (June 21, 2016), 81 FR 41619 (June 27, 2016) (SR–BX–2016–036).

[16] *See* Section 6(b)(1) of the Act. 15 U.S.C. 78f(b)(1).

previous filing, the Commission believes that waiving the 30-day operative delay[17] is consistent with the protection of investors and the public interest and designates the proposal operative on filing.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml);* or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–BX–2016–056 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–BX–2016–056. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml).* Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–BX–2016–056 and should be submitted on or before December 5, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[18]

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79251; File No. SR–NASDAQ–2016–149]

Self-Regulatory Organizations; The NASDAQ Stock Market LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Exchange's Market Access and Routing Subsidy Program

November 7, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on October 31, 2016, The NASDAQ Stock Market LLC (''Nasdaq'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Exchange's transaction fees at Chapter XV, Section 2 entitled ''NASDAQ Options Market—Fees and Rebates,'' which governs pricing for Nasdaq Participants using the NASDAQ Options Market (''NOM''), Nasdaq's facility for executing and routing standardized equity and index options. The Exchange proposes to amend its subsidy program, the Market Access and Routing Subsidy or ''MARS,'' for NOM Participants that provide certain order routing functionalities [3] to other NOM Participants and/or use such functionalities themselves.

While changes to the Pricing Schedule pursuant to this proposal are effective upon filing, the Exchange has designated these changes to be operative on November 1, 2016.

The text of the proposed rule change is available on the Exchange's Web site at *http://nasdaq.cchwallstreet.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

NOM proposes to amend the MARS subsidy program which pays a subsidy to NOM Participants that provide certain order routing functionalities to other NOM Participants and/or use such functionalities themselves. Generally, under MARS, the Exchange pays participating NOM Participants to subsidize their costs of providing routing services to route orders to NOM. The Exchange believes that MARS will continue to attract higher volumes of electronic equity and ETF options volume to the Exchange from non-NOM

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] The order routing functionalities permit a NOM Participant to provide access and connectivity to other Participants as well as utilize such access for themselves. The Exchange notes that one NOM Participant is eligible for payments under MARS, while another NOM Participant might potentially be liable for transaction charges associated with the execution of the order, because those orders were delivered to the Exchange through a NOM Participant's connection to the Exchange and that Participant qualified for the MARS Payment.

Participants as well as NOM Participants.

The Exchange proposes to amend Chapter XV, Section 2(6) to: (1) Provide another method to qualify for MARS System Eligibility; (2) expand the MARS Payment tiers; and (3) make clarifying changes to the rule text.

Amendment to MARS System Eligibility

Today, to qualify for MARS, a NOM Participant's routing system (hereinafter ''System'') is required to meet certain criteria. Specifically the Participant's System is required to: (1) Enable the electronic routing of orders to all of the U.S. options exchanges, including NOM; (2) provide current consolidated market data from the U.S. options exchanges; and (3) be capable of interfacing with NOM's API to access current NOM match engine functionality. The NOM Participant's System would also need to cause NOM to be one of the top three default destination exchanges for individually executed marketable orders if NOM is at the national best bid or offer (''NBBO''), regardless of size or time, but allow any user to manually override NOM as the default destination on an order-by-order basis.

The Exchange requires NOM Participants desiring to participate in MARS [4] to complete a form, in a manner prescribed by the Exchange, and reaffirm their information on a quarterly basis to the Exchange. Any NOM Participant is permitted to apply for MARS, provided the above-referenced requirements are met, including a robust and reliable System. The Participant is solely responsible for implementing and operating its System.

The Exchange proposes to amend the requirements for MARS System Eligibility to continue to require the Participant's System to cause NOM to be the one of the top three default destination exchanges for individually executed marketable orders if NOM is at the national best bid or offer (''NBBO''), regardless of size or time. In the alternative, the Exchange proposes to permit a Participant to be eligible if the Participant's System causes NOM to be the one of the top three default destination exchanges for orders that establish a new NBBO on NOM's Order Book. The NOM Participant may become eligible for MARS System Eligibility by complying with one of the two options proposed herein.

With respect to the new language, an example would be if the national best bid was 10 and national best offer was 20 and a NOM Participant bid 15 and that quote established a new NBBO on NOM's Order Book, that activity would also be considered eligible. The Exchange believes that this alternative method to qualify for MARS System Eligibility will further incentivize NOM Participants to provide liquidity at the NBBO on NOM to qualify for MARS.

Amendment to MARS Payment

Today, NOM Participants that have System Eligibility and have routed the requisite number of Eligible Contracts daily in a month (Average Daily Volume), which were executed on NOM, are entitled to a MARS Payment. For the purpose of qualifying for the MARS Payment, Eligible Contracts may include Firm,[5] Non-NOM Market Maker,[6] Broker-Dealer [7] or Joint Back Office or ''JBO'' [8] equity option orders that add liquidity and are electronically delivered and executed.[9]

Today, the Exchange pays the following MARS Payments according to Average Daily Volume (''ADV'') [10] submitted on NOM:

Tiers	Average Daily Volume (''ADV'')	MARS payment
1	2,500	$0.07
2	5,000	0.09
3	10,000	0.11

Also, NOM Participants that qualify for Customer and Professional Penny Pilot Options Rebate to Add Liquidity Tier 8 in Chapter XV, Section 2(1) will receive $0.09 per contract in addition to any MARS Payment tier on MARS Eligible Contracts the NOM Participant qualifies for in a given month. The specified MARS Payment is paid on all executed Eligible Contracts that add liquidity, which are routed to NOM through a participating NOM Participant's System and meet the requisite Eligible Contracts ADV. No payment will be made with respect to orders that are routed to NOM, but not executed.

The Exchange proposes to add a new Tier 4 with an ADV of 20,000 contracts and pay a MARS Payment of $0.15 per contract. The Exchange also proposes to rename the aforementioned tier 4 payment along with the current tier 1 through 3 payments as MARS Payment (Penny). The three existing payment tiers, along with the aforementioned new tier 4 payment tier of $0.15 per contract would be paid for Penny Pilot Options transactions that qualify for the MARS Payment tier program.

Additionally, the Exchange proposes 4 new tiers for Non-Penny Pilot Options transactions as follows: The 4 new tiers for MARS Payment (Non-Penny) shall be: Tier 1 with an ADV of 2,500 contracts would pay $0.15 per contract, tier 2 with an ADV of 5,000 contracts would pay $0.20 per contract, tier 3 with an ADV of 10,000 would pay $0.30 per contract and tier 4 with an ADV of 20,000 contracts would pay $0.50 per contract. The Exchange would continue to pay an additional $0.09 per contract in addition to any MARS Payment tier on MARS Eligible Contracts in a given month on the Non-Penny Pilot Options transactions, provided the NOM Participant qualified for the Customer and Professional Penny Pilot Options Rebate to Add Liquidity Tier 8 in Chapter XV, Section 2(1). The Exchange believes that MARS will continue to attract higher volumes of electronic equity and ETF options volume to the Exchange from non-NOM Participants as well as NOM Participants. This amendment may attract additional Non-Penny Pilot Options volume.

[4] For example, a NOM Participant that desires to qualify for MARS in November must complete the form and submit it to the Exchange no later than the last business day of November. Such form will require the NOM Participant to identify the NOM Participant seeking the MARS Payment and must list, among other things, the connections utilized by the NOM Participant to provide Exchange access to other NOM Participants and/or itself. MARS Payments would be made one month in arrears (i.e., a MARS Payment earned for activity in November would be paid to the qualifying NOM Participant in December), as is the case with all other transactional payments and assessments made by the Exchange.

[5] The term ''Firm'' or (''F'') applies to any transaction that is identified by a Participant for clearing in the Firm range at OCC.

[6] The term ''Non-NOM Market Maker'' or (''O'') is a registered market maker on another options exchange that is not a NOM Market Maker. A Non-NOM Market Maker must append the proper Non-NOM Market Maker designation to orders routed to NOM.

[7] The term ''Broker-Dealer'' or (''B'') applies to any transaction which is not subject to any of the other transaction fees applicable within a particular category.

[8] The term ''Joint Back Office'' or ''JBO'' applies to any transaction that is identified by a Participant for clearing in the Firm range at OCC and is identified with an origin code as a JBO. A JBO will be priced the same as a Broker-Dealer as of September 1, 2014. A JBO participant is a Participant that maintains a JBO arrangement with a clearing broker-dealer (''JBO Broker'') subject to the requirements of Regulation T Section 220.7 of the Federal Reserve System as further discussed in Chapter XIII, Section 5.

[9] Eligible Contracts do not include Mini-Option orders. Mini Options are further specified in Chapter XV, Section 2(4).

[10] Average Daily Volume is all Eligible Contracts daily in a month aggregating Penny and Non-Penny Pilot Options.

Clarifying Amendments

Today, a Participant will not be entitled to receive any other revenue from the Exchange for the use of its System, specifically with respect to orders routed to NOM. The Exchange believes that the MARS Payment will subsidize the costs of NOM Participants in providing the routing services. The Exchange proposes to make clear that Participant will not be entitled to receive any other revenue for the use of its System from the Exchange. The Exchange believes this new rule text provides clarity. The Exchange also proposes to add a missing period into the rule text.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[11] in general, and furthers the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,[12] in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among Participants and issuers and other persons using any facility or system which the Exchange operates or controls, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Commission and the courts have repeatedly expressed their preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, while adopting a series of steps to improve the current market model, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [13]

Likewise, in *NetCoalition* v. *Securities and Exchange Commission* [14] (''NetCoalition'') the D.C. Circuit upheld the Commission's use of a market-based approach in evaluating the fairness of market data fees against a challenge claiming that Congress mandated a cost-based approach.[15] As the court emphasized, the Commission ''intended in Regulation NMS that 'market forces, rather than regulatory requirements' play a role in determining the market data . . . to be made available to investors and at what cost.'' [16]

Further, ''[n]o one disputes that competition for order flow is 'fierce.' . . . As the SEC explained, '[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution'; [and] 'no exchange can afford to take its market share percentages for granted' because 'no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers'. . . .'' [17] Although the court and the SEC were discussing the cash equities markets, the Exchange believes that these views apply with equal force to the options markets.

Amendment to MARS System Eligibility

The Exchange's proposal to amend the requirements for MARS System Eligibility to continue to permit in the alternative for a Participant to be eligible if the Participant's System causes NOM to be the one of the top three default destination exchanges for orders that establish a new NBBO on NOM's Order Book is reasonable because the amendment will continue to incentivize NOM Participants to quote at the NBBO on NOM to qualify for MARS. The Exchange believes that requiring NOM Participants to maintain their Systems according to the various requirements set forth by the Exchange in order to qualify for MARS is reasonable because the Exchange seeks to encourage market participants to send higher volumes of orders to NOM, which will contribute to the Exchange's depth of book as well as to the top of book liquidity. MARS is designed to enhance the competitiveness of the Exchange, particularly with respect to those exchanges that offer their own front-end order entry system or one they subsidize in some manner.[18] The Exchange also notes that the Chicago Board of Options Exchange, Inc. (''CBOE'') currently offers a similar Order Routing Subsidy (''ORS''), which, similar to the current proposal, allows CBOE Participants to enter into subsidy arrangements with CBOE Trading Permit Holders (''TPHs'') that provide certain order routing functionalities to other CBOE TPHs and/or use such functionalities themselves.[19]

The Exchange's proposal to amend the requirements for MARS System Eligibility to further permit, in the alternative, for a Participant to be eligible if the Participant's System causes NOM to be the one of the top three default destination exchanges for orders that establish a new NBBO on NOM's Order Book is equitable and not unfairly discriminatory because these requirements will uniformly apply to all Participants desiring to qualify for MARS.

Amendments to MARS Eligible Contracts

The Exchange's proposal to add a new Tier 4 with an ADV of 20,000 contracts and pay a MARS Payment of $0.15 per contract and designate all remaining pricing as Penny Pilot Options transactions pricing and adopt new pricing for Non-Penny Pilot Options volume is reasonable because the amendments will attract higher volumes of electronic equity and ETF options volume to the Exchange, which will benefit all NOM Participants by offering greater price discovery, increased transparency, and an increased opportunity to trade on the Exchange. The expanded MARS Payments should enhance the competitiveness of the Exchange, particularly with respect to those exchanges that offer their own front-end order entry system or one they subsidize in some manner. The amendment to add Tier 4 will incentivize NOM Participants to achieve an even higher Penny Pilot Options rebate, provided the NOM Participant is eligible for MARS. Further, the tier structure will allow NOM Participants to price their services at a level that will enable them to attract order flow from market participants who would otherwise utilize an existing front-end order entry mechanism offered by the Exchange's competitors instead of incurring the cost in time and money to develop their own internal systems to be able to deliver orders directly to the Exchange's System.

The Exchange's proposal to add a new Tier 4 with an ADV of 20,000 contracts and pay a MARS Payment of $0.15 per contract and designate all remaining pricing as Penny Pilot Options transactions pricing and adopt new pricing for Non-Penny Pilot Options volume is equitable and not unfairly

[17] *Id.* at 539 (quoting Securities Exchange Act Release No. 59039 (December 2, 2008), 73 FR 74770, 74782–83 (December 9, 2008) (SR–NYSEArca-2006–21)).

[18] *See, e.g., supra* note 10; Securities Exchange Act Release No. 34–54121 (July 10, 2006), 71 FR 40566 (July 17, 2006) (SR–ISE–2006–31) (describing PrecISE, which is a front-end, order entry application for trading options utilized by International Securities Exchange LLC).

[19] *See* CBOE's Fees Schedule. CBOE's program permits both CBOE Participants and CBOE non-Participants to be eligible for a rebate. CBOE Participants are eligible to receive exchange transaction fees on transactions that earn a non-CBOE Participant a subsidy payment.

discriminatory because the Exchange will uniformly pay all NOM Participants the rebates specified in the proposed MARS Payment tiers provided the NOM Participant has executed the requisite number of Eligible Contracts. Moreover, the Exchange believes that the proposed MARS Payments offered by the Exchange are equitable and not unfairly discriminatory because any qualifying NOM Participant that offers market access and connectivity to the Exchange and/or utilize such functionality themselves may earn the MARS Payment for all Eligible Contracts.

The Exchange's proposal to adopt new Non-Penny Pilot Options MARS Payments tiers with higher rebates as compared to the Penny Pilot Options MARS Payment tiers is reasonable because the amendments will attract higher volumes of electronic equity and ETF options volume to the Exchange, which will benefit all NOM Participants by offering greater price discovery, increased transparency, and an increased opportunity to trade on the Exchange. The expanded MARS Payments should enhance the competitiveness of the Exchange, particularly with respect to those exchanges that offer their own front-end order entry system or one they subsidize in some manner. Today the Exchange bifurcates Penny and Non-Penny Options pricing. The Exchange pays higher Non-Penny Pilot Options rebates as compared to Penny Pilot Options rebates.[20] Penny Pilot Options are more liquid and traditionally are assessed lower fees and paid lower rebates. The Exchange believes it is reasonable to pay higher rebates for Non-Penny Pilot Options which are assessed higher transaction fees on the Exchange.[21]

The Exchange's proposal to adopt new Non-Penny Pilot Options MARS Payments tiers with higher rebates as compared to the Penny Pilot Options MARS Payment tiers is equitable and not unfairly discriminatory because the Exchange will uniformly pay all NOM Participants the MARS Payments specified in the proposed MARS Payment tiers for Penny and Non-Penny Pilot Options provided the NOM Participant has executed the requisite number of Eligible Contracts.

Clarifying Amendments

The Exchange's proposal to amend the rule text to make clear that a Participant will not be entitled to receive any other revenue for the use of its System from the Exchange and add a missing period into the rule text is reasonable, equitable and not unfairly discriminatory because it will clarify existing rule text for all NOM Participants.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. In terms of inter-market competition, the Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues if they deem fee levels at a particular venue to be excessive, or rebate opportunities available at other venues to be more favorable. In such an environment, the Exchange must continually adjust its fees to remain competitive with other exchanges and with alternative trading systems that have been exempted from compliance with the statutory standards applicable to exchanges. Because competitors are free to modify their own fees in response, and because market participants may readily adjust their order routing practices, the Exchange believes that the degree to which fee changes in this market may impose any burden on competition is extremely limited. In sum, if the changes proposed herein are unattractive to market participants, it is likely that the Exchange will lose market share as a result. Accordingly, the Exchange does not believe that the proposed changes will impair the ability of members or competing order execution venues to maintain their competitive standing in the financial markets.

Amendment to MARS System Eligibility

The Exchange's proposal to amend the requirements for MARS System Eligibility to further permit, in the alternative, for a Participant to be eligible if the Participant's System causes NOM to be the one of the top three default destination exchanges for orders that establish a new NBBO on NOM's Order Book does not impose an undue burden on intra-market competition because these requirements will uniformly apply to all Participants desiring to qualify for MARS.

Amendments to MARS Eligible Contracts

The Exchange's proposal to add a new Tier 4 with an ADV of 20,000 contracts and pay a MARS Payment of $0.15 per contract and designate this, along with all remaining pricing as Penny Pilot Options transactions pricing and adopt new pricing for Non-Penny Pilot Options volume does not impose an undue burden on intra-market competition because the Exchange will uniformly pay all NOM Participants the rebates specified in the proposed MARS Payment tiers provided the NOM Participant has executed the requisite number of Eligible Contracts. Moreover, the Exchange believes that the proposed MARS Payments offered by the Exchange are equitable and not unfairly discriminatory because any qualifying NOM Participant that offers market access and connectivity to the Exchange and/or utilizes such functionality themselves may earn the MARS Payment for all Eligible Contracts.

The Exchange's proposal to adopt new Non-Penny Pilot Options MARS Payments tiers with higher rebates as compared to the Penny Pilot Options MARS Payment tiers does not impose an undue burden on intra-market competition because the Exchange will uniformly pay all NOM Participants the MARS Payments specified in the proposed MARS Payment tiers for Penny and Non-Penny Pilot Options provided the NOM Participant has executed the requisite number of Eligible Contracts.

Clarifying Amendments

The Exchange's proposal to amend the rule text to make clear that a Participant will not be entitled to receive any other revenue for the use of its System from the Exchange and add a missing period into the rule text does not impose an undue burden on intra-market competition because it will clarify existing rule text for all NOM Participants.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act.[22]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) Necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the

[20] *See* NOM Rules at Chapter XV, Section 2(1).

[21] *Id.*

[22] 15 U.S.C. 78s(b)(3)(A)(ii).

Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NASDAQ–2016–149 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NASDAQ–2016–149. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*).

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly.

All submissions should refer to File Number SR–NASDAQ–2016–149 and should be submitted on or before December 5, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[23]

Brent J. Fields,

Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79253; File No. SR–ISEGemini–2016–13]

Self-Regulatory Organizations; ISE Gemini, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Make a Number of Non-Controversial and Technical Changes

November 7, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on October 26, 2016, ISE Gemini, LLC (''ISE Gemini'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to make a number of non-controversial and technical changes to its rules as described in more detail below.

The text of the proposed rule change is available on the Exchange's Web site at *www.ise.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange is proposing to make a number of non-controversial changes and technical corrections to its rules. Specifically, these changes are all to correct typographical errors and delete obsolete rule text.[3] The changes are described in more detail below.

1. No Bid Options/Limit Price

Rule 713(b), which deals with priority of orders, provides that if the lowest offer for any options contract is $0.05 then no member shall enter a market order to sell that series, and any such market order shall be considered a limit order to sell at a price of $0.05. This provision is intended to prevent members from submitting market orders to sell in no bid series, which could execute at a price of $0.00, and to instead convert those orders to limit orders with a limit price equal to the minimum trading increment, *i.e.,* $0.05 for most option classes.[4] A ''no bid'' or ''zero bid'' series refers to an option where the bid price is $0.00. Series of options quoted no bid are usually deep out-of-the-money series that are perceived as having little if any chance of expiring in-the-money. For options that trade in regular nickel increments, a best offer of $0.05 corresponds to a best bid of $0.00, *i.e.* one minimum trading increment below the offer. However, option series may be no bid with other offer prices as well. For example, an option class would be considered no bid if it is quoted at $0.00 (bid)–$0.15 (offer). In order to avoid having these orders execute at a price of $0.00, the Exchange proposes to clarify that Rule 713(b) applies to all option classes that are quoted no bid, rather than just those option classes that have an offer of $0.05. Currently, options exchanges have in place a pilot (the ''Penny Pilot'') to quote and trade options in one cent increments, lowering the minimum trading increment from $0.05 in certain symbols. The Exchange therefore

[23] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See also* Securities Exchange Act Release No. 73808 (December 10, 2014), 79 FR 74797 (December 16, 2014) (SR–ISE–2014–54) (order approving the same proposed rule changes to the International Securities Exchange, LLC (''ISE'') rulebook).

[4] Symbols not included in the Penny Pilot generally trade in $0.05 increments if the options contract is trading at less than $3.00 per option, and $0.10 increments if the options contract is trading at $3.00 per option or higher. *See* Rule 710.

proposes to amend Rule 713(b) to clarify that the Exchange will put a limit price equal to the minimum trading increment on market orders to sell a no bid option series. For example, if the deep out-of-the-money SPY December $230.00 call, which is traded in penny increments, is quoted at $0.00 (bid)–$0.03 (offer), a market order to sell would instead be treated as a limit order to sell at a price of $0.01.

2. Non-Displayed Penny Orders and Quotes

The Exchange currently has rules in place that allow members to enter non-displayed orders and quotes in penny increments in designated options with a minimum trading increment greater than one cent (''non-displayed penny orders and quotes'').[5] A non-displayed penny order or quote is available for execution at its penny price but is displayed at the closest minimum trading increment that does not violate the limit price.[6] The Exchange does not offer non-displayed penny orders or quotes and therefore proposes to delete obsolete references to this order type from its rules. First, the Exchange proposes to delete Rule 715(b)(4), which defines non-displayed penny orders. Second, the Exchange proposes to delete language in Rule 804(b)(1) and Rule 805(a) that permits market makers to enter non-displayed penny quotes and orders, respectively. Third, the Exchange proposes to delete language in Supplementary Material .06 to Rule 716 concerning split prices for non-displayed penny orders and quotes entered into the Facilitation and Solicitation Mechanisms. Finally, the Exchange proposes to delete language in Supplementary Material .03 to Rule 717 concerning the execution of non-displayed penny orders that an Electronic Access Member represents as agent against principal orders and orders solicited from other broker dealers.

3. Customer Participation Orders

A customer participation order (''CPO'') is an order type that can be used by Public Customers [7] to participate in the Price Improvement Mechanism (''PIM'').[8] Upon entry of a Crossing Transaction into the PIM,[9] a broadcast message is sent to all members, who then have 500 milliseconds to enter orders that indicate the size and price at which they want to participate in the execution (''Improvement Orders'').[10] The CPO is an instruction to the member to enter an Improvement Order on behalf of a Public Customer. Specifically, a CPO is a limit order on behalf of a Public Customer that, in addition to the limit order price in standard increments, includes a price stated in one cent increments at which the Public Customer wishes to participate in trades executed in the same options series in penny increments through the PIM.[11] The Exchange does not offer CPOs and therefore proposes to delete obsolete references to this order type from its rules. The Exchange first proposes to delete Rule 715(f), which defines CPOs. Furthermore, the Exchange proposes to remove two references to CPOs in other rules. Specifically, the Exchange proposes to remove references to CPOs in Supplementary Material .06 to Rule 723, which explains when Improvement Orders can be entered with respect to CPOs,[12] and in Rule 723(d), which notes that the agency side of an order entered into the Price Improvement Mechanism may execute against CPOs at the end of the exposure period.

4. Linkage Rules

The Exchange proposes to delete Supplementary Material .04 and .05 to Rule 803, which contains duplicative and obsolete provisions relevant to away market routing. In particular, the content of Supplementary Material .04 and .05 to Rule 803 is now contained in Supplementary Material .06 and .07 to Rule 1901 [13] because linkage handling is performed by unaffiliated broker dealers (*i.e.,* Linkage Handlers) on the Exchange. Therefore as described above, the Exchange proposes to delete this language from Rule 803, which concerns the obligations of market makers.

5. Supplementary Material

The Exchange notes that certain supplementary material is mistakenly labelled as ''supplemental'' material in the Exchange's rulebook.[14] In order to achieve consistency with how other rules are labelled, the Exchange proposes to change these to instead refer to ''supplementary'' material. Finally, the Exchange proposes to make a non-substantive change to Supplementary Material to Rule 803, which concerns the obligations of market makers, by updating the word ''To'' to lower case.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder that are applicable to a national securities exchange, and, in particular, with the requirements of Section 6(b) of the Act.[15] In particular, the proposal is consistent with Section 6(b)(5) of the Act [16] because it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanisms of a free and open market and a national market system and, in general, to protect investors and the public interest. The Exchange believes it is appropriate to make the proposed technical corrections to its rules so that Exchange members and investors have a clear and accurate understanding of the meaning of the ISE Gemini rules.

1. No Bid Options/Limit Price

The Exchange currently operates a pilot program to permit designated options classes to be quoted and traded in increments as low as one cent. The Exchange is proposing to amend Rule 713(b) to account for the fact that option classes selected for inclusion in the Penny Pilot are permitted to trade in penny increments. For penny classes that are quoted no bid, the Exchange will convert a market order to sell to a limit order with a price of one cent. In addition, the proposed rule change clarifies that Rule 713(b) applies to all series with a bid of $0.00, and not just those series that also have an offer of $0.05. The proposed rule change is necessary to account for options trading in multiple trading increments,

[5] *See* Rule 715(b)(4), Rule 804(b)(1) and Rule 805(a).

[6] *See* Rule 715(b)(4) and Rule 804(b)(1).

[7] The term ''Public Customer'' means a person or entity that is not a broker or dealer in securities. *See* Rule 100(a)(38).

[8] The PIM is a process by which an Electronic Access Member can provide price improvement opportunities for a transaction wherein the Electronic Access Member seeks to facilitate an order it represents as agent, and/or a transaction wherein the Electronic Access Member solicited interest to execute against an order it represents as agent (a ''Crossing Transaction''). *See* Rule 723(a).

[9] A Crossing Transaction is comprised of the order the Electronic Access Member represents as agent (the ''Agency Order'') and a counter-side order for the full size of the Agency Order (the ''Counter-Side Order''). The Counter-Side Order may represent interest for the Member's own account, or interest the Member has solicited from one or more other parties, or a combination of both. *See* Rule 723(b).

[10] *See* Rule 723(c)(1).

[11] *See* Rule 715(f).

[12] Although CPOs are no longer available, members will continue to be able to enter Improvement Orders for the account of Public Customers.

[13] *See* Securities Exchange Act Release No. 73808 (December 10, 2014), 79 FR 74797 (December 16, 2014) (SR–ISE–2014–54) (order approving the proposed changes to move Supplementary Material .04 and .05 to Rule 803 to Supplementary Material .06 and .07 to Rule 1901 in the ISE rulebook). Chapter 19 of the Exchange's rulebook incorporates Chapter 19 of the ISE rulebook by reference.

[14] *See* ''Supplemental'' Material to Rules 717 and 809. *See* also reference in Rule 721(a)(3) to ''Supplemental'' Material .01 to Rule 717.

[15] 15 U.S.C. 78f(b).

[16] 15 U.S.C. 78f(b)(5).

including under the Penny Pilot, and will ensure that market orders to sell are not inadvertently executed at a price of zero. The Exchange believes that these changes more accurately reflect the intent of Rule 713(b), as described above, and will eliminate investor confusion with respect to the operation of this rule by more accurately describing the functionality provided by the Exchange.

2. Non-Displayed Penny Orders and Quotes/Customer Participation Orders

As explained above, the Exchange does not offer non-displayed penny orders and quotes or customer participation orders, and thus proposes to remove obsolete definitions and other outdated references to these order types. The Exchange believes that these changes will eliminate investor confusion regarding order types available for trading on ISE Gemini to the benefit of members and investors.

3. Linkage Rules

The proposed changes to the linkage rules are non-substantive and intended to reduce investor confusion. As explained above, the Exchange is deleting duplicative and obsolete rule text from Chapter 8 of its rulebook because linkage handling is handled by Linkage Handlers. Therefore, the Exchange believes that these rules are more appropriately located in Chapter 19 of the Exchange's rulebook, which incorporates by reference Chapter 19 of the ISE rulebook.

4. Supplementary Material

The proposed change to label supplementary material correctly is non-substantive and is intended to achieve consistency in how these rules are labelled to the benefit of members and investors.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,[17] the Exchange does not believe that the proposed rule change will impose any burden on intermarket or intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change makes technical, non-substantive amendments to the Exchange's rules in order to eliminate investor confusion, and is not designed to have any competitive impact.

[17] 15 U.S.C. 78f(b)(8).

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act [18] and subparagraph (f)(6) of Rule 19b–4 thereunder.[19]

A proposed rule change filed under Rule 19b–4(f)(6) normally does not become operative prior to 30 days after the date of filing. However, Rule 19b–4(f)(6)(iii) [20] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. In its filing with the Commission, the Exchange requests that the Commission waive the 30-day operative delay. The Exchange asserts that waiver of the operative delay is consistent with the protection of investors and the public interest because the proposed rule change makes non-substantive, technical changes to the Exchange's rules. The Exchange also believes that the proposed rule change increases the clarity of ISE Gemini rules to the benefit of members and investors that trade on the Exchange. For these reasons, the Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Therefore, the Commission designates the proposed rule change to be operative upon filing.[21]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

[18] 15 U.S.C. 78s(b)(3)(A)(iii).

[19] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[20] 17 CFR 240.19b–4(f)(6)(iii).

[21] For purposes only of waiving the 30-day operative delay, the Commission also has considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–ISEGemini–2016–13 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–ISEGemini–2016–13. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–

ISEGemini–2016–13 and should be submitted on or before December 5, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[22]

Brent J. Fields,

Secretary.

[FR Doc. 2016–27237 Filed 11–10–16; 8:45 am]

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79252; File No. SR–DTC–2016–011]

Self-Regulatory Organizations; The Depository Trust Company; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Allow DTC To Automate the Process for Participants To Submit Eligibility Requests for the DTC Custody Service

November 7, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4,[2] notice is hereby given that on October 28, 2016, The Depository Trust Company (''DTC'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II and III below, which Items have been prepared by the clearing agency. DTC filed the proposed rule change pursuant to Section 19(b)(3)(A)[3] of the Act and Rule 19b–4(f)(4)[4] thereunder. The proposed rule change was effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Clearing Agency's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change[5] would amend the DTC Custody Service Guide (''Custody Guide'')[6] to allow DTC to (i) enhance the process by which Participants submit requests to make Securities, and assets that are not Securities (''Non-Security Assets''), as applicable, eligible for deposit into the Custody Service (''Custody Eligibility Requests'') and (ii) add functionality for Participants to inquire as to whether a particular issue is eligible for the Custody Service. Upon its implementation, the proposed rule change would enhance efficiencies for Participants and DTC by providing a secure, centralized environment for the submission of Custody Eligibility Requests.

II. Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the clearing agency included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The clearing agency has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

(A) Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

In order for DTC to accept a Security or a Non-Security Asset, as applicable, for deposit into the Custody Service, DTC requires that the Security or Non-Security Asset be made eligible for the Custody Service pursuant to a Custody Eligibility Request.[7] The proposed rule change would allow DTC to transfer the existing request method for Custody Eligibility Requests by which Participants submit requests via email, to an Internet-based application (''Application''), as more fully described below (''Enhanced Process'').[8] Upon implementation, the Enhanced Process would (i) promote a more secure environment by providing for the submission and processing of Custody Eligibility Requests through the Application,[9] and (ii) enhance efficiencies for DTC by reducing the manual processing of Custody Eligibility requests, as more fully described below.

Background

The Custody Service enables Participants that hold (i) Securities that (A) are not presently eligible for book-entry services at DTC and/or (B) would otherwise be eligible for DTC book-entry services but are not registered in the name of DTC's nominee, Cede & Co., and/or (ii) certain Non-Security Assets, to deposit those Securities and/or Non-Security Assets with DTC for safe-keeping, in accordance with requirements set forth in the Custody Guide.[10] Securities and Non-Security Assets deposited through the Custody Service are maintained in DTC's secure vault in a Participant's name or a Participant's customer's name (*i.e.,* they are not transferred into DTC's nominee name, Cede & Co).[11] In addition, once a Security is deposited into the Custody Service, DTC may perform limited depository services relating to the Security including physical processing for the Security on a Participant's behalf, such as facilitating the transfer of Security Certificates, and providing services available through the Custody Reorganization Service.[12]

The proposed rule change would amend the Custody Guide to allow DTC to implement the Enhanced Process by moving the processing of Custody Eligibility Requests to the Application and replacing certain manual processes, as more fully described below.

Existing Process

In order for an issue to be made eligible for deposit to the Custody Service, a Participant must submit a Custody Eligibility Request to DTC. The Custody Eligibility Request is submitted by email and must include certain data elements (''Data Elements'')[13] and a

[4] 17 CFR 240.19b–4(f)(4).

[5] Capitalized terms not otherwise defined herein have the respective meanings set forth in the DTC Rules, By-laws and Organization Certificate (''Rules''), *available at http://www.dtcc.com/legal/rules-and-procedures.aspx.*

[6] *Available at http://www.dtcc.com/~/media/Files/Downloads/legal/service-guides/Custody.pdf.*

[7] Once the Security or Non-Security Asset subject of the Custody Eligibility Request is made eligible by DTC for deposit into the Custody Service, additional deposits of that Security or Non-Security Asset by the requesting Participant or other Participants may be made without requiring submission of another Custody Eligibility Request.

[8] The Custody Guide provides that Custody Service functions may become accessible via web-based services as announced by DTC via Important Notice from time to time. *See* Custody Guide, *supra* note 6 at 4. DTC would announce the proposed rule change via Important Notice.

[9] The Application has been designed to provide a secure, centralized online system managed by DTC, whereas Participant security protocols for the transmission of emails may vary.

[10] *See* Custody Guide for the types of Securities and Non-Security Assets eligible for deposit to the Custody Service (''Custody Eligible Security Types''), *supra* note 6, at 5,12.

[11] Cede & Co. is the holder of record of Securities eligible for DTC's book-entry services.

[12] *See* Custody Guide, *supra* note 6, 14–17 (providing Procedures for the Custody Reorganization Service). The limited depository services provided by DTC as described above relate only to securities processing functions and do not apply to Non-Security Assets.

[13] Data Elements include DTC Participant Number (to identify the Participant making the Custody Eligibility Request), CUSIP (if available); Sub-Issue Type (required); description of the Security or Non-Security Asset (''Security Description'') (required); U.S/Non U.S. (This field is required for corporate debt and equity issues. All certificates of deposit and collateralized mortgage obligations must be U.S. issues. For municipal securities, this field is set to U.S. and is not updateable); Issuer Country of Origin (required for

Continued

copy of the Security Certificate to be deposited or, if the asset to be deposited is a Non-Security Asset, other asset-related documentation evidencing the asset to be deposited. Upon receipt of a Custody Eligibility Request, DTC reviews the Data Elements and the Security Certificate or other asset-related documentation, as applicable, to determine whether the Security or Non-Security Asset is a Custody Eligible Security Type.[14] If the Security or Non-Security, as applicable, is a Custody Eligible Security Type and otherwise complies with DTC's Rules on eligibility,[15] DTC will make it eligible for Custody services by adding it to the DTC Custody security master file (''Custody Master File''). For those eligible Securities or Non-Security Assets without an assigned CUSIP, DTC establishes the CUSIP for the Security, or other Non-Security Asset, as applicable, in DTC's system. The validation, CUSIP assignment and communication with the Participant are all manually processed by DTC. Once a Security or Non-Security Asset is made eligible for deposit into the Custody Service, the Participant may deliver the physical Security Certificate or other asset-related documentation, as applicable, either by hand, or via overnight mail, for deposit into DTC's secure vault.[16]

Enhanced Process

Pursuant to the proposed rule change, Custody Eligibility Requests would be submitted by Participants to DTC using the Enhanced Process through the Application. DTC would eliminate the ability to submit Custody Eligibility Requests by email. Participants would continue to provide the same information through the Application that they currently provide through email, including the Data Elements and a copy of the Security Certificate or other asset-related documentation they are seeking to make eligible.[17] In addition, the Application would offer Participants seeking to make multiple Custody Eligibility Requests the option to submit a spreadsheet containing the Data Elements for all the Securities and Non-Security Assets for which eligibility is being requested as one submission.[18]

Once the Custody Eligibility Request is submitted, DTC would validate the Data Elements to determine whether the Security or Non-Security Asset, as applicable, is a Custody Eligible Security Type, as DTC does today. DTC would send an automated email to notify the Participant if a Custody Eligibility Request requires further review by DTC prior to adding the Security or Non-Security Asset, as applicable, to the Custody system as eligible for deposit. DTC may require other information it deems necessary to complete its processing of a Custody Eligibility Request. If DTC requires additional information to complete its review of a Custody Eligibility Request, or otherwise identifies an issue that may affect processing of the Custody Eligibility Request (*e.g.,* incorrect Sub-Issue type, an issue regarding compliance with sanctions administered and enforced by the Office of Foreign Assets Control of the U.S. Department of the Treasury (''OFAC''), the listing of a Security on the issuer list maintained by OFAC,[19] etc.), DTC staff would contact the Participant in this regard directly by phone and/or in writing.[20]

If a Security or Non-Security Asset subject of the Custody Eligibility Request is eligible for deposit in the Custody Service but has not been assigned a CUSIP prior to submission of the Custody Eligibility Request to the Application, DTC would assign a CUSIP as it does today.[21] DTC would then notify the Participant through an automated email message that the Security or Non-Security Asset is eligible for the Custody Service, and add the Security or Non-Security Asset to the Custody Master File. The Participant may then deliver the physical Security Certificate or, for a Non-Security Asset, other asset-related documentation, as applicable, to DTC for deposit into DTC's secure vault in the same manner that it would today.

Implementation of the Enhanced Process would provide enhanced efficiency and a more secure system for submission and review of Custody Eligibility Requests to Participants and DTC in relation to the current email-based method. First, as described above, the Application would enhance security in transmission of Custody Eligibility Requests by using a secure online system instead of the current email method. Second, use of the Application for this purpose would enhance transparency for Participants with respect to the status of their individual Custody Eligibility Requests.[22] Third, the migration of the submission of Custody Eligibility Requests from an email-based method to using the Application would enhance processing efficiencies at DTC by providing an automated and centralized means for DTC to receive and manage Eligibility Request Documents.

Eligibility Inquiry Capability

The Application would also offer a new inquiry capability (''Custody Eligibility Inquiry Function'') for Participants' use that would allow them to directly view whether a Security or Non-Security Asset is already eligible for deposit into the Custody Service. The Participant would make the inquiry by entering certain search criteria (''Search Criteria''). The Custody Eligibility Inquiry Function, in addition to providing Participants the ability to search by CUSIP and Security Description or Non-Security Asset, would also provide the capability to use other Search Criteria to narrow the search.[23] If the applicable Security or Non-Security Asset is eligible for the Custody Service, the Participant would know that it can proceed with its deposit without first requesting eligibility. This feature would provide a Participant that needs to verify eligibility of a Security or Non-Security Asset before depositing it a real-time view into whether the Security is already on the Custody Master File

corporate debt and equity issue types); State of Incorporation (required for all U.S. issues); Dated Date (required for corporate debt and municipal security types); Accrual Date (required for corporate debt and municipal security types); Certificate Type (required and defaulted to R for Registered, can be updated to Bearer or Interchangeable, as applicable); Maturity Date (required for corporate debt, municipal securities and warrants); Interest Rate (required for corporate debt and municipal security types); Name of Paying Agent (required for corporate debt and municipal security types); and Exercise Price (required for warrants).

[14] *See* Custody Guide, *supra* note 10.

[15] *See* Rule 5, *supra* note 5.

[16] *See* Custody Guide, *supra* note 6 at 10–14 (setting forth Procedures for the deposit of Securities and Non-Security Assets to the Custody Service).

[17] If the request does not contain the required Data Elements, and the Security Certificate or other asset-related documentation, as applicable, then the Application would prompt the Participant to resubmit the inquiry with all required Data Elements, and the Security Certificate or other asset-related documentation, as applicable. Today, the Participant is notified in this regard only after DTC has reviewed the email request.

[18] Currently, each Custody Eligibility Request must be submitted individually. This feature would assist Participants performing large conversions, including those moving Custody functions from their own facility to DTC's Custody Service.

[19] *See* Rule 2, Section 8, and Rule 5, Section 1, *supra* note 5.

[20] The Custody Guide would state that Participants with questions regarding this process should call the DTC Underwriting Hotline phone number.

[21] CUSIPS [sic] assigned by DTC would be viewable on the Application screen.

[22] The Application would provide Participants with the ability to view the status of their Custody Eligibility Requests online.

[23] The Search Criteria include CUSIP or partial CUSIP (at least 6 characters), and Security Description (at least 3 characters). Additional Search Criteria would allow the Participant to narrow the results including the Security Interest Rate range, Maturity Date range, Dated Date range and Sub-Issue Type.

without having to inquire with DTC by phone or email.

Proposed Rule Changes

The Custody Guide does not currently contain a section describing Custody Eligibility Requests and the process for submitting them. Pursuant to the proposed rule change, DTC would amend the text of the Custody Guide to add a section in this regard, and:

(i) Provide the Procedures for the Enhanced Process as described above;

(ii) provide that (a) if a Participant seeking to make a Security or other asset eligible for the Custody Service does not know whether the Security or asset is currently eligible for deposit in DTC's Custody Service, the Participant should verify the eligibility status using the online Custody Eligibility Inquiry Function through the Application, as defined below and (b) if the Security or asset is not eligible then the Participant must, prior to depositing it at DTC, submit a request to DTC to make the Security or asset eligible for the Custody Service using the Custody Eligibility Application. [sic]

(iii) provide the Procedures for the Custody Eligibility Inquiry Function as described above; and

(iv) state that Participants must have access to DTC's online web-based portal (''Portal'') and the Application in order to submit Custody Eligibility Requests and make Custody Eligibility Inquiries.[24]

Implementation

The proposed rule change would be implemented in phases whereby Participants using the Custody Service would be migrated to use the Application to submit Custody Eligibility Requests over a period of approximately two months beginning on October 31, 2016 (''Effective Date''). Migration to the Application for all Participants that use the Custody Service would be expected to be completed by the end of December 2016. However, email submission of Custody Eligibility Requests would remain available to Participants as a valid method to submit Custody Eligibility Requests until the later of (i) January 31, 2017 and (ii) 30 calendar days following the date all Participants using the Custody Service have migrated to be able to submit Custody Eligibility Requests using the Custody Eligibility Application (''Final Effective Date'').[25] On and after the Final Effective Date, DTC would not accept such email requests and Custody Eligibility Requests would be required to be submitted through the Custody Eligibility Application only. The Custody Guide text as proposed would contain a footnote reflecting the above regarding the Final Effective Date and state that the footnote would be deleted as of the Final Effective Date.

2. Statutory Basis

Section 17A(b)(3)(F) of the Act[26] requires that the rules of the clearing agency be designed, *inter alia,* in general, to protect investors and the public interest. DTC believes the proposed rule change is consistent with this provision because (i) having Custody Eligibility Requests submitted through the Application would promote efficient and secure delivery and processing of such requests in order to facilitate making Securities and Non-Security Assets, as applicable, eligible for deposit into the Custody Service by Participants on behalf of themselves and their customers, and (ii) the proposed online functionality would facilitate enhanced transparency for Participants in their use of the Custody Service on behalf of themselves and their customers. Thus, by (i) facilitating efficient and secure submission of Custody Eligibility Requests, which in turn would facilitate the ability of Participants to deposit customer assets in DTC's secure vault, and (ii) providing for enhanced transparency to Participants in this regard, the proposed rule change would protect investors and the public interest.

Rule 17Ad–22(d)(6) promulgated under the Act[27] requires that each registered clearing agency shall establish, implement, maintain and enforce written policies and procedures reasonably designed to, as applicable, be cost-effective in meeting the requirements of participants while maintaining safe and secure operations. DTC believes that the proposed rule change is consistent with Rule 17Ad–22(d)(6) because (i) by enhancing the efficiency of the processing of Custody Eligibility Requests without increasing costs to Participants to access the service,[28] the proposed rule change would be cost-effective in meeting requirements of Participants, and (ii) by processing Custody Eligibility Requests through the Application, a centralized and secure online application, DTC would maintain safe and secure operations with respect to transmission and processing of such requests.

(B) Clearing Agency's Statement on Burden on Competition

DTC does not believe that the proposed rule change would have any adverse impact, or impose any burden, on competition because DTC would not charge a fee for access to the Application and therefore the proposal would not impose additional costs on Participants in this regard. In addition, the process for Participants to register for the Application is identical to that used by Participants to register for DTC web-based services generally.[29] DTC has discussed the proposal with Participants using the Custody Service and is conducting user testing on the Application prior to implementation on a Participant-by-Participant basis.

(C) Clearing Agency's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

DTC has not solicited and does not intend to solicit, comments regarding the proposed rule change. DTC has not received any unsolicited written comments from interested parties. To the extent DTC receives written comments on the proposed rule change, DTC will forward such comments to the Commission. DTC has conducted industry outreach with respect to the proposal including discussions with the Securities Processing Advisory Board (SPAB), whose members account for over 70 percent of the overall Custody Service activity at DTC.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)[30] of the Act and paragraph (f) of Rule 19b–4[31] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors,

[24] The Custody Guide would provide that Participants that require assistance in accessing the Portal and/or Application should contact their DTC Relationship Manager.

[25] The Final Effective Date would be announced via a DTC Important Notice.

or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–DTC–2016–011 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549.

All submissions should refer to File Number SR–DTC–2016–011. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of DTC and on DTCC's Web site (*http://dtcc.com/legal/sec-rule-filings.aspx*). All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–DTC–2016–011 and should be submitted on or before December 5, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[32]

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79257; File No. 265–29]

Equity Market Structure Advisory Committee

AGENCY: Securities and Exchange Commission.

ACTION: Notice of meeting.

SUMMARY: The Securities and Exchange Commission Equity Market Structure Advisory Committee is providing notice that it will hold a public meeting on Tuesday, November 29, 2016, in Multi-Purpose Room LL–006 at the Commission's headquarters, 100 F Street NE., Washington, DC. The meeting will begin at 9:30 a.m. (EST) and will be open to the public. The public portions of the meeting will be webcast on the Commission's Web site at *www.sec.gov.* Persons needing special accommodations to take part because of a disability should notify the contact person listed below. The public is invited to submit written statements to the Committee. The meeting will focus on recommendations and updates from the four subcommittees.

DATES: The public meeting will be held on Tuesday, November 29, 2016. Written statements should be received on or before November 23, 2016.

ADDRESSES: The meeting will be held at the Commission's headquarters, 100 F Street NE., Washington, DC. Written statements may be submitted by any of the following methods:

Electronic Statements

- Use the Commission's Internet submission form (*http://www.sec.gov/rules/other.shtml*); or
- Send an email message to *rule-comments@sec.gov.* Please include File Number 265–29 on the subject line; or

Paper Statements

- Send paper statements in triplicate to Brent J. Fields, Federal Advisory Committee Management Officer, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File No. 265–29. This file number should be included on the subject line if email is used. To help us process and review your statement more efficiently, please use only one method. The Commission will post all statements on the Commission's Internet Web site at SEC Web site at (*http://www.sec.gov/comments/265-29/265-29.shtml*).

Statements also will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Room 1580, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. All statements received will be posted without change; we do not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly.

FOR FURTHER INFORMATION CONTACT: Arisa Tinaves Kettig, Senior Special Counsel, at (202) 551–5676, Division of Trading and Markets, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–7010.

SUPPLEMENTARY INFORMATION: In accordance with Section 10(a) of the Federal Advisory Committee Act, 5 U.S.C.–App. 1, and the regulations thereunder, Stephen Luparello, Designated Federal Officer of the Committee, has ordered publication of this notice.

Dated: November 8, 2016.

Brent J. Fields,

Committee Management Officer.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79249; File No. SR–Phlx–2016–86]

Self-Regulatory Organizations; NASDAQ PHLX LLC; Order Granting Approval of Proposed Rule Change To Delete or Amend Rule Language Relating to Specialists and Registered Options Traders

November 7, 2016.

I. Introduction

On August 12, 2016, NASDAQ PHLX LLC (''Exchange'' or ''Phlx'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change to delete or amend its rules relating to specialists and Registered Options Traders

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

(''ROTs''). The proposed rule change was published for comment in the **Federal Register** on August 31, 2016.[3] On October 12, 2016, pursuant to Section 19(b)(2) of the Act,[4] the Commission designated a longer period within which to approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to disapprove the proposed rule change.[5] The Commission received no comment letters on the proposed rule change. This order approves the proposed rule change.

II. Description of the Proposal

Phlx Rules 1022(b) and (c) currently require each specialist [6] or ROT [7] to provide to the Exchange reports of options and orders in a manner prescribed by the Exchange. Phlx Rule 1022(b) requires each specialist or ROT to report opening positions and each purchase and sale in each option in which the specialist or ROT is registered for each account reported pursuant to Phlx Rule 1022.[8] Phlx Rule 1022(c) requires each specialist or ROT to report every order entered by the specialist or ROT for the purchase or sale of a security underlying any stock or Exchange-Traded Fund Share options contract traded on the Exchange or a security convertible into or exchangeable for such underlying security, as well as opening and closing positions in all such securities held in each account reported pursuant to Phlx Rule 1022.[9] The Exchange proposes to delete Phlx Rules 1022(b) and (c). The Exchange represents that the submission of these reports by specialists and ROTs is no longer necessary because most of the information in the reports is available to the Exchange from other sources.[10]

Phlx Rule 1036(a) currently requires every limited partner, approved person, and every party who is affiliated with a specialist member organization to agree, in a stipulation approved by the Exchange, not to violate any Exchange rule or cause a specialist or a specialist member organization to violate these or any other rules relating to specialists. The Exchange proposes to delete Phlx Rule 1036(a). The Exchange represents that the violation of a stipulation would have provided the Exchange with a separate basis for proceeding against the provider of the stipulation in the event of an Exchange rule violation.[11] The Exchange believes that the stipulations are no longer necessary for that purpose and that the burden of collecting stipulations outweighs any benefits from the rule.[12]

Phlx Rule 1036(b) provides that no issuer, or parent or subsidiary thereof, or any officer, director or 10% stockholder thereof, may become an approved person in a specialist member organization whose members are registered in a security of that issuer. The Exchange proposes to amend Phlx Rule 1036(b) to refer to members who are registered in options overlying a security of that issuer to specify that Phlx Rule 1036(b) applies only to *options* trading on the Exchange.[13]

Phlx Rule 1037 provides that a specialist is liable for any loss sustained for orders entrusted to him which should have been executed, and for which he should have sent an execution report, when the specialist was made aware of the error by 9:30 on the business day following the submission of the order. The Exchange proposes to delete Phlx Rule 1037. The Exchange represents that today, specialists on the Exchange trade only for their own account and no longer handle orders for other market participants in their capacity as specialists; therefore, specialists would no longer be in a position to miss orders as contemplated by Rule 1037.[14]

III. Discussion and Commission Findings

After careful review, the Commission finds that the proposed rule change is consistent with the requirements of the Act and rules and regulations thereunder applicable to a national securities exchange.[15] In particular, the Commission finds that the proposed rule change is consistent with Section 6(b)(5) of the Act,[16] which requires, among other things, that the rules of a national securities exchange be designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest; and are not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Commission notes that the deletion of Phlx Rules 1022(b), 1022(c), and 1036(a) should eliminate burdens on Phlx members that the Exchange believes are no longer necessary to carry out its oversight of its members. In addition, the Commission notes that the Exchange's proposal to delete Phlx Rules 1022(b), 1022(c), 1036(a), and 1037 should benefit investors by helping to ensure that the Phlx rules correctly describe the current operations of the Exchange and obligations of its members. Finally, the Commission believes that amending Phlx Rule 1036(b) to specify that Phlx Rule 1036(b) applies only to *options* trading on the Exchange should add clarity to Phlx's rules.

Accordingly, for the reasons discussed above, the Commission finds that the proposed rule change is consistent with Section 6(b)(5) of the Act.

V. Conclusion

It is therefore ordered pursuant to Section 19(b)(2) of the Act [17] that the proposed rule change (SR–PHLX–2016–86) be and hereby is approved.

---

[3] *See* Securities Exchange Act Release No. 78680 (August 25, 2016), 81 FR 60110 (August 31, 2016) (''Notice'').

[4] 15 U.S.C. 78s(b)(2).

[5] *See* Securities Exchange Act Release No. 79087, 81 FR 71776 (October 18, 2016). The Commission designated a longer period within which to take action on the proposed rule change and designated November 29, 2016, as the date by which it should approve, disapprove, or institute proceedings to determine whether to disapprove the proposed rule change.

[6] A ''specialist'' is an Exchange member who is registered as an options specialist pursuant to Phlx Rule 1020(a). Specialists are subject to quoting and registration obligations set forth in Phlx Rules 1014(b), 1020 and 1080.02.

[7] A ''ROT'' is defined in Phlx Rule 1014(b) as a regular member or a foreign currency options participant of the Exchange located on the trading floor who has received permission from the Exchange to trade in options for his own account. For the purposes of Phlx Rule 1014, the term ''ROT'' includes Streaming Quote Traders and Remote Streaming Quote Traders.

[8] *See* Notice, *supra* note 3, at 60110. The report is required to designate the time and type of tick at which such transaction was effected.

[9] *See id.* The report pertaining to orders must include the terms of each order, identification of the brokerage firms through which the orders were entered, the times of entry or cancellation, the times reports of executions were received and, if all or part of the order was executed, the quantity and execution price.

[10] *See id.* The Exchange represents that the information referred to in Phlx Rule 1022(b) is available from the Options Clearing Corporation and that much of the information referred to in Phlx Rule 1022(c) is available in the Intermarket Surveillance Group Equity Audit Trail.

[11] *See id.*

[12] *See id.*

[13] The Exchange is also correcting the rule by changing the word ''who'' to ''whose.''

[14] *See* Notice, *supra* note 3, at 60111.

[15] In approving the proposed rule changes, the Commission has considered their impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 32353; File No. 812–14654]

The Boston Trust & Walden Funds, et al.; Notice of Application

November 7, 2016.

AGENCY: Securities and Exchange Commission (''Commission'').

ACTION: Notice of an application for an order pursuant to: (a) Section 6(c) of the Investment Company Act of 1940 (''Act'') granting an exemption from sections 18(f) and 21(b) of the Act; (b) section 12(d)(1)(J) of the Act granting an exemption from section 12(d)(1) of the Act; (c) sections 6(c) and 17(b) of the Act granting an exemption from sections 17(a)(1), 17(a)(2) and 17(a)(3) of the Act; and (d) section 17(d) of the Act and rule 17d–1 under the Act to permit certain joint arrangements and transactions. Applicants request an order that would permit certain registered open-end management investment companies to participate in a joint lending and borrowing facility.

APPLICANTS: The Boston Trust & Walden Funds, registered under the Act as an open-end management investment company with one or more series, and Boston Trust Investment Management, Inc. (the ''Adviser''), registered as an investment adviser under the Investment Advisers Act of 1940.

FILING DATES: The application was filed on June 3, 2016, and amended on August 18, 2016 and October 18, 2016.

HEARING OR NOTIFICATION OF HEARING: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Commission's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on December 1, 2016 and should be accompanied by proof of service on the applicants, in the form of an affidavit, or, for lawyers, a certificate of service. Pursuant to Rule 0–5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the Commission's Secretary.

ADDRESSES: Secretary, U.S. Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090; Applicants, c/o Michael V. Wible, Esq., Thompson Hine LLP, 41 South High Street, Suite 1700, Columbus, OH 43215.

FOR FURTHER INFORMATION CONTACT: Jennifer Palmer, Senior Counsel, at (202) 551–5786 or Nadya Roytblat, Assistant Chief Counsel, at (202) 551–6823 (Division of Investment Management, Chief Counsel's Office).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained via the Commission's Web site by searching for the file number, or an applicant using the Company name box, at *http://www.sec.gov/search/search.htm* or by calling (202) 551–8090.

Summary of the Application

1. Applicants request an order that would permit the applicants to participate in an interfund lending facility where each Fund could lend money directly to and borrow money directly from other Funds to cover unanticipated cash shortfalls, such as unanticipated redemptions or trade fails.[1] The Funds will borrow under the facility only to satisfy their short-term cash needs, and the loans' duration will be no more than 7 days.[2]

2. Applicants anticipate that the proposed facility would provide a borrowing Fund with a source of liquidity at a rate lower than the bank borrowing rate at times when the cash position of the Fund is insufficient to meet temporary cash requirements. In addition, Funds making short-term cash loans directly to other Funds would earn interest at a rate higher than they otherwise could obtain from investing their cash in repurchase agreements or certain other short-term money market instruments. Thus, applicants assert that the facility would benefit both borrowing and lending Funds.

3. Applicants agree that any order granting the requested relief will be subject to the terms and conditions stated in the application. Among others, the Adviser, through a designated committee, would administer the facility as a disinterested fiduciary as part of its duties under the investment management agreements with the Funds and would receive no additional fee as compensation for its services in connection with the administration of the facility, except that the Adviser could collect standard fees for transaction-related services. The facility would be subject to oversight and certain approvals by the Funds' Board, including, among others, approval of the interest rate formula and of the method for allocating loans across Funds, as well as review of the process in place to evaluate the liquidity implications for the Funds. A Fund's aggregate outstanding interfund loans will not exceed 15% of its net assets, and the Fund's loans to any one Fund will not exceed 5% of the lending Fund's net assets.[3]

4. Applicants assert that the facility does not raise the concerns underlying section 12(d)(1) of the Act given that the Funds are part of the same group of investment companies and there will be no duplicative costs or fees to the Funds.[4] Applicants also assert that the proposed transactions do not raise the concerns underlying sections 17(a)(1), 17(a)(3), 17(d) and 21(b) of the Act as the Funds would not engage in lending transactions that unfairly benefit insiders or are detrimental to the Funds. Applicants state that the facility will offer both reduced borrowing costs and enhanced returns on loaned funds to all participating Funds and each Fund would have an equal opportunity to borrow and lend on equal terms based on an interest rate formula that is objective and verifiable. With respect to the relief from section 17(a)(2) of the Act, applicants note that any collateral pledged to secure an interfund loan would be subject to the same conditions imposed by any other lender to a Fund that imposes conditions on the quality of or access to collateral for a borrowing (if the lender is another Fund) or the

[1] Applicants request that the order apply to the applicants and to any existing or future registered open-end management investment company or series thereof for which the Adviser or any successor thereto or an investment adviser controlling, controlled by, or under common control with the Adviser or any successor thereto serves as investment adviser (each a ''Fund'' and collectively the ''Funds'' and each such investment adviser an ''Adviser''). For purposes of the requested order, ''successor'' is limited to any entity that results from a reorganization into another jurisdiction or a change in the type of a business organization.

[2] Any Fund, however, will be able to call a loan on one business day's notice.

[3] Under certain circumstances, a borrowing Fund will be required to pledge collateral to secure the loan.

[4] Applicants state that the obligation to repay an interfund loan could be deemed to constitute a security for the purposes of sections 17(a)(1) and 12(d)(1) of the Act.

same or better conditions (in any other circumstance).[5]

5. Applicants also believe that the limited relief from section 18(f)(1) of the Act that is necessary to implement the facility (because the lending Funds are not banks) is appropriate in light of the conditions and safeguards described in the application and because the Funds would remain subject to the requirement of section 18(f)(1) that all borrowings of a Fund, including combined interfund loans and bank borrowings, have at least 300% asset coverage.

6. Section 6(c) of the Act permits the Commission to exempt any persons or transactions from any provision of the Act if such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Section 12(d)(1)(J) of the Act provides that the Commission may exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions, from any provision of section 12(d)(1) if the exemption is consistent with the public interest and the protection of investors. Section 17(b) of the Act authorizes the Commission to grant an order permitting a transaction otherwise prohibited by section 17(a) if it finds that (a) the terms of the proposed transaction are fair and reasonable and do not involve overreaching on the part of any person concerned; (b) the proposed transaction is consistent with the policies of each registered investment company involved; and (c) the proposed transaction is consistent with the general purposes of the Act. Rule 17d–1(b) under the Act provides that in passing upon an application filed under the rule, the Commission will consider whether the participation of the registered investment company in a joint enterprise, joint arrangement or profit sharing plan on the basis proposed is consistent with the provisions, policies and purposes of the Act and the extent to which such participation is on a basis different from or less advantageous than that of the other participants.

For the Commission, by the Division of Investment Management, under delegated authority.

Secretary.

[FR Doc. 2016–27249 Filed 11–10–16; 8:45 am]

BILLING CODE 8011–01–P

[5] Applicants state that any pledge of securities to secure an interfund loan could constitute a purchase of securities for purposes of section 17(a)(2) of the Act.

SECURITIES AND EXCHANGE COMMISSION

Proposed Collection; Comment Request

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE., Washington, DC 20549–2736.

Extension: Rule 201 and Rule 200(g) of Regulation SHO
SEC File No. 270–606, OMB Control No. 3235–0670

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) (''PRA''), the Securities and Exchange Commission (''Commission'') is soliciting comments on the existing collection of information provided for in Rule 201 (17 CFR 242.201) and Rule 200(g) (17 CFR 242.200(g)) under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*). The Commission plans to submit this existing collection of information to the Office of Management and Budget (''OMB'') for extension and approval.

Rule 201 is a short sale-related circuit breaker rule that, if triggered, imposes a restriction on the prices at which securities may be sold short. Rule 200(g) provides that a broker-dealer may mark certain qualifying sell orders ''short exempt.'' The information collected under Rule 201's written policies and procedures requirement applicable to trading centers, the written policies and procedures requirement of the broker-dealer provision of Rule 201(c), the written policies and procedures requirement of the riskless principal provision of Rule 201(d)(6), and the ''short exempt'' marking requirement of Rule 200(g) enable the Commission and self-regulatory organizations (''SROs'') to examine and monitor for compliance with the requirements of Rule 201 and Rule 200(g).

In addition, the information collected under Rule 201's written policies and procedures requirement applicable to trading centers helps to ensure that trading centers do not execute or display any impermissibly priced short sale orders, unless an order is marked ''short exempt,'' in accordance with the rule's requirements. Similarly, the information collected under the written policies and procedures requirement of the broker-dealer provision of Rule 201(c) and the riskless principal provision of Rule 201(d)(6) helps to ensure that broker-dealers comply with the requirements of these provisions. The information collected pursuant to the ''short exempt'' marking requirement of Rule 200(g) also provides an indication to a trading center of when it must execute or display a short sale order without regard to whether the short sale order is at a price that is less than or equal to the current national best bid.

It is estimated that SRO and non-SRO respondents registered with the Commission and subject to the collection of information requirements of Rule 201 and Rule 200(g) incur an aggregate annual burden of 2,908,309 hours to comply with the rules and an aggregate annual external cost of $120,000.

Written comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's estimates of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information under the PRA unless it displays a currently valid OMB control number.

Please direct your written comments to: Pamela Dyson, Director/Chief Information Officer, Securities and Exchange Commission, c/o Remi Pavlik-Simon, 100 F Street NE., Washington, DC 20549, or send an email to: *PRA_Mailbox@sec.gov.*

Dated: November 7, 2016.

Brent J. Fields,

Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–79255; File No. SR–BatsBZX–2016–69]

Self-Regulatory Organizations; Bats BZX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Related to Fees for Use of the Exchange's Equity Options Platform

November 7, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] notice is hereby given that on October 27, 2016, Bats BZX Exchange, Inc. (''BZX'' or the ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange filed a proposal to amend the fee schedule applicable to Members [3] and non-Members of the Exchange pursuant to BZX Rules 15.1(a) and (c).

The text of the proposed rule change is available at the Exchange's Web site at *www.batstrading.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to modify its fee schedule applicable to the Exchange's equity options platform (''BZX Options'') to add a new Step-Up Tier under footnote 3, Non-Customer Penny Pilot Take Volume Tiers.

The Exchange appends fee code PP to Non-Customer [4] orders in Penny Pilot Securities [5] that removes liquidity. Orders that yield fee code PP are charged a fee of $0.50 per contract. The Exchange offers three tiers under footnote 3, Non-Customer Penny Pilot Take Volume Tiers, which offer reduced fees for Non-Customer orders that yield fee code PP upon achieving each tier's required criteria. Under Tier 1, orders that yield fee code PP will be eligible for a reduced fee of $044 [sic] per contract where the Member has: (i) an ADAV [6] in Customer [7] orders equal to or greater than 0.60% of average TCV; [8] (ii) an ADAV in Market Maker [9] orders equal to or greater than 0.25% of average TCV; and (iii) on the Exchange's equities platform, BZX Equities, an ADAV equal to or greater than 0.30% of average TCV. Under Tier 2, orders that yield fee code PP will be eligible for a reduced fee of $0.47 per contract where the Member has an ADAV in Customer orders equal to or greater than 1.00% of average TCV. Lastly, under Tier 3, orders that yield fee code PP will be eligible for a reduced fee of $0.44 per contract where the Member has an ADAV in Customer orders equal to or greater than 1.30% of average TCV.

The Exchange now proposes to reduce the above fees by $0.01 for Members that achieve certain additional volume requirements. Specifically, the Exchange proposes to add a Step-Up tier under footnote 3 such that the fee charged to a Member under fee code PP and the Non-Customer Penny Pilot Take Volume Tiers described above would be reduced by $0.01 per contract where the Member has an Options Step-Up Add TCV [10] in Customer orders from September 2016 baseline equal to or greater than 0.30%. The criteria for the proposed Step-Up Tier under footnote 3 would be in addition the criteria required by the three Non-Customer Take Volume tiers under footnote 3.

Implementation Date

The Exchange proposes to implement these amendments to its fee schedule as of November 1, 2016.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the objectives of Section 6 of the Act,[11] in general, and furthers the objectives of Section 6(b)(4),[12] in particular, as it is designed to provide for the equitable allocation of reasonable dues, fees and other charges among its Members and other persons using its facilities. Volume-based rebates such as those currently maintained on the Exchange have been widely adopted by equities and options exchanges and are equitable because they are open to all Members on an equal basis and provide additional benefits or discounts that are reasonably related to the value to an exchange's market quality associated with higher levels of market activity, such as higher levels of liquidity provision and/or growth patterns, and introduction of higher volumes of orders into the price and volume discovery processes. The addition of the Non-Customer Penny Pilot Take Volume Step-Up Tier is intended to incentivize Members to send additional orders to the Exchange in an effort to qualify for a further reduced fee for orders that yield fee code PP and the Non-Customer Penny Pilot Take Volume Tiers under footnote 3. The Exchange believes the rates remain competitive with those charged by other venues [13] and, therefore, are reasonable and equitably allocated to Members. The Exchange also notes that it operates in a highly-competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive. The Exchange believes that the proposed Step-Up Tier is equitable and non-discriminatory in that it would apply uniformly to all Members.

The Exchange also believes requiring the Member to have an Options Step-Up Add TCV in Customer orders from September 2016 baseline equal to or

[11] 15 U.S.C. 78f.

[12] 15 U.S.C. 78f(b)(4).

[13] *See* NYSE Arca, Inc.'s fee schedule *available at https://www.nyse.com/publicdocs/nyse/markets/arca-options/NYSE_Arca_Options_Fee_Schedule.pdf* (dated October 1, 2016) (offering additional credits to under incentive programs for customer, professional customer, and market maker orders as well as a separate take fee discount qualification tier).

greater than 0.30% is also equitable and reasonable. Such pricing programs reward a Member's growth pattern on the Exchange and such increased volume increases potential revenue to the Exchange, and will allow the Exchange to continue to provide and potentially expand the incentive programs operated by the Exchange. The Exchange believes that providing additional financial incentives to Members that demonstrate an increase over their September 2016 Options Step-Up Add TCV through the proposed tier offers an additional, flexible way to achieve financial incentives from the Exchange and encourage Members to add liquidity to the Exchange. The Exchange believes that this incentive is reasonable, fair and equitable because the liquidity from the proposed tier also benefits all investors by deepening the Exchange's liquidity pool, offering additional flexibility for all investors to enjoy cost savings, supporting the quality of price discovery, promoting market transparency and improving investor protection. These pricing programs are also fair and equitable in that they are available to all Members and will result in Members receiving either the same or an increased rebate than they would currently receive.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes the proposed amendment to its fee schedule would not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. To the contrary, the Exchange has designed the proposed amendment to its fee schedule to enhance its ability to compete with other exchanges. Also, the Exchange believes that the addition of the proposed tier contributes to rather than burdens competition, as such tier is intended to incentivize Members to increase their participation on the Exchange, which will increase the liquidity and market quality on the Exchange, which will then further enhance the Exchange's ability to compete with other exchanges.

The Exchange does not believe that the proposed change will impair the ability of Members or competing venues to maintain their competitive standing in the financial markets. Additionally, Members may opt to disfavor the Exchange's pricing if they believe that alternatives offer them better value. Accordingly, the Exchange does not believe that the proposed change to the Exchange's tiered pricing structure burdens competition, but instead, enhances competition as it is intended to increase the competitiveness of the Exchange.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any written comments from members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [14] and paragraph (f) of Rule 19b–4 thereunder.[15] At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR-BatsBZX–2016–69 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–BatsBZX–2016–69. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–BatsBZX–2016–69, and should be submitted on or before December 5, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[16]

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

Sunshine Act Meeting

Notice is hereby given that, pursuant to the provisions of the Government in the Sunshine Act, Public Law 94–409, the Securities and Exchange Commission will hold an Open Meeting on Tuesday, November 15, 2016, at 3:00 p.m., in the Auditorium, Room L–002.

The subject matter of the Open Meeting will be:

- The Commission will consider whether to approve a proposed national market system (''NMS'') plan to create, implement, and maintain a consolidated audit trail, submitted pursuant to Rule 613 of Regulation NMS.

At times, changes in Commission priorities require alterations in the scheduling of meeting items.

For further information and to ascertain what, if any, matters have been added, deleted, or postponed, please contact Brent J. Fields in the Office of the Secretary at (202) 551–5400.

Dated: November 8, 2016.

Brent J. Fields,

Secretary.

BILLING CODE 8011–01–P

SMALL BUSINESS ADMINISTRATION

[Disaster Declaration #14960 and #14961]

MINNESOTA Disaster #MN–00060

AGENCY: U.S. Small Business Administration.

ACTION: Notice.

SUMMARY: This is a Notice of the Presidential declaration of a major disaster for Public Assistance Only for the State of Minnesota (FEMA–4290–DR), dated 11/02/2016.

Incident: Severe Storms and Flooding.

Incident Period: 09/21/2016 through 09/24/2016.

Effective Date: 11/02/2016.

Physical Loan Application Deadline Date: 01/03/2017.

Economic Injury (EIDL) Loan Application Deadline Date: 08/02/2017.

ADDRESSES: Submit completed loan applications to: U.S. Small Business Administration, Processing And Disbursement Center, 14925 Kingsport Road, Fort Worth, TX 76155.

FOR FURTHER INFORMATION CONTACT: A. Escobar, Office of Disaster Assistance, U.S. Small Business Administration, 409 3rd Street SW., Suite 6050, Washington, DC 20416.

SUPPLEMENTARY INFORMATION: Notice is hereby given that as a result of the President's major disaster declaration on 11/02/2016, Private Non-Profit organizations that provide essential services of governmental nature may file disaster loan applications at the address listed above or other locally announced locations.

The following areas have been determined to be adversely affected by the disaster:

Primary Counties:

Blue Earth, Fillmore, Freeborn, Goodhue, Houston, Le Sueur, Rice, Steele, Waseca.

The Interest Rates are:

	Percent
For Physical Damage:	
Non-Profit Organizations With Credit Available Elsewhere ...	2.625
Non-Profit Organizations Without Credit Available Elsewhere	2.625
For Economic Injury:	
Non-Profit Organizations Without Credit Available Elsewhere	2.625

The number assigned to this disaster for physical damage is 14960B and for economic injury is 14961B.

DEPARTMENT OF STATE

[Public Notice: 9787]

In the Matter of the Amendment of the Designation of Al-Nusrah Front (and Other Aliases) as a Foreign Terrorist Organization Pursuant to Section 219 of the Immigration and Nationality Act, as Amended

Based upon a review of the Administrative Record assembled pursuant to Section 219 of the Immigration and Nationality Act, as amended (8 U.S.C. 1189) (''INA''), and in consultation with the Attorney General and the Secretary of the Treasury, I have concluded that there is a sufficient factual basis to find that Al-Nusrah Front (and other aliases) uses the additional alias Jabhat Fath al Sham, also known as Jabhat Fath al-Sham, also known as Jabhat Fatah al-Sham, also known as Jabhat Fateh al-Sham, also known as Fatah al-Sham Front, also known as Fateh Al-Sham Front, also known as Conquest of the Levant Front, also known as The Front for liberation of al Sham, also known as Front for the Conquest of Syria/the Levant, also known as Front for the Liberation of the Levant, also known as Front for the Conquest of Syria.

Therefore, pursuant to Section 219(b) of the INA, as amended (8 U.S.C. 1189(b)), I hereby amend the designation of Al-Nusrah Front as a foreign terrorist organization to include the following new aliases: Jabhat Fath al Sham, also known as Jabhat Fath al-Sham, also known as Jabhat Fatah al-Sham, also known as Jabhat Fateh al-Sham, also known as Fatah al-Sham Front, also known as Fateh Al-Sham Front, also known as Conquest of the Levant Front, also known as The Front for liberation of al Sham, also known as Front for the Conquest of Syria/the Levant, also known as Front for the Liberation of the Levant, also known as Front for the Conquest of Syria.

This determination shall be published in the **Federal Register**.

Dated: October 19, 2016.

John F. Kerry,

Secretary of State.

BILLING CODE 4710–AD–P

DEPARTMENT OF STATE

[Public Notice: 9788]

In the Matter of the Amendment of the Designation of Al-Nusrah Front (and Other Aliases) as a Specially Designated Global Terrorist

Based upon a review of the administrative record assembled in this matter, and in consultation with the Attorney General and the Secretary of the Treasury, I have concluded that there is a sufficient factual basis to find that Al-Nusrah Front (and other aliases), uses the alias Jabhat Fath al Sham, also known as Jabhat Fath al-Sham, also known as Jabhat Fatah al-Sham, also known as Jabhat Fateh al-Sham, also known as Fatah al-Sham Front, also known as Fateh Al-Sham Front, also known as Conquest of the Levant Front, also known as The Front for liberation of al Sham, also known as Front for the Conquest of Syria/the Levant, also known as Front for the Liberation of the Levant, also known as Front for the Conquest of Syria.

Therefore, pursuant to Section 1(b) of Executive Order 13224, I hereby amend the designation of Al-Nusrah Front as a Specially Designated Global Terrorist to include the following new aliases: Jabhat Fath al Sham, also known as Jabhat Fath al-Sham, also known as Jabhat Fatah al-Sham, also known as Jabhat Fateh al-Sham, also known as Fatah al-Sham Front, also known as Fateh Al-Sham Front, also known as Conquest of the Levant Front, also known as The Front for liberation of al Sham, also known as Front for the Conquest of Syria/the Levant, also known as Front for the Liberation of the Levant, also known as Front for the Conquest of Syria.

This determination shall be published in the **Federal Register**.

Dated: October 19, 2016.

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[FMCSA Docket No. FMCSA–[2016–0220]

Qualification of Drivers; Exemption Applications; Diabetes Mellitus

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of final disposition.

SUMMARY: FMCSA confirms its decision to exempt 58 individuals from its rule prohibiting persons with insulin-treated diabetes mellitus (ITDM) from operating commercial motor vehicles (CMVs) in interstate commerce. The exemptions enable these individuals to operate CMVs in interstate commerce.

DATES: The exemptions were effective on October 20, 2016. The exemptions expire on October 20, 2018.

FOR FURTHER INFORMATION CONTACT: Ms. Christine A. Hydock, Chief, Medical Programs Division, (202) 366–4001, *fmcsamedical@dot.gov,* FMCSA, Department of Transportation, 1200 New Jersey Avenue SE., Room W64–113, Washington, DC 20590–0001. Office hours are from 8:30 a.m. to 5 p.m. e.t., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

I. Electronic Access

You may see all the comments online through the Federal Document Management System (FDMS) at: *http://www.regulations.gov.*

Docket: For access to the docket to read background documents or comments, go to *http://www.regulations.gov* and/or Room W12–140 on the ground level of the West Building, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as

described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *www.dot.gov/privacy.*

II. Background

On September 19, 2016, FMCSA published a notice of receipt of Federal diabetes exemption applications from 58 individuals and requested comments from the public (81 FR 64257. The public comment period closed on October 19, 2016, and no comments were received.

FMCSA has evaluated the eligibility of the 58 applicants and determined that granting the exemptions to these individuals would achieve a level of safety equivalent to or greater than the level that would be achieved by complying with the current regulation 49 CFR 391.41(b)(3).

Diabetes Mellitus and Driving Experience of the Applicants

The Agency established the current requirement for diabetes in 1970 because several risk studies indicated that drivers with diabetes had a higher rate of crash involvement than the general population. The diabetes rule provides that ''A person is physically qualified to drive a commercial motor vehicle if that person has no established medical history or clinical diagnosis of diabetes mellitus currently requiring insulin for control'' (49 CFR 391.41(b)(3)).

FMCSA established its diabetes exemption program, based on the Agency's July 2000 study entitled ''A Report to Congress on the Feasibility of a Program to Qualify Individuals with Insulin-Treated Diabetes Mellitus to Operate in Interstate Commerce as Directed by the Transportation Act for the 21st Century.'' The report concluded that a safe and practicable protocol to allow some drivers with ITDM to operate CMVs is feasible. The September 3, 2003 (68 FR 52441), **Federal Register** notice in conjunction with the November 8, 2005 (70 FR 67777), **Federal Register** notice provides the current protocol for allowing such drivers to operate CMVs in interstate commerce.

These 58 applicants have had ITDM over a range of 1 to 42 years. These applicants report no severe hypoglycemic reactions resulting in loss of consciousness or seizure, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning symptoms, in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the past 5 years. In each case, an endocrinologist verified that the driver has demonstrated a willingness to properly monitor and manage his/her diabetes mellitus, received education related to diabetes management, and is on a stable insulin regimen. These drivers report no other disqualifying conditions, including diabetes-related complications. Each meets the vision requirement at 49 CFR 391.41(b)(10).

The qualifications and medical condition of each applicant were stated and discussed in detail in the September 19, 2016, **Federal Register** notice and they will not be repeated in this notice.

III. Discussion of Comments

FMCSA received no comments in this proceeding.

IV. Basis for Exemption Determination

Under 49 U.S.C. 31136(e) and 31315, FMCSA may grant an exemption from the diabetes requirement in 49 CFR 391.41(b)(3) if the exemption is likely to achieve an equivalent or greater level of safety than would be achieved without the exemption. The exemption allows the applicants to operate CMVs in interstate commerce.

To evaluate the effect of these exemptions on safety, FMCSA considered medical reports about the applicants' ITDM and vision, and reviewed the treating endocrinologists' medical opinion related to the ability of the driver to safely operate a CMV while using insulin.

Consequently, FMCSA finds that in each case exempting these applicants from the diabetes requirement in 49 CFR 391.41(b)(3) is likely to achieve a level of safety equal to that existing without the exemption.

V. Conditions and Requirements

The terms and conditions of the exemption will be provided to the applicants in the exemption document and they include the following: (1) That each individual submit a quarterly monitoring checklist completed by the treating endocrinologist as well as an annual checklist with a comprehensive medical evaluation; (2) that each individual reports within 2 business days of occurrence, all episodes of severe hypoglycemia, significant complications, or inability to manage diabetes; also, any involvement in an accident or any other adverse event in a CMV or personal vehicle, whether or not it is related to an episode of hypoglycemia; (3) that each individual provide a copy of the ophthalmologist's or optometrist's report to the medical examiner at the time of the annual medical examination; and (4) that each individual provide a copy of the annual medical certification to the employer for retention in the driver's qualification file, or keep a copy in his/her driver's qualification file if he/she is self-employed. The driver must also have a copy of the certification when driving, for presentation to a duly authorized Federal, State, or local enforcement official.

VI. Conclusion

Based upon its evaluation of the 58 exemption applications, FMCSA exempts the following drivers from the diabetes requirement in 49 CFR 391.41(b)(3), subject to the requirements cited above 49 CFR 391.64(b):

Ardell M. Banta, Sr. (IA)
Ronald I. Barker (MI)
William J. Bartlett (IA)
Griselda R. Begay (UT)
Darrell L. Boehning (IN)
John M. Bracken (PA)
Thomas E. Brennan (PA)
Matthew W. Brown (OK)
Norman Brown (ME)
Walter L. Coon, II (CA)
Roy L. Cox (NC)
Robert S. Downie, Jr. (PA)
Frank A. Eagen (WI)
Joseph F. Figueroa (WI)
Ernest R. Grasso (MA)
Nolan Graves (MI)
Darryl W. Grimes (TN)
Henry L. Hardin (GA)
John L. Hargis, Jr. (MO)
Michael G. Haskins (VA)
Howard C. Hayes (OK)
Kevin L. Hess (WA)
Joshua P. Hewson (ND)
Karen A. Holzwarth (PA)
Michael R. Jacklin (WI)
Richard P. Janney (DE)
Hershell D. Jones (KY)
William H. Kline (OH)
Mitchell A. Langford (OR)
Michael J. Lipovsky (CT)
Edward J. Manley (PA)
Joshua L. Mattas (PA)
Raymond E. McGuire (PA)
Ismael Mejia (WA)
James L. Morgan, Jr. (NC)
Shane M. Olden (PA)
Wade B. Patrick (NY)
Shawn B. Persinger (WY)
Timothy J. Peterson (NE)
Donald E. Ramper, Jr. (MD)
Jose W. Rodriguez (WI)
Stewart R. Rowell (TX)
William T. Shreeve (TN)
David L. Smith (TX)
James A. Stock (WI)
Marlon Taylor (OH)
Eddie B. Thacker (KY)
Earnest A. Tillman, III (FL)
William C. Tomlinson (GA)
David E. Walters (NM)
Brennan S. Watkins (VT)
Julius Williams (MS)

Kevin A. Wilson (WV)
Jeffrey S. Wine (IA)
John T. Witcraft (SD)
William B. Witzel (SC)
P. Wayne Woodward, Jr. (NY)
Richard Wynn (TX)

In accordance with 49 U.S.C. 31136(e) and 31315 each exemption is valid for two years unless revoked earlier by FMCSA. The exemption will be revoked if the following occurs: (1) The person fails to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than was maintained before it was granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315. If the exemption is still effective at the end of the 2-year period, the person may apply to FMCSA for a renewal under procedures in effect at that time.

Issued on: November 2, 2016.

Larry W. Minor,

Associate Administrator for Policy.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2012–0268]

Hours of Service of Drivers: Trailways Companies Exemption; FAST Act Extension of Expiration Date

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice; extension of exemption.

SUMMARY: FMCSA announces the extension of the 2015 exemption granted to Trailways Companies (Trailways) and other regular-route for-hire passenger carriers. The Agency extends the expiration date from June 4, 2015, to June 4, 2020, in response to the ''Fixing America's Surface Transportation Act'' (FAST Act). That Act extends the expiration date of hours-of-service (HOS) exemptions in effect on the date of enactment of the FAST Act to 5 years from the date of issuance of the exemptions. This exemption provides that drivers of passenger-carrying vehicles with regularly scheduled routes are exempted from changing their duty status from ''driving'' to ''on-duty not driving'' when making stops of less than 10 minutes for the limited purpose of picking up or dropping off passengers, baggage, or small express packages. The Agency previously determined that operations under this exemption would likely achieve a level of safety equivalent to or greater than the level of safety that would be obtained in the absence of the exemption.

DATES: This limited exemption is effective from June 4, 2015, through June 4, 2020.

FOR FURTHER INFORMATION CONTACT: Mr. Thomas Yager, Chief, FMCSA Driver and Carrier Operations Division; Office of Carrier, Driver and Vehicle Safety Standards; Telephone: 614–942–6477. Email: *MCPSD@dot.gov.*

SUPPLEMENTARY INFORMATION:

Legal Basis

FMCSA has authority under 49 U.S.C. 31136(e) and 31315 to grant exemptions from certain parts of the Federal Motor Carrier Safety Regulations. FMCSA must publish a notice of each exemption request in the **Federal Register** [49 CFR 381.315(a)].

Section 5206(b)(2)(A) of the ''Fixing America's Surface Transportation Act,'' (FAST Act), effective October 1, 2015, requires FMCSA to extend any exemption from any provision of the HOS regulations under 49 CFR part 395 that was in effect on the date of enactment of the Act for a period of 5 years from the date the exemption was granted. The exemption may be renewed. Because this action merely implements a statutory mandate that took effect on the date of enactment of the FAST Act, notice and comment are not required.

Trailways Exemption

Trailways, a regular-route passenger carrier, applied for a limited exemption on behalf of Adirondack Trailways, Pine Hill Trailways, New York Trailways and all other regular-route passenger carriers and their drivers, from the change of duty status requirements in 49 CFR 395.8(c). Trailways had requested that drivers with regularly scheduled routes be exempted from changing their duty status from ''driving'' to ''on-duty not driving'' when making stops of less than 10 minutes for the limited purpose of picking up or dropping off passengers, baggage, or small express packages.

FMCSA reviewed the application and the public comments and concluded that allowing these drivers to perform their daily duties without having to record short-term changes in duty status would promote safety at least as effectively as the logbook regulations in 49 CFR part 395.8(c). Trailways held a similar 2-year exemption from 2013 to 2015. A Notice of Final Determination granting the Trailways exemption was published on June 4, 2015 [80 FR 31961].

The substance of the exemption is not affected by this extension. The exemption covers only the driver's record of duty status regulations [49 CFR 395.8(c)]. The exemption is restricted to drivers employed by Trailways and other regular-route for-hire passenger carriers. Instead of complying with the provisions in 49 CFR 395.8(c), these drivers are exempted from changing their duty status from ''driving'' to ''on-duty not driving'' when making stops of less than 10 minutes.

The FMCSA does not believe the safety record of any driver operating under this exemption will deteriorate. However, should deterioration in safety occur, FMCSA will take all steps necessary to protect the public interest, including revocation of the exemption. The FMCSA has the authority to terminate the exemption at any time the Agency has the data/information to conclude that safety is being compromised.

Issued on: November 3, 2016.

T.F. Scott Darling, III,

Administrator.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2014–0420]

Hours of Service of Drivers: Specialized Carriers & Rigging Association (SC&RA) Exemption; FAST Act Extension of Expiration Date

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice; extension of exemption.

SUMMARY: FMCSA announces the extension of the 2015 exemption granted to the Specialized Carriers and Rigging Association (SC&RA) for the transportation of loads that exceed normal weight and dimensional limits. The exemption applies to all oversize-overweight permitted loads whose drivers are not required to comply with the 30-minute rest break rule. The Agency extends the expiration date to June 17, 2020, in response to section 5206(b)(2)(A) of the ''Fixing America's Surface Transportation Act'' (FAST Act). That section extends the expiration date of hours-of-service (HOS) exemptions in effect on the date of enactment of the FAST Act to 5 years

from the date of issuance of the exemptions. The SC&RA exemption from the Agency's 30-minute rest break requirement is limited to drivers of specialized loads moving in interstate commerce that exceed normal weight and dimension limits—oversize/overweight (OS/OW) loads—and require a permit issued by a government authority. The Agency previously determined that the drivers of specialized commercial motor vehicles (CMV) under this exemption would likely achieve a level of safety equivalent to or greater than the level of safety that would be obtained in the absence of the exemption.

DATES: This limited exemption is effective from June 18, 2015, through June 17, 2020.

FOR FURTHER INFORMATION CONTACT: Mr. Thomas Yager, Chief, FMCSA Driver and Carrier Operations Division; Office of Carrier, Driver and Vehicle Safety Standards; Telephone: 614–942–6477. Email: *MCPSD@dot.gov.*

SUPPLEMENTARY INFORMATION:

Legal Basis

FMCSA has authority under 49 U.S.C. 31136(e) and 31315 to grant exemptions from certain parts of the Federal Motor Carrier Safety Regulations. FMCSA must publish a notice of each exemption request in the **Federal Register** [49 CFR 381.315(a)].

Section 5206(b)(2)(A) of the FAST Act requires FMCSA to extend any exemption from any provision of the HOS regulations under 49 CFR part 395 that was in effect on the date of enactment of the Act for a period of 5 years from the date the exemption was granted. The exemption may be renewed. Because this action merely implements a statutory mandate that took effect on the date of enactment of the FAST Act, notice and comment are not required.

SC&RA Exemption

The SC&RA, a trade association, applied for a limited exemption from the mandatory rest break requirement of 49 CFR 395.3(a)(3)(ii) on behalf of all specialized carriers and drivers responsible for the transportation of loads exceeding standard legal weight and dimensional limits—oversize/overweight (OS/OW) loads—that require a permit issued by a government authority.

FMCSA reviewed SC&RA's application and the public comments and concluded that limiting the exemption to these OS/OW permitted loads would promote safety at least as effectively as the 30-minute break. Because hours in which an OS/OW load can travel are restricted by permit requirements, often those hours are in conflict with the timing of the required 30-minute rest break. A Notice of Final Determination granting the SC&RA exemption was published on June 18, 2015 [80 FR 34957].

The substance of the exemption is not affected by this extension. The exemption covers only the 30-minute rest break requirement [49 CFR 395.3(a)(3)(ii)]. The exemption is restricted to drivers of specialized loads moving in interstate commerce that exceed normal weight and dimensional limits—OS/OW loads—and require a permit issued by a government authority.

The FMCSA does not believe the safety record of any driver operating under this exemption will deteriorate. However, should deterioration in safety occur, FMCSA will take all steps necessary to protect the public interest, including revocation of the exemption. The FMCSA has the authority to terminate the exemption at any time the Agency has the data/information to conclude that safety is being compromised.

Issued on: November 3, 2016.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA–2016–0107; Notice 1]

The Goodyear Tire & Rubber Company, Receipt of Petition for Decision of Inconsequential Noncompliance

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Receipt of petition.

SUMMARY: The Goodyear Tire & Rubber Company (Goodyear), has determined that certain Goodyear tires do not fully comply with paragraph S6.5(f) of Federal Motor Vehicle Safety Standard (FMVSS) No. 119, *New pneumatic tires for motor vehicles with a GVWR of more than 4,536 kilograms (10,000 pounds) and motorcycles.* Goodyear filed a report dated September 27, 2016, pursuant to 49 CFR part 573, *Defect and Noncompliance Responsibility and Reports.* Goodyear then petitioned NHTSA under 49 CFR part 556 for a decision that the subject noncompliance is inconsequential as it relates to motor vehicle safety.

DATES: The closing date for comments on the petition is December 14, 2016.

ADDRESSES: Interested persons are invited to submit written data, views, and arguments on this petition. Comments must refer to the docket and notice number cited in the title of this notice and submitted by any of the following methods:

- *Mail:* Send comments by mail addressed to U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* Deliver comments by hand to U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590. The Docket Section is open on weekdays from 10 a.m. to 5 p.m. except Federal Holidays.
- *Electronically:* Submit comments electronically by logging onto the Federal Docket Management System (FDMS) Web site at *https://www.regulations.gov/.* Follow the online instructions for submitting comments.
- Comments may also be faxed to (202) 493–2251.

Comments must be written in the English language, and be no greater than 15 pages in length, although there is no limit to the length of necessary attachments to the comments. If comments are submitted in hard copy form, please ensure that two copies are provided. If you wish to receive confirmation that comments you have submitted by mail were received, please enclose a stamped, self-addressed postcard with the comments. Note that all comments received will be posted without change to *https://www.regulations.gov,* including any personal information provided.

All comments and supporting materials received before the close of business on the closing date indicated above will be filed in the docket and will be considered. All comments and supporting materials received after the closing date will also be filed and will be considered to the fullest extent possible.

When the petition is granted or denied, notice of the decision will also be published in the **Federal Register** pursuant to the authority indicated at the end of this notice.

All comments, background documentation, and supporting materials submitted to the docket may be viewed by anyone at the address and

times given above. The documents may also be viewed on the Internet at *https://www.regulations.gov* by following the online instructions for accessing the dockets. The docket ID number for this petition is shown in the heading of this notice.

DOT's complete Privacy Act Statement is available for review in a **Federal Register** notice published on April 11, 2000, (65 FR 19477–78).

SUPPLEMENTARY INFORMATION:

I. *Overview:* Pursuant to 49 U.S.C. 30118(d) and 30120(h) and their implementing regulations at 49 CFR part 556, Goodyear submitted a petition for an exemption from the notification and remedy requirements of 49 U.S.C. Chapter 301 on the basis that this noncompliance is inconsequential as it relates to motor vehicle safety.

This notice of receipt of Goodyear's petition is published under 49 U.S.C. 30118 and 30120 and does not represent any agency decision or other exercise of judgment concerning the merits of the petition.

II. *Tires Involved:* Affected are approximately 381 Goodyear G182 RSD size 11R22.5 LR G commercial truck tires manufactured between July 3, 2016, and August 20, 2016.

III. *Noncompliance:* Goodyear explains that because the sidewall markings on the reference side of the subject tires incorrectly identify the number of plies as ''TREAD 4 PLIES STEEL CORD'' instead of the correct labelling ''TREAD 5 PLIES STEEL CORD,'' the tires do not meet the requirements of paragraph S6.5(f) of FMVSS No. 119.

IV. *Rule Text:* Paragraph S6.5(f) of FMVSS No. 119 provides, in pertinent part:

> S6.5 Tire markings. Except as specified in this paragraph, each tire shall be marked on each sidewall with the information specified in paragraphs (a) through (j) of this section . . .
>
> (f) The actual number of plies and the composition of the ply cord material in the sidewall and, if different, in the tread area; . . .

V. *Summary of Goodyear's Petition:* Goodyear described the subject noncompliance and stated its belief that the noncompliance is inconsequential as it relates to motor vehicle safety.

In support of its petition, Goodyear submitted the following:

Goodyear believes this noncompliance is inconsequential to motor vehicle safety because these tires were manufactured as designed and meet or exceed all applicable Federal Motor Vehicles Safety performance standards. All of the sidewall markings related to tire service (load capacity, corresponding inflation pressure, etc.) are correct. Even though the tires were labeled incorrectly as ''TREAD 4 PLIES STEEL CORD'' on one side of the tires, the tires were manufactured with ''TREAD 5 PLIES STEEL CORD'', which is correctly marked on the opposite tire sidewall. The mislabeling of these tires is not a safety concern and also has no impact on the retreading and recycling industries. The affected tire mold has already been corrected and all future production will have the correct number of plies shown on both sidewalls.

Goodyear noted that NHTSA has previously granted petitions for the same noncompliance related to tire construction information on tires because of surveys that show most consumers do not base purchases on tire construction information found on the tire sidewall.

Goodyear concluded by expressing the belief that the subject noncompliance is inconsequential as it relates to motor vehicle safety, and that its petition to be exempted from providing notification of the noncompliance, as required by 49 U.S.C. 30118, and a remedy for the noncompliance, as required by 49 U.S.C. 30120, should be granted.

NHTSA notes that the statutory provisions (49 U.S.C. 30118(d) and 30120(h)) that permit manufacturers to file petitions for a determination of inconsequentiality allow NHTSA to exempt manufacturers only from the duties found in sections 30118 and 30120, respectively, to notify owners, purchasers, and dealers of a defect or noncompliance and to remedy the defect or noncompliance. Therefore, any decision on this petition only applies to the subject tires that Goodyear no longer controlled at the time it determined that the noncompliance existed. However, any decision on this petition does not relieve tire distributors and dealers of the prohibitions on the sale, offer for sale, or introduction or delivery for introduction into interstate commerce of the noncompliant tires under their control after Goodyear notified them that the subject noncompliance existed.

Authority: 49 U.S.C. 30118, 30120: Delegations of authority at 49 CFR 1.95 and 501.8.

Jeffrey M. Giuseppe,

Director, Office of Vehicle Safety Compliance.

[FR Doc. 2016–27275 Filed 11–10–16; 8:45 am]

BILLING CODE 4910–59–P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA–2016–0092; Notice 1]

Mercedes-Benz USA, LLC, Receipt of Petition for Decision of Inconsequential Noncompliance

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Receipt of petition.

SUMMARY: Mercedes-Benz USA, LLC (MBUSA), has determined that certain model year (MY) 2016 Mercedes GL-Class multipurpose passenger vehicles do not fully comply with paragraph S4.3(d) of Federal Motor Vehicle Safety Standard (FMVSS) No. 110, *Tire Selection and Rims and Motor Home/Recreation Vehicle Trailer Load Carrying Capacity Information for Motor Vehicles with a GVWR of 4,536 kilograms (10,000 pounds) or Less.* MBUSA filed a report dated August 12, 2016, and amended it on August 29, 2016, pursuant to 49 CFR part 573, *Defect and Noncompliance Responsibility and Reports.* MBUSA then petitioned NHTSA under 49 CFR part 556 for a decision that the subject noncompliance is inconsequential as it relates to motor vehicle safety.

DATES: The closing date for comments on the petition is December 14, 2016.

ADDRESSES: Interested persons are invited to submit written data, views, and arguments on this petition. Comments must refer to the docket and notice number cited in the title of this notice and be submitted by any of the following methods:

- *Mail:* Send comments by mail addressed to U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

The petition, supporting materials, and all comments received before the close of business on the closing date indicated above will be filed in the docket and will be considered. All comments and supporting materials received after the closing date will also be filed and will be considered to the extent possible.

When the petition is granted or denied, notice of the decision will also be published in the **Federal Register** pursuant to the authority indicated at the end of this notice.

All documents submitted to the docket may be viewed by anyone at the address and times given above. The documents may also be viewed on the Internet at *https://www.regulations.gov* by following the online instructions for accessing the dockets. The docket ID number for this petition is shown in the heading of this notice.

DOT's complete Privacy Act Statement is available for review in a **Federal Register** notice published on April 11, 2000, (65 FR 19477–78).

SUPPLEMENTARY INFORMATION:

I. *Overview:* Pursuant to 49 U.S.C. 30118(d) and 30120(h) and their implementing regulations at 49 CFR part 556, MBUSA submitted a petition for an exemption from the notification and remedy requirements of 49 U.S.C. Chapter 301 on the basis that this noncompliance is inconsequential as it relates to motor vehicle safety.

This notice of receipt of MBUSA's petition is published under 49 U.S.C. 30118 and 30120 and does not represent any agency decision or other exercise of judgement concerning the merits of the petition.

II. *Vehicles Involved:* Affected are 2,917 of the following MY 2016 Mercedes-Benz GL-Class multipurpose passenger vehicles manufactured between December 1, 2015, and February 5, 2016:

- GL 350 Bluetec 4Matic SUV (155 vehicles).
- GL 450 4Matic SUV (2,482 vehicles).
- GL 550 4Matic SUV (280 vehicles).

III. *Noncompliance:* MBUSA explains that the noncompliance is due to a labeling error. The subject vehicles are equipped with a spare tire, size T155/80 R19 114M; however, the tire information placard affixed to the vehicles' B-pillar incorrectly identifies the spare tire size as T165/90 R19 119M. The placard therefore does not comply with requirements specified in paragraph S4.3(d) of FMVSS No. 110.

IV. *Rule Text:* Paragraph S4.3 of FMVSS No. 110 states, in pertinent part:

S4.3 *Placard.* Each vehicle, except for a trailer or incomplete vehicle shall show the information specified in S4.3 (a) through (g), and may show, at the manufacturer's option, the information specified in S4.3 (h) through (i), on a placard permanently affixed to the driver's side B-pillar. In each vehicle without a driver's side B-pillar and two doors on the driver's side of the vehicle opening in the opposite directions, the placard shall be affixed on the forward edge of the rear side door . . .

(d) Tire size designation, indicated by the headings ''size'' or ''original tire size'' or ''original size,'' and ''spare tire'' or ''spare,'' for the tires installed at the time of the first purchase for purposes other than resale. For full size spare tires, the statement ''see above'' may, at the manufacturer's option replace the tire size designation. If no spare tire is provided, the word ''none'' must replace the tire size designation; . . .

V. *Summary of MBUSA's Petition:* MBUSA described the subject noncompliance and stated its belief that the noncompliance is inconsequential as it relates to motor vehicle safety.

In support of its petition, MBUSA stated the following:

(a) Both tire sizes can be used on the vehicle. The spare tire with the size of T165/90 R19 119M (the size stated on the B-pillar label) is equipped on older models produced before November 2015. The purpose of FMVSS No. 110 is to ''prevent tire overloading,'' *see* 40 CFR 571. S1, and no overloading will result from the incorrect label because either tire size (the one stated on the label or the one actually on the vehicle) can be used.

(b) The tire pressure is the same for both spare tire sizes. When checking the tire pressure for the spare tire, the customer will find the correct tire pressure values on the label. Again, no overloading will result from the incorrect label because the correct tire pressure values are provided.

(c) Information regarding the correct spare tire is available to the vehicle owner. The vehicles are equipped with an Operator's Manual which describes both spare tire sizes. Also, if a tire needs to be replaced on the spare wheel, the dealer Electronic Parts Catalogue (EPC) correctly specifies the proper tire part number. Additionally, further assistance regarding the correct spare tire can be provided by the customer assistance center.

(d) The presumption that the issue described above will have an inconsequential impact on safety is supported by field data: MBUSA is not aware of any customer complaints, accidents, or injuries alleged to have occurred as a result of this tire label discrepancy in the United States.

MBUSA concluded by expressing the belief that the subject noncompliance is inconsequential as it relates to motor vehicle safety, and that its petition to be exempted from providing notification of the noncompliance, as required by 49 U.S.C. 30118, and a remedy for the noncompliance, as required by 49 U.S.C. 30120, should be granted.

NHTSA notes that the statutory provisions (49 U.S.C. 30118(d) and 30120(h)) that permit manufacturers to file petitions for a determination of inconsequentiality allow NHTSA to exempt manufacturers only from the duties found in sections 30118 and 30120, respectively, to notify owners, purchasers, and dealers of a defect or noncompliance and to remedy the defect or noncompliance. Therefore, any decision on this petition only applies to the subject vehicles that MBUSA no longer controlled at the time it determined that the noncompliance existed. However, any decision on this petition does not relieve vehicle distributors and dealers of the prohibitions on the sale, offer for sale, or introduction or delivery for introduction into interstate commerce of the noncompliant vehicles under their control after MBUSA notified them that the subject noncompliance existed.

Authority: 49 U.S.C. 30118, 30120: delegations of authority at 49 CFR 1.95 and 501.8.

Jeffrey M. Giuseppe,

Director, Office of Vehicle Safety Compliance.

BILLING CODE 4910–59–P

DEPARTMENT OF TRANSPORTATION

Intelligent Transportation Systems Program Advisory Committee; Notice of Meeting

AGENCY: ITS Joint Program Office, Office of the Assistant Secretary for Research and Technology, U.S. Department of Transportation.

ACTION: Notice.

The Intelligent Transportation Systems (ITS) Program Advisory Committee (ITSPAC) will hold a meeting on December 7, 2016, from 8:30 a.m. to 4:00 p.m. (EST) in the Doubletree Crystal City Hotel, 300 Army Navy Drive, Arlington, VA 22202.

The ITSPAC, established under Section 5305 of Public Law 109–59, Safe, Accountable, Flexible, Efficient

Transportation Equity Act: A Legacy for Users, August 10, 2005, and re-established under Section 6007 of Public Law 114–94, Fixing America's Surface Transportation (FAST) Act, December 4, 2015, was created to advise the Secretary of Transportation on all matters relating to the study, development, and implementation of intelligent transportation systems. Through its sponsor, the ITS Joint Program Office (JPO), the ITSPAC makes recommendations to the Secretary regarding ITS Program needs, objectives, plans, approaches, content, and progress.

The following is a summary of the meeting tentative agenda: (1) Welcome, (2) Discussion of Potential Advice Memorandum Topics, (3) Summary and Adjourn.

The meeting will be open to the public, but limited space will be available on a first-come, first-served basis. Members of the public who wish to present oral statements at the meeting must submit a request to *ITSPAC@dot.gov,* not later than November 28, 2016.

Questions about the agenda or written comments may be submitted by U.S. Mail to: U.S. Department of Transportation, Office of the Assistant Secretary for Research and Technology, ITS Joint Program Office, Attention: Stephen Glasscock, 1200 New Jersey Avenue SE., HOIT, Washington, DC 20590 or faxed to (202) 493–2027. The ITS JPO requests that written comments be submitted not later than November 28, 2016.

Notice of this conference is provided in accordance with the Federal Advisory Committee Act and the General Services Administration regulations (41 CFR part 102–3) covering management of Federal advisory committees.

Issued in Washington, DC, on the 8th day of November 2016.

Stephen Glasscock,

Designated Federal Officer, ITS Joint Program Office.

BILLING CODE 4910–22–P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0011]

Agency Information Collection: Activity: Under OMB Review (Application for Reinstatement—Insurance Lapsed More Than 6 Months and Application for Reinstatement—Non Medical Comparative Health Statement)

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3521), this notice announces that the Veterans Benefits Administration (VBA), Department of Veterans Affairs, will submit the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden; it includes the actual data collection instrument.

DATES: Comments must be submitted on or before December 14, 2016.

ADDRESSES: Submit written comments on the collection of information through *www.Regulations.gov*, or to Office of Information and Regulatory Affairs, Office of Management and Budget, Attn: VA Desk Officer; 725 17th St. NW., Washington, DC 20503 or sent through electronic mail to *oira_submission@omb.eop.gov.* Please refer to ''OMB Control No. 2900–0011'' in any correspondence.

FOR FURTHER INFORMATION CONTACT: Cynthia Harvey-Pryor, Enterprise Records Service (005R1B), Department of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420, (202) 461–5870 or email *cynthia.harvey-pryor@va.gov.* Please refer to ''OMB Control No. 2900–0011.''

SUPPLEMENTARY INFORMATION:

Title: Application for Reinstatement—Insurance Lapsed More Than 6 Months (29–352) Application for Reinstatement—Non Medical Comparative Health Statement (29–353).

OMB Control Number: 2900–0011.

Type of Review: Revision of a currently approved collection.

Abstract: These forms are used by veterans who are requesting a reinstatement of their lapsed life insurance policies. The information requested on the forms is required by law, 38 U.S.C. Sections 6.79 and 8.22. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published Thursday, September 1, 2016, 81, FR 60413.

Affected Public: Individuals or households.

Estimated Annual Burden: 1,125 hours.

Estimated Average Burden per Respondent: 22.5 minutes.

Frequency of Response: On occasion.

Estimated Number of Respondents: 3000.

By direction of the Secretary.

Cynthia Harvey-Pryor,

Program Specialist, Office of Privacy and Records Management, Department of Veterans Affairs.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

42 CFR Parts 414, 416, 419, 482, 486, 488, and 495

[CMS–1656–FC and IFC]

RIN 0938–AS82

Medicare Program: Hospital Outpatient Prospective Payment and Ambulatory Surgical Center Payment Systems and Quality Reporting Programs; Organ Procurement Organization Reporting and Communication; Transplant Outcome Measures and Documentation Requirements; Electronic Health Record (EHR) Incentive Programs; Payment to Nonexcepted Off-Campus Provider-Based Department of a Hospital; Hospital Value-Based Purchasing (VBP) Program; Establishment of Payment Rates Under the Medicare Physician Fee Schedule for Nonexcepted Items and Services Furnished by an Off-Campus Provider-Based Department of a Hospital

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Final rule with comment period and interim final rule with comment period.

SUMMARY: This final rule with comment period revises the Medicare hospital outpatient prospective payment system (OPPS) and the Medicare ambulatory surgical center (ASC) payment system for CY 2017 to implement applicable statutory requirements and changes arising from our continuing experience with these systems. In this final rule with comment period, we describe the changes to the amounts and factors used to determine the payment rates for Medicare services paid under the OPPS and those paid under the ASC payment system. In addition, this final rule with comment period updates and refines the requirements for the Hospital Outpatient Quality Reporting (OQR) Program and the ASC Quality Reporting (ASCQR) Program.

Further, in this final rule with comment period, we are making changes to tolerance thresholds for clinical outcomes for solid organ transplant programs; to Organ Procurement Organizations (OPOs) definitions, outcome measures, and organ transport documentation; and to the Medicare and Medicaid Electronic Health Record Incentive Programs. We also are removing the HCAHPS Pain Management dimension from the Hospital Value-Based Purchasing (VBP) Program.

In addition, we are implementing section 603 of the Bipartisan Budget Act of 2015 relating to payment for certain items and services furnished by certain off-campus provider-based departments of a provider. In this document, we also are issuing an interim final rule with comment period to establish the Medicare Physician Fee Schedule payment rates for the nonexcepted items and services billed by a nonexcepted off-campus provider-based department of a hospital in accordance with the provisions of section 603.

DATES: *Effective date:* This final rule with comment period and the interim final rule with comment period are effective on January 1, 2017.

Comment period: To be assured consideration, comments on: (1) The payment classifications assigned to new Level II HCPCS codes and recognition of new and revised Category I and III CPT codes in this final rule with comment period; (2) the 20-hour a week minimum requirement for partial hospitalization services in this final rule with comment period; (3) the potential limitation on clinical service line expansion or volume of services by nonexcepted off-campus PBDs in this final rule with comment period; and (4) the Medicare Physician Fee Schedule (MPFS) payment rates for nonexcepted items and services furnished and billed by nonexcepted off-campus provider-based departments of hospitals in the interim final rule with comment period must be received at one of the addresses provided in the **ADDRESSES** section no later than 5 p.m. EST on December 31, 2016.

ADDRESSES: In commenting, please refer to file code CMS–1656–FC when commenting on the issues in the final rule with comment period and CMS–1656–IFC when commenting on issues in the interim final rule with comment period. Because of staff and resource limitations, we cannot accept comments by facsimile (FAX) transmission.

You may submit comments in one of four ways (no duplicates, please):

1. *Electronically.* You may (and we encourage you to) submit electronic comments on this regulation to *http://www.regulations.gov.* Follow the instructions under the ''submit a comment'' tab.

2. *By regular mail.* You may mail written comments to the following address ONLY:

Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–1656–FC or CMS–1656–IFC (as appropriate), P.O. Box 8013, Baltimore, MD 21244–1850.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By express or overnight mail.* You may send written comments via express or overnight mail to the following address ONLY:

Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–1656–FC or CMS–1656–IFC (as appropriate), Mail Stop C4–26–05, 7500 Security Boulevard, Baltimore, MD 21244–1850.

4. *By hand or courier.* If you prefer, you may deliver (by hand or courier) your written comments before the close of the comment period to either of the following addresses:

a. For delivery in Washington, DC—

Centers for Medicare & Medicaid Services, Department of Health and Human Services, Room 445–G, Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, DC 20201.

(Because access to the interior of the Hubert H. Humphrey Building is not readily available to persons without Federal Government identification, commenters are encouraged to leave their comments in the CMS drop slots located in the main lobby of the building. A stamp-in clock is available for persons wishing to retain a proof of filing by stamping in and retaining an extra copy of the comments being filed.)

b. For delivery in Baltimore, MD—

Centers for Medicare & Medicaid Services, Department of Health and Human Services, 7500 Security Boulevard, Baltimore, MD 21244–1850.

If you intend to deliver your comments to the Baltimore address, please call the telephone number (410) 786–7195 in advance to schedule your arrival with one of our staff members.

Comments mailed to the addresses indicated as appropriate for hand or courier delivery may be delayed and received after the comment period.

For information on viewing public comments, we refer readers to the beginning of the **SUPPLEMENTARY INFORMATION** section.

SUPPLEMENTARY INFORMATION:

Inspection of Public Comments: All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. We post all comments received before the close of the comment period on the following Web site as soon as possible after they have been received: *http://www.regulations.gov/*. Follow the search instructions on that Web site to view public comments.

Comments received timely will also be available for public inspection, generally beginning approximately 3 weeks after publication of the rule, at the headquarters of the Centers for Medicare & Medicaid Services, 7500 Security Boulevard, Baltimore, MD 21244, on Monday through Friday of each week from 8:30 a.m. to 4:00 p.m. EST. To schedule an appointment to view public comments, phone 1–800–743–3951.

Electronic Access

This **Federal Register** document is also available from the **Federal Register** online database through *Federal Digital System (FDsys),* a service of the U.S. Government Printing Office. This database can be accessed via the internet at *https://www.gpo.gov/fdsys/.*

Addenda Available Only Through the Internet on the CMS Web Site

In the past, a majority of the Addenda referred to in our OPPS/ASC proposed and final rules were published in the **Federal Register** as part of the annual rulemakings. However, beginning with the CY 2012 OPPS/ASC proposed rule, all of the Addenda no longer appear in the **Federal Register** as part of the annual OPPS/ASC proposed and final rules to decrease administrative burden and reduce costs associated with publishing lengthy tables. Instead, these Addenda are published and available only on the CMS Web site. The Addenda relating to the OPPS are available at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html.* The Addenda relating to the ASC payment system are available at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html.*

I. Summary and Background

A. Executive Summary of This Document

1. Purpose

In this document, we are updating the payment policies and payment rates for services furnished to Medicare beneficiaries in hospital outpatient departments (HOPDs) and ambulatory surgical centers (ASCs) beginning January 1, 2017. Section 1833(t) of the Social Security Act (the Act) requires us to annually review and update the payment rates for services payable under the Hospital Outpatient Prospective Payment System (OPPS). Specifically, section 1833(t)(9)(A) of the Act requires the Secretary to review certain components of the OPPS not less often than annually, and to revise the groups, relative payment weights, and other adjustments that take into account changes in medical practices, changes in technologies, and the addition of new services, new cost data, and other relevant information and factors. In addition, under section 1833(i) of the Act, we annually review and update the ASC payment rates. We describe these and various other statutory authorities in the relevant sections of this final rule with comment period. In addition, this final rule with comment period updates and refines the requirements for the Hospital Outpatient Quality Reporting (OQR) Program and the ASC Quality Reporting (ASCQR) Program.

In addition, we are making changes to the conditions for coverage (CfCs) for organ procurement organizations (OPOs); revisions to the outcome requirements for solid organ transplant programs, transplant enforcement, and for transplant documentation requirements; a technical correction to enforcement provisions for organ transplant centers; modifications to the Medicare and Medicaid Electronic Health Record (EHR) Incentive Programs to reduce hospital administrative burden and to allow hospitals to focus more on patient care; and the removal of the HCAHPS Pain Management dimension from the Hospital Value-Based Purchasing (VBP) Program.

Further, we are implementing section 603 of the Bipartisan Budget Act of 2015 relating to payment for nonexcepted items and services furnished by nonexcepted off-campus provider-based departments (PBDs) of a hospital. In conjunction with implementation of section 603 in this final rule with comment period, we are issuing in this **Federal Register** document an interim final rule with comment period that establishes payment rates under the MPFS for nonexcepted items and services furnished by nonexcepted off-campus PBDs of hospitals.

2. Summary of the Major Provisions

- *OPPS Update:* For CY 2017, we are increasing the payment rates under the OPPS by an Outpatient Department (OPD) fee schedule increase factor of 1.65 percent. This increase factor is based on the hospital inpatient market basket percentage increase of 2.7 percent for inpatient services paid under the hospital inpatient prospective payment system (IPPS), minus the multifactor productivity (MFP) adjustment of 0.3 percentage point, and minus a 0.75 percentage point adjustment required by the Affordable Care Act. Based on this update, we estimate that total payments to OPPS providers (including beneficiary cost-sharing and estimated changes in enrollment, utilization, and case-mix), for CY 2017 will be approximately $773 million, an increase of approximately $5.0 billion compared to estimated CY 2016 OPPS payments.

We are continuing to implement the statutory 2.0 percentage point reduction in payments for hospitals failing to meet the hospital outpatient quality reporting requirements, by applying a reporting factor of 0.980 to the OPPS payments and copayments for all applicable services.

- *Rural Adjustment:* We are continuing the adjustment of 7.1 percent to the OPPS payments to certain rural sole community hospitals (SCHs), including essential access community hospitals (EACHs). This adjustment applies to all services paid under the OPPS, excluding separately payable drugs and biologicals, devices paid under the pass-through payment policy, and items paid at charges reduced to cost.

- *Cancer Hospital Payment Adjustment:* For CY 2017, we are continuing to provide additional payments to cancer hospitals so that the cancer hospital's payment-to-cost ratio (PCR) after the additional payments is equal to the weighted average PCR for the other OPPS hospitals using the most recently submitted or settled cost report data. Based on those data, a target PCR of 0.91 will be used to determine the CY 2017 cancer hospital payment adjustment to be paid at cost report settlement. That is, the payment adjustments will be the additional payments needed to result in a PCR equal to 0.91 for each cancer hospital.

- *Comprehensive APCs:* For CY 2017, we are not making extensive changes to the already established methodology used for C–APCs. However, we are creating 25 new C–APCs that meet the previously established criteria, which, when combined with the existing 37 C–APCs, will bring the total number to 62 C–APCs as of January 1, 2017.

- *Chronic Care Management (CCM):* For CY 2017, we are making some minor changes to certain CCM scope-of-service elements. We refer readers to the CY 2017 MPFS final rule with comment period for a detailed discussion of these changes to the scope of service elements for CCM. We are applying these changes to CCM furnished to hospital outpatients.

- *Device-Intensive Procedures:* For CY 2017, we are finalizing our policy of determining the payment rate for any device-intensive procedure that is assigned to an APC with fewer than 100 total claims for all procedures in the APC to be based on the median cost instead of the geometric mean cost. We believe that this approach will mitigate significant year-to-year payment rate fluctuations while preserving accurate claims-data-based payment rates for low volume device-intensive procedures. In addition, we are revising the device intensive calculation methodology and calculating the device offset amount at the HCPCS code level rather than at the APC level to ensure that device intensive status is properly assigned to all device-intensive procedures.

- *Outpatient Laboratory Tests:* For CY 2017, we are discontinuing the use of the ''L1'' modifier to identify unrelated laboratory tests on claims. In addition, we are expanding the laboratory packaging exclusion that currently

applies to Molecular Pathology tests to all laboratory tests designated as advanced diagnostic laboratory tests (ADLTs) that meet the criteria of section 1834A(d)(5)(A) of the Act.

• *Packaging Policies:* The OPPS currently packages many categories of items and services that are typically provided as part of the outpatient hospital service (for example, operating and recovery room, anesthesia, among others). Packaging encourages hospital efficiency, flexibility, and long-term cost containment, and it also promotes the stability of payment for services over time. In CY 2014 and 2015, we added several new categories of packaged items and services. Among these were laboratory tests, ancillary services, services described by add-on codes, and drugs used in a diagnostic test or surgical procedure. For CY 2017, we are aligning the packaging logic for all of the conditional packaging status indicators so that packaging would occur at the claim level (instead of based on the date of service) to promote consistency and ensure that items and services that are provided during a hospital stay that may span more than one day are appropriately packaged according to OPPS packaging policies.

• *Payment Modifier for X-Ray Films:* Section 502(b) of Division O, Title V of the Consolidated Appropriations Act, 2016 (Pub. L. 114–113) amended section 1833(t)(16) of the Act by adding new subparagraph (F). New section 1833(t)(16)(F)(i) of the Act provides that, effective for services furnished during 2017 or any subsequent year, the payment under the OPPS for imaging services that are X-rays taken using film (including the X-ray component of a packaged service) that would otherwise be made under the OPPS (without application of this paragraph and before application of any other adjustment) shall be reduced by 20 percent. We are requiring that, effective for services furnished on or after January 1, 2017, hospitals are required to use a modifier on claims for X-rays that are taken using film. The use of this modifier will result in a 20-percent payment reduction for the X-ray service, as specified under section 1833(t)(16)(F)(i) of the Act, of the determined OPPS payment amount (without application of paragraph (F) and before any other adjustments under section 1833(t)).

• *Payment for Nonexcepted Items and Services Furnished by Nonexcepted Off-Campus Departments of a Provider:* We are implementing section 603 of the Bipartisan Budget Act of 2015 (Pub. L. 114–74). This provision requires that certain items and services furnished in certain off-campus PBDs shall not be considered covered OPD services for purposes of OPPS payment and those nonexcepted items and services will instead be paid ''under the applicable payment system'' beginning January 1, 2017. We are finalizing, with modification, the policies we proposed relating to which off-campus PBDs and which items and services furnished by such off-campus PBDs may be excepted from application of payment changes under this provision.

In addition, we are establishing that the Medicare Physician Fee Schedule (MPFS) will be the ''applicable payment system'' for the majority of the nonexcepted items and services furnished by nonexcepted off-campus PBDs. We are establishing new site-of-service payment rates under the MPFS to pay nonexcepted off-campus PBDs for the furnishing of nonexcepted items and services. These nonexcepted items and services must be reported on the institutional claim form and identified with a newly established claims processing modifier.

• *Ambulatory Surgical Center Payment Update:* For CY 2017, we are increasing payment rates under the ASC payment system by 1.9 percent for ASCs that meet the quality reporting requirements under the ASCQR Program. This increase is based on a projected CPI–U update of 2.2 percent minus a multifactor productivity adjustment required by the Affordable Care Act of 0.3 percentage point. Based on this update, we estimate that total payments to ASCs (including beneficiary cost-sharing and estimated changes in enrollment, utilization, and case-mix), for CY 2017 will be approximately $4,478 million, an increase of approximately $177 million compared to estimated CY 2016 Medicare payments.

• *Hospital Outpatient Quality Reporting (OQR) Program:* For the Hospital OQR Program, we are establishing measures and policies for the CY 2018 payment determination, the CY 2019 payment determination and the CY 2020 payment determination and subsequent years. For the CY 2018 payment determination and subsequent years, we are finalizing, as proposed, that we will publicly display data on the *Hospital Compare* Web site, or other CMS Web site, as soon as possible after measure data have been submitted to CMS. In addition, we are finalizing, as proposed, that hospitals will generally have approximately 30 days to preview their data. Lastly, we are finalizing, as proposed, that we also will announce the timeframes for the preview period on a CMS Web site and/or on our applicable listservs. For the CY 2019 payment determination and subsequent years, we are finalizing, as proposed, an extension of the time for filing extraordinary circumstances extensions or exemptions (ECE) requests from 45 days to 90 days from the date that the extraordinary circumstance occurred. For the CY 2020 payment determination and subsequent years, we are finalizing, as proposed, a total of seven measures: Two claims-based measures and five Outpatient and Ambulatory Surgery Consumer Assessment of Healthcare Providers and Systems (OAS CAHPS) Survey-based measures. The two claims-based measures are: (1) OP–35: Admissions and Emergency Department Visits for Patients Receiving Outpatient Chemotherapy and (2) OP–36: Hospital Visits after Hospital Outpatient Surgery (NQF #2687). The five survey-based measures are: (1) OP–37a: OAS CAHPS—About Facilities and Staff; (2) OP–37b: OAS CAHPS—Communication About Procedure; (3) OP–37c: OAS CAHPS—Preparation for Discharge and Recovery; (4) OP–37d: OAS CAHPS—Overall Rating of Facility; and (5) OP–37e: OAS CAHPS—Recommendation of Facility.

• *Ambulatory Surgical Center Quality Reporting (ASCQR) Program:* For the ASCQR Program, we are finalizing our proposals for the CY 2018 payment determination, the CY 2019 payment determination, and the CY 2020 payment determination and subsequent years. For the CY 2018 payment determination and subsequent years, we are finalizing, as proposed, that we will publicly display data on the *Hospital Compare* Web site, or other CMS Web site, as soon as possible after measure data have been submitted to CMS. In addition, we are finalizing, as proposed, that ASCs will generally have approximately 30 days to preview their data. Lastly, we are finalizing, as proposed, that we will announce the timeframes for the preview period on a CMS Web site and/or on our applicable listservs. For the CY 2019 payment determination and subsequent years, we are finalizing our proposal to change the submission deadline to May 15 for all data submitted via a CMS Web-based tool. We also are finalizing, as proposed, the extension of the submission deadline for filing extraordinary circumstances extensions or exemptions (ECE) requests from 45 days to 90 days. For the CY 2020 payment determination and subsequent years, we are finalizing, as proposed, a total of seven measures: Two measures collected via a CMS Web-based tool and five Outpatient and Ambulatory Surgery Consumer Assessment of Healthcare Providers and

Systems (OAS CAHPS) Survey-based measures. The two measures that require data to be submitted directly to CMS via a CMS Web-based tool are: (1) ASC–13: Normothermia Outcome and (2) ASC–14: Unplanned Anterior Vitrectomy. The five survey-based measures are: (1) ASC–15a: OAS CAHPS—About Facilities and Staff; (2) ASC–15b: OAS CAHPS—Communication About Procedure; (3) ASC–15c: OAS CAHPS—Preparation for Discharge and Recovery; (4) ASC–15d: OAS CAHPS—Overall Rating of Facility; and (5) ASC–15e: OAS CAHPS—Recommendation of Facility.

• *Hospital Value-Based Purchasing (VBP) Program Update:* Section 1886(o) of the Act requires the Secretary to establish a Hospital VBP Program under which value-based incentive payments are made in a fiscal year to hospitals based on their performance on measures established for a performance period for such fiscal year. In this final rule with comment period, we are removing the HCAHPS Pain Management dimension from the Hospital VBP Program, beginning with the FY 2018 program year.

• *Medicare and Medicaid Electronic Health Record (EHR) Incentive Programs:* In this final rule, we are making changes to the objectives and measures of meaningful use for Modified Stage 2 and Stage 3 starting with the EHR reporting periods in CY 2017. Under both Modified Stage 2 in 2017 and Stage 3 in 2017 and 2018, for eligible hospitals and CAHs attesting to CMS, we are eliminating the Clinical Decision Support (CDS) and Computerized Provider Order Entry (CPOE) objectives and measures, and lowering the reporting thresholds for a subset of the remaining objectives and measures, generally to the Modified Stage 2 thresholds. The reduction of measure thresholds is intended to respond to input we have received from hospitals, hospital associations, health systems, and vendors expressing concerns about the established measures. The revised requirements focus on reducing hospital administrative burden, allowing eligible hospitals and CAHs attesting to CMS to focus more on providing quality patient care, as well as focus on updating and optimizing CEHRT functionalities to sufficiently meet the requirements of the EHR Incentive Program and prepare for Stage 3 of meaningful use. Based on the public comments we received, we are finalizing a policy that these changes to the objectives and measures apply for all eligible hospitals and CAHs that attest to CMS, including eligible hospitals and CAHs that are eligible to participate in both the Medicare and Medicaid EHR Incentive Programs.

In addition, we are changing the EHR reporting period in CY 2016 and 2017 for eligible professionals, eligible hospitals, and CAHs; reporting requirements for eligible professionals, eligible hospitals, and CAHs that are new participants in 2017; and the policy on measure calculations for actions outside the EHR reporting period. Finally, we are making a one-time significant hardship exception from the 2018 payment adjustment for certain eligible professionals who are new participants in the EHR Incentive Program in 2017 and are transitioning to the Merit-Based Incentive Payment System in 2017. We believe these changes are responsive to additional stakeholder feedback received through both correspondence and in-person meetings and will result in continued advancement of certified EHR technology utilization, particularly among those eligible professionals, eligible hospitals and CAHs that have not previously achieved meaningful use, and result in a program more focused on supporting interoperability and data sharing for all participants under the Medicare and Medicaid EHR Incentive Programs.

• *Transplant Performance Thresholds:* With respect to solid organ transplant programs, we are restoring the effective tolerance range for clinical outcomes that was allowed in our original 2007 rule. These outcome requirements in the Medicare Conditions of Participation (CoPs) have been affected by the nationwide improvement in transplant outcomes, making it now more difficult for transplant programs to maintain compliance with, in effect, increasingly stringent Medicare standards for patient and graft survival. We expect that our policies will increase access to organ transplants while continuing to protect Medicare beneficiaries.

• *Organ Procurement Organizations (OPOs) Changes:* In this final rule with comment period, we are: Changing the current ''eligible death'' definition to be consistent with the OPTN definition; modifying CMS current outcome measures to be consistent with yield calculations currently utilized by the SRTR; and modifying current requirements for documentation of donor information which is sent to the transplant center along with the organ.

3. Summary of Costs and Benefits

In sections XXIII. and XXIV. of this final rule with comment period, we set forth a detailed analysis of the regulatory and Federalism impacts that these changes will have on affected entities and beneficiaries. Key estimated impacts are described below.

a. Impacts of the OPPS Update

(1) Impacts of All OPPS Changes

Table 52 in section XXIII. of this final rule with comment period displays the distributional impact of all the OPPS changes on various groups of hospitals and CMHCs for CY 2017 compared to all estimated OPPS payments in CY 2016. We estimate that the policies in this final rule with comment period will result in a 1.7 percent overall increase in OPPS payments to providers. We estimate that total OPPS payments for CY 2017, including beneficiary cost-sharing, to the approximate 3,906 facilities paid under the OPPS (including general acute care hospitals, children's hospitals, cancer hospitals, and CMHCs) will increase by approximately $773 million compared to CY 2016 payments, excluding our estimated changes in enrollment, utilization, and case-mix.

We estimated the isolated impact of our OPPS policies on CMHCs because CMHCs are only paid for partial hospitalization services under the OPPS. Continuing the provider-specific structure that we adopted beginning in CY 2011 and basing payment fully on the type of provider furnishing the service, we estimate a 15.0 percent decrease in CY 2017 payments to CMHCs relative to their CY 2016 payments.

(2) Impacts of the Updated Wage Indexes

We estimate that our update of the wage indexes based on the FY 2017 IPPS final rule wage indexes results in no change for urban hospitals and a 0.3 percent increase for rural hospitals under the OPPS. These wage indexes include the continued implementation of the OMB labor market area delineations based on 2010 Decennial Census data.

(3) Impacts of the Rural Adjustment and the Cancer Hospital Payment Adjustment

There are no significant impacts of our CY 2017 payment policies for hospitals that are eligible for the rural adjustment or for the cancer hospital payment adjustment. We are not making any change in policies for determining the rural and cancer hospital payment adjustments, and the adjustment amounts do not significantly impact the budget neutrality adjustments for these policies.

(4) Impacts of the Proposed OPD Fee Schedule Increase Factor

We estimate that, for most hospitals, the application of the OPD fee schedule increase factor of 1.65 percent to the conversion factor for CY 2017 will mitigate the impacts of the budget neutrality adjustments. As a result of the OPD fee schedule increase factor and other budget neutrality adjustments, we estimate that rural and urban hospitals will experience increases of approximately 1.7 percent for urban hospitals and 2.2 percent for rural hospitals. Classifying hospitals by teaching status or type of ownership suggests that these hospitals will receive similar increases.

b. Impacts of the ASC Payment Update

For impact purposes, the surgical procedures on the ASC list of covered procedures are aggregated into surgical specialty groups using CPT and HCPCS code range definitions. The percentage change in estimated total payments by specialty groups under the CY 2017 payment rates compared to estimated CY 2016 payment rates ranges between 12 percent for cardiovascular system procedures and −15 percent for hemic and lymphatic system procedures.

c. Impacts of the Hospital OQR Program

We do not expect our CY 2017 policies to significantly affect the number of hospitals that do not receive a full annual payment update.

d. Impacts of the ASCQR Program

We do not expect our CY 2017 policies to significantly affect the number of ASCs that do not receive a full annual payment update.

e. Impacts for Implementation of Section 603 of the Bipartisan Budget Act of 2015

We estimate that implementation of section 603 of Public Law 114–74 in this interim final rule with comment period will reduce Medicare Part B expenditures by approximately $50 million in CY 2017, relative to a baseline where section 603 was not implemented in CY 2017. This estimate is a significantly lower impact than the $330 million reduction estimated for the CY 2017 OPPS proposed rule. This lower impact estimate is primarily a result of changes in technical assumptions regarding the impact of this provision, not a result of the change in payment policy.

B. Legislative and Regulatory Authority for the Hospital OPPS

When Title XVIII of the Social Security Act was enacted, Medicare payment for hospital outpatient services was based on hospital-specific costs. In an effort to ensure that Medicare and its beneficiaries pay appropriately for services and to encourage more efficient delivery of care, the Congress mandated replacement of the reasonable cost-based payment methodology with a prospective payment system (PPS). The Balanced Budget Act of 1997 (BBA) (Pub. L. 105–33) added section 1833(t) to the Act authorizing implementation of a PPS for hospital outpatient services. The OPPS was first implemented for services furnished on or after August 1, 2000. Implementing regulations for the OPPS are located at 42 CFR parts 410 and 419.

The Medicare, Medicaid, and SCHIP Balanced Budget Refinement Act of 1999 (BBRA) (Pub. L. 106–113) made major changes in the hospital OPPS. The following Acts made additional changes to the OPPS: The Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act of 2000 (BIPA) (Pub. L. 106–554); the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA) (Pub. L. 108–173); the Deficit Reduction Act of 2005 (DRA) (Pub. L. 109–171), enacted on February 8, 2006; the Medicare Improvements and Extension Act under Division B of Title I of the Tax Relief and Health Care Act of 2006 (MIEA–TRHCA) (Pub. L. 109–432), enacted on December 20, 2006; the Medicare, Medicaid, and SCHIP Extension Act of 2007 (MMSEA) (Pub. L. 110–173), enacted on December 29, 2007; the Medicare Improvements for Patients and Providers Act of 2008 (MIPPA) (Pub. L. 110–275), enacted on July 15, 2008; the Patient Protection and Affordable Care Act (Pub. L. 111–148), enacted on March 23, 2010, as amended by the Health Care and Education Reconciliation Act of 2010 (Pub. L. 111–152), enacted on March 30, 2010 (these two public laws are collectively known as the Affordable Care Act); the Medicare and Medicaid Extenders Act of 2010 (MMEA, Pub. L. 111–309); the Temporary Payroll Tax Cut Continuation Act of 2011 (TPTCCA, Pub. L. 112–78), enacted on December 23, 2011; the Middle Class Tax Relief and Job Creation Act of 2012 (MCTRJCA, Pub. L. 112–96), enacted on February 22, 2012; the American Taxpayer Relief Act of 2012 (Pub. L. 112–240), enacted January 2, 2013; the Pathway for SGR Reform Act of 2013 (Pub. L. 113–67) enacted on December 26, 2013; the Protecting Access to Medicare Act of 2014 (PAMA, Pub. L. 113–93), enacted on March 27, 2014; the Medicare Access and CHIP Reauthorization Act (MACRA) of 2015 (Pub. L. 114–10), enacted April 16, 2015; the Bipartisan Budget Act of 2015 (Pub. L. 114–74), enacted November 2, 2015; and the Consolidated Appropriations Act, 2016 (Pub. L. 114–113), enacted on December 18, 2015.

Under the OPPS, we pay for hospital Part B services on a rate-per-service basis that varies according to the APC group to which the service is assigned. We use the Healthcare Common Procedure Coding System (HCPCS) (which includes certain Current Procedural Terminology (CPT) codes) to identify and group the services within each APC. The OPPS includes payment for most hospital outpatient services, except those identified in section I.C. of this final rule with comment period. Section 1833(t)(1)(B) of the Act provides for payment under the OPPS for hospital outpatient services designated by the Secretary (which includes partial hospitalization services furnished by CMHCs), and certain inpatient hospital services that are paid under Medicare Part B.

The OPPS rate is an unadjusted national payment amount that includes the Medicare payment and the beneficiary copayment. This rate is divided into a labor-related amount and a nonlabor-related amount. The labor-related amount is adjusted for area wage differences using the hospital inpatient wage index value for the locality in which the hospital or CMHC is located.

All services and items within an APC group are comparable clinically and with respect to resource use (section 1833(t)(2)(B) of the Act). In accordance with section 1833(t)(2) of the Act, subject to certain exceptions, items and services within an APC group cannot be considered comparable with respect to the use of resources if the highest median cost (or mean cost, if elected by the Secretary) for an item or service in the APC group is more than 2 times greater than the lowest median cost (or mean cost, if elected by the Secretary) for an item or service within the same APC group (referred to as the ''2 times rule''). In implementing this provision, we generally use the cost of the item or service assigned to an APC group.

For new technology items and services, special payments under the OPPS may be made in one of two ways. Section 1833(t)(6) of the Act provides for temporary additional payments, which we refer to as ''transitional pass-through payments,'' for at least 2 but not more than 3 years for certain drugs, biological agents, brachytherapy devices used for the treatment of cancer, and categories of other medical devices. For new technology services that are not

eligible for transitional pass-through payments, and for which we lack sufficient clinical information and cost data to appropriately assign them to a clinical APC group, we have established special APC groups based on costs, which we refer to as New Technology APCs. These New Technology APCs are designated by cost bands which allow us to provide appropriate and consistent payment for designated new procedures that are not yet reflected in our claims data. Similar to pass-through payments, an assignment to a New Technology APC is temporary; that is, we retain a service within a New Technology APC until we acquire sufficient data to assign it to a clinically appropriate APC group.

C. Excluded OPPS Services and Hospitals

Section 1833(t)(1)(B)(i) of the Act authorizes the Secretary to designate the hospital outpatient services that are paid under the OPPS. While most hospital outpatient services are payable under the OPPS, section 1833(t)(1)(B)(iv) of the Act excludes payment for ambulance, physical and occupational therapy, and speech-language pathology services, for which payment is made under a fee schedule. It also excludes screening mammography, diagnostic mammography, and effective January 1, 2011, an annual wellness visit providing personalized prevention plan services. The Secretary exercises the authority granted under the statute to also exclude from the OPPS certain services that are paid under fee schedules or other payment systems. Such excluded services include, for example, the professional services of physicians and nonphysician practitioners paid under the Medicare Physician Fee Schedule (MPFS); certain laboratory services paid under the Clinical Laboratory Fee Schedule (CLFS); services for beneficiaries with end-stage renal disease (ESRD) that are paid under the ESRD prospective payment system; and services and procedures that require an inpatient stay that are paid under the hospital IPPS. In addition, section 1833(t)(1)(B)(v) of the Act authorizes that applicable items and services furnished by nonexcepted off-campus provider-based departments of a hospital on or after January 1, 2017, will not be considered covered outpatient department services as defined under section 1833(t)(1)(B) of the Act for purposes of payment under the OPPS. We set forth the services that are excluded from payment under the OPPS in regulations at 42 CFR 419.22, which was amended by adding paragraph (v) to implement exclusion of items and services furnished by nonexcepted off-campus provider-based departments from the definition of covered outpatient department services.

Under § 419.20(b) of the regulations, we specify the types of hospitals that are excluded from payment under the OPPS. These excluded hospitals include: Critical access hospitals (CAHs); hospitals located in Maryland and paid under the Maryland All-Payer Model; hospitals located outside of the 50 States, the District of Columbia, and Puerto Rico; and Indian Health Service (IHS) hospitals.

D. Prior Rulemaking

On April 7, 2000, we published in the **Federal Register** a final rule with comment period (65 FR 18434) to implement a prospective payment system for hospital outpatient services. The hospital OPPS was first implemented for services furnished on or after August 1, 2000. Section 1833(t)(9)(A) of the Act requires the Secretary to review certain components of the OPPS, not less often than annually, and to revise the groups, relative payment weights, and other adjustments that take into account changes in medical practices, changes in technologies, and the addition of new services, new cost data, and other relevant information and factors.

Since initially implementing the OPPS, we have published final rules in the **Federal Register** annually to implement statutory requirements and changes arising from our continuing experience with this system. These rules can be viewed on the CMS Web site at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html*.

E. Advisory Panel on Hospital Outpatient Payment (the HOP Panel or the Panel)

1. Authority of the Panel

Section 1833(t)(9)(A) of the Act, as amended by section 201(h) of Public Law 106–113, and redesignated by section 202(a)(2) of Public Law 106–113, requires that we consult with an external advisory panel of experts to annually review the clinical integrity of the payment groups and their weights under the OPPS. In CY 2000, based on section 1833(t)(9)(A) of the Act, the Secretary established the Advisory Panel on Ambulatory Payment Classification Groups (APC Panel) to fulfill this requirement. In CY 2011, based on section 222 of the PHS Act which gives discretionary authority to the Secretary to convene advisory councils and committees, the Secretary expanded the panel's scope to include the supervision of hospital outpatient therapeutic services in addition to the APC groups and weights. To reflect this new role of the panel, the Secretary changed the panel's name to the Advisory Panel on Hospital Outpatient Payment (the HOP Panel, or the Panel). The Panel is not restricted to using data compiled by CMS, and in conducting its review, it may use data collected or developed by organizations outside the Department.

2. Establishment of the Panel

On November 21, 2000, the Secretary signed the initial charter establishing the HOP Panel, and at that time named the APC Panel. This expert panel is composed of appropriate representatives of providers (currently employed full-time, not as consultants, in their respective areas of expertise), reviews clinical data, and advises CMS about the clinical integrity of the APC groups and their payment weights. Since CY 2012, the Panel also is charged with advising the Secretary on the appropriate level of supervision for individual hospital outpatient therapeutic services. The Panel is technical in nature, and it is governed by the provisions of the Federal Advisory Committee Act (FACA). The current charter specifies, among other requirements, that: The Panel continues to be technical in nature; is governed by the provisions of the FACA; may convene up to three meetings per year; has a Designated Federal Official (DFO); and is chaired by a Federal Official designated by the Secretary. The Panel's charter was amended on November 15, 2011, renaming the Panel and expanding the Panel's authority to include supervision of hospital outpatient therapeutic services and to add Critical Access Hospital (CAH) representation to its membership. The current charter was renewed on November 6, 2014 (80 FR 23009) and the number of panel members was revised from up to 19 to up to 15 members.

The current Panel membership and other information pertaining to the Panel, including its charter, **Federal Register** notices, membership, meeting dates, agenda topics, and meeting reports, can be viewed on the CMS Web site at: *https://www.cms.gov/Regulations-and-Guidance/Guidance/FACA/AdvisoryPanelonAmbulatoryPaymentClassificationGroups.html*.

3. Panel Meetings and Organizational Structure

The Panel has held multiple meetings, with the last meeting taking place on August 22, 2016. Prior to each meeting,

we publish a notice in the **Federal Register** to announce the meeting and, when necessary, to solicit nominations for Panel membership, to announce new members and to announce any other changes that the public should be aware of. Beginning in CY 2017, we will transition to one meeting per year, which will be scheduled in the summer (81 FR 31941).

The Panel has established an operational structure that, in part, currently includes the use of three subcommittees to facilitate its required review process. The three current subcommittees are the Data Subcommittee, the Visits and Observation Subcommittee, and the Subcommittee for APC Groups and Status Indicator (SI) Assignments. The Data Subcommittee is responsible for studying the data issues confronting the Panel and for recommending options for resolving them. The Visits and Observation Subcommittee reviews and makes recommendations to the Panel on all technical issues pertaining to observation services and hospital outpatient visits paid under the OPPS (for example, APC configurations and APC relative payment weights). The Subcommittee for APC Groups and SI Assignments advises the Panel on the following issues: The appropriate status indicators to be assigned to HCPCS codes, including but not limited to whether a HCPCS code or a category of codes should be packaged or separately paid; and the appropriate APC assignment of HCPCS codes regarding services for which separate payment is made.

Each of these subcommittees was established by a majority vote from the full Panel during a scheduled Panel meeting, and the Panel recommended at the August 22, 2016 meeting that the subcommittees continue. We accepted this recommendation.

Discussions of the other recommendations made by the Panel at the March 14, 2016 and August 22, 2016 Panel meetings are included in the sections of this final rule with comment period that are specific to each recommendation. For discussions of earlier Panel meetings and recommendations, we refer readers to previously published OPPS/ASC proposed and final rules, the CMS Web site mentioned earlier in this section, and the FACA database at: *http://facadatabase.gov/*.

F. Public Comments Received on the CY 2016 OPPS/ASC Final Rule With Comment Period

We received 25 timely pieces of correspondence on the CY 2016 OPPS/ASC final rule with comment period that appeared in the **Federal Register** on November 13, 2015 (80 FR 70298), some of which contained comments on the interim APC assignments and/or status indicators of new or replacement Level II HCPCS codes (identified with comment indicator ''NI'' in OPPS Addendum B, ASC Addendum AA, and ASC Addendum BB to that final rule). Summaries of the public comments on new or replacement Level II HCPCS codes are set forth in this CY 2017 final rule with comment period under the appropriate subject matter headings.

II. Updates Affecting OPPS Payments

A. Recalibration of APC Relative Payment Weights

1. Database Construction

a. Database Source and Methodology

Section 1833(t)(9)(A) of the Act requires that the Secretary review not less often than annually and revise the relative payment weights for APCs. In the April 7, 2000 OPPS final rule with comment period (65 FR 18482), we explained in detail how we calculated the relative payment weights that were implemented on August 1, 2000 for each APC group.

In the CY 2017 OPPS/ASC proposed rule (81 FR 45615), for CY 2017, we proposed to recalibrate the APC relative payment weights for services furnished on or after January 1, 2017, and before January 1, 2018 (CY 2017), using the same basic methodology that we described in the CY 2016 OPPS/ASC final rule with comment period (80 FR 70309 through 70321). That is, we proposed to recalibrate the relative payment weights for each APC based on claims and cost report data for hospital outpatient department (HOPD) services, using the most recent available data to construct a database for calculating APC group weights.

For the purpose of recalibrating the proposed APC relative payment weights for CY 2017, we used approximately 163 million final action claims (claims for which all disputes and adjustments have been resolved and payment has been made) for HOPD services furnished on or after January 1, 2015, and before January 1, 2016.

Addendum N to the proposed rule included the proposed list of bypass codes for CY 2017. The proposed list of bypass codes contains codes that were reported on claims for services in CY 2015 and, therefore, includes codes that were in effect in CY 2015 and used for billing, but were deleted for CY 2016. We retained these deleted bypass codes on the proposed CY 2017 bypass list because these codes existed in CY 2015 and were covered OPD services in that period, and CY 2015 claims data are used to calculate CY 2017 payment rates. Keeping these deleted bypass codes on the bypass list potentially allows us to create more ''pseudo'' single procedure claims for ratesetting purposes. ''Overlap bypass codes'' that are members of the proposed multiple imaging composite APCs were identified by asterisks (*) in the third column of Addendum N to the proposed rule. HCPCS codes that we proposed to add for CY 2017 were identified by asterisks (*) in the fourth column of Addendum N.

We did not receive any public comments on our general proposal to recalibrate the relative payment weights for each APC based on claims and cost report data for HOPD services or on our proposed bypass code process. Therefore, we are adopting as final the proposed ''pseudo'' single claims process and the final CY 2017 bypass list of 194 HCPCS codes, as displayed in Addendum N to this final rule with comment period (which is available via the Internet on the CMS Web site). For this final rule with comment period, for the purpose of recalibrating the final APC relative payment weights for CY 2017, we used approximately 86 million final action claims (claims for which all disputes and adjustments have been resolved and payment has been made) for HOPD services furnished on or after January 1, 2015, and before January 1, 2016. For exact numbers of claims used and additional details on the claims accounting process, we refer readers to the claims accounting narrative under supporting documentation for this CY 2017 OPPS/ASC final rule with comment period on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html.*

Table 1 below contains the list of codes that we are removing from the CY 2017 bypass list.

TABLE 1—HCPCS CODES REMOVED FROM THE CY 2017 BYPASS LIST

HCPCS code	HCPCS short descriptor
95925	Somatosensory testing.
95808	Polysom any age 1–3> param.
90845	Psychoanalysis.
96151	Assess hlth/behave subseq.
31505	Diagnostic laryngoscopy.
95872	Muscle test one fiber.

b. Calculation and Use of Cost-to-Charge Ratios (CCRs)

For CY 2017, in the CY 2017 OPPS/ASC proposed rule (81 FR 45616), we

proposed to continue to use the hospital-specific overall ancillary and departmental cost-to-charge ratios (CCRs) to convert charges to estimated costs through application of a revenue code-to-cost center crosswalk. To calculate the APC costs on which the CY 2017 APC payment rates are based, we calculated hospital-specific overall ancillary CCRs and hospital-specific departmental CCRs for each hospital for which we had CY 2015 claims data by comparing these claims data to the most recently available hospital cost reports, which, in most cases, are from CY 2014. For the proposed CY 2017 OPPS payment rates, we used the set of claims processed during CY 2015. We applied the hospital-specific CCR to the hospital's charges at the most detailed level possible, based on a revenue code-to-cost center crosswalk that contains a hierarchy of CCRs used to estimate costs from charges for each revenue code. That crosswalk is available for review and continuous comment on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html.*

To ensure the completeness of the revenue code-to-cost center crosswalk, we reviewed changes to the list of revenue codes for CY 2015 (the year of claims data we used to calculate the proposed CY 2017 OPPS payment rates) and found that the National Uniform Billing Committee (NUBC) did not add any new revenue codes to the NUBC 2015 Data Specifications Manual.

In accordance with our longstanding policy, we calculated CCRs for the standard and nonstandard cost centers accepted by the electronic cost report database. In general, the most detailed level at which we calculated CCRs was the hospital-specific departmental level. For a discussion of the hospital-specific overall ancillary CCR calculation, we refer readers to the CY 2007 OPPS/ASC final rule with comment period (71 FR 67983 through 67985). The calculation of blood costs is a longstanding exception (since the CY 2005 OPPS) to this general methodology for calculation of CCRs used for converting charges to costs on each claim. This exception is discussed in detail in the CY 2007 OPPS/ASC final rule with comment period and discussed further in section II.A.2.b.(1) of the proposed rule (81 FR 45617) and of this final rule with comment period.

Comment: One commenter supported the CY 2014 final rule transitional policy of excluding providers that use a ''square foot'' methodology to calculate CCRs used to estimate costs associated with the CT and MRI APCs for CYs 2014–2017, as discussed in the CY 2017 OPPS proposed rule claims accounting narrative on pages 33 through 37, that was made available under supporting documentation for the CY 2017 OPPS/ASC proposed rule on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html.* However, the commenter opposed the provision of the CY 2014 final rule policy that was discussed in the CY 2017 OPPS proposed rule claims accounting narrative that sunsets this transitional policy after CY 2017.

Response: We thank the commenter for its support of our proposed CY 2017 policy. In response to the commenter's concern about the sunset of the transitional policy after CY 2017, while CY 2018 payment policies will be addressed in the CY 2018 OPPS/ASC proposed rule, we note that the sunset of this transitional policy for CY 2018 was discussed in the CY 2014 OPPS/ASC final rule with comment period. We believe that 4 years is sufficient time for hospitals that have not done so to transition to a more accurate cost allocation method and for the related data to be available for ratesetting purposes. After consideration of the public comment we received on the general CCR process, we are finalizing using the hospital-specific overall ancillary and departmental CCRs to convert charges to estimated costs through application of a revenue code-to-cost center crosswalk and the established methodology for CY 2017.

2. Data Development Process and Calculation of Costs Used for Ratesetting

In this section of this final rule with comment period, we discuss the use of claims to calculate the OPPS payment rates for CY 2017. The Hospital OPPS page on the CMS Web site on which this final rule with comment period is posted (*http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html*) provides an accounting of claims used in the development of the final payment rates. That accounting provides additional detail regarding the number of claims derived at each stage of the process. In addition, below in this section we discuss the file of claims that comprises the data set that is available for purchase under a CMS data use agreement. The CMS Web site, *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html,* includes information about purchasing the ''OPPS Limited Data Set,'' which now includes the additional variables previously available only in the OPPS Identifiable Data Set, including ICD–9–CM diagnosis codes and revenue code payment amounts. This file is derived from the CY 2015 claims that were used to calculate the payment rates for the CY 2017 OPPS.

In the history of the OPPS, we have traditionally established the scaled relative weights on which payments are based using APC median costs, which is a process described in the CY 2012 OPPS/ASC final rule with comment period (76 FR 74188). However, as discussed in more detail in section II.A.2.f. of the CY 2013 OPPS/ASC final rule with comment period (77 FR 68259 through 68271), we finalized the use of geometric mean costs to calculate the relative weights on which the CY 2013 OPPS payment rates were based. While this policy changed the cost metric on which the relative payments are based, the data process in general remained the same, under the methodologies that we used to obtain appropriate claims data and accurate cost information in determining estimated service cost. For CY 2017, in the CY 2017 OPPS/ASC proposed rule (81 FR 45616), we proposed to continue to use geometric mean costs to calculate the relative weights on which the CY 2017 OPPS payment rates are based.

We did not receive any public comments on this proposed process and are finalizing our proposed methodology for calculating geometric mean costs for purposes of creating relative payment weights and subsequent APC payment rates for the CY 2017 OPPS. We used the methodology described in sections II.A.2.a. through II.A.2.d. of this final rule with comment period to calculate the costs we used to establish the relative payment weights used in calculating the final OPPS payment rates for CY 2017 shown in Addenda A and B to this final rule with comment period (which are available via the Internet on the CMS Web site). We refer readers to section II.A.4. of this final rule with comment period for a discussion of the conversion of APC costs to scaled payment weights.

For details of the claims process used in this final rule with comment period, we refer readers to the claims accounting narrative under supporting documentation for this CY 2017 OPPS/ASC final rule with comment period on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html.*

a. Recommendations of the Advisory Panel on Hospital Outpatient Payment (the Panel) Regarding Data Development

As we discussed in the CY 2017 OPPS/ASC proposed rule (81 FR 45616 through 45617), at the March 14, 2016 meeting of the Panel, we presented our standard analysis of APCs, specifically those APCs for which geometric mean costs in the CY 2015 claims data through September 2015 varied significantly from the CY 2014 claims data used for the CY 2016 OPPS/ASC final rule with comment period. At the March 14, 2016 Panel meeting, the Panel made three recommendations related to the data process. The Panel's data-related recommendations and our responses follow.

Recommendation: The Panel recommends that CMS provide the Data Subcommittee a list of APCs fluctuating significantly in costs prior to each Panel meeting.

CMS Response: We accepted this recommendation.

Recommendation: The Panel recommends that the work of the Data Subcommittee continue.

CMS Response: We accepted this recommendation.

Recommendation: The Panel recommends that Michael Schroyer continue serving as subcommittee Chair for the August 2016 HOP Panel.

CMS Response: We accepted this recommendation.

At the August 22, 2016 meeting of the Panel, we provided the Data Committee a list of APCs for CY 2017 for which geometric mean costs in the CY 2015 claims data varied significantly from the CY 2014 claims data used for the CY 2016 OPPS/ASC final rule with comment period. At the August 22, 2016 Panel meeting, the Panel made four recommendations related to the data process. The Panel's data-related recommendations and our responses follow.

Recommendation: The Panel recommends that CMS provide the Data Subcommittee a list of APCs fluctuating significantly in costs prior to each Panel meeting.

CMS Response: We are accepting this recommendation.

Recommendation: The Panel recommends that CMS provide the Data Subcommittee a presentation on the claims accounting process prior to each HOP Panel meeting.

CMS Response: We are accepting this recommendation.

Recommendation: The Panel recommends that the work of the data subcommittee continue.

CMS Response: We are accepting this recommendation.

Recommendation: The Panel recommends that Michael Schroyer continue serving as Chair of the Data Subcommittee.

CMS Response: We are accepting this recommendation.

b. Calculation of Single Procedure APC Criteria-Based Costs

(1) Blood and Blood Products

(a) Methodology

Since the implementation of the OPPS in August 2000, we have made separate payments for blood and blood products through APCs rather than packaging payment for them into payments for the procedures with which they are administered. Hospital payments for the costs of blood and blood products, as well as for the costs of collecting, processing, and storing blood and blood products, are made through the OPPS payments for specific blood product APCs.

For CY 2017, in the CY 2017 OPPS/ASC proposed rule (81 FR 45617), we proposed to continue to establish payment rates for blood and blood products using our blood-specific CCR methodology, which utilizes actual or simulated CCRs from the most recently available hospital cost reports to convert hospital charges for blood and blood products to costs. This methodology has been our standard ratesetting methodology for blood and blood products since CY 2005. It was developed in response to data analysis indicating that there was a significant difference in CCRs for those hospitals with and without blood-specific cost centers, and past public comments indicating that the former OPPS policy of defaulting to the overall hospital CCR for hospitals not reporting a blood-specific cost center often resulted in an underestimation of the true hospital costs for blood and blood products. Specifically, in order to address the differences in CCRs and to better reflect hospitals' costs, we proposed to continue to simulate blood CCRs for each hospital that does not report a blood cost center by calculating the ratio of the blood-specific CCRs to hospitals' overall CCRs for those hospitals that do report costs and charges for blood cost centers. We also proposed to apply this mean ratio to the overall CCRs of hospitals not reporting costs and charges for blood cost centers on their cost reports in order to simulate blood-specific CCRs for those hospitals. We proposed to calculate the costs upon which the CY 2017 payment rates for blood and blood products are based using the actual blood-specific CCR for hospitals that reported costs and charges for a blood cost center and a hospital-specific, simulated blood-specific CCR for hospitals that did not report costs and charges for a blood cost center.

We continue to believe that the hospital-specific, simulated blood-specific CCR methodology better responds to the absence of a blood-specific CCR for a hospital than alternative methodologies, such as defaulting to the overall hospital CCR or applying an average blood-specific CCR across hospitals. Because this methodology takes into account the unique charging and cost accounting structure of each hospital, we believe that it yields more accurate estimated costs for these products. We continue to believe that this methodology in CY 2017 would result in costs for blood and blood products that appropriately reflect the relative estimated costs of these products for hospitals without blood cost centers and, therefore, for these blood products in general.

We note that, as discussed in section II.A.2.e. of the CY 2014 OPPS/ASC final rule with comment period (78 FR 74861 through 74910), the CY 2015 OPPS/ASC final rule with comment period (79 FR 66798 through 66810), and the CY 2016 OPPS/ASC final rule with comment period (80 FR 70325 through 70339), we defined a comprehensive APC (C–APC) as a classification for the provision of a primary service and all adjunctive services provided to support the delivery of the primary service. Under this policy, we include the costs of blood and blood products when calculating the overall costs of these C–APCs. We proposed to continue to apply the blood-specific CCR methodology described in this section when calculating the costs of the blood and blood products that appear on claims with services assigned to the C–APCs. Because the costs of blood and blood products will be reflected in the overall costs of the C–APCs (and, as a result, in the payment rates of the C–APCs), we proposed to not make separate payments for blood and blood products when they appear on the same claims as services assigned to the C–APCs (we refer readers to the CY 2015 OPPS/ASC final rule with comment period (79 FR 66796)).

We invited public comments on these proposals. We also referred readers to Addendum B to the proposed rule (which was available via the Internet on the CMS Web site) for the proposed CY 2017 payment rates for blood and blood products (which were identified with status indicator ''R''). For a more detailed discussion of the blood-specific CCR methodology, we refer readers to the CY 2005 OPPS proposed rule (69 FR

50524 through 50525). For a full history of OPPS payment for blood and blood products, we refer readers to the CY 2008 OPPS/ASC final rule with comment period (72 FR 66807 through 66810).

Comment: Commenters supported the proposal to continue to separately pay for blood and blood products using a blood-specific CCR methodology.

Response: We appreciate the commenters' support.

After consideration of the public comments we received, we are finalizing our CY 2017 proposal to continue to establish payment rates for blood and blood products using our blood-specific CCR methodology. The final CY 2017 payment rates for blood and blood products (which are identified with status indicator ''R'') are reflective of the use of the hospital-specific simulated blood-specific CCR methodology and can be found in Addendum B to this final rule with comment period (which is available via the Internet on the CMS Web site).

(b) Solicitation of Public Comments

As discussed in the CY 2016 OPPS/ASC final rule with comment period (80 FR 70323), we are in the process of examining the current set of HCPCS P-codes for blood products, which became effective many years ago. Because these HCPCS P-codes were created many years ago, we are considering whether this code set could benefit from some code descriptor revisions, updating, and/or consolidation to make these codes properly reflect current product descriptions and utilization while minimizing redundancy and potentially outdated descriptors. In the CY 2017 OPPS/ASC proposed rule (81 FR 45617 through 45618), we requested public comments regarding the adequacy and necessity (in terms of the existing granularity) of the current descriptors for the HCPCS P-codes describing blood products. Specifically, there are three main categories of blood products: Red blood cells; platelets; and plasma. In each of these categories, there are terms that describe various treatments or preparations of the blood products, with each, in several cases, represented individually and in combination. For example, for pheresis platelets, there are codes for ''leukocyte reduced,'' ''irradiated,'' ''leukocyte reduced + irradiated,'' and ''leukocyte reduced + irradiated + CMV-negative,'' among others. We asked the blood product stakeholder community whether the current blood product HCPCS P-code descriptors with the associated granularity best describe the state of the current technology for blood products that hospitals currently provide to hospital outpatients. In several cases, the hospital costs as calculated from the CMS claims data are similar for blood products of the same type (for example, pheresis platelets) that have different code descriptors, which indicates to us that there is not a significant difference in the resources needed to produce the similar products. Again, we invited public comments on the current set of active HCPCS P-codes that describe blood products regarding how the code descriptors could be revised and updated (if necessary) to reflect the current blood products provided to hospital outpatients. The current set of active HCPCS P-codes that describe blood products can be found in Addendum B to the proposed rule and this final rule with comment period (which is available via the Internet on the CMS Web site).

Comment: Several commenters responded to the solicitation for public comments and supported a thorough examination of the current set of HCPCS P-codes for blood products as a necessary undertaking because the HCPCS P-codes were created several years ago. Several commenters recommended that CMS convene a stakeholder group that includes representatives of hospitals, blood banks, the American Red Cross, and others to discuss a framework to systematically review and revise the HCPCS P-codes for blood products. Commenters also encouraged CMS to retain individual HCPCS P-codes for unique blood products with significant therapeutic distinctions, as opposed to creating modifiers to be applied to the existing HCPCS P-codes. Commenters also suggested that CMS establish a ''not otherwise classified (NOC)'' code for blood products, which would allow hospitals to begin immediately billing for a new blood product that is not described by a specific HCPCS P-code. One commenter supported the use of broader descriptions for HCPCS P-codes when more granular language is no longer meaningful for differentiating between different types of blood and blood products, and where the costs and volume of the HCPCS P-codes are similar. Other commenters suggested specific modifications to the order, classification, and code descriptors of the blood and blood product HCPCS P-codes.

Response: We appreciate the commenters' detailed responses. These comments will be taken into consideration in the development of proposals to update the HCPCS P-codes that describe blood products.

(c) Rapid Bacterial Testing for Platelets

In March 2016, the Food and Drug Administration (FDA) issued draft guidance for the health care industry entitled, ''Bacterial Risk Control Strategies for Blood Collection Establishments and Transfusion Services to Enhance the Safety and Availability of Platelets for Transfusion'' (available at: *http://www.fda.gov/BiologicsBloodVaccines/GuidanceComplianceRegulatoryInformation/Guidances/default.htm*). This guidance encourages the use of rapid bacterial testing devices or pathogen-reduction technology for platelets to adequately control the risk of bacterial contamination of platelets.

In the CY 2016 OPPS/ASC final rule with comment period (80 FR 70322), CMS established three HCPCS P-codes for pathogen-reduced blood products, which became effective January 1, 2016. These codes included: HCPCS code P9070 (Plasma, pooled multiple donor, pathogen reduced, frozen, each unit); HCPCS code P9071 (Plasma (single donor), pathogen reduced, frozen, each unit); and HCPCS code P9072 (Platelets, pheresis, pathogen reduced, each unit).

The HCPCS Workgroup has decided to revise the HCPCS code established in CY 2016 for pathogen-reduced platelets (HCPCS code P9072) to include the use of pathogen-reduction technology or rapid bacterial testing. Specifically, the descriptor for this code will be revised, effective January 1, 2017, to read as follows: HCPCS code P9072 (Platelets, pheresis, pathogen reduced or rapid bacterial tested, each unit). The payment rate for HCPCS code P9072 is based on a crosswalk to HCPCS code P9037 (Platelets, pheresis, leukocyte reduced, irradiated, each unit). We refer readers to the CY 2016 OPPS/ASC final rule with comment period for a further discussion of crosswalks for pathogen-reduced blood products (80 FR 70323). When claims data become available for HCPCS code P9072, we will establish a payment rate for this code using that data and our blood-specific CCR methodology. The revised HCPCS code descriptor and final payment rate for this service can be found in Addendum B of this final rule with comment period (which is available via the Internet on the CMS Web site).

(2) Brachytherapy Sources

Section 1833(t)(2)(H) of the Act mandates the creation of additional groups of covered OPD services that classify devices of brachytherapy consisting of a seed or seeds (or radioactive source) (''brachytherapy sources'') separately from other services

or groups of services. The statute provides certain criteria for the additional groups. For the history of OPPS payment for brachytherapy sources, we refer readers to prior OPPS final rules, such as the CY 2012 OPPS/ASC final rule with comment period (77 FR 68240 through 68241). As we have stated in prior OPPS updates, we believe that adopting the general OPPS prospective payment methodology for brachytherapy sources is appropriate for a number of reasons (77 FR 68240). The general OPPS methodology uses costs based on claims data to set the relative payment weights for hospital outpatient services. This payment methodology results in more consistent, predictable, and equitable payment amounts per source across hospitals by averaging the extremely high and low values, in contrast to payment based on hospitals' charges adjusted to costs. We believe that the OPPS methodology, as opposed to payment based on hospitals' charges adjusted to cost, also would provide hospitals with incentives for efficiency in the provision of brachytherapy services to Medicare beneficiaries. Moreover, this approach is consistent with our payment methodology for the vast majority of items and services paid under the OPPS. We refer readers to the CY 2016 OPPS/ASC final rule with comment period (80 FR 70323 through 70325) for further discussion of the history of OPPS payment for brachytherapy sources.

In the CY 2017 OPPS/ASC proposed rule (81 FR 45618), for CY 2017, we proposed to use the costs derived from CY 2015 claims data to set the CY 2017 payment rates for brachytherapy sources because CY 2015 is the same year of data we proposed to use to set the proposed payment rates for most other items and services that would be paid under the CY 2017 OPPS. We proposed to base the payment rates for brachytherapy sources on the geometric mean unit costs for each source, consistent with the methodology that we proposed for other items and services paid under the OPPS, as discussed in section II.A.2. of the proposed rule. We also proposed to continue the other payment policies for brachytherapy sources that we finalized and first implemented in the CY 2010 OPPS/ASC final rule with comment period (74 FR 60537). We proposed to pay for the stranded and nonstranded not otherwise specified (NOS) codes, HCPCS codes C2698 and C2699, at a rate equal to the lowest stranded or nonstranded prospective payment rate for such sources, respectively, on a per source basis (as opposed to, for example, a per mCi), which is based on the policy we established in the CY 2008 OPPS/ASC final rule with comment period (72 FR 66785). For CY 2017 and subsequent years, we also proposed to continue the policy we first implemented in the CY 2010 OPPS/ASC final rule with comment period (74 FR 60537) regarding payment for new brachytherapy sources for which we have no claims data, based on the same reasons we discussed in the CY 2008 OPPS/ASC final rule with comment period (72 FR 66786; which was delayed until January 1, 2010 by section 142 of Pub. L. 110–275). Specifically, this policy is intended to enable us to assign new HCPCS codes for new brachytherapy sources to their own APCs, with prospective payment rates set based on our consideration of external data and other relevant information regarding the expected costs of the sources to hospitals.

The proposed CY 2017 payment rates for brachytherapy sources were included in Addendum B to the proposed rule (which is available via the Internet on the CMS Web site) and were identified with status indicator ''U''. We note that, for CY 2017, we proposed to assign new proposed status indicator ''E2'' (Items and Services for Which Pricing Information and Claims Data Are Not Available) to HCPCS code C2644 (Brachytherapy cesium-131 chloride) because this code was not reported on CY 2015 claims. Therefore, we are unable to calculate a payment rate based on the general OPPS ratesetting methodology described earlier. Although HCPCS code C2644 became effective July 1, 2014, and although we would expect that if a hospital furnished a brachytherapy source described by this code in CY 2015, HCPCS code C2644 should appear on the CY 2015 claims, there are no CY 2015 claims reporting this code. In addition, unlike new brachytherapy sources HCPCS codes, we will not consider external data to determine a proposed payment rate for HCPCS code C2644 for CY 2017.

Therefore, we proposed to assign new proposed status indicator ''E2'' to HCPCS code C2644.

We invited public comments on this proposed policy. We also requested recommendations for new HCPCS codes to describe new brachytherapy sources consisting of a radioactive isotope, including a detailed rationale to support recommended new sources.

Comment: One commenter requested that CMS establish a new HCPCS code to specifically describe the use of CivaString®, a linear, low dose rate polymer encapsulated palladium-103 brachytherapy source. The commenter stated that CivaString® became commercially available in CY 2013, and providers began reporting charges for the brachytherapy source using HCPCS code C2636 (Brachytherapy linear, non-stranded, palladium-103). However, the commenter believed that providers experienced confusion regarding the appropriate reporting of HCPCS code C2636. The commenter stated that six hospitals reported charges using HCPCS code C2636 over the past 6 years, without purchasing a linear, non-stranded palladium-103 brachytherapy source. Moreover, the commenter believed that providers may have inappropriately reported charges using HCPCS code C2636, including instances where providers reported charges for the use of HCPCS code 2636 although acquisition of CivaString® had not been obtained when it became commercially available in CY 2013. In addition, the commenter stated that the National Correct Coding Initiative (NCCI) established a medically unlikely edit (MUE) for HCPCS code C2636 in the outpatient hospital setting for 150 mm, effective April 1, 2010. Subsequently, in November 2015, the manufacturer of CivaString® requested that the MUE be increased to 900 mm based on the recommended clinical usage of CivaString®. In response to that request, the NCCI increased the MUE to 600 mm, effective April 1, 2016. However, the commenter further stated that claims for the use of CivaString® with the appropriate number of units continued to be denied based on the MUE. Because of these concerns, the commenter requested that CMS establish a new HCPCS code to specifically describe the use of CivaString®, as well as an increase in the payment rate proposed to adequately pay for the costs of this brachytherapy source.

Response: Section 1833(t)(2)(h) of the Act requires that the Secretary create additional groups of covered outpatient department services that classify brachytherapy sources separately from other services in a manner reflecting the number, isotope, and radioactive intensity of such sources. As such, we believe that HCPCS code C2636 adequately describes the clinical properties of CivaString®. Therefore, it is not necessary and would be duplicative to create a separate group for another linear, non-stranded palladium-103 source.

HCPCS code C2636 has been active since January 1, 2005. In response to the commenter's concerns regarding hospitals that may have inappropriately reported charges using HCPCS code C2636 although acquisition of

CivaString® had not been obtained, as a matter of general policy, we rely on hospitals to report all HCPCS codes on claims accurately in accordance with their code descriptors and CPT and CMS instructions, as applicable, and to report charges on claims and charges and costs on their Medicare hospital cost reports appropriately. We stated in the CY 2011 OPPS/ASC final rule with comment period (75 FR 71838) that the quality and accuracy of reported units and charges significantly influence the geometric mean costs that are the basis for our payment rates, especially for low-volume items and services. Beyond our standard OPPS trimming methodology that we apply to those claims that have passed various types of claims processing edits, it is not our general policy to judge the accuracy of hospital coding and charging for purposes of ratesetting.

With regard to the MUE value, we note that the MUE for HCPCS code C2636 is a date-of-service edit. This means if billed units of service (UOS) for HCPCS code C2636 are denied based on the MUE value, the provider may appeal the denial. Medicare Administrative Contractors (MACs) may pay UOS in excess of the MUE value if medical record documentation supports medically reasonable and necessary UOS in excess of the MUE value. Therefore, we are not establishing a new HCPCS code for the use of CivaString® because we believe that HCPCS code C2636 adequately describes the clinical properties of CivaString®. We refer readers to the facility outpatient services MUE table, which is available on the CMS Web site at: *https://www.cms.gov/Medicare/Coding/NationalCorrectCodInitEd/MUE.html.*

Comment: One commenter acknowledged the proposed increased CY 2017 payment rate for brachytherapy sources described by HCPCS code C2616 (Brachytx, non-str, yttrium-90) in comparison to the CY 2016 payment rate, but continued to believe that the proposed CY 2017 payment rate would not adequately pay a hospital's true cost for purchasing the device. The commenter supported the proposed CY 2017 increase in the payment rate for HCPCS code C2616, but remained concerned that the limited increase in payment would not adequately pay for all costs incurred by the hospital such as storage, handling, and disposal costs. In addition, based on the commenter's analysis of Medicare Provider Analysis and Review (MedPAR) data, which contain data from claims for services provided to beneficiaries admitted to Medicare certified inpatient hospitals and skilled nursing facilities, the commenter noted that a few hospitals inconsistently or incorrectly reported revenue code assignments with incorrect facility charge data. As a result of the erroneous and/or inaccurate coding, the commenter believed that the claims data used for CY 2017 ratesetting are adversely affected, which resulted in the inadequate proposed payment rate for HCPCS code C2616. Based on these concerns, the commenter requested that CMS eliminate outlier data that is out of range of other accurately reporting facilities. Specifically, the commenter requested that CMS eliminate claims from facilities that report a purchase price of $1.00 or other costs dramatically less than the $16,000 selling price.

Response: As previously discussed, under the OPPS, we use cost-based weights to determine relative costliness for outpatient items and services. The relativity of weights is used to set APC payment rates for brachytherapy sources, not the invoice cost or list price. Therefore, under a prospective payment system based on relative weights, items and services may not be paid at 100 percent of the reported costs.

With regard to the commenter's analysis of MedPAR data on claims that reported HCPCS code C2616, we note that MedPAR data consolidate inpatient hospital or skilled nursing facility (SNF) claims data from the National Claims History (NCH) files into stay level records. Because MedPAR data do not include OPPS claims, it is incorrect for the commenter to conclude that the CY 2017 OPPS proposed payment rate is inadequate as a result of erroneous and/or inaccurate coding on inpatient hospital or SNF claims. We have no reason to believe that prospective payment rates based on outpatient claims data from those providers furnishing a brachytherapy source described by HCPCS code C2616 do not appropriately reflect the cost of that source to hospitals. Therefore, we are not excluding or eliminating any claims with paid lines for HCPCS code C2616 in ratesetting for CY 2017.

Comment: A few commenters expressed concern regarding the outpatient hospital claims data that CMS used to set the prospective payment rates for brachytherapy sources. The commenters stated that high dose rate (HDR) brachytherapy devices are renewable because the devices have a 90-day use span and are used in the treatment of multiple patients during this 90-day span. According to the commenters, the true cost of treatment involving brachytherapy sources depends on the number of patients treated by a hospital within a 90-day period, as well as the number of treatments required and the intensity of the treatments. For this reason, the commenters believed that it is difficult to establish fair and adequate prospective payment rates for brachytherapy sources. The commenters also noted that the brachytherapy source payment data continue to show huge variation in per unit cost across hospitals.

In addition, the commenters believed that CMS' claims data contain rank order anomalies, causing the usual cost relationship between the high activity palladium-103 source (HCPCS code C2635, Brachytherapy source, non-stranded, high activity, palladium-103, greater than 2.2 mci (NIST) per source) and the low activity palladium-103 sources (HCPCS code C2640, Brachytherapy source, stranded, palladium-103, per source and HCPCS code C2641, Brachytherapy source, non-stranded, palladium-103, per source) to be reversed. The commenters noted that the proposed geometric mean costs of the brachytherapy source HCPCS codes are approximately $26, $77, and $70, respectively. The commenters stated that, based on their experience, stranded palladium-103 sources (HCPCS code C2640) always cost more than non-stranded palladium-103 sources (HCPCS code C2641), which was not reflected in the proposed rule claims data that CMS used.

In addition, the commenters expressed concern that payment for several brachytherapy sources are unstable and fluctuate significantly since CMS implemented the prospective payment methodology based on source-specific median cost in CY 2010 and geometric mean unit cost in CY 2013.

As a result of these concerns, the commenters requested that CMS adopt policies that more accurately account for the costs associated with HDR brachytherapy treatment delivery and to limit the overall fluctuation in payment for brachytherapy devices.

Response: We have received similar public comments regarding payment rates for HDR brachytherapy sources, payment rates for low and high activity palladium sources, and the year-to-year variation in payment rates for most brachytherapy sources in response to prior proposed rules and have addressed these public comments in prior final rules with comment period. We refer readers to 72 FR 66782; 74 FR 60534; 75 FR 71979; 76 FR 74161; 77 FR 68241; 78 FR 74861; 79 FR 66796; and 80 FR 70324 for our past responses to these similar comments. In these rules, we explain the characteristics of a

prospective payment system and how low-volume services are more susceptible to payment volatility compared to high-volume services. We also describe our expectation for how hospitals should treat HDR brachytherapy sources that can be used on multiple patients during its use span. In addition, we address concerns on varied cost distributions and their impact on the observed relationship in geometric mean cost between the different types of sources.

After consideration of the public comments we received, we are finalizing our proposal to continue to set the payment rates for brachytherapy sources using our established prospective payment methodology, which is based on geometric mean costs. In addition, we are finalizing our proposal to assign new status indicator ''E2'' to HCPCS code C2644 because there are no CY 2015 claims reporting use of this code and, therefore, we are unable to determine a payment rate for CY 2017.

The final CY 2017 payment rates for brachytherapy sources are included in Addendum B to this final rule with comment period (which is available via the Internet on the CMS Web site) and are identified with status indicator ''U''.

We continue to invite hospitals and other parties to submit recommendations to us for new codes to describe new brachytherapy sources. Such recommendations should be directed to the Division of Outpatient Care, Mail Stop C4–01–26, Centers for Medicare and Medicaid Services, 7500 Security Boulevard, Baltimore, MD 21244. We will continue to add new brachytherapy source codes and descriptors to our systems for payment on a quarterly basis.

c. Comprehensive APCs (C–APCs) for CY 2017

(1) Background

In the CY 2014 OPPS/ASC final rule with comment period (78 FR 74861 through 74910), we finalized a comprehensive payment policy that packages payment for adjunctive and secondary items, services, and procedures into the most costly primary procedure under the OPPS at the claim level. The policy was finalized in CY 2014, but the effective date was delayed until January 1, 2015, to allow additional time for further analysis, opportunity for public comment, and systems preparation. The comprehensive APC (C–APC) policy was implemented effective January 1, 2015, with modifications and clarifications in response to public comments received regarding specific provisions of the C–APC policy (79 FR 66798 through 66810).

A C–APC is defined as a classification for the provision of a primary service and all adjunctive services provided to support the delivery of the primary service. We established C–APCs as a category broadly for OPPS payment and implemented 25 C–APCs beginning in CY 2015 (79 FR 66809 through 66810). In the CY 2016 OPPS/ASC final rule with comment period (80 FR 70332), we finalized 10 additional C–APCs to be paid under the existing C–APC payment policy.

Under this policy, we designated a service described by a HCPCS code assigned to a C–APC as the primary service when the service is identified by OPPS status indicator ''J1''. When such a primary service is reported on a hospital outpatient claim, taking into consideration the few exceptions that are discussed below, we make payment for all other items and services reported on the hospital outpatient claim as being integral, ancillary, supportive, dependent, and adjunctive to the primary service (hereinafter collectively referred to as ''adjunctive services'') and representing components of a complete comprehensive service (78 FR 74865 and 79 FR 66799). Payments for adjunctive services are packaged into the payments for the primary services. This results in a single prospective payment for each of the primary, comprehensive services based on the costs of all reported services at the claim level.

Services excluded from the C–APC policy include services that are not covered OPD services, services that cannot by statute be paid for under the OPPS, and services that are required by statute to be separately paid. This includes certain mammography and ambulance services that are not covered OPD services in accordance with section 1833(t)(1)(B)(iv) of the Act; brachytherapy seeds, which also are required by statute to receive separate payment under section 1833(t)(2)(H) of the Act; pass-through drugs and devices, which also require separate payment under section 1833(t)(6) of the Act; self-administered drugs (SADs) that are not otherwise packaged as supplies because they are not covered under Medicare Part B under section 1861(s)(2)(B) of the Act; and certain preventive services (78 FR 74865 and 79 FR 66800 through 66801). A list of services excluded from the C–APC policy is included in Addendum J to this final rule with comment period (which is available via the Internet on the CMS Web site).

The C–APC policy payment methodology set forth in the CY 2014 OPPS/ASC final rule with comment period for the C–APCs and modified and implemented beginning in CY 2015 is summarized as follows (78 FR 74887 and 79 FR 66800):

Basic Methodology. As stated in the CY 2015 OPPS/ASC final rule with comment period, we define the C–APC payment policy as including all covered OPD services on a hospital outpatient claim reporting a primary service that is assigned to status indicator ''J1,'' excluding services that are not covered OPD services or that cannot by statute be paid for under the OPPS. Services and procedures described by HCPCS codes assigned to status indicator ''J1'' are assigned to C–APCs based on our usual APC assignment methodology by evaluating the geometric mean costs of the primary service claims to establish resource similarity and the clinical characteristics of each procedure to establish clinical similarity within each APC. In the CY 2016 OPPS/ASC final rule with comment period, we expanded the C–APC payment methodology with the establishment of status indicator ''J2''. The assignment of status indicator ''J2'' to a specific combination of services performed in combination with each other, as opposed to a single, primary service, allows for all other OPPS payable services and items reported on the claim (excluding services that are not covered OPD services or that cannot by statute be paid for under the OPPS) to be deemed adjunctive services representing components of a comprehensive service and resulting in a single prospective payment for the comprehensive service based on the costs of all reported services on the claim (80 FR 70333 through 70336).

Services included under the C–APC payment packaging policy, that is, services that are typically adjunctive to the primary service and provided during the delivery of the comprehensive service, include diagnostic procedures, laboratory tests, and other diagnostic tests and treatments that assist in the delivery of the primary procedure; visits and evaluations performed in association with the procedure; uncoded services and supplies used during the service; durable medical equipment as well as prosthetic and orthotic items and supplies when provided as part of the outpatient service; and any other components reported by HCPCS codes that represent services that are provided during the complete comprehensive service (78 FR 74865 and 79 FR 66800).

In addition, payment for outpatient department services that are similar to therapy services and delivered either by therapists or non-therapists is included as part of the payment for the packaged complete comprehensive service. These services that are provided during the perioperative period are adjunctive services and are deemed to be not therapy services as described in section 1834(k) of the Act, regardless of whether the services are delivered by therapists or other nontherapist health care workers. We have previously noted that therapy services are those provided by therapists under a plan of care in accordance with section 1835(a)(2)(C) and section 1835(a)(2)(D) of the Act and are paid for under section 1834(k) of the Act, subject to annual therapy caps as applicable (78 FR 74867 and 79 FR 66800). However, certain other services similar to therapy services are considered and paid for as outpatient department services. Payment for these non-therapy outpatient department services that are reported with therapy codes and provided with a comprehensive service is included in the payment for the packaged complete comprehensive service. We note that these services, even though they are reported with therapy codes, are outpatient department services and not therapy services.

Therefore, the requirement for functional reporting under the regulations at 42 CFR 410.59(a)(4) and 42 CFR 410.60(a)(4) does not apply. We refer readers to the July 2016 OPPS Change Request 9658 (Transmittal 3523) for further instructions on reporting these services in the context of a C–APC service.

Items included in the packaged payment provided in conjunction with the primary service also include all drugs, biologicals, and radiopharmaceuticals, regardless of cost, except those drugs with pass-through payment status and SADs, unless they function as packaged supplies (78 FR 74868 through 74869 and 74909 and 79 FR 66800). We refer readers to Section 50.2M, Chapter 15, of the Medicare Benefit Policy Manual for a description of our policy on SADs treated as hospital outpatient supplies, including lists of SADs that function as supplies and those that do not function as supplies.

We define each hospital outpatient claim reporting a single unit of a single primary service assigned to status indicator ''J1'' as a single ''J1'' unit procedure claim (78 FR 74871 and 79 FR 66801). We sum all line item charges for services included on the C–APC claim, convert the charges to costs, and calculate the comprehensive geometric mean cost of one unit of each service assigned to status indicator ''J1.'' (We note that we use the term ''comprehensive'' to describe the geometric mean cost of a claim reporting ''J1'' service(s) or the geometric mean cost of a C–APC, inclusive of all of the items and services included in the C–APC service payment bundle.) Charges for services that would otherwise be separately payable are added to the charges for the primary service. This process differs from our traditional cost accounting methodology only in that all such services on the claim are packaged (except certain services as described above). We apply our standard data trims, excluding claims with extremely high primary units or extreme costs.

The comprehensive geometric mean costs are used to establish resource similarity and, along with clinical similarity, dictate the assignment of the primary services to the C–APCs. We establish a ranking of each primary service (single unit only) to be assigned to status indicator ''J1'' according to their comprehensive geometric mean costs. For the minority of claims reporting more than one primary service assigned to status indicator ''J1'' or units thereof, we identify one ''J1'' service as the primary service for the claim based on our cost-based ranking of primary services. We then assign these multiple ''J1'' procedure claims to the C–APC to which the service designated as the primary service is assigned. If the reported ''J1'' services reported on a claim map to different C–APCs, we designate the ''J1'' service assigned to the C–APC with the highest comprehensive geometric mean cost as the primary service for that claim. If the reported multiple ''J1'' services on a claim map to the same C–APC, we designate the most costly service (at the HCPCS code level) as the primary service for that claim. This process results in initial assignments of claims for the primary services assigned to status indicator ''J1'' to the most appropriate C–APCs based on both single and multiple procedure claims reporting these services and clinical and resource homogeneity.

Complexity Adjustments. We use complexity adjustments to provide increased payment for certain comprehensive services. We apply a complexity adjustment by promoting qualifying ''J1'' service code combinations or code combinations of ''J1'' services and certain add-on codes (as described further below) from the originating C–APC (the C–APC to which the designated primary service is first assigned) to the next higher paying C–APC in the same clinical family of C–APCs. We implement this type of complexity adjustment when the code combination represents a complex, costly form or version of the primary service according to the following criteria:

- Frequency of 25 or more claims reporting the code combination (frequency threshold); and
- Violation of the 2 times rule in the originating C–APC (cost threshold).

After designating a single primary service for a claim, we evaluate that service in combination with each of the other procedure codes reported on the claim assigned to status indicator ''J1'' (or certain add-on codes) to determine if they meet the complexity adjustment criteria. For new HCPCS codes, we determine initial C–APC assignments and complexity adjustments using the best available information, crosswalking the new HCPCS codes to predecessor codes when appropriate.

Once we have determined that a particular code combination of ''J1'' services (or combinations of ''J1'' services reported in conjunction with certain add-on codes) represents a complex version of the primary service because it is sufficiently costly, frequent, and a subset of the primary comprehensive service overall according to the criteria described above, we promote the complex version of the primary service as described by the code combination to the next higher cost C–APC within the clinical family unless the primary service is already assigned to the highest cost APC within the C–APC clinical family or assigned to the only C–APC in a clinical family. We do not create new APCs with a comprehensive geometric mean cost that is higher than the highest geometric mean cost (or only) C–APC in a clinical family just to accommodate potential complexity adjustments. Therefore, the highest payment for any code combination for services assigned to a C–APC would be the highest paying C–APC in the clinical family (79 FR 66802).

We package payment for all add-on codes into the payment for the C–APC. However, certain primary service-add-on combinations may qualify for a complexity adjustment. As noted in the CY 2016 OPPS/ASC final rule with comment period (80 FR 70331), all add-on codes that can be appropriately reported in combination with a base code that describes a primary ''J1''service are evaluated for a complexity adjustment.

To determine which combinations of primary service codes reported in conjunction with an add-on code may

qualify for a complexity adjustment for CY 2017, in the CY 2017 OPPS/ASC proposed rule (81 FR 45620), we proposed to apply the frequency and cost criteria thresholds discussed above, testing claims reporting one unit of a single primary service assigned to status indicator ''J1'' and any number of units of a single add-on code. If the frequency and cost criteria thresholds for a complexity adjustment are met, and reassignment to the next higher cost APC in the clinical family is appropriate, we make a complexity adjustment for the code combination; that is, we reassign the primary service code reported in conjunction with the add-on code combination to a higher cost C–APC within the same clinical family of C–APCs. If any add-on code combination reported in conjunction with the primary service code does not qualify for a complexity adjustment, payment for these services is packaged within the payment for the complete comprehensive service. We listed the complexity adjustments proposed for add-on code combinations for CY 2017, along with all of the other proposed complexity adjustments, in Addendum J to the proposed rule (which is available via the Internet on the CMS Web site). For CY 2017, we proposed to discontinue the requirement that a code combination (that qualifies for a complexity adjustment by satisfying the frequency and cost criteria thresholds described earlier) also not create a 2 times rule violation in the higher level or receiving APC (80 FR 70328). We believe that this requirement is not useful because most code combinations fall below our established frequency threshold for considering 2 times rule violations, which is described in section III.B. of this final rule with comment period. Therefore, because the 2 times rule would not typically apply to complexity-adjusted code combinations, we proposed to discontinue this requirement.

We provided in Addendum J to the proposed rule a breakdown of cost statistics for each code combination that would qualify for a complexity adjustment (including primary code and add-on code combinations). Addendum J to the proposed rule also contained summary cost statistics for each of the code combinations that describe a complex code combination that would qualify for a complexity adjustment and are proposed to be reassigned to the next higher cost C–APC within the clinical family. The combined statistics for all proposed reassigned complex code combinations are represented by an alphanumeric code with the first 4 digits of the designated primary service followed by a letter. For example, the proposed geometric mean cost listed in Addendum J for the code combination described by complexity adjustment assignment 3320R, which is assigned to C–APC 5224 (Level 4 Pacemaker and Similar Procedures), includes all code combinations that are proposed to be reassigned to C–APC 5224 when CPT code 33208 is the primary code. Providing the information contained in Addendum J to the proposed rule allowed stakeholders the opportunity to better assess the impact associated with the proposed reassignment of each of the code combinations eligible for a complexity adjustment.

Comment: Commenters generally supported the proposal to no longer require that a code combination (that qualifies for a complexity adjustment by satisfying the frequency and cost criteria thresholds) be evaluated for a 2 times rule violation in the higher level or receiving APC. One commenter requested that CMS allow the complexity-adjusted pair to move up an additional level in the clinical family if the code combination creates a 2 times rule violation in the receiving APC. Several other commenters requested that CMS review and modify the established C–APC complexity adjustment criteria to allow for complexity adjustments for specific ''J1'' service code combinations or code combinations of ''J1'' services and certain add-on codes that do not qualify under the current criteria.

Response: We appreciate the commenters' support. We continue to believe that the complexity adjustment criteria, which require a frequency of 25 or more claims reporting a code combination and a violation of the 2 times rule in the originating C–APC in order to receive payment in the next higher cost C–APC within the clinical family, is adequate to determine if a combination of procedures represents a complex, costly subset of the primary service. If a code combination meets these criteria, the combination receives payment at the next higher cost C–APC. Code combinations that do not meet these criteria receive the C–APC payment rate associated with the primary ''J1'' service. A minimum of 25 claims is already very low for a national payment system. Lowering the minimum of 25 claims further could lead to unnecessary complexity adjustments for service combinations that are rarely performed. The complexity adjustment cost threshold compares the code combinations to the lowest cost significant procedure assigned to the APC. If the cost of the code combination does not exceed twice the cost of the lowest cost significant procedure within the APC, no complexity adjustment is made. Lowering this threshold also could remove too many claims from the accounting for the primary J1 service, which would undermine the C–APC policy. We are finalizing the policy proposal to discontinue the requirement that a code combination (that qualifies for a complexity adjustment by satisfying the frequency and cost criteria thresholds) also not create a 2 times rule violation in the higher level or receiving APC as proposed. We are not otherwise changing the complexity adjustment criteria.

Comment: Other commenters requested that CMS ensure that claims for bilateral C–APC procedures that are correctly reported with modifier ''50'' (a modifier used to report bilateral procedures that are performed at the same operative session as a single line item) are accounted for in the evaluation of complexity adjustments, as well as the C–APC claims accounting. The commenters believed that these claims should be recognized as reporting two units of the service in the evaluation of the frequency of the code combination and the payment of the complexity-adjusted C–APC rate.

Response: The issue of complexity adjustments for bilateral, status indicator ''J1'' procedures reported with modifier ''50'' was addressed in the April 2016 Integrated OCE Specifications Quarterly Release Files (Attachment A—Integrated OCE Specs, Appendix L: Comprehensive APC Assignment Logic). In that document, the C–APC assignment logic was updated to specify the following: Once the highest ranked comprehensive procedure is determined, if there are multiple comprehensive procedures present with status indicator ''J1'' or there are qualifying add-on procedure codes present (status indicator ''N''), determine if there are any pairings that may qualify for a complexity adjustment. Multiple occurrences or service units of the same comprehensive procedure, or the reporting of modifier ''50,'' may qualify for a complexity adjustment. If there is a qualifying pair present associated with the highest ranked comprehensive procedure, assign the complexity-adjusted comprehensive APC. This change was made retroactive to January 2015. As of January 1, 2015, status indicator ''J1'' procedure claims with modifier ''50'' also will be included in the C–APC claims accounting and the complexity adjustment evaluations.

Comment: One commenter requested that CMS eliminate one of the criterion for assignment to status indicator ''J2'' and C–APC 8011 (Comprehensive Observation Services). Specifically, the commenter stated that claims that otherwise would qualify for payment through C–APC 8011, but contain a procedure described by a HCPCS code assigned to status indicator ''T'' that is reported with a date of service on the same day or 1 day earlier than the date of service associated with services described by HCPCS code G0378, should not be excluded from receiving payment through C–APC 8011.

Response: Services that would otherwise qualify for the observation C–APC (C–APC 8011) are not considered to be observation services when they are associated with a surgical procedure (assigned to status indicator ''T''). Instead, they are considered to be perioperative recovery, which is always packaged in with the surgical procedure.

Comment: Some commenters submitted comments regarding C–APC 5627 (Level 7 Radiation Therapy) and the treatment planning and preparation services involved with stereotactic radiosurgery (SRS) treatment. Commenters urged CMS to continue the policy finalized in the CY 2016 OPPS/ASC final rule with comment period (80 FR 70337) that pays separately for certain SRS planning and preparation services (a policy that is a temporary special exception for APC 5627 to the C–APC packaging policy that packages all adjunctive services (with a few exceptions listed in Addendum J)). Commenters believed that CMS should not package treatment planning and preparation into the C–APC payment rate for Level 7 Radiation Therapy in the future as discussed in the CY 2016 OPPS/ASC final rule with comment period because SRS claims may include other unrelated radiation therapy services.

Response: For CY 2017, we will continue the policy for the payment of SRS treatment as described in the CY 2016 OPPS/ASC final rule with comment period (80 FR 70337). This policy removes claims reporting certain planning and preparation services for SRS treatment from our geometric mean cost calculation for the CY 2017 payment rate for C–APC 5627 and pays separately for these planning and preparation services. For 2018, we will again examine the claims for cranial single session SRS patients and evaluate the services reported with modifier ''CT'' (Adjunctive service related to a procedure assigned to a comprehensive ambulatory payment classification [C–APC] procedure). We will consider in the future whether repackaging all adjunctive services (planning, preparation, and imaging, among others) back into cranial single session SRS is appropriate in order to preserve the integrity of the C–APC policy and the OPPS as a prospective payment system.

Comment: Commenters noted that claims that included several insertion codes for brachytherapy devices (namely CPT codes 57155, 20555, 31643, 41019, 43241, 55920, and 58346) often did not also contain a brachytherapy treatment delivery code. The commenters concluded that brachytherapy delivery charges are being underrepresented in ratesetting under the C–APC methodology because a correctly coded claim should always include an insertion and treatment delivery code combination. One commenter suggested that CMS adopt a composite APC methodology for CPT code 57155 similar to the composite methodology for LDR prostate brachytherapy services.

Response: The calculation of OPPS relative payment weights that reflect the relative resources required for HOPD services is the foundation of the OPPS. We rely on hospitals to bill all HCPCS codes accurately in accordance with their code descriptors and CPT and CMS instructions, as applicable, and to report charges on claims and charges and costs on their Medicare hospital cost reports appropriately (77 FR 68324). Moreover, we generally do not remove claims from the claims accounting when stakeholders believe that hospitals included incorrect information on some claims. Therefore, we are not excluding claims from the ratesetting calculation that include procedures described by CPT codes 57155, 20555, 31643, 41019, 43241, 55920, and 58346. In the future, we will examine the claims for these brachytherapy insertion codes and determine if any future adjustment to the methodology (or possibly code edits) would be appropriate.

(2) C–APCs for CY 2017

(a) Additional C–APCs for CY 2017

For CY 2017 and subsequent years, in the CY 2017 OPPS/ASC proposed rule (81 FR 45620), we proposed to continue to apply the C–APC payment policy methodology made effective in CY 2015, as described in detail below. We proposed to continue to define the services assigned to C–APCs as primary services or a specific combination of services performed in combination with each other. We also proposed to define a C–APC as a classification for the provision of a primary service or specific combination of services and all adjunctive services and supplies provided to support the delivery of the primary or specific combination of services. We also proposed to continue to follow the C–APC payment policy methodology of packaging all covered OPD services on a hospital outpatient claim reporting a primary service that is assigned to status indicator ''J1'' or reporting the specific combination of services assigned to status indicator ''J2,'' excluding services that are not covered OPD services or that cannot by statute be paid under the OPPS.

As a result of our annual review of the services and APC assignments under the OPPS, we proposed 25 additional C–APCs to be paid under the existing C–APC payment policy beginning in CY 2017. The proposed additional CY 2017 C–APCs were listed in Table 2 of the proposed rule. All C–APCs, including those effective in CY 2016 and those being proposed for CY 2017, also were displayed in Addendum J to this proposed rule. Addendum J to this proposed rule (which is available via the Internet on the CMS Web site) also contained all of the data related to the C–APC payment policy methodology, including the list of proposed complexity adjustments and other information.

Comment: Many commenters supported the proposal to expand the C–APC policy to include new C–APCs. However, several commenters requested that CMS delay the expansion of the C–APC policy and expressed concerns that the costs of procedures and services paid through a C–APC are not being accurately captured and C–APC payment rates do not adequately cover the costs associated with the primary and adjunctive services. Commenters also requested more information regarding the rationale for the assignment of services to a C–APC and stated that more time is needed to analyze and assess the financial impact of the proposed C–APC policy changes. One commenter expressed concerns that CMS may not be fully considering the impact of adding relatively low cost (below $2,227) procedures to C–APCs and suggested the establishment of a minimum cost threshold for a procedure to be assigned to a C–APC. Other commenters requested a delay in the assignment of new codes, including add-on codes, to C–APCs unless a crosswalk exists from the old code to the new code.

Response: We appreciate the commenters' support. With regard to the comments relating to delaying the expansion of the C–APC policy, we do

not believe that we should delay implementation of the proposed CY 2017 C–APCs. C–APCs were introduced in 2015, and, like all of the payment polices contained in the OPPS, are reviewed annually, as provided at section 1833(t)(9)(A) of the Act. We communicate with various stakeholders on an ongoing basis as a part of our mutual efforts to further improve the OPPS. We believe that sufficient information is available for stakeholders to evaluate how C–APCs affect payment for services, and that there is sufficient time for the public to review and analyze our proposed payment policies. This is evidenced by the many stakeholders that submit public comments, including, for example, analyses of the C–APC payment policy. Regarding the comment about creating a cost threshold for assignment of a procedure to a C–APC, we do not believe that this is necessary. Procedures assigned to C–APCs are primary services (mostly major surgical procedures) that are typically the focus of the hospital outpatient stay. We do not believe that a cost threshold would help to differentiate primary from secondary or adjunctive services. Lastly, we assign new codes to APCs (including C–APCs) based on predecessor code APC assignments, comparisons to similar codes, clinical comparability, and estimates of the resource intensity, as well as other relevant information. If we failed to assign new codes to C–APCs, this could result in significant underpayment for some new codes if a C–APC is the most appropriate APC for the new procedure.

Comment: A few commenters requested that CMS not convert APCs 5153 through 5155 (Levels 3 through 5 Airway Endoscopy) into C–APCs. The commenters expressed concerns regarding reduced payments for sinus surgeries when a patient has multiple surgeries during a single operative session. The major concern focused on the loss of additional payments for multiple procedures under the C–APC methodology. Commenters stated that multiple procedures (coded either as a bilateral case or with multiple different CPT codes) are common for the treatment of sinus diseases. One commenter noted that the AMA CPT Editorial Panel is in the process of revising some of the sinus surgery codes and bundling some of these codes. Another commenter believed that payment reductions for sinus surgery could negatively affect opportunities for resident training on these procedures.

Response: The commenters concerns are not unique to sinus surgery. The C–APC methodology relies on the average cost of the range of cases included in the claims accounting for the primary service code. We believe that this approach is better suited to a prospective payment system like the OPPS that relies on average cost payments that sometimes exceed the cost of a given case and other times are less than the cost of a given case. If, as the commenters suggest, bilateral surgery and/or multiple procedures are common in sinus surgery, the costs of this approach would be reflected in the geometric mean cost of the primary procedure under the C–APC methodology. It also seems that, according to one commenter, the AMA is preparing to address what might be fragmented codes in this clinical area. We are finalizing as proposed the conversion of the three highest level airway endoscopy APCs to C–APCs as a part of our continuing effort to direct the OPPS more towards a prospective payment system and away from a per service or per code fee schedule in which every coded item or service results in additional payment. We also do not agree that this payment policy raises concerns regarding the training of otolaryngology residents in sinus surgery, but we will monitor these APCs as we do with all others as a part of our annual OPPS/ASC rulemaking.

Comment: One commenter stated that while APC 5153 (Level 3 Airway Endoscopy Procedures) is a proposed C–APC for CY 2017, one of the codes assigned to APC 5153, namely CPT code 31649 (Bronchoscopy, rigid or flexible, including fluoroscopic guidance, when performed; with removal of bronchial valve(s), each additional lobe (List separately in addition to code for primary procedure)), is assigned a status indicator of ''Q2'' and not ''J1.'' The commenter requested that this procedure be assigned to status indicator ''J1.''

Response: This procedure is assigned status indicator ''Q2'' because it describes the removal of a device, specifically a bronchial valve. In the CY 2014 OPPS/ASC final rule with comment period (78 FR 74926), we finalized a proposal to conditionally package device removal procedures. This procedure is separately paid unless it is billed on the same date of service as a surgical procedure assigned to status indicator ''J1'' or ''T'' that involves repair or replacement of the device. The procedure was placed in a C–APC on the basis of resource and clinical homogeneity. For these reasons, we do not agree with the commenters, and are not assigning CPT code 31649 to status indicator ''J1.''

After consideration of the public comments we received, we are finalizing the proposal for 25 additional C–APCs to be paid under the existing C–APC payment policy beginning in CY 2017.

Table 2 below lists the final additional C–APCs for CY 2017, including the C–APCs currently effective for CY 2016. All C–APCs, including those effective in CY 2016 and those finalized for CY 2017, also are displayed in Addendum J to this final rule with comment period. Addendum J to this final rule with comment period (which is available via the Internet on the CMS Web site) also contains all of the data related to the C–APC payment policy methodology, including the list of complexity adjustments and other information.

* New C–APC for CY 2017.

C–APC Clinical Family Descriptor Key: AENDO = Airway Endoscopy; AICDP = Automatic Implantable Cardiac Defibrillators, Pacemakers, and Related Devices; BREAS = Breast Surgery; COCHL = Cochlear Implant; EBIDX = Excision/Biopsy/Incision and Drainage; ENTXX = ENT Procedures; EPHYS = Cardiac Electrophysiology; EXEYE = Extraocular Ophthalmic Surgery; GIXXX = Gastrointestinal Procedures; GYNXX = Gynecologic Procedures; INEYE = Intraocular Surgery; LAPXX = Laparoscopic Procedures; NERVE = Nerve Procedures; NSTIM = Neurostimulators; ORTHO = Orthopedic Surgery; PUMPS = Implantable Drug Delivery Systems; RADTX = Radiation Oncology; SCTXX = Stem Cell Transplant; UROXX = Urologic Procedures; VASCX = Vascular Procedures; WPMXX = Wireless PA Pressure Monitor.

(b) New Allogeneic Hematopoietic Stem Cell Transplantation (HSCT) C–APC

Allogeneic hematopoietic stem cell transplantation (HSCT) involves the intravenous infusion of hematopoietic stem cells derived from the bone marrow, umbilical cord blood, or peripheral blood of a donor to a recipient. Allogeneic hematopoietic stem cell collection procedures, which are performed not on the beneficiary but on a donor, cannot be paid separately under the OPPS because hospitals may bill and receive payment only for services provided to a Medicare beneficiary who is the recipient of the HSCT and whose illness is being treated with the transplant. Currently, under the OPPS, payment for these acquisition services is packaged into the APC payment for the allogeneic HSCT when the transplant occurs in the hospital outpatient setting (74 FR 60575). In the CY 2016 OPPS/ASC final rule with comment period, we assigned allogeneic HSCT to APC 5281 (Apheresis and Stem

Cell Procedures), which has a CY 2016 OPPS payment rate of $3,015.

As provided in the Medicare Claims Processing Manual, Pub. 100–04, Chapter 4, section 231.11, donor acquisition charges for allogeneic HSCT may include, but are not limited to, charges for the costs of several services. These services include, but are not necessarily limited to, National Marrow Donor Program fees, if applicable, tissue typing of donor and recipient, donor evaluation, physician pre-procedure donor evaluation services, costs associated with the collection procedure (for example, general routine and special care services, procedure/operating room and other ancillary services, apheresis services, among others), post-operative/post-procedure evaluation of donor, and the preparation and processing of stem cells.

When the allogeneic stem cell transplant occurs in the hospital outpatient setting, providers are instructed to report stem cell donor acquisition charges for allogeneic HSCT separately in Field 42 on Form CMS–1450 (or UB–04) by using revenue code 0819 (Organ Acquisition: Other Donor). Revenue code 0819 charges should include all services required to acquire hematopoietic stem cells from a donor, as defined earlier, and should be reported on the same date of service as the transplant procedure in order to be appropriately packaged for payment purposes. Revenue code 0819 maps to cost center code 086XX (Other organ acquisition where XX is ''00'' through ''19'') and is reported on line 112 (or applicable subscripts of line 112) of the Medicare cost report.

In recent years, we have received comments from stakeholders detailing concerns about the accuracy of ratesetting for allogeneic HSCT (79 FR 40950 through 40951; 79 FR 66809; and 80 FR 70414 through 70415). Stakeholders have presented several issues that could result in an inappropriate estimation of provider costs for these procedures, including outpatient allogeneic HCST reported on claims being identified as multiple procedure claims that are unusable under the standard OPPS ratesetting methodology. Stakeholders also have indicated that the requirement for the reporting of revenue code 0819 on claims reporting allogeneic HSCTs and the lack of a dedicated cost center for stem cell transplantation donor acquisition costs have led to an overly broad CCR being applied to these procedures, which comprise a very low volume of the services reported within the currently assigned cost center. In addition, commenters noted that it is likely that there are services being reported with the same revenue code (0819) and mapped to the same cost center code (086XX) as allogeneic HSCT donor acquisition charges that are unrelated to these services. Lastly, providers have commented that the donor acquisition costs of allogeneic HSCT are much higher relative to their charges when compared to the other items and services that are reported in the current cost center. Providers also have stated that hospitals have difficulty applying an appropriate markup to donor acquisition charges that will sufficiently generate a cost that approximates the total cost of donor acquisition. Through our examination of the CY 2016 claims data, we believe that the issues presented above provide a persuasive rationale for payment adjustment for donor acquisition costs for allogeneic HCST.

Stakeholders suggested that the establishment of a C–APC for stem cell transplant services would improve payment adequacy by allowing the use of multiple procedure claims, provided CMS also create a separate and distinct CCR for donor search and acquisition charges so that they are not diluted by lower cost services. In the CY 2016 OPPS/ASC final rule with comment period (80 FR 70414 through 70415), we stated that we would not create a new C–APC for stem cell transplant procedures at that time and that we would instead continue to pay for the services through the assigned APCs while continuing to monitor the issue.

Based on our current analysis of this longstanding issue and stakeholder input, in the CY 2017 OPPS/ASC proposed rule (81 FR 45623), for CY 2017, we proposed to create a new C–APC 5244 (Level 4 Blood Product Exchange and Related Services) and to assign procedures described by CPT code 38240 (Hematopoietic progenitor cell (HPC); allogeneic transplantation per donor) to this C–APC and to assign status indicator ''J1'' to the code. The creation of a new C–APC for allogeneic HSCT and the assignment of status indicator ''J1'' to CPT code 38240 would allow for the costs for all covered OPD services, including donor acquisition services, included on the claim to be packaged into the C–APC payment rate. These costs also will be analyzed using our comprehensive cost accounting methodology to establish future C–APC payment rates. We proposed to establish a payment rate for proposed new C–APC 5244 of $15,267 for CY 2017.

In order to develop an accurate estimate of allogeneic HSCT donor acquisition costs for future ratesetting, for CY 2017 and subsequent years, we proposed to update the Medicare hospital cost report (Form CMS–2552–10) by adding a new standard cost center 112.50, ''Allogeneic Stem Cell Acquisition,'' to Worksheet A (and applicable worksheets) with the standard cost center code of ''11250.'' The proposed new cost center, line 112.50, would be used for the recording of any acquisition costs related to allogeneic stem cell transplants as defined in Section 231.11, Chapter 4, of the Medicare Claims Processing Manual (Pub. 100–04). Acquisition charges for allogeneic stem cell transplants apply only to allogeneic transplants for which stem cells are obtained from a donor (rather than from the recipient). Acquisition charges do not apply to autologous transplants (transplanted stem cells are obtained from the recipient) because autologous transplants involve services provided to a beneficiary only (and not to a donor), for which the hospital may bill and receive payment. Acquisition costs for allogeneic stem cells are included in the prospective payment. This cost center flows through cost finding and accumulates any appropriate overhead costs.

In conjunction with our proposed addition of the new ''Allogeneic Stem Cell Acquisition'' standard cost center, we proposed to use the newly created revenue code 0815 (Allogeneic Stem Cell Acquisition Services) to identify hospital charges for stem cell acquisition for allogeneic bone marrow/stem cell transplants. Specifically, for CY 2017 and subsequent years, we proposed to require hospitals to identify stem cell acquisition charges for allogeneic bone marrow/stem cell transplants separately in Field 42 on Form CMS–1450 (or UB–04), when an allogeneic stem cell transplant occurs. Revenue code 0815 charges should include all services required to acquire stem cells from a donor, as defined above, and should be reported on the same date of service as the transplant procedure in order to be appropriately packaged for payment purposes. The proposed new revenue code 0815 would map to the proposed new line 112.50 (with the cost center code of ''11250'') on the Form CMS–2552–10 cost report. In addition, for CY 2017 and subsequent years, we proposed to no longer use revenue code 0819 for the identification of stem cell acquisition charges for allogeneic bone marrow/stem cell transplants. We invited public comments on these proposals.

Comment: Several commenters supported the proposal to create a new C–APC for allogeneic HSCT (C–APC 5244) and the assignment of status

indicator ''J1'' to CPT code 38240. However, many commenters believed that the proposed payment for C–APC 5244 continued to be significantly less than the overall cost of the service. Some commenters stated that CMS used claims to calculate the proposed payment rate for this service that were incomplete and did not adhere to CMS billing instructions for providers for allogeneic bone marrow/stem cell transplants. Specifically, the commenters stated that there were claims included in the geometric mean cost calculation for allogeneic HSCT (CPT code 38240) that did not include donor acquisition costs reported with revenue code 0819 on the same date of service as the transplant. According to the commenters, this resulted in an inaccurate and low estimation of the total cost of this service. The commenters requested that CMS exclude these claims from ratesetting for allogeneic HSCT. Commenters also suggested that CMS institute an edit beginning in CY 2017 that requires both the donor acquisition revenue code and the stem cell transplant CPT code on the claim to ensure that Medicare receives correctly coded claims for this relatively costly service.

Lastly, commenters stated that the new cost center and revenue code should be utilized for both inpatient and outpatient donor acquisition cost reporting, requested instructions from CMS on how to reclassify expenses into the new cost center from ancillary departments, and also suggested that CMS reconsider the use of cost center line 112.50 because this line is designated for solid organ acquisition costs, which are paid at cost. According to these commenters, these costs do not carry to Worksheet C and, for calculation of CCR, are dropped from cost report after accumulation of overhead. The commenter suggested the use of a cost center in the range of lines 50 through 76.99.

Response: We are persuaded by the commenters and note that at the summer 2016 meeting of the Advisory Panel on Hospital Outpatient Payment (HOP Panel), the panel also recommended that CMS use only the claims that include both CPT code 38240 and revenue code 0819 in calculating the CY 2017 payment rates for allogeneic HSCT. Therefore, we believe it is preferable to use only the claims with both the CPT code for the transplant (CPT code 38240) and the revenue code for the donor acquisition costs (revenue code 0819) to calculate the payment rate for this service under the new C–APC. We agree, in this case, to use only the subset of claims that include both codes because hospitals were specifically instructed in the CMS Internet Only Manual and in prior final rule preamble language to use revenue code 0819 to report donor acquisition costs. This instruction is different from our general instructions regarding correct coding in that this instruction is very specific and was issued to address problems associated with the reporting of donor acquisition costs. We also agree with the commenters' that implementing a code edit beginning in CY 2017 that will require revenue code 0815 to be on a claim with CPT code 38240 is appropriate because this practice will help to ensure that donor acquisition costs for allogeneic HSCT are reported with the appropriate revenue code and that these costs are accurately recorded in the Medicare hospital cost report. This edit will become effective January 1, 2017, and will return claims to the provider if CPT code 38240 is present for the transplant procedure without a separate line on the claim reporting revenue code 0815 for donor acquisition services. Again, we emphasize that this is an exceptional circumstance. We do not anticipate taking any similar actions for any other existing or future APCs or C–APCs. The combination of forming a new C–APC, providing unusually specific instructions in the CMS Internet Only Manual, needing to create a new cost center on the hospital cost report, and the clear recommendation from the HOP Panel—following both its and our thorough analysis of the issue—make this case particularly unique.

Regarding the comment related to the use of cost center line 112.50 to report allogeneic HSCT donor acquisition costs, we agree with the commenter that cost report lines 105 through 117 are designated for solid organ acquisition costs and other data for informational purposes. The commenter also indicated that the proposed line 112.50 does not carry over to Worksheet C for the calculation of a CCR and drops off after accumulation of overhead. The commenter makes a valid point regarding the proposed line 112.50, and we agree that the proposed new revenue code 0815 should be mapped to a different cost center. The commenters recommended the use of a cost center in the range of lines 50 through 76.99. However these cost centers have standard cost center descriptions that do not have a logical subscript for the proposed new line ''Allogeneic Stem Cell Acquisition''. Also, line 76 is used for too many variables and would not provide the needed isolation of costs or charges. However, the Medicare hospital cost report contains an available expansion in the range of lines 77 through 87. We are revising our proposal to update the Medicare hospital cost report (Form CMS–2552–10) by adding proposed new line 112.50 (with the cost center code of ''11250'') and are instead adding a new standard cost center 77, ''Allogeneic Stem Cell Acquisition,'' to Worksheet A (and applicable worksheets) with the standard cost center code of ''07700.'' The new cost center, line 77, will be used for the recording of any acquisition costs related to allogeneic stem cell transplants as defined in Section 231.11, Chapter 4, of the Medicare Claims Processing Manual (Pub. 100–04).

After consideration of the public comments we received, we are finalizing the proposal for C–APC 5244 (Level 4 Blood Product Exchange and Related Services), with the modification to exclude claims that do not include donor acquisition costs reported with revenue code 0819 from ratesetting. In addition, for CY 2017 and subsequent years, we are finalizing the proposal to no longer use revenue code 0819 for the identification of stem cell acquisition charges for allogeneic bone marrow/stem cell transplants. We are establishing a final payment rate for new C–APC 5244 of $27,752 for CY 2017.

d. Calculation of Composite APC Criteria-Based Costs

As discussed in the CY 2008 OPPS/ASC final rule with comment period (72 FR 66613), we believe it is important that the OPPS enhance incentives for hospitals to provide necessary, high quality care as efficiently as possible. For CY 2008, we developed composite APCs to provide a single payment for groups of services that are typically performed together during a single clinical encounter and that result in the provision of a complete service. Combining payment for multiple, independent services into a single OPPS payment in this way enables hospitals to manage their resources with maximum flexibility by monitoring and adjusting the volume and efficiency of services themselves. An additional advantage to the composite APC model is that we can use data from correctly coded multiple procedure claims to calculate payment rates for the specified combinations of services, rather than relying upon single procedure claims which may be low in volume and/or incorrectly coded. Under the OPPS, we currently have composite policies for low dose rate (LDR) prostate brachytherapy, mental health services, and multiple imaging services. We refer

readers to the CY 2008 OPPS/ASC final rule with comment period for a full discussion of the development of the composite APC methodology (72 FR 66611 through 66614 and 66650 through 66652) and the CY 2012 OPPS/ASC final rule with comment period (76 FR 74163) for more recent background. In the CY 2017 OPPS/ASC proposed rule (81 FR 45623), for CY 2017 and subsequent years, we proposed to continue our composite APC payment policies for LDR prostate brachytherapy services, mental health services, and multiple imaging services, as discussed below.

At its August 22, 2016 meeting the HOP Panel recommended that CMS develop a composite APC for pathology services when multiple pathology services are reported on a claim with no other payable services.

Comment: Several commenters supported the HOP Panel's recommendation to develop a composite APC for pathology services when multiple pathology services are reported on a claim with no other payable services and urged CMS to propose and finalize a policy to create such a composite APC. Some commenters also requested that CMS create additional composite APCs for X-ray services, respiratory services, cardiology services, and allergy testing services.

Response: We appreciate the HOP Panel's recommendation, as well as the commenters' request to create new composite APCs for additional services. However, we did not propose to create any new composite APCs for CY 2017. Therefore, we are not accepting the HOP Panel's recommendation at this time. We may consider this HOP Panel recommendation in conjunction with the commenters' request for the creation of new additional composite APCs for future rulemaking.

(1) Low Dose Rate (LDR) Prostate Brachytherapy Composite APC

LDR prostate brachytherapy is a treatment for prostate cancer in which hollow needles or catheters are inserted into the prostate, followed by permanent implantation of radioactive sources into the prostate through the needles/catheters. At least two CPT codes are used to report the composite treatment service because there are separate codes that describe placement of the needles/catheters and the application of the brachytherapy sources: CPT code 55875 (Transperineal placement of needles or catheters into prostate for interstitial radioelement application, with or without cystoscopy) and CPT code 77778 (Interstitial radiation source application; complex), which are generally present together on claims for the same date of service in the same operative session. In order to base payment on claims for the most common clinical scenario, and to further our goal of providing payment under the OPPS for a larger bundle of component services provided in a single hospital encounter, beginning in CY 2008, we began providing a single payment for LDR prostate brachytherapy when the composite service, reported as CPT codes 55875 and 77778, is furnished in a single hospital encounter. We base the payment for composite APC 8001 (LDR Prostate Brachytherapy Composite) on the geometric mean cost derived from claims for the same date of service that contain both CPT codes 55875 and 77778 and that do not contain other separately paid codes that are not on the bypass list. We refer readers to the CY 2008 OPPS/ASC final rule with comment period (72 FR 66652 through 66655) for a full history of OPPS payment for LDR prostate brachytherapy services and a detailed description of how we developed the LDR prostate brachytherapy composite APC.

In the CY 2017 OPPS/ASC proposed rule (81 FR 45623 through 45624), we proposed to continue to pay for LDR prostate brachytherapy services using the composite APC payment methodology proposed and implemented for CY 2008 through CY 2016. That is, we proposed to use CY 2015 claims reporting charges for both CPT codes 55875 and 77778 on the same date of service with no other separately paid procedure codes (other than those on the bypass list) to calculate the proposed payment rate for composite APC 8001. Consistent with our CY 2008 through CY 2016 practice, in the CY 2017 OPPS/ASC proposed rule, we proposed not to use the claims that meet these criteria in the calculation of the geometric mean costs of procedures or services assigned to APC 5375 (Level IV Cystourethroscopy and Other Genitourinary Procedures) and APC 5641 (Complex Interstitial Radiation Source Application), the APCs to which CPT codes 55875 and 77778 are assigned, respectively. We proposed to continue to calculate the proposed geometric mean costs of procedures or services assigned to APCs 5375 and 5641 using single and ''pseudo'' single procedure claims. We continue to believe that composite APC 8001 contributes to our goal of creating hospital incentives for efficiency and cost containment, while providing hospitals with the most flexibility to manage their resources. We also continue to believe that data from claims reporting both services required for LDR prostate brachytherapy provide the most accurate geometric mean cost upon which to base the proposed composite APC payment rate.

Using a partial year of CY 2015 claims data available for the CY 2017 OPPS/ASC proposed rule, we were able to use 202 claims that contained both CPT codes 55875 and 77778 to calculate the proposed geometric mean cost of approximately $3,581 for these procedures upon which the proposed CY 2017 payment rate for composite APC 8001 was based.

We did not receive any public comments on this proposal. Therefore, we are finalizing our proposal, without modification, to continue to use the payment rate for composite APC 8001 to pay for LDR prostate brachytherapy services for CY 2017 and to set the payment rate for this APC using our established methodology. Using the CY 2015 claims data available for this CY 2017 final rule with comment period, we were able to use 224 claims that contained both CPT codes 55875 and 77778 to calculate the geometric mean cost of approximately $3,598 for these procedures upon which the final CY 2017 payment rate for composite APC 8001 is based.

(2) Mental Health Services Composite APC

In the CY 2017 OPPS/ASC proposed rule (81 FR 45624), we proposed to continue our longstanding policy of limiting the aggregate payment for specified less resource-intensive mental health services furnished on the same date to the payment for a day of partial hospitalization services provided by a hospital, which we consider to be the most resource-intensive of all outpatient mental health services. We refer readers to the April 7, 2000 OPPS final rule with comment period (65 FR 18452 through 18455) for the initial discussion of this longstanding policy and the CY 2012 OPPS/ASC final rule with comment period (76 FR 74168) for more recent background.

Specifically, we proposed that when the aggregate payment for specified mental health services provided by one hospital to a single beneficiary on one date of service based on the payment rates associated with the APCs for the individual services exceeds the maximum per diem payment rate for partial hospitalization services provided by a hospital, those specified mental health services would be assigned to composite APC 8010 (Mental Health Services Composite). We also proposed to continue to set the payment rate for

composite APC 8010 at the same payment rate that we proposed to establish for APC 5862 (Level 2 Partial Hospitalization (4 or more services) for hospital-based PHPs), which is the maximum partial hospitalization per diem payment rate for a hospital, and that the hospital continue to be paid the payment rate for composite APC 8010. Under this policy, the I/OCE would continue to determine whether to pay for these specified mental health services individually, or to make a single payment at the same payment rate established for APC 5862 for all of the specified mental health services furnished by the hospital on that single date of service. We continue to believe that the costs associated with administering a partial hospitalization program at a hospital represent the most resource-intensive of all outpatient mental health services. Therefore, we do not believe that we should pay more for mental health services under the OPPS than the highest partial hospitalization per diem payment rate for hospitals.

In the CY 2017 OPPS/ASC proposed rule (81 FR 45667 through 45678), we proposed to combine the existing Level 1 and Level 2 hospital- based PHP APCs into a single hospital-based PHP APC and thereby discontinue APCs 5861 (Level 1 Partial Hospitalization (3 services) for Hospital-Based PHPs) and 5862 (Level 2 Partial Hospitalization (4 or more services) for Hospital-Based PHPs) and replace them with proposed new APC 5863 (Partial Hospitalization (3 or more services per day)). This proposal is being finalized in section VIII. of this final rule with comment period. In light of this policy, we are modifying our final policy for CY 2017, as fully discussed below.

We did not receive any public comments on this proposal. Therefore, we are finalizing our CY 2017 proposal, without modification, that when the aggregate payment for specified mental health services provided by one hospital to a single beneficiary on a single date of service, based on the payment rates associated with the APCs for the individual services, exceeds the maximum per diem payment rate for partial hospitalization services provided by a hospital, those specified mental health services will be paid through composite APC 8010 (Mental Health Services Composite) for CY 2017. In addition, we are finalizing our CY 2017 proposal, with modification, to set the payment rate for composite APC 8010 for CY 2017 at the same payment rate that we established for new APC 5863, which is the maximum partial hospitalization per diem payment rate for a hospital, and that the hospital continue to be paid the payment rate for composite APC 8010.

(3) Multiple Imaging Composite APCs (APCs 8004, 8005, 8006, 8007, and 8008)

Effective January 1, 2009, we provide a single payment each time a hospital submits a claim for more than one imaging procedure within an imaging family on the same date of service, in order to reflect and promote the efficiencies hospitals can achieve when performing multiple imaging procedures during a single session (73 FR 41448 through 41450). We utilize three imaging families based on imaging modality for purposes of this methodology: (1) Ultrasound; (2) computed tomography (CT) and computed tomographic angiography (CTA); and (3) magnetic resonance imaging (MRI) and magnetic resonance angiography (MRA). The HCPCS codes subject to the multiple imaging composite policy and their respective families are listed in Table 12 of the CY 2014 OPPS/ASC final rule with comment period (78 FR 74920 through 74924). While there are three imaging families, there are five multiple imaging composite APCs due to the statutory requirement under section 1833(t)(2)(G) of the Act that we differentiate payment for OPPS imaging services provided with and without contrast. While the ultrasound procedures included under the policy do not involve contrast, both CT/CTA and MRI/MRA scans can be provided either with or without contrast. The five multiple imaging composite APCs established in CY 2009 are:

- APC 8004 (Ultrasound Composite);
- APC 8005 (CT and CTA without Contrast Composite);
- APC 8006 (CT and CTA with Contrast Composite);
- APC 8007 (MRI and MRA without Contrast Composite); and
- APC 8008 (MRI and MRA with Contrast Composite).

We define the single imaging session for the ''with contrast'' composite APCs as having at least one or more imaging procedures from the same family performed with contrast on the same date of service. For example, if the hospital performs an MRI without contrast during the same session as at least one other MRI with contrast, the hospital will receive payment based on the payment rate for APC 8008, the ''with contrast'' composite APC.

We make a single payment for those imaging procedures that qualify for payment based on the composite APC payment rate, which includes any packaged services furnished on the same date of service. The standard (noncomposite) APC assignments continue to apply for single imaging procedures and multiple imaging procedures performed across families. For a full discussion of the development of the multiple imaging composite APC methodology, we refer readers to the CY 2009 OPPS/ASC final rule with comment period (73 FR 68559 through 68569).

In the CY 2017 OPPS/ASC proposed rule (81 FR 45624 through 45625), we proposed to continue to pay for all multiple imaging procedures within an imaging family performed on the same date of service using the multiple imaging composite APC payment methodology. We continue to believe that this policy will reflect and promote the efficiencies hospitals can achieve when performing multiple imaging procedures during a single session.

The proposed CY 2017 payment rates for the five multiple imaging composite APCs (APCs 8004, 8005, 8006, 8007, and 8008) were based on proposed geometric mean costs calculated from a partial year of CY 2015 claims available for the CY 2017 OPPS/ASC proposed rule that qualified for composite payment under the current policy (that is, those claims reporting more than one procedure within the same family on a single date of service). To calculate the proposed geometric mean costs, we used the same methodology that we used to calculate the final geometric mean costs for these composite APCs since CY 2014, as described in the CY 2014 OPPS/ASC final rule with comment period (78 FR 74918). The imaging HCPCS codes referred to as ''overlap bypass codes'' that we removed from the bypass list for purposes of calculating the proposed multiple imaging composite APC geometric mean costs, in accordance with our established methodology as stated in the CY 2014 OPPS/ASC final rule with comment period (78 FR 74918), were identified by asterisks in Addendum N to the CY 2017 OPPS/ASC proposed rule (which is available via the Internet on the CMS Web site) and were discussed in more detail in section II.A.1.b. of the CY 2017 OPPS/ASC proposed rule. For the CY 2017 OPPS/ASC proposed rule, we were able to identify approximately 599,294 ''single session'' claims out of an estimated 1.6 million potential claims for payment through composite APCs from our ratesetting claims data, which represents approximately 38 percent of all eligible claims, to calculate the proposed CY 2017 geometric mean costs for the multiple imaging composite APCs. Table 7 of the CY 2017 OPPS/

ASC proposed rule lists the proposed HCPCS codes that would be subject to the multiple imaging composite APC policy and their respective families and approximate composite APC proposed geometric mean costs for CY 2017.

We did not receive any public comments on this proposal. Therefore, we are finalizing our proposal to continue the use of multiple imaging composite APCs to pay for services providing more than one imaging procedure from the same family on the same date, without modification. For this CY 2017 final rule with comment period, we were able to identify approximately 635,363 ''single session'' claims out of an estimated 1.7 million potential claims for payment through composite APCs from our ratesetting claims data, which represents approximately 37 percent of all eligible claims, to calculate the final CY 2017 geometric mean costs for the multiple imaging composite APCs. Table 3 below lists the HCPCS codes that are subject to the multiple imaging composite APC policy and their respective families and approximate composite APC geometric mean costs for CY 2017.

TABLE 3—FINAL OPPS IMAGING FAMILIES AND MULTIPLE IMAGING PROCEDURE COMPOSITE APCS

Family 1—Ultrasound	
CY 2017 APC 8004 (ultrasound composite)	CY 2017 Approximate APC geometric mean cost = $296
76604	Us exam, chest.
76700	Us exam, abdom, complete.
76705	Echo exam of abdomen.
76770	Us exam abdo back wall, comp.
76775	Us exam abdo back wall, lim.
76776	Us exam k transpl w/Doppler.
76831	Echo exam, uterus.
76856	Us exam, pelvic, complete.
76870	Us exam, scrotum.
76857	Us exam, pelvic, limited.
Family 2—CT and CTA with and without contrast	
CY 2017 APC 8005 (CT and CTA without contrast composite) *	CY 2017 Approximate APC geometric mean cost = $325
70450	Ct head/brain w/o dye.
70480	Ct orbit/ear/fossa w/o dye.
70486	Ct maxillofacial w/o dye.
70490	Ct soft tissue neck w/o dye.
71250	Ct thorax w/o dye.
72125	Ct neck spine w/o dye.
72128	Ct chest spine w/o dye.
72131	Ct lumbar spine w/o dye.
72192	Ct pelvis w/o dye.
73200	Ct upper extremity w/o dye.
73700	Ct lower extremity w/o dye.
74150	Ct abdomen w/o dye.
74261	Ct colonography, w/o dye.
74176	Ct angio abd & pelvis.
CY 2017 APC 8006 (CT and CTA with contrast composite)	CY 2017 Approximate APC geometric mean cost = $548
70487	Ct maxillofacial w/dye.
70460	Ct head/brain w/dye.
70470	Ct head/brain w/o & w/dye.
70481	Ct orbit/ear/fossa w/dye.
70482	Ct orbit/ear/fossa w/o & w/dye.
70488	Ct maxillofacial w/o & w/dye.
70491	Ct soft tissue neck w/dye.

C8918	MRA w/cont, pelvis.
C8920	MRA w/o fol w/cont, pelvis.
C8931	MRA, w/dye, spinal canal.
C8933	MRA, w/o&w/dye, spinal canal.
C8934	MRA, w/dye, upper extremity.
C8936	MRA, w/o&w/dye, upper extr.

* If a ''without contrast'' MRI or MRA procedure is performed during the same session as a ''with contrast'' MRI or MRA procedure, the I/OCE assigns the procedure to APC 8008 rather than APC 8007.

3. Changes to Packaged Items and Services

a. Background and Rationale for Packaging in the OPPS

Like other prospective payment systems, the OPPS relies on the concept of averaging to establish a payment rate for services. The payment may be more or less than the estimated cost of providing a specific service or a bundle of specific services for a particular patient. The OPPS packages payment for multiple interrelated items and services into a single payment to create incentives for hospitals to furnish services most efficiently and to manage their resources with maximum flexibility. Our packaging policies support our strategic goal of using larger payment bundles in the OPPS to maximize hospitals' incentives to provide care in the most efficient manner. For example, where there are a variety of devices, drugs, items, and supplies that could be used to furnish a service, some of which are more costly than others, packaging encourages hospitals to use the most cost-efficient item that meets the patient's needs, rather than to routinely use a more expensive item, which often results if separate payment is provided for the item.

Packaging also encourages hospitals to effectively negotiate with manufacturers and suppliers to reduce the purchase price of items and services or to explore alternative group purchasing arrangements, thereby encouraging the most economical health care delivery. Similarly, packaging encourages hospitals to establish protocols that ensure that necessary services are furnished, while scrutinizing the services ordered by practitioners to maximize the efficient use of hospital resources. Packaging payments into larger payment bundles promotes the predictability and accuracy of payment for services over time. Finally, packaging may reduce the importance of refining service-specific payment because packaged payments include costs associated with higher cost cases requiring many ancillary items and services and lower cost cases requiring fewer ancillary items and services. Because packaging encourages efficiency and is an essential component of a prospective payment system, packaging payment for items and services that are typically integral, ancillary, supportive, dependent, or adjunctive to a primary service has been a fundamental part of the OPPS since its implementation in August 2000. For an extensive discussion of the history and background of the OPPS packaging policy, we refer readers to the CY 2000 OPPS final rule (65 FR 18434), the CY 2008 OPPS/ASC final rule with comment period (72 FR 66580), the CY 2014 OPPS/ASC final rule with comment period (78 FR 74925), the CY 2015 OPPS/ASC final rule with comment period (79 FR 66817), and the CY 2016 OPPS/ASC final rule with comment period (80 FR 70343). As we continue to develop larger payment groups that more broadly reflect services provided in an encounter or episode of care, we have expanded the OPPS packaging policies. Most, but not necessarily all, items and services currently packaged in the OPPS are listed in 42 CFR 419.2(b). Our overarching goal is to make OPPS payments for all services paid under the OPPS more consistent with those of a prospective payment system and less like those of a per service fee schedule, which pays separately for each coded item. As a part of this effort, we have continued to examine the payment for items and services provided under the OPPS to determine which OPPS services can be packaged to further achieve the objective of advancing the OPPS toward a more prospective payment system.

For CY 2017, we have examined our OPPS packaging policies, reviewing categories of integral, ancillary, supportive, dependent, or adjunctive items and services that are packaged into payment for the primary service that they support. In the CY 2017 OPPS/ASC proposed rule (81 FR 45628), we proposed some modifications to our packaging policies. The specific proposals and any applicable summations of and responses to any public comments received in response to these proposals are discussed under the sections below.

b. Clinical Diagnostic Laboratory Test Packaging Policy

(1) Background

In CY 2014, we finalized a policy to package payment for most clinical

diagnostic laboratory tests in the OPPS (78 FR 74939 through 74942, and 42 CFR 419.2(b)(17)). In CY 2016, we made some minor modifications to this policy (80 FR 70348 through 70350). Under current policy, certain clinical diagnostic laboratory tests that are listed on the Clinical Laboratory Fee Schedule (CLFS) are packaged in the OPPS as integral, ancillary, supportive, dependent, or adjunctive to the primary service or services provided in the hospital outpatient setting. Specifically, we conditionally package laboratory tests and only pay separately for laboratory tests when (1) they are the only services provided to a beneficiary on a claim; (2) they are ''unrelated'' laboratory tests, meaning they are on the same claim as other hospital outpatient services, but are ordered for a different diagnosis than the other hospital outpatient services and are ordered by a different practitioner than the practitioner who ordered the other hospital outpatient services; (3) they are molecular pathology tests; or (4) the laboratory tests are considered preventive services.

(2) ''Unrelated'' Laboratory Test Exception

Laboratory tests are separately paid in the HOPD when they are considered ''unrelated'' laboratory tests. Unrelated laboratory tests are tests on the same claim as other hospital outpatient services, but are ordered for a different diagnosis than the other hospital outpatient services and are ordered by a different practitioner than the practitioner who ordered the other hospital outpatient services. Unrelated laboratory tests are designated for separate payment by hospitals with the ''L1'' modifier. This is the only use of the ''L1'' modifier.

For CY 2017, in the CY 2017 OPPS/ASC proposed rule (81 FR 45628), we proposed to discontinue the unrelated laboratory test exception (and the ''L1'' modifier) for the following reasons: We believe that, in most cases, ''unrelated'' laboratory tests are not significantly different than most other packaged laboratory tests provided in the HOPD. Multiple hospitals have informed us that the ''unrelated'' laboratory test exception is not useful to them because they cannot determine when a laboratory test has been ordered by a different physician and for a different diagnosis than the other services reported on the same claim. We agree with these hospitals, and we also believe that the requirements for ''unrelated'' laboratory tests (different diagnosis and different ordering physician) do not necessarily correlate with the relatedness of a laboratory test to the other HOPD services that a patient receives during the same hospital stay. In the context of most hospital outpatient encounters, most laboratory tests are related in some way to other services being provided because most common laboratory tests evaluate the functioning of the human body as a physiologic system and, therefore, relate to other tests and interventions that a patient receives. Also, it is not uncommon for beneficiaries to have multiple diagnoses, and often times the various diagnoses are related in some way. Therefore, the associated diagnosis is not necessarily indicative of how related a laboratory test is to other hospital outpatient services performed during a hospital stay, especially given the granularity of ICD–10 diagnosis coding. Packaging of other ancillary services in the OPPS is not dependent upon a common diagnosis with the primary service into which an ancillary service is packaged. Therefore, we do not believe that this should be a requirement for laboratory test packaging. Furthermore, we believe that just because a laboratory test is ordered by a different physician than the physician who ordered the other hospital outpatient services furnished during a hospital outpatient stay does not necessarily mean that the laboratory test is not related to other services being provided to a beneficiary.

Therefore, because the ''different physician, different diagnosis'' criteria for ''unrelated'' laboratory tests do not clearly identify or distinguish laboratory tests that are not integral, ancillary, supportive, dependent, or adjunctive to other hospital outpatient services provided to the beneficiary during the hospital stay, we proposed to no longer permit the use of the ''L1'' modifier to self-designate an exception to the laboratory test packaging under these circumstances, and seek separate payment for such laboratory tests at the CLFS payment rates. Instead, we proposed to package any and all laboratory tests (except molecular pathology tests, certain ADLTs, and preventive tests) if they appear on a claim with other hospital outpatient services.

We invited public comments on this proposal.

Comment: The majority of commenters supported the proposal. Some of the commenters believed that the proposal would reduce administrative burden. Other commenters opposed the proposal and stated that, despite the burden, they would rather have the opportunity for separate payment for ''unrelated'' laboratory tests. Some commenters believed that the proposal would result in no separate payment for laboratory tests when laboratory tests are the only services provided.

Response: We appreciate the commenters' support. The proposal was made in response to concerns raised by hospitals about when to use modifier ''L1,'' and because we agreed with the commenters' concerns as noted above. We also do not believe that the discontinuation of the modifier ''L1'' policy is inconsistent with our policy to package items and services that are integral, ancillary, supportive, dependent, or adjunctive to other hospital outpatient services. Also, we stated in the CY 2017 OPPS/ASC proposed rule (81 FR 45628) that ''[i]n the context of most hospital outpatient encounters, most laboratory tests are related in some way to other services being provided because most common laboratory tests evaluate the functioning of the human body as a physiologic system and therefore relate to other tests and interventions that a patient receives.'' Therefore, we do not believe that it is necessary to attempt to identify certain laboratory tests as unrelated to other services furnished to a patient. Finally, the discontinuation of the ''L1'' modifier and the associated policy does not affect the separate payment for laboratory tests when these procedures are the only services that are provided to the beneficiary.

After consideration of the public comments we received, we are finalizing, as proposed, the discontinuation of the ''unrelated'' laboratory test exception and consequently the ''L1'' modifier.

(3) Molecular Pathology Test Exception

In 2014, we excluded from the laboratory packaging policy molecular pathology tests described by CPT codes in the ranges of 81200 through 81383, 81400 through 81408, and 81479 (78 FR 74939 through 74942). In 2016, we expanded this policy to include not only the original code range but also all new molecular pathology test codes. Molecular pathology laboratory tests were excluded from packaging because we believed that these relatively new tests may have a different pattern of clinical use than more conventional laboratory tests, which may make them generally less tied to a primary service in the hospital outpatient setting than the more common and routine laboratory tests that are packaged (80 FR 70348 through 70350).

In response to the CY 2016 OPPS/ASC proposed rule, commenters argued that CMS' rationale for excluding molecular

pathology tests from the laboratory test packaging policy also applies to certain CPT codes that describe some new multianalyte assays with algorithmic analyses (MAAAs).

In the CY 2016 OPPS/ASC final rule with comment period (80 FR 70349 through 70350), we stated that ''we may consider whether additional exceptions to the OPPS laboratory test packaging policy should apply to tests other than molecular pathology tests in the future.'' After further consideration, we agree with these commenters that the exception that currently applies to molecular pathology tests may be appropriately applied to other laboratory tests that, like molecular pathology tests, are relatively new and may have a different pattern of clinical use than more conventional laboratory tests, which may make them generally less tied to a primary service in the hospital outpatient setting than the more common and routine laboratory tests that are packaged. Therefore, for CY 2017, in the CY 2017 OPPS/ASC proposed rule (81 FR 45628), we proposed an expansion of the laboratory packaging exception that currently applies to molecular pathology tests to also apply to all advanced diagnostic laboratory tests (ADLTs) that meet the criteria of section 1834A(d)(5)(A) of the Act. We believe that some of these diagnostic tests that meet these criteria will not be molecular pathology tests but will also have a different pattern of clinical use than more conventional laboratory tests, which may make them generally less tied to a primary service in the hospital outpatient setting than the more common and routine laboratory tests that are packaged. We proposed to assign status indicator ''A'' (Separate payment under the CLFS) to ADLTs once a laboratory test is designated an ADLT under the CLFS.

We invited public comments on this proposal.

Comment: Many commenters supported the proposal. A few commenters suggested that CMS apply the exception not just to ADLTs that meet the criteria of section 1834A(d)(5)(A) of the Act, but to all MAAAs.

Response: We appreciate the commenters' support. Regarding the suggestion that we exempt all MAAAs from OPPS packaging, we do not believe that this would be prudent, as MAAAs are a broad category of tests. We are limiting the expansion of this exception to only those ADLTs that meet the criteria of section 1834A(d)(5)(A) of the Act, which are defined as tests that provide an analysis of multiple biomarkers of DNA, RNA, or proteins combined with a unique algorithm to yield a single patient-specific result.

After consideration of the public comments we received, we are finalizing our proposal, without modification, to assign status indicator ''A'' (Separate payment under the CLFS) to ADLTs once a laboratory test is designated an ADLT under the CLFS.

c. Conditional Packaging Status Indicators ''Q1'' and ''Q2''

(1) Background

Packaged payment versus separate payment of items and services in the OPPS is designated at the code level through the assignment of a status indicator to all CPT and HCPCS codes. One type of packaging in the OPPS is conditional packaging, which means that, under certain circumstances, items and services are packaged, and under other circumstances, they are paid separately. There are several different conditional packaging status indicators. Two of these status indicators indicate packaging of the services with other services furnished on the same date of service: Status indicator ''Q1,'' which packages items or services on the same date of service with services assigned status indicator ''S'' (Procedure or Service, Not Discounted When Multiple), ''T'' (Procedure or Service, Multiple Procedure Reduction Applies), or ''V'' (Clinic or Emergency Department Visit); and status indicator ''Q2,'' which packages items or services on the same date of service with services assigned status indicator ''T.'' Other conditional packaging status indicators, ''Q4'' (Conditionally packaged laboratory tests) and ''J1''/''J2'' (Hospital Part B services paid through a comprehensive APC), package services on the same claim, regardless of the date of service.

(2) Change in Conditional Packaging Status Indicators Logic

We do not believe that some conditional packaging status indicators should package based on date of service, while other conditional packaging status indicators package based on services reported on the same claim. For CY 2017, we proposed to align the packaging logic for all of the conditional packaging status indicators and change the logic for status indicators ''Q1'' and ''Q2'' so that packaging would occur at the claim level (instead of based on the date of service) to promote consistency and ensure that items and services that are provided during a hospital stay that may span more than one day are appropriately packaged according to OPPS packaging policies (81 FR 45629). We pointed out that this would increase the conditional packaging of conditionally packaged items and services because conditional packaging would occur whenever a conditionally packaged item or service is reported on the same claim as a primary service without regard to the date of service.

We invited public comments on this proposal.

Comment: The majority of commenters opposed the proposal. These commenters opposed the proposal primarily because of a general opposition to packaging in the OPPS. Other commenters supported the proposal and acknowledged CMS' efforts to promote consistency in the OPPS. Some commenters requested further information on the impacts of the proposed change.

Response: We thank the commenters who support this proposal. The commenters who opposed the proposal did not provide specifics as to why the proposed change would be inconsistent with OPPS packaging policies. We believe that conditional packaging should operate at the claim level for an entire hospital stay and not be limited to a single date of service. We refer the commenters interested in the impacts of this and other policies to section XXIII. of this final rule with comment period.

After consideration of the public comments we received, we are finalizing our proposal, without modification, to align the packaging logic for all of the conditional packaging status indicators and change the logic for status indicators ''Q1'' and ''Q2'' so that packaging occurs at the claim level (instead of based on the date of service).

4. Calculation of OPPS Scaled Payment Weights

We established a policy in the CY 2013 OPPS/ASC final rule with comment period (77 FR 68283) of using geometric mean-based APC costs to calculate relative payment weights under the OPPS. In the CY 2016 OPPS/ASC final rule with comment period (80 FR 70350 through 70351), we applied this policy and calculated the relative payment weights for each APC for CY 2016 that were shown in Addenda A and B to that final rule with comment period (which were made available via the Internet on the CMS Web site) using the APC costs discussed in sections II.A.1. and II.A.2. of that final rule with comment period. For CY 2017, we proposed to continue to apply the policy established in CY 2013 and calculate relative payment weights for each APC for CY 2017 using geometric mean-based APC costs (81 FR 45629).

For CY 2012 and CY 2013, outpatient clinic visits were assigned to one of five

levels of clinic visit APCs, with APC 0606 representing a mid-level clinic visit. In the CY 2014 OPPS/ASC final rule with comment period (78 FR 75036 through 75043), we finalized a policy that created alphanumeric HCPCS code G0463 (Hospital outpatient clinic visit for assessment and management of a patient), representing any and all clinic visits under the OPPS. HCPCS code G0463 was assigned to APC 0634 (Hospital Clinic Visits). We also finalized a policy to use CY 2012 claims data to develop the CY 2014 OPPS payment rates for HCPCS code G0463 based on the total geometric mean cost of the levels one through five CPT E/M codes for clinic visits previously recognized under the OPPS (CPT codes 99201 through 99205 and 99211 through 99215). In addition, we finalized a policy to no longer recognize a distinction between new and established patient clinic visits.

For CY 2016, we deleted APC 0634 and reassigned the outpatient clinic visit HCPCS code G0463 to APC 5012 (Level 2 Examinations and Related Services) (80 FR 70351).

For CY 2017, we proposed to continue to standardize all of the relative payment weights to APC 5012 (81 FR 45629). We believe that standardizing relative payment weights to the geometric mean of the APC to which HCPCS code G0463 is assigned maintains consistency in calculating unscaled weights that represent the cost of some of the most frequently provided OPPS services. For CY 2017, in the CY 2017 OPPS/ASC proposed rule (81 FR 45629), we proposed to assign APC 5012 a relative payment weight of 1.00 and to divide the geometric mean cost of each APC by the geometric mean cost for APC 5012 to derive the unscaled relative payment weight for each APC. The choice of the APC on which to standardize the relative payment weights does not affect payments made under the OPPS because we scale the weights for budget neutrality.

Section 1833(t)(9)(B) of the Act requires that APC reclassification and recalibration changes, wage index changes, and other adjustments be made in a budget neutral manner. Budget neutrality ensures that the estimated aggregate weight under the OPPS for CY 2017 is neither greater than nor less than the estimated aggregate weight that would have been made without the changes. To comply with this requirement concerning the APC changes, we proposed to compare the estimated aggregate weight using the CY 2016 scaled relative payment weights to the estimated aggregate weight using the proposed CY 2017 unscaled relative payment weights.

We did not receive any public comments on our proposal to use the geometric mean cost of renumbered APC 5012 to standardize relative payment weights. Therefore, we are finalizing our proposal and assigning APC 5012 the relative payment weight of 1.00, and using the relative payment weight for APC 5012 to derive the unscaled relative payment weight for each APC for CY 2017.

For CY 2016, we multiplied the CY 2016 scaled APC relative payment weight applicable to a service paid under the OPPS by the volume of that service from CY 2015 claims to calculate the total relative payment weight for each service. We then added together the total relative payment weight for each of these services in order to calculate an estimated aggregate weight for the year. For CY 2017, in the CY 2017 OPPS/ASC proposed rule (81 FR 45629), we proposed to apply the same process using the estimated CY 2017 unscaled relative payment weights rather than scaled relative payment weights. We proposed to calculate the weight scalar by dividing the CY 2016 estimated aggregate weight by the unscaled CY 2017 estimated aggregate weight.

For a detailed discussion of the weight scalar calculation, we refer readers to the OPPS claims accounting document available on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html*. Click on the CY 2017 OPPS final rule link and open the claims accounting document link at the bottom of the page.

In the CY 2017 OPPS/ASC proposed rule (81 FR 45630), we proposed to compare the estimated unscaled relative payment weights in CY 2017 to the estimated total relative payment weights in CY 2016 using CY 2015 claims data, holding all other components of the payment system constant to isolate changes in total weight. Based on this comparison, we proposed to adjust the calculated CY 2017 unscaled relative payment weights for purposes of budget neutrality. We proposed to adjust the estimated CY 2017 unscaled relative payment weights by multiplying them by a weight scaler of 1.4059 to ensure that the proposed CY 2017 relative payment weights are scaled to be budget neutral. The proposed CY 2017 relative payment weights listed in Addenda A and B to the proposed rule (which are available via the Internet on the CMS Web site) were scaled and incorporated the recalibration adjustments discussed in sections II.A.1. and II.A.2. of the proposed rule.

Section 1833(t)(14) of the Act provides the payment rates for certain SCODs. Section 1833(t)(14)(H) of the Act provides that additional expenditures resulting from this paragraph shall not be taken into account in establishing the conversion factor, weighting, and other adjustment factors for 2004 and 2005 under paragraph (9), but shall be taken into account for subsequent years. Therefore, the cost of those SCODs (as discussed in section V.B.3. of this final rule with comment period) is included in the budget neutrality calculations for the CY 2017 OPPS.

We did not receive any public comments on the proposed weight scaler calculation.

Therefore, we are finalizing our proposal to use the calculation process described in the proposed rule, without modification. Using updating final rule claims data, we are updating the estimated CY 2017 unscaled relative payment weights by multiplying them by a weight scaler of 1.4208 to ensure that the final CY 2017 relative payment weights are scaled to be budget neutral.

B. Conversion Factor Update

Section 1833(t)(3)(C)(ii) of the Act requires the Secretary to update the conversion factor used to determine the payment rates under the OPPS on an annual basis by applying the OPD fee schedule increase factor. For purposes of section 1833(t)(3)(C)(iv) of the Act, subject to sections 1833(t)(17) and 1833(t)(3)(F) of the Act, the OPD fee schedule increase factor is equal to the hospital inpatient market basket percentage increase applicable to hospital discharges under section 1886(b)(3)(B)(iii) of the Act. In the FY 2017 IPPS/LTCH PPS final rule (81 FR 56938 through 81 FR 56939), consistent with current law, based on IHS Global Insight, Inc.'s second quarter 2016 forecast of the FY 2017 market basket increase, the FY 2017 IPPS market basket update is 2.7 percent.

However, sections 1833(t)(3)(F) and 1833(t)(3)(G)(v) of the Act, as added by section 3401(i) of the Patient Protection and Affordable Care Act of 2010 (Pub. L. 111–148) and as amended by section 10319(g) of that law and further amended by section 1105(e) of the Health Care and Education Reconciliation Act of 2010 (Pub. L. 111–152), provide adjustments to the OPD fee schedule increase factor for CY 2017.

Specifically, section 1833(t)(3)(F)(i) of the Act requires that, for 2012 and subsequent years, the OPD fee schedule increase factor under subparagraph

(C)(iv) be reduced by the productivity adjustment described in section 1886(b)(3)(B)(xi)(II) of the Act. Section 1886(b)(3)(B)(xi)(II) of the Act defines the productivity adjustment as equal to the 10-year moving average of changes in annual economy-wide, private nonfarm business multifactor productivity (MFP) (as projected by the Secretary for the 10-year period ending with the applicable fiscal year, year, cost reporting period, or other annual period) (the ''MFP adjustment''). In the FY 2012 IPPS/LTCH PPS final rule (76 FR 51689 through 51692), we finalized our methodology for calculating and applying the MFP adjustment, and then revised this methodology as discussed in the FY 2016 IPPS/LTCH PPS final rule (80 FR 49509). In the FY 2017 IPPS/LTCH PPS final rule (81 FR 56938 through 81 FR 56939), we discussed the calculation of the final MFP adjustment for FY 2017, which is 0.3 percentage point.

In the CY 2017 OPPS/ASC proposed rule, we proposed that if more recent data became subsequently available after the publication of the proposed rule (for example, a more recent estimate of the market basket increase and the MFP adjustment), we would use such updated data, if appropriate, to determine the CY 2017 market basket update and the MFP adjustment, which are components in calculating the OPD fee schedule increase factor under sections 1833(t)(3)(C)(iv) and 1833(t)(3)(F) of the Act, in this CY 2017 OPPS/ASC final rule with comment period. Consistent with that proposal, and the FY 2017 IPPS/LTCH PPS final rule, we applied the updated final FY 2017 market basket percentage increase (2.7 percent) and the MFP adjustment (0.3 percent) to the OPD fee schedule increase factor for the CY 2017 OPPS.

In addition, section 1833(t)(3)(F)(ii) of the Act requires that, for each of years 2010 through 2019, the OPD fee schedule increase factor under section 1833(t)(3)(C)(iv) of the Act be reduced by the adjustment described in section 1833(t)(3)(G) of the Act. For CY 2017, section 1833(t)(3)(G)(v) of the Act provides a 0.75 percentage point reduction to the OPD fee schedule increase factor under section 1833(t)(3)(C)(iv) of the Act. Therefore, in accordance with sections 1833(t)(3)(F)(ii) and 1833(t)(3)(G)(v) of the Act, in the CY 2017 OPPS/ASC proposed rule, we proposed to apply a 0.75 percentage point reduction to the OPD fee schedule increase factor for CY 2017.

We note that section 1833(t)(3)(F) of the Act provides that application of this subparagraph may result in the OPD fee schedule increase factor under section 1833(t)(3)(C)(iv) of the Act being less than 0.0 percent for a year, and may result in OPPS payment rates being less than rates for the preceding year. As described in further detail below, we are applying an OPD fee schedule increase factor of 1.65 percent for the CY 2017 OPPS (which is 2.7 percent, the final estimate of the hospital inpatient market basket percentage increase, less the final 0.3 percentage point MFP adjustment, and less the 0.75 percentage point additional adjustment).

Hospitals that fail to meet the Hospital OQR Program reporting requirements are subject to an additional reduction of 2.0 percentage points from the OPD fee schedule increase factor adjustment to the conversion factor that would be used to calculate the OPPS payment rates for their services, as required by section 1833(t)(17) of the Act. For further discussion of the Hospital OQR Program, we refer readers to section XIII. of this final rule with comment period.

In the CY 2017 OPPS/ASC proposed rule, we proposed to amend 42 CFR 419.32(b)(1)(iv)(B) by adding a new paragraph (*8*) to reflect the requirement in section 1833(t)(3)(F)(i) of the Act that, for CY 2017, we reduce the OPD fee schedule increase factor by the MFP adjustment as determined by CMS, and to reflect the requirement in section 1833(t)(3)(G)(v) of the Act, as required by section 1833(t)(3)(F)(ii) of the Act, that we reduce the OPD fee schedule increase factor by an additional 0.75 percentage point for CY 2017.

We did not receive any public comments on the proposed adjustments to the OPD fee schedule increase factor or on the proposed changes to the regulations at 42 CFR 419.32(b)(1)(iv)(B). For the reasons discussed above, we are adjusting the OPD fee schedule increase factor and finalizing the changes to the regulations as proposed. To set the OPPS conversion factor for the CY 2017 proposed rule, we proposed to increase the CY 2016 conversion factor of $73.725 by 1.55 percent. In accordance with section 1833(t)(9)(B) of the Act, we proposed further to adjust the conversion factor for CY 2017 to ensure that any revisions made to the wage index and rural adjustment were made on a budget neutral basis. We proposed to calculate an overall budget neutrality factor of 1.0000 for wage index changes by comparing proposed total estimated payments from our simulation model using the proposed FY 2017 IPPS wage indexes to those payments using the FY 2016 IPPS wage indexes, as adopted on a calendar year basis for the OPPS.

For the CY 2017 proposed rule, we proposed to maintain the current rural adjustment policy, as discussed in section II.E. of this final rule with comment period. Therefore, the proposed budget neutrality factor for the rural adjustment was 1.0000.

For the CY 2017 proposed rule, we proposed to continue previously established policies for implementing the cancer hospital payment adjustment described in section 1833(t)(18) of the Act, as discussed in section II.F. of this final rule with comment period. We proposed to calculate a CY 2017 budget neutrality adjustment factor for the cancer hospital payment adjustment by comparing estimated total CY 2017 payments under section 1833(t) of the Act, including the proposed CY 2017 cancer hospital payment adjustment, to estimated CY 2017 total payments using the CY 2016 final cancer hospital payment adjustment as required under section 1833(t)(18)(B) of the Act.

The CY 2017 proposed estimated payments applying the proposed CY 2017 cancer hospital payment adjustment were identical to estimated payments applying the CY 2016 final cancer hospital payment adjustment. Therefore, we proposed to apply a budget neutrality adjustment factor of 1.0000 to the conversion factor for the cancer hospital payment adjustment.

For CY 2017, we proposed to apply a budget neutrality adjustment factor of 1.0003 to increase the conversion factor to account for our proposal to package unrelated laboratory tests into OPPS payment.

For the proposed rule, we estimated that proposed pass-through spending for drugs, biologicals, and devices for CY 2017 would equal approximately $148.3 million, which represented 0.24 percent of total projected CY 2017 OPPS spending. Therefore, the proposed conversion factor would be adjusted by the difference between the 0.26 percent estimate of pass-through spending for CY 2016 and the 0.24 percent estimate of proposed pass-through spending for CY 2017, resulting in a proposed adjustment for CY 2017 of 0.02 percent. Proposed estimated payments for outliers would remain at 1.0 percent of total OPPS payments for CY 2017. We estimated for the proposed rule that outlier payments would be 0.96 percent of total OPPS payments in CY 2016; the 1.0 percent for proposed outlier payments in CY 2017 would constitute a 0.04 percent increase in payment in CY 2017 relative to CY 2016.

Comment: One commenter requested that CMS verify the amount of dollars

used to calculate the adjustment of the conversion factor from the policy change to include payments for unrelated laboratory services with modifier ''L1'' that will be packaged into OPPS services starting in CY 2017. The commenter believed that the cost of packaging those services would be approximately $40 million rather than the approximately $22 million that CMS identified using the methodology and claims data from the CY 2017 OPPS/ASC proposed rule (81 FR 45631).

Response: We appreciate the commenter's review of our analysis. We note that, while estimated cost is generally used for ratesetting purposes to establish the relative payment weights, our proposed policy of including those payments for unrelated laboratory services with the ''L1'' modifier that would be newly packaged would be in the context of budget neutralizing those payments into the OPPS. While the costs used from these services in establishing the relative weights would be approximately $45 million, the payments that would be used for budget neutralization would be approximately $25 million, using the same source claims dataset as in the CY 2017 OPPS/ASC final rule with comment period. We then determine how to adjust the OPPS conversion factor by comparing the CY 2015 aggregate payment of approximately $25 million to the total estimated payment for the CY 2015 OPPS, which results in a final conversion factor adjustment for this final laboratory services policy change of 1.0004.

For the proposed rule, we also proposed that hospitals that fail to meet the reporting requirements of the Hospital OQR Program would continue to be subject to a further reduction of 2.0 percentage points to the OPD fee schedule increase factor. For hospitals that fail to meet the requirements of the Hospital OQR Program, we proposed to make all other adjustments discussed above, but use a reduced OPD fee schedule update factor of −0.45 percent (that is, the proposed OPD fee schedule increase factor of 1.55 percent further reduced by 2.0 percentage points). This would result in a proposed reduced conversion factor for CY 2017 of 73.411 for hospitals that fail to meet the Hospital OQR requirements (a difference of −1.498 in the conversion factor relative to hospitals that met the requirements).

In summary, for CY 2017, we proposed to amend § 419.32(b)(1)(iv)(B) by adding a new paragraph (*8*) to reflect the reductions to the OPD fee schedule increase factor that are required for CY 2017 to satisfy the statutory requirements of sections 1833(t)(3)(F) and (t)(3)(G)(v) of the Act. We proposed to use a reduced conversion factor of 73.411 in the calculation of payments for hospitals that fail to meet the Hospital OQR Program requirements (a difference of −1.498 in the conversion factor relative to hospitals that met the requirements).

We invited public comments on these proposals. However, we did not receive any public comments. Therefore, we are finalizing these proposals without modification. For CY 2017, we proposed to continue previously established policies for implementing the cancer hospital payment adjustment described in section 1833(t)(18) of the Act, as discussed in section II.F. of this final rule with comment period. Based on the final rule updated data used in calculating the cancer hospital payment adjustment in section II.F. of this final rule with comment period, the target payment-to-cost ratio for the cancer hospital payment adjustment, which was 0.92 for CY 2016, is 0.91 for CY 2017. As a result, we are applying a budget neutrality adjustment factor of 1.0003 to the conversion factor for the cancer hospital payment adjustment.

As a result of these finalized policies, the OPD fee schedule increase factor for the CY 2017 OPPS is 1.65 percent (which is 2.7 percent, the estimate of the hospital inpatient market basket percentage increase, less the 0.3 percentage point MFP adjustment, and less the 0.75 percentage point additional adjustment). For CY 2017, we are using a conversion factor of $75.001 in the calculation of the national unadjusted payment rates for those items and services for which payment rates are calculated using geometric mean costs; that is, the OPD fee schedule increase factor of 1.65 percent for CY 2017, the required wage index budget neutrality adjustment of approximately 0.9999, the cancer hospital payment adjustment of 1.0003, the packaging of unrelated laboratory tests adjustment factor of 1.0004, and the adjustment of 0.02 percentage point of projected OPPS spending for the difference in the pass-through spending and outlier payments that result in a conversion factor for CY 2017 of $75.001.

C. Wage Index Changes

Section 1833(t)(2)(D) of the Act requires the Secretary to determine a wage adjustment factor to adjust the portion of payment and coinsurance attributable to labor-related costs for relative differences in labor and labor-related costs across geographic regions in a budget neutral manner (codified at 42 CFR 419.43(a)). This portion of the OPPS payment rate is called the OPPS labor-related share. Budget neutrality is discussed in section II.B. of this final rule with comment period.

The OPPS labor-related share is 60 percent of the national OPPS payment. This labor-related share is based on a regression analysis that determined that, for all hospitals, approximately 60 percent of the costs of services paid under the OPPS were attributable to wage costs. We confirmed that this labor-related share for outpatient services is appropriate during our regression analysis for the payment adjustment for rural hospitals in the CY 2006 OPPS final rule with comment period (70 FR 68553). In the CY 2017 OPPS/ASC proposed rule (81 FR 45631), we proposed to continue this policy for the CY 2017 OPPS. We refer readers to section II.H. of this final rule with comment period for a description and an example of how the wage index for a particular hospital is used to determine payment for the hospital.

As discussed in section II.A.2.c. of this final rule with comment period, for estimating APC costs, we standardize 60 percent of estimated claims costs for geographic area wage variation using the same FY 2017 pre-reclassified wage index that the IPPS uses to standardize costs. This standardization process removes the effects of differences in area wage levels from the determination of a national unadjusted OPPS payment rate and copayment amount.

Under 42 CFR 419.41(c)(1) and 419.43(c) (published in the OPPS April 7, 2000 final rule with comment period (65 FR 18495 and 18545)), the OPPS adopted the final fiscal year IPPS post-reclassified wage index as the calendar year wage index for adjusting the OPPS standard payment amounts for labor market differences. Therefore, the wage index that applies to a particular acute care, short-stay hospital under the IPPS also applies to that hospital under the OPPS. As initially explained in the September 8, 1998 OPPS proposed rule (63 FR 47576), we believe that using the IPPS wage index as the source of an adjustment factor for the OPPS is reasonable and logical, given the inseparable, subordinate status of the HOPD within the hospital overall. In accordance with section 1886(d)(3)(E) of the Act, the IPPS wage index is updated annually.

The Affordable Care Act contained several provisions affecting the wage index. These provisions were discussed in the CY 2012 OPPS/ASC final rule with comment period (76 FR 74191). Section 10324 of the Affordable Care Act added section 1886(d)(3)(E)(iii)(II) to the Act, which defines a frontier State

and amended section 1833(t) of the Act to add new paragraph (19), which requires a frontier State wage index floor of 1.00 in certain cases, and states that the frontier State floor shall not be applied in a budget neutral manner. We codified these requirements at § 419.43(c)(2) and (c)(3) of our regulations. For the CY 2017 OPPS, we proposed to implement this provision in the same manner as we have since CY 2011. Under this policy, the frontier State hospitals would receive a wage index of 1.00 if the otherwise applicable wage index (including reclassification, rural and imputed floors, and rural floor budget neutrality) is less than 1.00. Because the HOPD receives a wage index based on the geographic location of the specific inpatient hospital with which it is associated, the frontier State wage index adjustment applicable for the inpatient hospital also would apply for any associated HOPD. We refer readers to the following sections in the FY 2011 through FY 2017 IPPS/LTCH PPS final rules for discussions regarding this provision, including our methodology for identifying which areas meet the definition of ''frontier States'' as provided for in section 1886(d)(3)(E)(iii)(II) of the Act: for FY 2011, 75 FR 50160 through 50161; for FY 2012, 76 FR 51793, 51795, and 51825; for FY 2013, 77 FR 53369 through 53370; for FY 2014, 78 FR 50590 through 50591; for FY 2015, 79 FR 49971; for FY 2016, 80 FR 49498; and for FY 2017, 81 FR 56922.

In addition to the changes required by the Affordable Care Act, we note that the FY 2017 IPPS wage indexes continue to reflect a number of adjustments implemented over the past few years, including, but not limited to, reclassification of hospitals to different geographic areas, the rural floor and imputed floor provisions, an adjustment for occupational mix, and an adjustment to the wage index based on commuting patterns of employees (the out-migration adjustment). We refer readers to the FY 2017 IPPS/LTCH PPS final rule (81 FR 56912 through 56937) for a detailed discussion of all changes to the FY 2017 IPPS wage indexes. In addition, we refer readers to the CY 2005 OPPS final rule with comment period (69 FR 65842 through 65844) and subsequent OPPS rules for a detailed discussion of the history of these wage index adjustments as applied under the OPPS.

As discussed in the FY 2015 IPPS/LTCH PPS final rule (79 FR 49951 through 49963), the FY 2016 IPPS/LTCH PPS final rule (80 FR 49488 through 49489 and 49494 through 49496), and the FY 2017 IPPS/LTCH PPS final rule (81 FR 56913), the Office of Management and Budget (OMB) issued revisions to the labor market area delineations on February 28, 2013 (based on 2010 Decennial Census data), that included a number of significant changes such as new Core Based Statistical Areas (CBSAs), urban counties that became rural, rural counties that became urban, and existing CBSAs that were split apart (OMB Bulletin 13–01). This bulletin can be found at: *http://www.whitehouse.gov/sites/default/files/omb/bulletins/2013/b13-01.pdf.* In the FY 2015 IPPS/LTCH PPS final rule (79 FR 49950 through 49985), we adopted the use of the OMB labor market area delineations that were based on the 2010 Decennial Census data, effective October 1, 2014.

Generally, OMB issues major revisions to statistical areas every 10 years, based on the results of the decennial census. However, OMB occasionally issues minor updates and revisions to statistical areas in the years between the decennial censuses. On July 15, 2015, OMB issued OMB Bulletin No. 15–01, which provides updates to and supersedes OMB Bulletin No. 13–01 that was issued on February 28, 2013. The attachment to OMB Bulletin No. 15–01 provides detailed information on the update to statistical areas since February 28, 2013. The updates provided in OMB Bulletin No. 15–01 are based on the application of the 2010 Standards for Delineating Metropolitan and Micropolitan Statistical Areas to Census Bureau population estimates for July 1, 2012 and July 1, 2013. The complete list of statistical areas incorporating these changes is provided in the attachment to OMB Bulletin No. 15–01. According to OMB, ''[t]his bulletin establishes revised delineations for the Nation's Metropolitan Statistical Areas, Micropolitan Statistical Areas, and Combined Statistical Areas. The bulletin also provides delineations of Metropolitan Divisions as well as delineations of New England City and Town Areas.'' A copy of this bulletin may be obtained on the Web site at: *https://www.whitehouse.gov/omb/bulletins_default.*

OMB Bulletin No. 15–01 made the following changes that are relevant to the IPPS and OPPS wage index:

- Garfield County, OK, with principal city Enid, OK, which was a Micropolitan (geographically rural) area, now qualifies as an urban new CBSA 21420 called Enid, OK.
- The county of Bedford City, VA, a component of the Lynchburg, VA CBSA 31340, changed to town status and is added to Bedford County. Therefore, the county of Bedford City (SSA State county code 49088, FIPS State County Code 51515) is now part of the county of Bedford, VA (SSA State county code 49090, FIPS State County Code 51019). However, the CBSA remains Lynchburg, VA 31340.
- The name of Macon, GA, CBSA 31420, as well as a principal city of the Macon-Warner Robins, GA combined statistical area, is now Macon-Bibb County, GA. The CBSA code remains as 31420.

In the FY 2017 IPPS/LTCH PPS proposed rule (81 FR 25062), we proposed to implement these revisions, effective October 1, 2016, beginning with the FY 2017 wage indexes. In the FY 2017 IPPS/LTCH PPS proposed rule, we proposed to use these new definitions to calculate area IPPS wage indexes in a manner that is generally consistent with the CBSA-based methodologies finalized in the FY 2005 and the FY 2015 IPPS final rules. Implementation of these revisions for the IPPS/LTCH PPS was finalized in the FY 2017 IPPS/LTCH PPS final rule (81 FR 56913). We believe that it is important for the OPPS to use the latest labor market area delineations available as soon as is reasonably possible in order to maintain a more accurate and up-to-date payment system that reflects the reality of population shifts and labor market conditions. Therefore, for purposes of the OPPS, in the CY 2017 OPPS/ASC proposed rule (81 FR 45632), we proposed to implement these revisions to the OMB statistical area delineations, effective January 1, 2017, beginning with the CY 2017 OPPS wage indexes. We invited public comments on these proposals for the CY 2017 OPPS wage indexes. We note that Tables 2 and 3 for the FY 2017 IPPS/LTCH PPS final rule and the County to CBSA Crosswalk File and Urban CBSAs and Constituent Counties for Acute Care Hospitals File posted on the CMS Web site reflect the CBSA changes. These two tables are available via the Internet on the CMS Web site.

In the CY 2017 OPPS/ASC proposed rule, we proposed to use the FY 2017 hospital IPPS post-reclassified wage index for urban and rural areas as the wage index for the OPPS to determine the wage adjustments for both the OPPS payment rate and the copayment standardized amount for CY 2017. Therefore, we stated that any adjustments that were proposed for the FY 2017 IPPS post-reclassified wage index would be reflected in the proposed CY 2017 OPPS wage index, including the revisions to the OMB labor market delineations discussed above, as set forth in OMB Bulletin No.

15–01. (We refer readers to the FY 2017 IPPS/LTCH PPS proposed rule (81 FR 25062 through 25076) and final rule (81 FR 56912 through 56937), and the proposed and final FY 2017 hospital wage index files posted on the CMS Web site.)

Hospitals that are paid under the OPPS, but not under the IPPS, do not have an assigned hospital wage index under the IPPS. Therefore, for non-IPPS hospitals paid under the OPPS, it is our longstanding policy to assign the wage index that would be applicable if the hospital were paid under the IPPS, based on its geographic location and any applicable wage index adjustments. We proposed to continue this policy for CY 2017. The following is a brief summary of the major FY 2017 IPPS wage index policies and adjustments that we proposed to apply to these hospitals under the OPPS for CY 2017. We further refer readers to the FY 2017 IPPS/LTCH PPS final rule (81 FR 56912 through 56937) for a detailed discussion of the final changes to the FY 2017 IPPS wage indexes.

It has been our longstanding policy to allow non-IPPS hospitals paid under the OPPS to qualify for the out-migration adjustment if they are located in a section 505 out-migration county (section 505 of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA)). Applying this adjustment is consistent with our policy of adopting IPPS wage index policies for hospitals paid under the OPPS. We note that, because non-IPPS hospitals cannot reclassify, they would be eligible for the out-migration wage adjustment if they are located in a section 505 out-migration county. This is the same out-migration adjustment policy that would apply if the hospital were paid under the IPPS. For CY 2017, we proposed to continue our policy of allowing non-IPPS hospitals paid under the OPPS to qualify for the out-migration adjustment if they are located in a section 505 out-migration county (section 505 of the MMA).

As stated earlier, in the FY 2015 IPPS/LTCH PPS final rule, we adopted the OMB labor market area delineations issued by OMB in OMB Bulletin No. 13–01 on February 28, 2013, based on standards published on June 28, 2010 (75 FR 37246 through 37252) and the 2010 Census data to delineate labor market areas for purposes of the IPPS wage index. For IPPS wage index purposes, for hospitals that were located in urban CBSAs in FY 2014 but were designated as rural under these revised OMB labor market area delineations, we generally assigned them the urban wage index value of the CBSA in which they were physically located for FY 2014 for a period of 3 fiscal years (79 FR 49957 through 49960). To be consistent, we applied the same policy to hospitals paid under the OPPS but not under the IPPS so that such hospitals will maintain the wage index of the CBSA in which they were physically located for FY 2014 for 3 calendar years (until December 31, 2017). Therefore, for the CY 2017 OPPS, consistent with the FY 2017 IPPS/LTCH PPS final rule (81 FR 56912 through 56937), this 3-year transition will continue for the third year in CY 2017.

In addition, for the FY 2017 IPPS, we extended the imputed floor policy (both the original methodology and alternative methodology) for another year, through September 30, 2017 (81 FR 56919 through 56922). For purposes of the CY 2017 OPPS, we proposed to apply the imputed floor policy to hospitals paid under the OPPS but not under the IPPS so long as the IPPS continues an imputed floor policy.

For CMHCs, for CY 2017, we proposed to continue to calculate the wage index by using the post-reclassification IPPS wage index based on the CBSA where the CMHC is located. As with OPPS hospitals and for the same reasons, for CMHCs previously located in urban CBSAs that were designated as rural under the revised OMB labor market area delineations in OMB Bulletin No. 13–01, we finalized a policy to maintain the urban wage index value of the CBSA in which they were physically located for CY 2014 for 3 calendar years (until December 31, 2017). Consistent with our current policy, the wage index that applies to CMHCs includes both the imputed floor adjustment and the rural floor adjustment, but does not include the out-migration adjustment because that adjustment only applies to hospitals.

We did not receive any public comments on our proposals as discussed above.

Therefore, for the reasons discussed above and in the CY 2017 OPPS/ASC proposed rule, we are finalizing our proposals, without modification, to:

- Continue to use an OPPS labor-related share of 60 percent of the national OPPS payment for the CY 2017 OPPS;
- Use the final FY 2017 IPPS post-reclassified wage index for urban and rural areas in its entirety, including the frontier State wage index floor, the rural floor, geographic reclassifications, and all other applicable wage index adjustments, as the final CY 2017 wage index for OPPS hospitals and CMHCs based on where the facility is located for both the OPPS payment rate and the copayment standardized amount, as discussed above and as set forth in the CY 2017 OPPS/ASC proposed rule (81 FR 45631 through 45633). (We refer readers to the FY 2017 IPPS/LTCH PPS final rule (81 FR 56912 through 56937) and the final FY 2017 hospital wage index files posted on the CMS Web site.);
- Implement the revisions to the OMB statistical area delineations set forth in OMB Bulletin No. 15–01 effective January 1, 2017, beginning with the CY 2017 OPPS wage indexes;
- Implement the frontier State floor provisions in the same manner as we have since CY 2011 as discussed above;
- For non-IPPS hospitals paid under the OPPS, continue to assign the wage index that would be applicable if the hospital were paid under the IPPS, based on its geographic location and any applicable wage index adjustments;
- Apply the imputed floor policy to hospitals paid under the OPPS but not under the IPPS so long as the IPPS continues an imputed floor policy, which CMS has extended for an additional year under the IPPS in the FY 2017 IPPS/LTCH PPS final rule; and
- Continue our policy of allowing non-IPPS hospitals paid under the OPPS to qualify for the out-migration adjustment if they are located in a section 505 out-migration county (section 505 of the MMA).

Table 2 associated with the FY 2017 IPPS/LTCH PPS final rule (available via the Internet on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*) identifies counties eligible for the out-migration adjustment and IPPS hospitals that will receive the adjustment for FY 2017. We are including the out-migration adjustment information from Table 2 associated with the FY 2017 IPPS/LTCH PPS final rule as Addendum L to this final rule with comment period with the addition of non-IPPS hospitals that will receive the section 505 out-migration adjustment under the CY 2017 OPPS. Addendum L is available via the Internet on the CMS Web site. We refer readers to the CMS Web site for the OPPS at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html.* At this link, readers will find a link to the final FY 2017 IPPS wage index tables and Addendum L.

D. Statewide Average Default CCRs

In addition to using CCRs to estimate costs from charges on claims for ratesetting, CMS uses overall hospital-specific CCRs calculated from the

hospital's most recent cost report to determine outlier payments, payments for pass-through devices, and monthly interim transitional corridor payments under the OPPS during the PPS year. MACs cannot calculate a CCR for some hospitals because there is no cost report available. For these hospitals, CMS uses the statewide average default CCRs to determine the payments mentioned above until a hospital's MAC is able to calculate the hospital's actual CCR from its most recently submitted Medicare cost report. These hospitals include, but are not limited to, hospitals that are new, hospitals that have not accepted assignment of an existing hospital's provider agreement, and hospitals that have not yet submitted a cost report. CMS also uses the statewide average default CCRs to determine payments for hospitals that appear to have a biased CCR (that is, the CCR falls outside the predetermined ceiling threshold for a valid CCR) or for hospitals in which the most recent cost report reflects an all-inclusive rate status (Medicare Claims Processing Manual (Pub. 100–04), Chapter 4, Section 10.11).

In the CY 2017 OPPS/ASC proposed rule (81 FR 45633), we proposed to update the default ratios for CY 2017 using the most recent cost report data. We discussed our policy for using default CCRs, including setting the ceiling threshold for a valid CCR, in the CY 2009 OPPS/ASC final rule with comment period (73 FR 68594 through 68599) in the context of our adoption of an outlier reconciliation policy for cost reports beginning on or after January 1, 2009. For detail on our process for calculating the statewide average CCRs, we referred readers to the CY 2017 OPPS proposed rule Claims Accounting Narrative that was posted on the CMS Web site. Table 4 published in the proposed rule (81 FR 45634 through 45635) listed the proposed statewide average default CCRs for OPPS services furnished on or after January 1, 2017.

We did not receive any public comments on the proposed statewide average default CCR policy. Therefore, we are finalizing our proposal, without modification, to apply our standard methodology of calculating the statewide average default CCRs using the same hospital overall CCRs that we used to adjust charges to costs on claims data for setting the final CY 2017 OPPS relative payment weights. Table 4 below lists the statewide average default CCRs for OPPS services furnished on or after January 1, 2017 based on final rule data.

E. Adjustment for Rural SCHs and EACHs Under Section 1833(t)(13)(B) of the Act

In the CY 2006 OPPS final rule with comment period (70 FR 68556), we finalized a payment increase for rural SCHs of 7.1 percent for all services and procedures paid under the OPPS, excluding drugs, biologicals, brachytherapy sources, and devices paid under the pass-through payment policy in accordance with section 1833(t)(13)(B) of the Act, as added by section 411 of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA) (Pub. L. 108–173). Section 1833(t)(13) of the Act provided the Secretary the authority to make an adjustment to OPPS payments for rural hospitals, effective January 1, 2006, if justified by a study of the difference in costs by APC between hospitals in rural areas and hospitals in urban areas. Our analysis showed a difference in costs for rural SCHs. Therefore, for the CY 2006 OPPS, we finalized a payment adjustment for rural SCHs of 7.1 percent for all services and procedures paid under the OPPS, excluding separately

payable drugs and biologicals, brachytherapy sources, and devices paid under the pass-through payment policy, in accordance with section 1833(t)(13)(B) of the Act.

In the CY 2007 OPPS/ASC final rule with comment period (71 FR 68010 and 68227), for purposes of receiving this rural adjustment, we revised § 419.43(g) of the regulations to clarify that EACHs also are eligible to receive the rural SCH adjustment, assuming these entities otherwise meet the rural adjustment criteria. Currently, two hospitals are classified as EACHs, and as of CY 1998, under section 4201(c) of Public Law 105–33, a hospital can no longer become newly classified as an EACH.

This adjustment for rural SCHs is budget neutral and applied before calculating outlier payments and copayments. We stated in the CY 2006 OPPS final rule with comment period (70 FR 68560) that we would not reestablish the adjustment amount on an annual basis, but we may review the adjustment in the future and, if appropriate, would revise the adjustment. We provided the same 7.1 percent adjustment to rural SCHs, including EACHs, again in CYs 2008 through 2016. Further, in the CY 2009 OPPS/ASC final rule with comment period (73 FR 68590), we updated the regulations at § 419.43(g)(4) to specify, in general terms, that items paid at charges adjusted to costs by application of a hospital-specific CCR are excluded from the 7.1 percent payment adjustment.

In the CY 2017 OPPS/ASC proposed rule (81 FR 45635), for the CY 2017 OPPS, we proposed to continue our policy of a 7.1 percent payment adjustment that is done in a budget neutral manner for rural SCHs, including EACHs, for all services and procedures paid under the OPPS, excluding separately payable drugs and biologicals, devices paid under the pass-through payment policy, and items paid at charges reduced to costs (80 FR 39244).

Comment: Commenters supported the proposed payment adjustment for rural SCHs and EACHs, and stated that this adjustment would support access to care in rural areas.

Response: We appreciate the commenters' support.

After consideration of the public comments we received, we are finalizing the proposal for CY 2017 to continue our policy of a 7.1 percent payment adjustment that is done in a budget neutral manner for rural SCHs, including EACHs, for all services and procedures paid under the OPPS, excluding separately payable drugs and biologicals, devices paid under the pass-through payment policy, and items paid at charges reduced to costs.

F. Payment Adjustment for Certain Cancer Hospitals for CY 2017

1. Background

Since the inception of the OPPS, which was authorized by the Balanced Budget Act of 1997 (BBA) (Pub. L. 105–33), Medicare has paid the 11 hospitals that meet the criteria for cancer hospitals identified in section 1886(d)(1)(B)(v) of the Act under the OPPS for covered outpatient hospital services. These cancer hospitals are exempted from payment under the IPPS. With the Medicare, Medicaid and SCHIP Balanced Budget Refinement Act of 1999 (Pub. L. 106–113), Congress established section 1833(t)(7) of the Act, ''Transitional Adjustment to Limit Decline in Payment,'' to determine OPPS payments to cancer and children's hospitals based on their pre-BBA payment amount (often referred to as ''held harmless'').

As required under section 1833(t)(7)(D)(ii) of the Act, a cancer hospital receives the full amount of the difference between payments for covered outpatient services under the OPPS and a ''pre-BBA amount.'' That is, cancer hospitals are permanently held harmless to their ''pre-BBA amount,'' and they receive transitional outpatient payments (TOPs) or hold harmless payments to ensure that they do not receive a payment that is lower in amount under the OPPS than the payment amount they would have received before implementation of the OPPS, as set forth in section 1833(t)(7)(F) of the Act. The ''pre-BBA amount'' is the product of the hospital's reasonable costs for covered outpatient services occurring in the current year and the base payment-to-cost ratio (PCR) for the hospital defined in section 1833(t)(7)(F)(ii) of the Act. The ''pre-BBA amount'' and the determination of the base PCR are defined at 42 CFR 419.70(f). TOPs are calculated on Worksheet E, Part B, of the Hospital Cost Report or the Hospital Health Care Complex Cost Report (Form CMS–2552–96 or Form CMS–2552–10, respectively) as applicable each year. Section 1833(t)(7)(I) of the Act exempts TOPs from budget neutrality calculations.

Section 3138 of the Affordable Care Act amended section 1833(t) of the Act by adding a new paragraph (18), which instructs the Secretary to conduct a study to determine if, under the OPPS, outpatient costs incurred by cancer hospitals described in section 1886(d)(1)(B)(v) of the Act with respect to APC groups exceed outpatient costs incurred by other hospitals furnishing services under section 1833(t) of the Act, as determined appropriate by the Secretary. Section 1833(t)(18)(A) of the Act requires the Secretary to take into consideration the cost of drugs and biologicals incurred by cancer hospitals and other hospitals. Section 1833(t)(18)(B) of the Act provides that, if the Secretary determines that cancer hospitals' costs, the Secretary shall provide an appropriate adjustment under section 1833(t)(2)(E) of the Act to reflect these higher costs. In 2011, after conducting the study required by section 1833(t)(18)(A) of the Act, we determined that outpatient costs incurred by the 11 specified cancer hospitals were greater than the costs incurred by other OPPS hospitals. For a complete discussion regarding the cancer hospital cost study, we refer readers to the CY 2012 OPPS/ASC final rule with comment period (76 FR 74200 through 74201).

Based on these findings, we finalized a policy to provide a payment adjustment to the 11 specified cancer hospitals that reflects their higher outpatient costs as discussed in the CY 2012 OPPS/ASC final rule with comment period (76 FR 74202 through 74206). Specifically, we adopted a policy to provide additional payments to the cancer hospitals so that each cancer hospital's final PCR for services provided in a given calendar year is equal to the weighted average PCR (which we refer to as the ''target PCR'') for other hospitals paid under the OPPS. The target PCR is set in advance of the calendar year and is calculated using the most recent submitted or settled cost report data that are available at the time of final rulemaking for the calendar year. The amount of the payment adjustment is made on an aggregate basis at cost report settlement. We note that the changes made by section 1833(t)(18) of the Act do not affect the existing statutory provisions that provide for TOPs for cancer hospitals. The TOPs are assessed as usual after all payments, including the cancer hospital payment adjustment, have been made for a cost reporting period. For CYs 2012 and 2013, the target PCR for purposes of the cancer hospital payment adjustment was 0.91. For CY 2014, the target PCR for purposes of the cancer hospital payment adjustment was 0.89. For CY 2015, the target PCR was 0.90. For CY 2016, the target PCR was 0.92, as discussed in the CY 2016 OPPS/ASC final rule with comment period (80 FR 70362 through 70363).

b. Proposed and Finalized Policy for CY 2017

In the CY 2017 OPPS/ASC proposed rule (81 FR 45636), for CY 2017, we proposed to continue our policy to provide additional payments to the 11 specified cancer hospitals so that each cancer hospital's final PCR is equal to the weighted average PCR (or ''target PCR'') for the other OPPS hospitals using the most recent submitted or settled cost report data that are available at the time of the development of the proposed rule. To calculate the proposed CY 2017 target PCR, we used the same extract of cost report data from HCRIS, as discussed in section II.A. of the proposed rule, used to estimate costs for the CY 2017 OPPS. Using these cost report data, we included data from Worksheet E, Part B, for each hospital, using data from each hospital's most recent cost report, whether as submitted or settled.

We then limited the dataset to the hospitals with CY 2015 claims data that we used to model the impact of the proposed CY 2017 APC relative payment weights (3,716 hospitals) because it is appropriate to use the same set of hospitals that we are using to calibrate the modeled CY 2017 OPPS. The cost report data for the hospitals in this dataset were from cost report periods with fiscal year ends ranging from 2012 to 2015. We then removed the cost report data of the 50 hospitals located in Puerto Rico from our dataset because we do not believe that their cost structure reflects the costs of most hospitals paid under the OPPS and, therefore, their inclusion may bias the calculation of hospital-weighted statistics. We also removed the cost report data of 14 hospitals because these hospitals had cost report data that were not complete (missing aggregate OPPS payments, missing aggregate cost data, or missing both), so that all cost reports in the study would have both the payment and cost data necessary to calculate a PCR for each hospital, leading to a proposed analytic file of 3,652 hospitals with cost report data.

Using this smaller dataset of cost report data, we estimated that, on average, the OPPS payments to other hospitals furnishing services under the OPPS were approximately 92 percent of reasonable cost (weighted average PCR of 0.92). Therefore, we proposed that the payment amount associated with the cancer hospital payment adjustment to be determined at cost report settlement would be the additional payment needed to result in a proposed target PCR equal to 0.92 for each cancer hospital. Table 5 of the proposed rule indicated the proposed estimated percentage increase in OPPS payments to each cancer hospital for CY 2017 due to the cancer hospital payment adjustment policy.

Comment: Several commenters supported the proposed cancer hospital payment adjustment for CY 2017.

Response: We appreciate the commenters' support.

After consideration of the public comments we received, we are finalizing our cancer hospital payment adjustment methodology as proposed. For this final rule with comment period, we are using the most recent cost report data through June 30, 2016 to update the adjustment. This update yields a target PCR of 0.91. We limited the dataset to the hospitals with CY 2015 claims data that we used to model the impact of the CY 2017 APC relative payment weights (3,744 hospitals) because it is appropriate to use the same set of hospitals that we are using to calibrate the modeled CY 2017 OPPS. The cost report data for the hospitals in this dataset were from cost report periods with fiscal year ends ranging from 2012 to 2016. We then removed the cost report data of the 49 hospitals located in Puerto Rico from our dataset because we do not believe that their cost structure reflects the costs of most hospitals paid under the OPPS and, therefore, their inclusion may bias the calculation of hospital-weighted statistics. We also removed the cost report data of 13 hospitals because these hospitals had cost report data that were not complete (missing aggregate OPPS payments, missing aggregate cost data, or missing both), so that all cost reports in the study would have both the payment and cost data necessary to calculate a PCR for each hospital, leading to a proposed analytic file of 3,682 hospitals with cost report data.

Using this smaller dataset of cost report data, we estimated that, on average, the OPPS payments to other hospitals furnishing services under the OPPS are approximately 91 percent of reasonable cost (weighted average PCR of 0.91). Therefore, we are finalizing that the payment amount associated with the cancer hospital payment adjustment to be determined at cost report settlement will be the additional payment needed to result in a PCR equal to 0.91 for each cancer hospital.

Table 5 below indicates the final estimated percentage increase in OPPS payments to each cancer hospital for CY 2017 due to the finalized cancer hospital payment adjustment policy. The actual amount of the CY 2017 cancer hospital payment adjustment for each cancer hospital will be determined at cost report settlement and will depend on each hospital's CY 2017 payments and costs. We note that the requirements contained in section 1833(t)(18) of the Act do not affect the existing statutory provisions that provide for TOPs for cancer hospitals. The TOPs will be assessed as usual after all payments, including the cancer hospital payment adjustment, have been made for a cost reporting period.

TABLE 5—ESTIMATED CY 2017 HOSPITAL-SPECIFIC PAYMENT ADJUSTMENT FOR CANCER HOSPITALS TO BE PROVIDED AT COST REPORT SETTLEMENT

Provider No.	Hospital name	Estimated percentage increase in OPPS payments for CY 2017 due to payment adjustment (%)
050146	City of Hope Comprehensive Cancer Center	25.8
050660	USC Norris Cancer Hospital	14.0
100079	Sylvester Comprehensive Cancer Center	32.4
100271	H. Lee Moffitt Cancer Center & Research Institute	27.3
220162	Dana-Farber Cancer Institute	49.8
330154	Memorial Sloan-Kettering Cancer Center	50.4
330354	Roswell Park Cancer Institute	30.0
360242	James Cancer Hospital & Solove Research Institute	37.9
390196	Fox Chase Cancer Center	16.6
450076	M.D. Anderson Cancer Center	52.3

TABLE 5—ESTIMATED CY 2017 HOSPITAL-SPECIFIC PAYMENT ADJUSTMENT FOR CANCER HOSPITALS TO BE PROVIDED AT COST REPORT SETTLEMENT—Continued

Provider No.	Hospital name	Estimated percentage increase in OPPS payments for CY 2017 due to payment adjustment (%)
500138	Seattle Cancer Care Alliance	58.7

G. Hospital Outpatient Outlier Payments

1. Background

The OPPS provides outlier payments to hospitals to help mitigate the financial risk associated with high-cost and complex procedures, where a very costly service could present a hospital with significant financial loss. As explained in the CY 2015 OPPS/ASC final rule with comment period (79 FR 66832 through 66834), we set our projected target for aggregate outlier payments at 1.0 percent of the estimated aggregate total payments under the OPPS for the prospective year. Outlier payments are provided on a service-by-service basis when the cost of a service exceeds the APC payment amount multiplier threshold (the APC payment amount multiplied by a certain amount) as well as the APC payment amount plus a fixed-dollar amount threshold (the APC payment plus a certain amount of dollars). In CY 2016, the outlier threshold was met when the hospital's cost of furnishing a service exceeded 1.75 times (the multiplier threshold) the APC payment amount and exceeded the APC payment amount plus $3,250 (the fixed-dollar amount threshold) (80 FR 70365). If the cost of a service exceeds both the multiplier threshold and the fixed-dollar threshold, the outlier payment is calculated as 50 percent of the amount by which the cost of furnishing the service exceeds 1.75 times the APC payment amount. Beginning with CY 2009 payments, outlier payments are subject to a reconciliation process similar to the IPPS outlier reconciliation process for cost reports, as discussed in the CY 2009 OPPS/ASC final rule with comment period (73 FR 68594 through 68599).

It has been our policy to report the actual amount of outlier payments as a percent of total spending in the claims being used to model the OPPS. In the CY 2017 OPPS/ASC proposed rule (81 FR 45637), we indicated that our estimate of total outlier payments as a percent of total CY 2015 OPPS payment, using CY 2015 claims available for the proposed rule and the revised OPPS expenditure estimate for the FY 2016 President's Budget, was approximately 1.0 percent of the total aggregated OPPS payments. For CY 2015, we continue to estimate that we paid the outlier target of 1.0 percent of total aggregated OPPS payments.

As stated in the proposed rule, using CY 2015 claims data and CY 2016 payment rates, we estimated that the aggregate outlier payments for CY 2016 would be approximately 1.0 percent of the total CY 2016 OPPS payments. Using an updated claims dataset and OPPS ancillary CCRs, we estimate that we paid approximately 0.96 percent of the total CY 2016 OPPS payments, in OPPS outliers. We provided estimated CY 2017 outlier payments for hospitals and CMHCs with claims included in the claims data that we used to model impacts in the Hospital–Specific Impacts—Provider-Specific Data file on the CMS Web site at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html*.

2. Outlier Calculation for CY 2017

In the CY 2017 OPPS/ASC proposed rule (81 FR 45637), for CY 2017, we proposed to continue our policy of estimating outlier payments to be 1.0 percent of the estimated aggregate total payments under the OPPS. We proposed that a portion of that 1.0 percent, an amount equal to less than 0.01 percent of outlier payments (or 0.0001 percent of total OPPS payments) would be allocated to CMHCs for PHP outlier payments. This is the amount of estimated outlier payments that would result from the proposed CMHC outlier threshold as a proportion of total estimated OPPS outlier payments. As discussed in section VIII.C. of the proposed rule and this final rule with comment period, we proposed to continue our longstanding policy that if a CMHC's cost for partial hospitalization services, paid under proposed APC 5853 (Partial Hospitalization for CMHCs), exceeds 3.40 times the payment rate for proposed APC 5853, the outlier payment would be calculated as 50 percent of the amount by which the cost exceeds 3.40 times the proposed APC 5853 payment rate. For further discussion of CMHC outlier payments, we refer readers to section VIII.D. of the proposed rule and this final rule with comment period.

To ensure that the estimated CY 2017 aggregate outlier payments would equal 1.0 percent of estimated aggregate total payments under the OPPS, we proposed that the hospital outlier threshold be set so that outlier payments would be triggered when a hospital's cost of furnishing a service exceeds 1.75 times the APC payment amount and exceeds the APC payment amount plus $3,825.

We calculated the proposed fixed-dollar threshold of $3,825 using the standard methodology most recently used for CY 2016 (80 FR 70364 through 70365). For purposes of estimating outlier payments for the proposed rule, we used the hospital-specific overall ancillary CCRs available in the April 2016 update to the Outpatient Provider-Specific File (OPSF). The OPSF contains provider-specific data, such as the most current CCRs, which are maintained by the MACs and used by the OPPS Pricer to pay claims. The claims that we use to model each OPPS update lag by 2 years.

In order to estimate the CY 2017 hospital outlier payments for the proposed rule, we inflated the charges on the CY 2015 claims using the same inflation factor of 1.0898 that we used to estimate the IPPS fixed-dollar outlier threshold for the FY 2017 IPPS/LTCH PPS proposed rule (81 FR 25270 through 25273). We used an inflation factor of 1.0440 to estimate CY 2016 charges from the CY 2015 charges reported on CY 2015 claims. The methodology for determining this charge inflation factor is discussed in the FY 2017 IPPS/LTCH PPS final rule (81 FR 57286). As we stated in the CY 2005 OPPS final rule with comment period (69 FR 65845), we believe that the use of these charge inflation factors are appropriate for the OPPS because, with the exception of the inpatient routine service cost centers, hospitals use the same ancillary and outpatient cost centers to capture costs and charges for inpatient and outpatient services.

As noted in the CY 2007 OPPS/ASC final rule with comment period (71 FR 68011), we are concerned that we could systematically overestimate the OPPS hospital outlier threshold if we did not apply a CCR inflation adjustment factor. Therefore, we proposed to apply the same CCR inflation adjustment factor that we proposed to apply for the FY 2017 IPPS outlier calculation to the CCRs used to simulate the proposed CY 2017 OPPS outlier payments to determine the fixed-dollar threshold. Specifically, for CY 2017, we proposed to apply an adjustment factor of 0.9696 to the CCRs that were in the April 2016 OPSF to trend them forward from CY 2016 to CY 2017. The methodology for calculating this proposed adjustment was discussed in the FY 2017 IPPS/LTCH PPS proposed rule (81 FR 25272).

To model hospital outlier payments for the proposed rule, we applied the overall CCRs from the April 2016 OPSF after adjustment (using the proposed CCR inflation adjustment factor of 0.9696 to approximate CY 2017 CCRs) to charges on CY 2015 claims that were adjusted (using the proposed charge inflation factor of 1.0898 to approximate CY 2017 charges). We simulated aggregated CY 2017 hospital outlier payments using these costs for several different fixed-dollar thresholds, holding the 1.75 multiplier threshold constant and assuming that outlier payments would continue to be made at 50 percent of the amount by which the cost of furnishing the service would exceed 1.75 times the APC payment amount, until the total outlier payments equaled 1.0 percent of aggregated estimated total CY 2017 OPPS payments. We estimated that a proposed fixed-dollar threshold of $3,825, combined with the proposed multiplier threshold of 1.75 times the APC payment rate, would allocate 1.0 percent of aggregated total OPPS payments to outlier payments. For CMHCs, we proposed that, if a CMHC's cost for partial hospitalization services, paid under APC 5853, exceeds 3.40 times the payment rate for APC 5853, the outlier payment would be calculated as 50 percent of the amount by which the cost exceeds 3.40 times the APC 5853 payment rate.

Section 1833(t)(17)(A) of the Act, which applies to hospitals as defined under section 1886(d)(1)(B) of the Act, requires that hospitals that fail to report data required for the quality measures selected by the Secretary, in the form and manner required by the Secretary under section 1833(t)(17)(B) of the Act, incur a 2.0 percentage point reduction to their OPD fee schedule increase factor; that is, the annual payment update factor. The application of a reduced OPD fee schedule increase factor results in reduced national unadjusted payment rates that will apply to certain outpatient items and services furnished by hospitals that are required to report outpatient quality data and that fail to meet the Hospital OQR Program requirements. For hospitals that fail to meet the Hospital OQR Program requirements, we proposed to continue the policy that we implemented in CY 2010 that the hospitals' costs will be compared to the reduced payments for purposes of outlier eligibility and payment calculation. For more information on the Hospital OQR Program, we refer readers to section XIII. of this final rule with comment period.

Comment: One commenter suggested that the OPPS outlier fixed-dollar threshold of $3,825 was too high for CMS to pay the target aggregate outlier payment amount of 1.0 percent of the estimated aggregate total payments under the OPPS for the prospective year. The commenter suggested that CMS reduce the OPPS outlier threshold to compensate for the difference between the proposed and final fixed-dollar thresholds for outlier payments under the IPPS.

Response: As indicated earlier, we introduced a fixed-dollar threshold in order to better target outlier payments to those high-cost and complex procedures where a very costly service could present a hospital with significant financial loss. We maintain the target outlier percentage of 1.0 percent of estimated aggregate total payment under the OPPS and have a fixed-dollar threshold so that OPPS outlier payments are made only when the hospital would experience a significant loss for furnishing a particular service. The methodology we use to calculate the fixed-dollar threshold for the prospective payment year factors is based on several data inputs that may change from prior payment years. For instance, updated hospital CCR data and changes to the OPPS payment methodology influence projected outlier payments in the prospective year. For this final rule with comment period, we used the same methodology for calculating the outlier fixed-dollar threshold that we used for the proposed rule but used updated data. We do not believe that incorporating the percentage difference between the proposed and final fixed-dollar loss thresholds under the IPPS would improve our methodology to meet our target outlier payment percentage of 1.0 percent.

After consideration of the public comments we received, we are finalizing our proposal to continue our policy of estimating outlier payments to be 1.0 percent of the estimated aggregate total payments under the OPPS and to use our established methodology to set the OPPS outlier fixed-dollar loss threshold for CY 2017.

3. Final Outlier Calculation

Consistent with historical practice, we used updated data for this final rule with comment period for outlier calculations. For CY 2017, we are applying the overall CCRs from the July 2016 OPSF file after adjustment (using the CCR inflation adjustment factor of 0.9688 to approximate CY 2017 CCRs) to charges on CY 2015 claims that were adjusted (using the charge inflation factor of 1.0984 to approximate CY 2017 charges). These are the same CCR adjustment and charge inflation factors that were used to set the IPPS fixed-dollar thresholds for the FY 2017 IPPS/LTCH PPS final rule (81 FR 57286). We simulated aggregated CY 2017 hospital outlier payments using these costs for several different fixed-dollar thresholds, holding the 1.75 multiple threshold constant and assuming that outlier payments will continue to be made at 50 percent of the amount by which the cost of furnishing the service would exceed 1.75 times the APC payment amount, until the total outlier payments equaled 1.0 percent of aggregated estimated total CY 2017 OPPS payments. We estimated that a fixed-dollar threshold of $3,825, combined with the multiple threshold of 1.75 times the APC payment rate, will allocate 1.0 percent of aggregated total OPPS payments to outlier payments. For CMHCs, if a CMHC's cost for partial hospitalization services, paid under APC 5853 exceeds 3.40 times the payment rate, the outlier payment will be calculated as 50 percent of the amount by which the cost exceeds 3.40 times APC 5853.

H. Calculation of an Adjusted Medicare Payment From the National Unadjusted Medicare Payment

The basic methodology for determining prospective payment rates for HOPD services under the OPPS is set forth in existing regulations at 42 CFR part 419, subparts C and D. For this CY 2017 OPPS/ASC final rule with comment period, the payment rate for most services and procedures for which payment is made under the OPPS is the product of the conversion factor calculated in accordance with section II.B. of this final rule with comment period and the relative payment weight determined under section II.A. of this

final rule with comment period. Therefore, the national unadjusted payment rate for most APCs contained in Addendum A to this final rule with comment period (which is available via the Internet on the CMS Web site) and for most HCPCS codes to which separate payment under the OPPS has been assigned in Addendum B to this final rule with comment period (which is available via the Internet on the CMS Web site) was calculated by multiplying the CY 2017 scaled weight for the APC by the CY 2017 conversion factor.

We note that section 1833(t)(17) of the Act, which applies to hospitals as defined under section 1886(d)(1)(B) of the Act, requires that hospitals that fail to submit data required to be submitted on quality measures selected by the Secretary, in the form and manner and at a time specified by the Secretary, incur a reduction of 2.0 percentage points to their OPD fee schedule increase factor, that is, the annual payment update factor. The application of a reduced OPD fee schedule increase factor results in reduced national unadjusted payment rates that apply to certain outpatient items and services provided by hospitals that are required to report outpatient quality data and that fail to meet the Hospital OQR Program (formerly referred to as the Hospital Outpatient Quality Data Reporting Program (HOP QDRP)) requirements. For further discussion of the payment reduction for hospitals that fail to meet the requirements of the Hospital OQR Program, we refer readers to section XIII. of this final rule with comment period.

In the CY 2017 OPPS/ASC proposed rule (81 FR 45638), we demonstrated the steps on how to determine the APC payments that will be made in a calendar year under the OPPS to a hospital that fulfills the Hospital OQR Program requirements and to a hospital that fails to meet the Hospital OQR Program requirements for a service that has any of the following status indicator assignments: ''J1,'' ''J2,'' ''P,'' ''Q1,'' ''Q2,'' ''Q3,'' ''Q4,'' ''R,'' ''S,'' ''T,'' ''U,'' or ''V'' (as defined in Addendum D1 to the proposed rule, which is available via the Internet on the CMS Web site), in a circumstance in which the multiple procedure discount does not apply, the procedure is not bilateral, and conditionally packaged services (status indicator of ''Q1'' and ''Q2'') qualify for separate payment. We noted that, although blood and blood products with status indicator ''R'' and brachytherapy sources with status indicator ''U'' are not subject to wage adjustment, they are subject to reduced payments when a hospital fails to meet the Hospital OQR Program requirements.

We did not receive any public comments on these steps under the methodology that we included in the proposed rule to determine the APC payments for CY 2017. Therefore, we are using the steps in the methodology specified below, as we proposed, to demonstrate the calculation of the final CY 2017 OPPS payments using the same parameters.

Individual providers interested in calculating the payment amount that they will receive for a specific service from the national unadjusted payment rates presented in Addenda A and B to this final rule with comment period (which are available via the Internet on the CMS Web site) should follow the formulas presented in the following steps. For purposes of the payment calculations below, we refer to the national unadjusted payment rate for hospitals that meet the requirements of the Hospital OQR Program as the ''full'' national unadjusted payment rate. We refer to the national unadjusted payment rate for hospitals that fail to meet the requirements of the Hospital OQR Program as the ''reduced'' national unadjusted payment rate. The reduced national unadjusted payment rate is calculated by multiplying the reporting ratio of 0.980 times the ''full'' national unadjusted payment rate. The national unadjusted payment rate used in the calculations below is either the full national unadjusted payment rate or the reduced national unadjusted payment rate, depending on whether the hospital met its Hospital OQR Program requirements in order to receive the full CY 2017 OPPS fee schedule increase factor.

Step 1. Calculate 60 percent (the labor-related portion) of the national unadjusted payment rate. Since the initial implementation of the OPPS, we have used 60 percent to represent our estimate of that portion of costs attributable, on average, to labor. We refer readers to the April 7, 2000 OPPS final rule with comment period (65 FR 18496 through 18497) for a detailed discussion of how we derived this percentage. During our regression analysis for the payment adjustment for rural hospitals in the CY 2006 OPPS final rule with comment period (70 FR 68553), we confirmed that this labor-related share for hospital outpatient services is appropriate.

The formula below is a mathematical representation of Step 1 and identifies the labor-related portion of a specific payment rate for a specific service.

X is the labor-related portion of the national unadjusted payment rate.

$X = .60 * (\text{national unadjusted payment rate})$.

Step 2. Determine the wage index area in which the hospital is located and identify the wage index level that applies to the specific hospital. We note that, under the CY 2017 OPPS policy for continuing to use the OMB labor market area delineations based on the 2010 Decennial Census data for the wage indexes used under the IPPS, a hold harmless policy for the wage index may apply, as discussed in section II.C. of this final rule with comment period. The wage index values assigned to each area reflect the geographic statistical areas (which are based upon OMB standards) to which hospitals are assigned for FY 2017 under the IPPS, reclassifications through the MGCRB, section 1886(d)(8)(B) ''Lugar'' hospitals, reclassifications under section 1886(d)(8)(E) of the Act, as defined in § 412.103 of the regulations, and hospitals designated as urban under section 601(g) of Public Law 98–21. For further discussion of the changes to the FY 2017 IPPS wage indexes, as applied to the CY 2017 OPPS, we refer readers to section II.C. of this final rule with comment period. As we proposed, we are continuing to apply a wage index floor of 1.00 to frontier States, in accordance with section 10324 of the Affordable Care Act of 2010.

Step 3. Adjust the wage index of hospitals located in certain qualifying counties that have a relatively high percentage of hospital employees who reside in the county, but who work in a different county with a higher wage index, in accordance with section 505 of Public Law 108–173. Addendum L to this final rule with comment period (which is available via the Internet on the CMS Web site) contains the qualifying counties and the associated wage index increase developed for the FY 2017 IPPS, which are listed in Table 2 in the FY 2017 IPPS/LTCH PPS final rule and correction notice tables and available via the Internet on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html.* This step is to be followed only if the hospital is not reclassified or redesignated under section 1886(d)(8) or section 1886(d)(10) of the Act.

Step 4. Multiply the applicable wage index determined under Steps 2 and 3 by the amount determined under Step 1 that represents the labor-related portion of the national unadjusted payment rate.

The formula below is a mathematical representation of Step 4 and adjusts the labor-related portion of the national unadjusted payment rate for the specific service by the wage index.

X_a is the labor-related portion of the national unadjusted payment rate (wage adjusted).

X_a = .60 * (national unadjusted payment rate) * applicable wage index.

Step 5. Calculate 40 percent (the nonlabor-related portion) of the national unadjusted payment rate and add that amount to the resulting product of Step 4. The result is the wage index adjusted payment rate for the relevant wage index area.

The formula below is a mathematical representation of Step 5 and calculates the remaining portion of the national payment rate, the amount not attributable to labor, and the adjusted payment for the specific service.

Y is the nonlabor-related portion of the national unadjusted payment rate.

Y = .40 * (national unadjusted payment rate). Adjusted Medicare Payment = $Y + X_a$.

Step 6. If a provider is an SCH, as set forth in the regulations at § 412.92, or an EACH, which is considered to be an SCH under section 1886(d)(5)(D)(iii)(III) of the Act, and located in a rural area, as defined in § 412.64(b), or is treated as being located in a rural area under § 412.103, multiply the wage index adjusted payment rate by 1.071 to calculate the total payment.

The formula below is a mathematical representation of Step 6 and applies the rural adjustment for rural SCHs.

Adjusted Medicare Payment (SCH or EACH) = Adjusted Medicare Payment * 1.071.

We are providing examples below of the calculation of both the full and reduced national unadjusted payment rates that will apply to certain outpatient items and services performed by hospitals that meet and that fail to meet the Hospital OQR Program requirements, using the steps outlined above. For purposes of this example, we used a provider that is located in Brooklyn, New York that is assigned to CBSA 35614. This provider bills one service that is assigned to APC 5071 (Level 1 Excision/Biopsy/Incision and Drainage). The CY 2017 full national unadjusted payment rate for APC 5071 is approximately $538.88. The reduced national unadjusted payment rate for APC 5071 for a hospital that fails to meet the Hospital OQR Program requirements is approximately $528.10. This reduced rate is calculated by multiplying the reporting ratio of 0.980 by the full unadjusted payment rate for APC 5071.

The FY 2017 wage index for a provider located in CBSA 35614 in New York is 1.2936. The labor-related portion of the full national unadjusted payment is approximately $418.26 (.60 * $538.88 * 1.2936). The labor-related portion of the reduced national unadjusted payment is approximately $409.89 (.60 * $528.10 * 1.2936). The nonlabor-related portion of the full national unadjusted payment is approximately $215.55 (.40 * $538.88). The nonlabor-related portion of the reduced national unadjusted payment is approximately $211.24 (.40 * $528.10). The sum of the labor-related and nonlabor-related portions of the full national adjusted payment is approximately $633.81 ($418.26 + $215.55). The sum of the portions of the reduced national adjusted payment is approximately $621.13 ($409.89 + $211.24).

I. Beneficiary Copayments

1. Background

Section 1833(t)(3)(B) of the Act requires the Secretary to set rules for determining the unadjusted copayment amounts to be paid by beneficiaries for covered OPD services. Section 1833(t)(8)(C)(ii) of the Act specifies that the Secretary must reduce the national unadjusted copayment amount for a covered OPD service (or group of such services) furnished in a year in a manner so that the effective copayment rate (determined on a national unadjusted basis) for that service in the year does not exceed a specified percentage. As specified in section 1833(t)(8)(C)(ii)(V) of the Act, the effective copayment rate for a covered OPD service paid under the OPPS in CY 2006, and in calendar years thereafter, shall not exceed 40 percent of the APC payment rate. Section 1833(t)(3)(B)(ii) of the Act provides that, for a covered OPD service (or group of such services) furnished in a year, the national unadjusted copayment amount cannot be less than 20 percent of the OPD fee schedule amount. However, section 1833(t)(8)(C)(i) of the Act limits the amount of beneficiary copayment that may be collected for a procedure performed in a year to the amount of the inpatient hospital deductible for that year.

Section 4104 of the Affordable Care Act eliminated the Medicare Part B coinsurance for preventive services furnished on and after January 1, 2011, that meet certain requirements, including flexible sigmoidoscopies and screening colonoscopies, and waived the Part B deductible for screening colonoscopies that become diagnostic during the procedure. Our discussion of the changes made by the Affordable Care Act with regard to copayments for preventive services furnished on and after January 1, 2011, may be found in section XII.B. of the CY 2011 OPPS/ASC final rule with comment period (75 FR 72013).

2. OPPS Copayment Policy

In the CY 2017 OPPS/ASC proposed rule (81 FR 45640), for CY 2017, we proposed to determine copayment amounts for new and revised APCs using the same methodology that we implemented beginning in CY 2004. (We refer readers to the November 7, 2003 OPPS final rule with comment period (68 FR 63458).) In addition, we proposed to use the same standard rounding principles that we have historically used in instances where the application of our standard copayment methodology would result in a copayment amount that is less than 20 percent and cannot be rounded, under standard rounding principles, to 20 percent. (We refer readers to the CY 2008 OPPS/ASC final rule with comment period (72 FR 66687) in which we discuss our rationale for applying these rounding principles.) We included the proposed national unadjusted copayment amounts for services payable under the OPPS that would be effective January 1, 2017, in Addenda A and B to the proposed rule (which are available via the Internet on the CMS Web site).

As discussed in section XIII.E. of the proposed and this final rule with comment period, for CY 2017, the Medicare beneficiary's minimum unadjusted copayment and national unadjusted copayment for a service to which a reduced national unadjusted payment rate applies will equal the product of the reporting ratio and the national unadjusted copayment, or the product of the reporting ratio and the minimum unadjusted copayment, respectively, for the service.

We note that OPPS copayments may increase or decrease each year based on changes in the calculated APC payment rates due to updated cost report and claims data, and any changes to the OPPS cost modeling process. However, as described in the CY 2004 OPPS final rule with comment period, the development of the copayment methodology generally moves beneficiary copayments closer to 20 percent of OPPS APC payments (68 FR 63458 through 63459).

In the CY 2004 OPPS final rule with comment period (68 FR 63459), we adopted a new methodology to calculate unadjusted copayment amounts in situations including reorganizing APCs, and we finalized the following rules to determine copayment amounts in CY 2004 and subsequent years.

• When an APC group consists solely of HCPCS codes that were not paid under the OPPS the prior year because they were packaged or excluded or are new codes, the unadjusted copayment amount would be 20 percent of the APC payment rate.

• If a new APC that did not exist during the prior year is created and consists of HCPCS codes previously assigned to other APCs, the copayment amount is calculated as the product of the APC payment rate and the lowest coinsurance percentage of the codes comprising the new APC.

• If no codes are added to or removed from an APC and, after recalibration of its relative payment weight, the new payment rate is equal to or *greater than* the prior year's rate, the copayment amount remains constant (unless the resulting coinsurance percentage is less than 20 percent).

• If no codes are added to or removed from an APC and, after recalibration of its relative payment weight, the new payment rate is *less than* the prior year's rate, the copayment amount is calculated as the product of the new payment rate and the prior year's coinsurance percentage.

• If HCPCS codes are added to or deleted from an APC and, after recalibrating its relative payment weight, holding its unadjusted copayment amount constant results in a decrease in the coinsurance percentage for the reconfigured APC, the copayment amount would not change (unless retaining the copayment amount would result in a coinsurance rate less than 20 percent).

• If HCPCS codes are added to an APC and, after recalibrating its relative payment weight, holding its unadjusted copayment amount constant results in an increase in the coinsurance percentage for the reconfigured APC, the copayment amount would be calculated as the product of the payment rate of the reconfigured APC and the lowest coinsurance percentage of the codes being added to the reconfigured APC.

We noted in the CY 2004 OPPS final rule with comment period that we would seek to lower the copayment percentage for a service in an APC from the prior year if the copayment percentage was greater than 20 percent. We noted that this principle was consistent with section 1833(t)(8)(C)(ii) of the Act, which accelerates the reduction in the national unadjusted coinsurance rate so that beneficiary liability will eventually equal 20 percent of the OPPS payment rate for all OPPS services to which a copayment applies, and with section 1833(t)(3)(B) of the Act, which is consistent with the Congressional goal of achieving a 20-percent copayment percentage when fully phased in and gives the Secretary the authority to set rules for determining copayment amounts for new services. We further noted that the use of this methodology would, in general, reduce the beneficiary coinsurance rate and copayment amount for APCs for which the payment rate changes as the result of the reconfiguration of APCs and/or recalibration of relative payment weights (68 FR 63459).

We did not receive any public comments on the copayment policy proposal. For the reasons set forth in this final rule with comment period, we are finalizing our proposed CY 2017 copayment policy without modification.

3. Calculation of an Adjusted Copayment Amount for an APC Group

Individuals interested in calculating the national copayment liability for a Medicare beneficiary for a given service provided by a hospital that met or failed to meet its Hospital OQR Program requirements should follow the formulas presented in the following steps.

Step 1. Calculate the beneficiary payment percentage for the APC by dividing the APC's national unadjusted copayment by its payment rate. For example, using APC 5071, $107.78 is approximately 20 percent of the full national unadjusted payment rate of $538.88. For APCs with only a minimum unadjusted copayment in Addenda A and B to this final rule with comment period (which are available via the Internet on the CMS Web site), the beneficiary payment percentage is 20 percent.

The formula below is a mathematical representation of Step 1 and calculates the national copayment as a percentage of national payment for a given service.

B is the beneficiary payment percentage.

B = National unadjusted copayment for APC/ national unadjusted payment rate for APC.

Step 2. Calculate the appropriate wage-adjusted payment rate for the APC for the provider in question, as indicated in Steps 2 through 4 under section II.H. of this final rule with comment period. Calculate the rural adjustment for eligible providers as indicated in Step 6 under section II.H. of this final rule with comment period.

Step 3. Multiply the percentage calculated in Step 1 by the payment rate calculated in Step 2. The result is the wage-adjusted copayment amount for the APC. The formula below is a mathematical representation of Step 3 and applies the beneficiary payment percentage to the adjusted payment rate for a service calculated under section II.H. of this final rule with comment period, with and without the rural adjustment, to calculate the adjusted beneficiary copayment for a given service.

Wage-adjusted copayment amount for the APC = Adjusted Medicare Payment * *B.*

Wage-adjusted copayment amount for the APC (SCH or EACH) = (Adjusted Medicare Payment * 1.071) * *B.*

Step 4. For a hospital that failed to meet its Hospital OQR Program requirements, multiply the copayment calculated in Step 3 by the reporting ratio of 0.980.

The unadjusted copayments for services payable under the OPPS that will be effective January 1, 2017, are shown in Addenda A and B to this final rule with comment period (which are available via the Internet on the CMS Web site). We note that the national unadjusted payment rates and copayment rates shown in Addenda A and B to this final rule with comment period reflect the CY 2017 OPD fee schedule increase factor discussed in section II.B. of this final rule with comment period.

In addition, as noted above, section 1833(t)(8)(C)(i) of the Act limits the amount of beneficiary copayment that may be collected for a procedure performed in a year to the amount of the inpatient hospital deductible for that year.

III. OPPS Ambulatory Payment Classification (APC) Group Policies

A. OPPS Treatment of New CPT and Level II HCPCS Codes

CPT and Level II HCPCS codes are used to report procedures, services, items, and supplies under the hospital OPPS. Specifically, CMS recognizes the following codes on OPPS claims:

• Category I CPT codes, which describe surgical procedures and medical services;

• Category III CPT codes, which describe new and emerging technologies, services, and procedures; and

• Level II HCPCS codes, which are used primarily to identify products, supplies, temporary procedures, and services not described by CPT codes.

CPT codes are established by the American Medical Association (AMA) and the Level II HCPCS codes are established by the CMS HCPCS Workgroup. These codes are updated and changed throughout the year. CPT and HCPCS code changes that affect the OPPS are published both through the annual rulemaking cycle and through

the OPPS quarterly update Change Requests (CRs). CMS releases new Level II HCPCS codes to the public or recognizes the release of new CPT codes by the AMA and makes these codes effective (that is, the codes can be reported on Medicare claims) outside of the formal rulemaking process via OPPS quarterly update CRs. Based on our review, we assign the new CPT and Level II HCPCS codes to interim status indicator (SI) and APC assignments. These interim assignments are finalized in the OPPS/ASC final rules. This quarterly process offers hospitals access to codes that may more accurately describe items or services furnished and provides payment or more accurate payment for these items or services in a timelier manner than if we waited for the annual rulemaking process. We solicit public comments on these new codes and finalize our proposals related to these codes through our annual rulemaking process.

We note that, under the OPPS, the APC assignment determines the payment rate for an item, procedure, or service. For those items, procedures, or services not paid separately under the hospital OPPS, they are assigned to appropriate status indicators. Section XI. of this final rule with comment period provides a discussion of the various status indicators used under the OPPS. Certain payment status indicators provide separate payment while other payment status indicators do not.

In Table 6 below, we summarize our current process for updating codes through our OPPS quarterly update CRs, seeking public comments, and finalizing the treatment of these new codes under the OPPS.

TABLE 6—COMMENT TIMEFRAME FOR NEW OR REVISED HCPCS CODES

OPPS quarterly update CR	Type of code	Effective date	Comments sought	When finalized
April I, 2016	Level II HCPCS Codes	April 1, 2016	CY 2017 OPPS/ASC proposed rule.	CY 2017 OPPS/ASC final rule with comment period.
July 1, 2016	Level II HCPCS Codes	July 1, 2016	CY 2017 OPPS/ASC proposed rule.	CY 2017 OPPS/ASC final rule with comment period.
	Category I (certain vaccine codes) and III CPT codes.	July 1, 2016	CY 2017 OPPS/ASC proposed rule.	CY 2017 OPPS/ASC final rule with comment period.
October 1, 2016	Level II HCPCS Codes	October 1, 2016	CY 2017 OPPS/ASC final rule with comment period.	CY 2018 OPPS/ASC final rule with comment period.
January 1, 2017	Level II HCPCS Codes	January 1, 2017	CY 2017 OPPS/ASC final rule with comment period.	CY 2018 OPPS/ASC final rule with comment period.
	Category I and III CPT Codes	January 1, 2017	CY 2017 OPPS/ASC proposed rule.	CY 2017 OPPS/ASC final rule with comment period.

1. Treatment of New Level II HCPCS Codes Effective April 1, 2016 for Which We Solicited Public Comments in the CY 2017 OPPS/ASC Proposed Rule

Through the April 2016 OPPS quarterly update CR (Transmittal 3471, Change Request 9549, dated February 26, 2016) we recognized several new Level II HCPCS codes for separate payment under the OPPS. Effective April 1, 2016, we implemented 10 new HCPCS codes and also assigned them to appropriate interim OPPS status indicators and APCs. Specifically, as displayed in Table 7 of the CY 2017 OPPS/ASC proposed rule (81 FR 45642), we provided separate payment for HCPCS codes C9137, C9138, C9461, C9470, C9471, C9472, C9473, C9474, C9475, and J7503. We note that HCPCS code J7503 was initially assigned to OPPS status indicator ''E'' (Not paid by Medicare when submitted on outpatient claims (any outpatient bill type) when the code was established on January 1, 2016. However, we revised its OPPS status indicator from ''E'' to ''G'' (Pass-Through Drugs and Biologicals. Paid under OPPS; separate APC payment) effective April 1, 2016, when the drug associated with HCPCS code J7503 was approved for pass-through payment status under the hospital OPPS.

In the CY 2017 OPPS/ASC proposed rule, we solicited public comments on the proposed APC and status indicator assignments for the 10 HCPCS codes implemented on April 1, 2016. We indicated that the proposed payment rates for these codes, where applicable, could be found in Addendum B to the proposed rule (which is available via the Internet on the CMS Web site).

We did not receive any public comments on the proposed APC and status indicator assignments for the HCPCS codes implemented in April 2016. Therefore, we are finalizing the proposed APC assignments and status indicators for the new HCPCS codes that were implemented on April 1, 2016. The final APC and status indicator assignments are listed in Table 7 below.

We note that, for the CY 2017 update, the HCPCS Workgroup replaced the temporary drug HCPCS C-codes that were listed in Table 7 of the proposed rule with permanent HCPCS J-codes effective January 1, 2017. Because the replacement HCPCS J-codes describe the same drugs with the same dosage descriptors as their predecessor HCPCS C-codes, they will continue to receive pass-through payment status in CY 2017. Therefore, we are assigning the replacement HCPCS J-codes to the same APCs and status indicators as their predecessor HCPCS C-codes, as shown in Table 7 below. The final payment rates for these codes, where applicable, can be found in Addendum B to this final rule with comment period (which is available via the Internet on the CMS Web site).

TABLE 7—FINAL CY 2017 STATUS INDICATOR (SI) AND APC ASSIGNMENTS FOR THE NEW LEVEL II HCPCS CODES THAT WERE IMPLEMENTED ON APRIL 1, 2016

CY 2016 HCPCS code	CY 2017 HCPCS code	CY 2017 long descriptor	Final CY 2017 SI	Final CY 2017 APC
C9137	J7207	Injection, factor viii, (antihemophilic factor, recombinant), PEGylated, 1 i.u.	G	1844
C9138	J7209	Injection, factor viii, (antihemophilic factor, recombinant), (Nuwiq), 1 i.u.	G	1846
C9461	A9515	Choline c-11, diagnostic, per study dose up to 20 millicuries	G	9461

TABLE 7—FINAL CY 2017 STATUS INDICATOR (SI) AND APC ASSIGNMENTS FOR THE NEW LEVEL II HCPCS CODES THAT WERE IMPLEMENTED ON APRIL 1, 2016—Continued

CY 2016 HCPCS code	CY 2017 HCPCS code	CY 2017 long descriptor	Final CY 2017 SI	Final CY 2017 APC
C9470	J1942	Injection, aripiprazole lauroxil, 1 mg	G	9470
C9471	J7322	Hyaluronan or derivative, Hymovis, for intra-articular injection, 1 mg	G	9471
C9472	J9325	Injection, talimogene laherparepvec, per 1 million plaque forming units	G	9472
C9473	J2182	Injection, mepolizumab, 1 mg	G	9473
C9474	J9205	Injection, irinotecan liposome, 1 mg	G	9474
C9475	J9295	Injection, necitumumab, 1 mg	G	9475
J7503	J7503	Tacrolimus, extended release, (Envarsus XR), oral, 0.25 mg	G	1845

2. Treatment of New CPT and Level II HCPCS Codes Effective July 1, 2016 for Which We Solicited Public Comments in the CY 2017 OPPS/ASC Proposed Rule

Effective July 1, 2016, we implemented several new CPT and Level II HCPCS codes under the hospital OPPS. Through the July 2016 OPPS quarterly update CR (Transmittal 3523, Change Request 9658, dated May 13, 2016), we assigned nine new Category III CPT codes and nine Level II HCPCS codes that were made effective July 1, 2016, to interim OPPS status indicators and APCs. Specifically, as displayed in Table 8 of the CY 2017 OPPS/ASC proposed rule (81 FR 45643), we established interim OPPS status indicator and APC assignments for Category III CPT codes 0438T, 0440T, 0441T, 0442T, and 0443T, and Level II HCPCS codes C9476, C9477, C9478, C9479, C9480, Q5102, Q9981, Q9982, and Q9983. We noted that Category III CPT codes 0437T, 0439T, 0444T, and 0445T are assigned to OPPS status indicator ''N'' to indicate that the services described by the codes are packaged and their payment is included in the primary procedure codes reported with these codes.

Table 8 of the CY 2017 OPPS/ASC proposed rule listed the CPT and Level II HCPCS codes that were implemented on July 1, 2016, along with the proposed status indicators and proposed APC assignments, where applicable, for CY 2017. We solicited public comments on the proposed APC and status indicator assignments.

We received one comment related to the proposed APC assignment for Category III CPT codes 0440T, 0441T, and 0442T, which we address in section III.D.10. of this final rule with comment period. We did not receive any public comments on the proposed APC and status indicator assignments for the other 15 codes that were listed in Table 8 of the CY 2017 OPPS/ASC proposed rule. Therefore, in this final rule with comment period, we are adopting as final, without modification, the proposed APC and/or status indicator assignments for Category III CPT codes 0437T, 0438T, 0439T, 0444T, and 0445T and Level II HCPCS codes C9476, C9477, C9478, C9479, C9480, Q5102, Q9981, Q9982, and Q9983. However, we are modifying the OPPS status indicator for CPT code 0443T from ''T'' to ''N'' because this is an add-on code. Since January 1, 2014, payment for procedures described by add-on codes have been packaged under the hospital OPPS.

In addition, for the CY 2017 update, the HCPCS Workgroup replaced temporary HCPCS codes C9476, C9477, C9478, C9480, and Q9981 with permanent HCPCS J-codes effective January 1, 2017. Because the replacement HCPCS J-codes describe the same drugs with the same dosage descriptors as their predecessor HCPCS C-codes and Q-codes, they will continue to receive pass-through payment status in CY 2017. Consequently, we are assigning the replacement HCPCS J-codes to the same APCs and status indicators as their predecessor HCPCS C-codes and Q-codes, as shown in Table 8 below. Table 8 lists the CPT and Level II HCPCS codes that were implemented on July 1, 2016, along with the final status indicators and APC assignments for CY 2017. The final payment rates for these codes, where applicable, can be found in Addendum B to this final rule with comment period (which is available via the Internet on the CMS Web site).

TABLE 8—FINAL CY 2017 STATUS INDICATORS (SI) AND APC ASSIGNMENTS FOR THE NEW CATEGORY III CPT AND LEVEL II HCPCS CODES IMPLEMENTED ON JULY 1, 2016

CY 2016 CPT/HCPCS code	CY 2017 CPT/HCPCS code	CY 2017 long descriptor	Final CY 2017 SI	Final CY 2017 APC
C9476	J9145	Injection, daratumumab, 10 mg	G	9476
C9477	J9176	Injection, elotuzumab, 1 mg	G	9477
C9478	J2840	Injection, sebelipase alfa, 1 mg	G	9478
C9479	J7342	Instillation, ciprofloxacin otic suspension, 6 mg	G	9479
C9480	J9352	Injection, trabectedin, 0.1 mg	G	9480
Q5102	Q5102	Injection, Infliximab, Biosimilar, 10 mg	E2	N/A
Q9981	J8670	Rolapitant, oral, 1 mg	K	1761
Q9982*	Q9982	Flutemetamol F18, diagnostic, per study dose, up to 5 millicuries	G	9459
Q9983**	Q9983	Florbetaben f18, diagnostic, per study dose, up to 8.1 millicuries	G	9458
0437T	0437T	Implantation of non-biologic or synthetic implant (*e.g.,* polypropylene) for fascial reinforcement of the abdominal wall (List separately in addition to primary procedure).	N	N/A
0438T	0438T***	Transperineal placement of biodegradable material, peri-prostatic (via needle), single or multiple, includes image guidance.	T	5374
0439T	0439T	Myocardial contrast perfusion echocardiography; at rest or with stress, for assessment of myocardial ischemia or viability (List separately in addition to primary procedure).	N	N/A

TABLE 8—FINAL CY 2017 STATUS INDICATORS (SI) AND APC ASSIGNMENTS FOR THE NEW CATEGORY III CPT AND LEVEL II HCPCS CODES IMPLEMENTED ON JULY 1, 2016—Continued

CY 2016 CPT/HCPCS code	CY 2017 CPT/HCPCS code	CY 2017 long descriptor	Final CY 2017 SI	Final CY 2017 APC
0440T	0440T	Ablation, percutaneous, cryoablation, includes imaging guidance; upper extremity distal/peripheral nerve.	J1	5432
0441T	0441T	Ablation, percutaneous, cryoablation, includes imaging guidance; lower extremity distal/peripheral nerve.	J1	5432
0442T	0442T	Ablation, percutaneous, cryoablation, includes imaging guidance; nerve plexus or other truncal nerve (*e.g.,* brachial plexus, pudendal nerve).	J1	5432
0443T	0443T	Real time spectral analysis of prostate tissue by fluorescence spectroscopy ...	N	N/A
0444T	0444T	Initial placement of a drug-eluting ocular insert under one or more eyelids, including fitting, training, and insertion, unilateral or bilateral.	N	N/A
0445T	0445T	Subsequent placement of a drug-eluting ocular insert under one or more eyelids, including re-training, and removal of existing insert, unilateral or bilateral.	N	N/A

*HCPCS code C9459 (Flutemetamol f18, diagnostic, per study dose, up to 5 millicuries) was deleted June 30, 2016, and replaced with HCPCS code Q9982 effective July 1, 2016.

**HCPCS code C9458 (Florbetaben f18, diagnostic, per study dose, up to 8.1 millicuries) was deleted June 30, 2016, and replaced with HCPCS code Q9983 effective July 1, 2016.

***HCPCS code C9743 (Injection/implantation of bulking or spacer material (any type) with or without image guidance (not to be used if a more specific code applies) was deleted June 30, 2016 and replaced with CPT code 0438T effective July 1, 2016.

3. Process for New Level II HCPCS Codes That Became Effective October 1, 2016 and New Level II HCPCS Codes That Will Be Effective January 1, 2017 for Which We Are Soliciting Public Comments in This CY 2017 OPPS/ASC Final Rule With Comment Period

As has been our practice in the past, we incorporate those new Level II HCPCS codes that are effective October 1 and January 1 in the final rule with comment period thereby updating the OPPS for the following calendar year. These codes are released to the public through the October and January OPPS quarterly update CRs and via the CMS HCPCS Web site (for Level II HCPCS codes). For CY 2017, we proposed to continue our established policy of assigning comment indicator ''NI'' to these codes to indicate that we are assigning them an interim payment status which is subject to public comment (81 FR 45643). Specifically, the status indicators and the APC assignments for codes flagged with comment indicator ''NI'' are open to public comment in this final rule with comment period, and we will respond to these public comments in the OPPS/ASC final rule with comment period for the next year's OPPS/ASC update. For CY 2017, we proposed to include in Addendum B to the CY 2017 OPPS/ASC final rule with comment period the following new HCPCS codes:

- New Level II HCPCS codes effective October 1, 2016, that would be incorporated in the October 2016 OPPS quarterly update CR;
- New Level II HCPCS codes effective January 1, 2017, that would be incorporated in the January 2017 OPPS quarterly update CR.

As stated above, the October 1, 2016 and January 1, 2017 codes are flagged with comment indicator ''NI'' in Addendum B to this CY 2017 OPPS/ASC final rule with comment period to indicate that we have assigned the codes an interim OPPS payment status for CY 2017. We are inviting public comments on the interim status indicator and APC assignments and payment rates for these codes, if applicable, that will be finalized in the CY 2018 OPPS/ASC final rule with comment period.

4. Treatment of New and Revised CY 2017 Category I and III CPT Codes That Will Be Effective January 1, 2017, for Which We Solicited Public Comments in the CY 2017 OPPS/ASC Proposed Rule

In the CY 2015 OPPS/ASC final rule with comment period (79 FR 66841 through 66844), we finalized a revised process of assigning APC and status indicators for new and revised Category I and III CPT codes that would be effective January 1. Specifically, for the new/revised CPT codes that we receive in a timely manner from the AMA's CPT Editorial Panel, we finalized our proposal to include the codes that would be effective January 1 in the OPPS/ASC proposed rules, along with proposed APC and status indicator assignments for them, and to finalize the APC and status indicator assignments in the OPPS/ASC final rules beginning with the CY 2016 OPPS update. For those new/revised CPT codes that were received too late for inclusion in the OPPS/ASC proposed rule, we finalized our proposal to establish and use HCPCS G-codes that mirror the predecessor CPT codes and retain the current APC and status indicator assignments for a year until we can propose APC and status indicator assignments in the following year's rulemaking cycle. We noted that even if we find that we need to create HCPCS G-codes in place of certain CPT codes for the MPFS proposed rule, we do not anticipate that these HCPCS G codes will always be necessary for OPPS purposes. We will make every effort to include proposed APC and status indicator assignments for all new and revised CPT codes that the AMA makes publicly available in time for us to include them in the proposed rule, and to avoid establishing HCPCS G codes and the resulting delay in utilization of the most current CPT codes. In addition, we finalized our proposal to make interim APC and status indicator assignments for CPT codes that are not available in time for the proposed rule and that describe wholly new services (such as new technologies or new surgical procedures), solicit public comments, and finalize the specific APC and status indicator assignments for those codes in the following year's final rule.

For the CY 2017 OPPS update, we received the CY 2017 CPT codes that will be effective January 1, 2017, from the AMA in time for inclusion in the CY 2017 OPPS/ASC proposed rule. In the proposed rule (81 FR 45643 through 45644), we indicated that the new and revised CY 2017 Category I and III CPT codes could be found in OPPS Addendum B to the proposed rule and were assigned to new comment indicator ''NP'' to indicate that the code

is new for the next calendar year or the code is an existing code with substantial revision to its code descriptor in the next calendar year as compared to current calendar year with a proposed APC assignment. We further stated that comments would be accepted on the proposed APC assignment and status indicator.

In addition, we reminded readers that the CPT code descriptors that appeared in OPPS Addendum B are short descriptors and do not accurately describe the complete procedure, service, or item described of the CPT code. Therefore, we included the 5-digit placeholder codes and their long descriptors in Addendum O to the proposed rule (which is available via the Internet on the CMS Web site) so that the public could adequately comment on our proposed APCs and status indicator assignments. The 5-digit placeholder codes were listed in Addendum O of the proposed rule, specifically under the column labeled ''CY 2017 OPPS/ASC Proposed Rule 5-Digit Placeholder Code.'' We also indicated that the final CPT code numbers would be included in this CY 2017 OPPS/ASC final rule with comment period. The final CPT code numbers, along with their corresponding 5-digit placeholder codes, can be found in Addendum O of this final rule with comment period.

We note that not every code listed in Addendum O of the proposed rule was subject to comment. For the new/revised Category I and III CPT codes, we requested public comments on only those codes that were assigned to comment indicator ''NP.'' We indicated that public comments would not be accepted for new Category I CPT laboratory codes that were not assigned to ''NP'' comment indicator in Addendum O to the proposed rule. We stated that comments to these codes must be submitted at the Clinical Laboratory Fee Schedule (CLFS) Public Meeting, which was scheduled for July 18, 2016.

We received public comments on several of the new CPT codes that were assigned to comment indicator ''NP'' in Addendum B of the CY 2017 OPPS/ASC proposed rule. We respond to these comments in section III.D. of this CY 2017 OPPS/ASC final rule with comment period.

The final status indicators, APC assignments, and payment rates for the new CPT codes that will be effective January 1, 2017, can be found in Addendum B to this final rule with comment period (which is available via the Internet on the CMS Web site).

B. OPPS Changes—Variations Within APCs

1. Background

Section 1833(t)(2)(A) of the Act requires the Secretary to develop a classification system for covered hospital outpatient department services. Section 1833(t)(2)(B) of the Act provides that the Secretary may establish groups of covered OPD services within this classification system, so that services classified within each group are comparable clinically and with respect to the use of resources. In accordance with these provisions, we developed a grouping classification system, referred to as Ambulatory Payment Classifications (APCs), as set forth in § 419.31 of the regulations. We use Level I and Level II HCPCS codes to identify and group the services within each APC. The APCs are organized such that each group is homogeneous both clinically and in terms of resource use. Using this classification system, we have established distinct groups of similar services. We also have developed separate APC groups for certain medical devices, drugs, biologicals, therapeutic radiopharmaceuticals, and brachytherapy devices that are not packaged into the payment for the procedure.

We have packaged into the payment for each procedure or service within an APC group the costs associated with those items and services that are typically ancillary and supportive to a primary diagnostic or therapeutic modality and, in those cases, are an integral part of the primary service they support. Therefore, we do not make separate payment for these packaged items or services. In general, packaged items and services include, but are not limited to, the items and services listed in § 419.2(b) of the regulations. A further discussion of packaged services is included in section II.A.3. of this final rule with comment period.

Under the OPPS, we generally pay for covered hospital outpatient services on a rate-per-service basis, where the service may be reported with one or more HCPCS codes. Payment varies according to the APC group to which the independent service or combination of services is assigned. In the CY 2017 OPPS/ASC proposed rule (81 FR 45644), for CY 2017, we proposed that each APC relative payment weight represents the hospital cost of the services included in that APC, relative to the hospital cost of the services included in APC 5012 (Clinic Visits and Related Services). The APC relative payment weights are scaled to APC 5012 because it is the hospital clinic visit APC and clinic visits are among the most frequently furnished services in the hospital outpatient setting.

2. Application of the 2 Times Rule

Section 1833(t)(9)(A) of the Act requires the Secretary to review, not less often than annually, and revise the APC groups, the relative payment weights, and the wage and other adjustments described in paragraph (2) to take into account changes in medical practice, changes in technology, the addition of new services, new cost data, and other relevant information and factors. Section 1833(t)(9)(A) of the Act also requires the Secretary to consult with an expert outside advisory panel composed of an appropriate selection of representatives of providers to review (and advise the Secretary concerning) the clinical integrity of the APC groups and the relative payment weights. We note that the Panel recommendations for specific services for the CY 2017 OPPS and our responses to them are discussed in the relevant specific sections throughout this final rule with comment period.

In addition, section 1833(t)(2) of the Act provides that, subject to certain exceptions, the items and services within an APC group cannot be considered comparable with respect to the use of resources if the highest cost for an item or service in the group is more than 2 times greater than the lowest cost for an item or service within the same group (referred to as the ''2 times rule''). The statute authorizes the Secretary to make exceptions to the 2 times rule in unusual cases, such as low-volume items and services (but the Secretary may not make such an exception in the case of a drug or biological that has been designated as an orphan drug under section 526 of the Federal Food, Drug, and Cosmetic Act).

Therefore, in accordance with section 1833(t)(2) of the Act and § 419.31 of the regulations, we annually review the items and services within an APC group to determine if there are any APC violations of the 2 times rule and whether there are any appropriate revisions to APC assignments that may be necessary or exceptions to be made. In determining the APCs with a 2 times rule violation, we consider only those HCPCS codes that are significant based on the number of claims. We note that, for purposes of identifying significant procedure codes for examination under the 2 times rule, we consider procedure codes that have more than 1,000 single major claims or procedure codes that have both greater than 99 single major claims and contribute at least 2 percent

of the single major claims used to establish the APC cost to be significant (75 FR 71832). This longstanding definition of when a procedure code is significant for purposes of the 2 times rule was selected because we believe that a subset of 1,000 claims (or less than 1,000 claims) is negligible within the set of approximately 100 million single procedure or single session claims we use for establishing costs. Similarly, a procedure code for which there are fewer than 99 single claims and which comprises less than 2 percent of the single major claims within an APC will have a negligible impact on the APC cost. In the CY 2017 OPPS/ASC proposed rule (81 FR 45644 through 45645), we proposed to make exceptions to this limit on the variation of costs within each APC group in unusual cases, such as low-volume items and services.

For the CY 2017 OPPS update, we identified the APCs with violations of the 2 times rule, and we proposed changes to the procedure codes assigned to these APCs in Addendum B to the CY 2017 OPPS/ASC proposed rule. We noted that Addendum B did not appear in the printed version of the **Federal Register** as part of the CY 2017 OPPS/ASC proposed rule. Rather, it was published and made available via the Internet on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html*. In these cases, to eliminate a violation of the 2 times rule or to improve clinical and resource homogeneity, in the CY 2017 OPPS/ASC proposed rule (81 FR 45645), we proposed to reassign these procedure codes to new APCs that contain services that are similar with regard to both their clinical and resource characteristics. In many cases, the proposed procedure code reassignments and associated APC reconfigurations for CY 2017 included in the proposed rule are related to changes in costs of services that were observed in the CY 2015 claims data newly available for CY 2017 ratesetting. We also proposed changes to the status indicators for some procedure codes that were not specifically and separately discussed in the proposed rule. In these cases, we proposed to change the status indicators for these procedure codes because we believe that another status indicator would more accurately describe their payment status from an OPPS perspective based on the policies that we proposed for CY 2017. Addendum B to the CY 2017 OPPS/ASC proposed rule identified with a comment indicator ''CH'' those procedure codes for which we proposed a change to the APC assignment or status indicator, or both, that were initially assigned in the April 1, 2016 OPPS Addendum B Update (available via the Internet on the CMS Web site at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Addendum-A-and-Addendum-B-Updates.html*). In contrast, Addendum B to this final rule with comment period (available via the Internet on the CMS Web site) identifies with the ''CH'' comment indicator the final CY 2017 changes compared to the HCPCS codes' status as reflected in the October 2016 Addendum B update.

3. APC Exceptions to the 2 Times Rule

Taking into account the APC changes that we proposed for CY 2017, we reviewed all of the APCs to determine which APCs would not meet the requirements of the 2 times rule. We used the following criteria to evaluate whether to propose exceptions to the 2 times rule for affected APCs:

- Resource homogeneity;
- Clinical homogeneity;
- Hospital outpatient setting utilization;
- Frequency of service (volume); and
- Opportunity for upcoding and code fragments.

Based on the CY 2015 claims data available for the CY 2017 proposed rule, we found 4 APCs with violations of the 2 times rule. We applied the criteria as described above to identify the APCs that we proposed to make exceptions for under the 2 times rule for CY 2017, and identified 4 APCs that met the criteria for an exception to the 2 times rule based on the CY 2015 claims data available for the proposed rule. For a detailed discussion of these criteria, we refer readers to the April 7, 2000 OPPS final rule with comment period (65 FR 18457 and 18458).

In addition, in the proposed rule, we noted that, for cases in which a recommendation by the Panel appears to result in or allow a violation of the 2 times rule, we may accept the Panel's recommendation because those recommendations are based on explicit consideration (that is, a review of the latest OPPS claims data and group discussion of the issue) of resource use, clinical homogeneity, site of service, and the quality of the claims data used to determine the APC payment rates.

Table 9 of the proposed rule listed the 4 APCs that we proposed to make exceptions for under the 2 times rule for CY 2017 based on the criteria cited above and claims data submitted between January 1, 2015, and December 31, 2015, and processed on or before December 31, 2015. We indicated that, for the final rule with comment period, we intend to use claims data for dates of service between January 1, 2015, and December 31, 2015, that were processed on or before June 30, 2016, and updated CCRs, if available.

Based on the updated final rule CY 2015 claims data, we found 7 APCs with violations of the 2 times rule for this final rule with comment period. We applied the criteria as described earlier to identify the APCs that are exceptions to the 2 times rule for CY 2015, and identified 4 additional APCs that meet the criteria for exception to the 2 times rule for this final rule with comment period, but that did not meet the criteria using proposed rule claims data. Specifically, we found that the following 4 additional APCs violated the 2 times rule using the final rule with comment period claims data:

- APC 5181 (Level 1 Vascular Procedures)
- APC 5732 (Level 2 Minor Procedures)
- APC 5821 (Level 1 Health and Behavior Services)
- APC 5823 (Level 3 Health and Behavior Services)

After considering the public comments we received on APC assignments and our analysis of the CY 2015 costs from hospital claims and cost report data available for this final rule with comment period, we are finalizing our proposals with some modifications. Specifically, we are finalizing our proposal to except 3 of the 4 proposed APCs from the 2 times rule for CY 2017 (APCs 5521, 5735, and 5771), and also excepting 4 additional APCs (APCs 5181, 5732, 5821, and 5823). APC 5841 (Psychotherapy), which appeared as one of the 4 APCs in Table 9 of the CY 2017 OPPS/ASC proposed rule, no longer met the criteria for exception to the 2 times rule in this final rule with comment period. Table 9 below lists the 7 APCs that we are excepting from the 2 times rule for CY 2017 based on the criteria described earlier and a review of updated claims data. We note that, for cases in which a recommendation by the HOP Panel appears to result in or allow a violation of the 2 times rule, we generally accept the Panel's recommendation because those recommendations are based on explicit consideration of resource use, clinical homogeneity, site of service, and the quality of the claims data used to determine the APC payment rates. The geometric mean costs for hospital outpatient services for these and all other APCs that were used in the development of this final rule with comment period can be found on the CMS Web site at: *http://www.cms.gov/*

Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices.html.

TABLE 9—FINAL CY 2017 APC EXCEPTIONS TO THE 2 TIMES RULE

CY 2017 APC	CY 2017 APC title
5181	Level 1 Vascular Procedures.
5521	Level 1 Imaging without Contrast.
5732	Level 2 Minor Procedures.
5735	Level 5 Minor Procedures.
5771	Cardiac Rehabilitation.
5821	Level 1 Health and Behavior Services.
5823	Level 3 Health and Behavior Services.

C. New Technology APCs

1. Background

In the November 30, 2001 final rule (66 FR 59903), we finalized changes to the time period a service was eligible for payment under a New Technology APC. Beginning in CY 2002, we retain services within New Technology APC groups until we gather sufficient claims data to enable us to assign the service to an appropriate clinical APC. This policy allows us to move a service from a New Technology APC in less than 2 years if sufficient data are available. It also allows us to retain a service in a New Technology APC for more than 2 years if sufficient data upon which to base a decision for reassignment have not been collected.

For CY 2016, there are 48 New Technology APC levels, ranging from the lowest cost band assigned to APC 1491 (New Technology—Level 1A ($0–$10)) through the highest cost band assigned to APC 1599 (New Technology—Level 48 ($90,001–$100,000)). In the CY 2004 OPPS final rule with comment period (68 FR 63416), we restructured the New Technology APCs to make the cost intervals more consistent across payment levels and refined the cost bands for these APCs to retain two parallel sets of New Technology APCs, one set with a status indicator of ''S'' (Significant Procedures, Not Discounted when Multiple. Paid under OPPS; separate APC payment) and the other set with a status indicator of ''T'' (Significant Procedure, Multiple Reduction Applies. Paid under OPPS; separate APC payment). These current New Technology APC configurations allow us to price new technology services more appropriately and consistently.

We note that the cost bands for the New Technology APCs, specifically, APCs 1491 through 1599, vary with increments ranging from $10 to $9,999. These cost bands identify the APCs to which new technology procedures and services with estimated service costs that fall within those cost bands are assigned under the OPPS. Payment for each APC is made at the mid-point of the APC's assigned cost band. For example, payment for New Technology APC 1507 (New Technology—Level 7 ($501–$600)) is made at $550.50.

Every year we receive several requests for higher payment amounts under the New Technology APCs for specific procedures paid under the OPPS because they require the use of expensive equipment. We are taking this opportunity to reiterate our response in general to the issue of hospitals' capital expenditures as they relate to the OPPS and Medicare, as specified in the CY 2016 OPPS/ASC final rule with comment period (80 FR 70374).

Under the OPPS, one of our goals is to make payments that are appropriate for the services that are necessary for the treatment of Medicare beneficiaries. The OPPS, like other Medicare payment systems, is budget neutral and increases are limited to the annual hospital inpatient market basket increase. We believe that our payment rates generally reflect the costs that are associated with providing care to Medicare beneficiaries, and we believe that our payment rates are adequate to ensure access to services (80 FR 70374).

For many emerging technologies, there is a transitional period during which utilization may be low, often because providers are first learning about the techniques and their clinical utility. Quite often, parties request that Medicare make higher payment amounts under the New Technology APCs for new procedures in that transitional phase. These requests, and their accompanying estimates for expected total patient utilization, often reflect very low rates of patient use of expensive equipment, resulting in high per use costs for which requesters believe Medicare should make full payment. Medicare does not, and we believe should not, assume responsibility for more than its share of the costs of procedures based on projected utilization for Medicare beneficiaries and does not set its payment rates based on initial projections of low utilization for services that require expensive capital equipment. For the OPPS, we rely on hospitals to make informed business decisions regarding the acquisition of high cost capital equipment, taking into consideration their knowledge about their entire patient base (Medicare beneficiaries included) and an understanding of Medicare's and other payers' payment policies. (We refer readers to the CY 2013 OPPS/ASC final rule with comment period (77 FR 68314) for further discussion regarding this payment policy.)

We note that, in a budget neutral environment, payments may not fully cover hospitals' costs in a particular circumstance, including those for the purchase and maintenance of capital equipment. We rely on hospitals to make their decisions regarding the acquisition of high cost equipment with the understanding that the Medicare program must be careful to establish its initial payment rates, including those made through New Technology APCs, for new services that lack hospital claims data based on realistic utilization projections for all such services delivered in cost-efficient hospital outpatient settings. As the OPPS acquires claims data regarding hospital costs associated with new procedures, we regularly examine the claims data and any available new information regarding the clinical aspects of new procedures to confirm that our OPPS payments remain appropriate for procedures as they transition into mainstream medical practice (77 FR 68314).

2. Additional New Technology APC Groups

As stated above, for the CY 2017 update, there are 48 levels of New Technology APC groups with two parallel status indicators; one set with a status indicator of ''S'' and the other set with a status indicator of ''T.'' To improve our ability to pay appropriately for new technology services and procedures, in the CY 2017 OPPS/ASC proposed rule (81 FR 45646), we proposed to expand the New Technology APC groups by adding 3 more levels, specifically, adding New Technology Levels 49 through 51. We proposed this expansion to accommodate the assignment of retinal prosthesis implantation procedures to a New Technology APC, which is discussed in section III.C.3. of this final rule with comment period. Therefore, for the CY 2017 OPPS update, we proposed to establish 6 new groups of New Technology APCs, APCs 1901 through 1906 (for New Technology APC Levels 49 through 51), with procedures assigned to both OPPS status indicators ''S'' and ''T.'' These new groups of APCs have the same payment levels with one set subject to the multiple procedure payment reduction (procedures assigned to status indicator ''T'') and the other set not subject to the multiple procedure

payment reduction (procedures assigned to status indicator ''S''). Each proposed set of New Technology APC groups has identical group titles, payment rates, and minimum unadjusted copayments, but a different status indicator assignment. Table 10 of the CY 2017 OPPS/ASC proposed rule included the complete list of the proposed additional 6 New Technology APC groups for CY 2017 (81 FR 45646).

We did not receive any public comments on the proposed expansion of the New Technology APC groups, specifically, adding New Technology Levels 49 through 51 for New Technology APCs 1901 through 1906. Therefore, we are finalizing our proposal, without modification. Table 10 lists the final CY 2017 New Technology APCs and the group titles for New Technology Levels 49 through 51. The payment rates for New Technology APCs 1901 through 1906 can be found in Addendum A to this final rule with comment period (which is available via the Internet on the CMS Web site).

TABLE 10—FINAL CY 2017 ADDITIONAL NEW TECHNOLOGY APC GROUPS

New CY 2017 APC	CY 2017 APC title	Final CY 2017 SI
1901	New Technology—Level 49 ($100,001–$120,000)	S
1902	New Technology—Level 49 ($100,001–$120,000)	T
1903	New Technology—Level 50 ($120,001–$140,000)	S
1904	New Technology—Level 50 ($120,001–$140,000)	T
1905	New Technology—Level 51 ($140,001–$160,000)	S
1906	New Technology—Level 51 ($140,001–$160,000)	T

3. Procedures Assigned to New Technology APC Groups for CY 2017

a. Overall Proposal

As we explained in the CY 2002 OPPS final rule with comment period (66 FR 59902), we generally retain a procedure in the New Technology APC to which it is initially assigned until we have obtained sufficient claims data to justify reassignment of the procedure to a clinically appropriate APC. However, in cases where we find that our initial New Technology APC assignment was based on inaccurate or inadequate information (although it was the best information available at the time), or we obtain new information that was not available at the time of our initial New Technology APC assignment, or where the New Technology APCs are restructured, we may, based on more recent resource utilization information (including claims data) or the availability of refined New Technology APC cost bands, reassign the procedure or service to a different New Technology APC that more appropriately reflects its cost (66 FR 59903).

Consistent with our current policy, for CY 2017, in the CY 2017 OPPS/ASC proposed rule (81 FR 45646), we proposed to retain services within New Technology APC groups until we obtain sufficient claims data to justify reassignment of the service to a clinically appropriate APC. The flexibility associated with this policy allows us to reassign a service from a New Technology APC in less than 2 years if sufficient claims data are available. It also allows us to retain a service in a New Technology APC for more than 2 years if sufficient claims data upon which to base a decision for reassignment have not been obtained (66 FR 59902).

For CY 2016, only two procedure codes, specifically, HCPCS codes C9740 (Cystourethroscopy, with insertion of transprostatic implant; 4 or more implants) and 0100T (Placement of a subconjunctival retinal prosthesis receiver and pulse generator, and implantation of intra-ocular retinal electrode array, with vitrectomy) received payment through a New Technology APC. In the CY 2017 OPPS/ASC proposed rule (81 FR 45646 through 45648), we proposed to reassign HCPCS code C9740 from APC 1565 (New Technology—Level 28 ($5000–$5500)) to APC 5376 (Level 6 Urology and Related Services), and to reassign CPT code 0100T from APC 1599 (New Technology—Level 48 ($90,000–$100,000)) to APC 1906 (New Technology—Level 51 ($140,001–$160,000)). We received public comments on the proposed APC assignment revisions for both procedure codes. Below in section III.C.3.b. of this final rule with comment period, we discuss the public comments we received, our responses, and our final policy for CY 2017 for CPT code 0100T on the retinal prosthesis implant procedure. In section III.D.4.a. of this final rule with comment period, we discuss the public comments we received, our responses, and our final policy for CY 2017 for HCPCS code C9740 on cystourethroscopy.

b. Retinal Prosthesis Implant Procedure

As stated above, in the CY 2017 OPPS/ASC proposed rule, we proposed to revise the APC assignment for CPT code 0100T from New Technology APC 1599 to New Technology APC 1906.

CPT code 0100T describes the implantation of a retinal prosthesis, specifically, a procedure involving use of the Argus® II Retinal Prosthesis System. This first retinal prosthesis was approved by the FDA in 2013 for adult patients diagnosed with advanced retinitis pigmentosa. Pass-through payment status was granted for the Argus® II device under HCPCS code C1841 (Retinal prosthesis, includes all internal and external components) beginning October 1, 2013, and expired on December 31, 2015. We note that after pass-through payment status expires for a medical device, the payment for the device is packaged into the payment for the associated surgical procedure. Consequently, for CY 2016, the device described by HCPCS code C1841 was assigned to OPPS status indicator ''N'' to indicate that payment for the device is packaged and included in the payment rate for the surgical procedure described by CPT code 0100T. For CY 2016, CPT code 0100T is assigned to APC 1599 with a payment rate of $95,000. This payment includes both the surgical procedure (CPT code 0100T) and the use of the Argus® II device (HCPCS code C1841). However, stakeholders (including the device manufacturer and hospitals) believe that the CY 2016 payment rate for the procedure involving the Argus® II System is insufficient to cover the hospital cost of performing the procedure, which includes the cost of the retinal prosthesis, which has a retail price of approximately $145,000.

For the CY 2017 update, analysis of the CY 2015 OPPS claims data used for the CY 2017 proposed rule showed 5 single claims (out of 7 total claims) for CPT code 0100T, with a geometric mean

cost of approximately $141,900 based on claims submitted between January 1, 2015, through December 31, 2015, and processed through December 31, 2015. In the proposed rule, we noted that the final payment rate in the CY 2017 OPPS/ASC final rule with comment period would be based on claims submitted between January 1, 2015, and December 31, 2015, and processed through June 30, 2016.

Based on the CY 2015 OPPS claims data available for the proposed rule and our understanding of the Argus® II procedure, we proposed to reassign CPT code 0100T from APC 1599 to APC 1906 with a proposed payment rate of approximately $150,000 for CY 2017. We stated that we believe that APC 1906 is the most appropriate APC assignment for the Argus® II procedure. We noted that this payment rate includes the cost of both the surgical procedure (CPT code 0100T) and the retinal prosthesis device (HCPCS code C1841).

Comment: Several commenters supported CMS' proposal to reassign CPT code 0100T from APC 1599 to APC 1906, which had a proposed CY 2017 payment rate of $150,000, and stated that the proposed payment better aligns with the cost of providing the service. However, one commenter stated that, while this change may benefit some hospitals, it does not help hospitals with a low wage-index value because the cost of the technology itself is not affected by the hospital's wages relative to other hospitals. The commenter further stated that the use of such new technologies as the Argus® II procedure underpays hospitals in less costly wage areas and, therefore, limit its use. Consequently, the commenter suggested that CMS consider the effect of setting new technology payments for hospitals assigned to less costly wage areas.

Response: We appreciate the commenters' support. Based on the updated CY 2015 hospital outpatient claims data used for this final rule with comment period, which is based on claims submitted between January 1, 2015, and December 31, 2015, and processed through June 30, 2016, we believe that APC 1906 remains the most appropriate APC assignment for CPT code 0100T. The latest claims data showed 9 single claims (out of 13 total claims) for CPT code 0100T, with a geometric mean cost of approximately $142,003. We believe that the payment for APC 1906 appropriately captures the cost of providing the service associated with the Argus® II procedure.

With respect to the issue of hospitals with a low wage index, we appreciate the commenter's interest in refining the methodology for new technology APCs under the OPPS. Because we did not propose a change to hospitals with a low wage index values, we will take this comment into consideration in future rulemaking.

After consideration of the public comments we received, we are finalizing our proposal, without modification, to reassign CPT code 0100T from APC 1599 (New Technology—Level 48 ($90,001–$100,000)) to APC 1906 (New Technology—Level 51 ($140,001–$160,000)), which has a final payment rate of $150,000.50 for CY 2017. We note this payment includes both the surgical procedure (CPT code 0100T) and the use of the Argus® II device (HCPCS code C1841).

D. OPPS APC-Specific Policies

1. Cardiovascular Procedures/Services

a. Cardiac Event Recorder (APC 5071)

We proposed to assign procedures described by CPT code 33284 (Removal of an implantable, patient-activated cardiac event recorder) to APC 5071 (Level 1 Excision/Biopsy/Incision and Drainage) for CY 2017. Based on the CY 2015 claims data used for the proposed rule, the geometric mean cost of procedures described by CPT code 33284 was approximately $733 (2,650 single claims), and the geometric mean cost of APC 5071 was approximately $555. In addition, CPT code 33284 is assigned to status indicator ''Q2,'' which indicates that the service is conditionally packaged under the OPPS. Therefore, when this procedure is performed in conjunction with a revision or replacement procedure, the payment for the procedure described by CPT code 33284 is packaged under the OPPS.

Comment: One commenter requested that CMS assign procedures described by CPT code 33284 to a higher paying APC. In particular, the commenter requested that procedures described by CPT code 33284 be assigned to APC 5211 (Level 1 Electrophysiologic Procedures) instead of APC 5071. The commenter believed that the procedure described by CPT code 33284 is more similar clinically and in terms of resource use to the services assigned to APC 5211 than to those assigned to APC 5071.

Response: We disagree with the commenter. We believe that the procedures described by CPT code 33284 are appropriately assigned to APC 5071. Based on updated claims data used for the final rule, the geometric mean cost of CPT code 33284 (approximately $715) is more comparable to the geometric mean cost of APC 5071 (approximately $554) than to the geometric mean cost of APC 5072 (approximately $1,271). Therefore, we do not believe that it would be appropriate to assign procedures described by CPT code 33284 to a higher level within the Excision/Biopsy/Incision and Drainage APC series. In addition, the procedures described by CPT code 33284 are not electrophysiology services and, therefore, do not appropriately correlate with the services assigned to APC 5211. Therefore, we are finalizing our CY 2017 proposal to assign the procedures described by CPT code 33284 to APC 5071.

b. Cardiac Telemetry (APC 5733)

As listed in Addendum B of the CY 2017 OPPS/ASC proposed rule, we proposed to reassign CPT code 93229 (External mobile cardiovascular telemetry with electrocardiographic recording, concurrent computerized real time data analysis and greater than 24 hours of accessible ecg data storage (retrievable with query) with ecg triggered and patient selected events transmitted to a remote attended surveillance center for up to 30 days; technical support for connection and patient instructions for use, attended surveillance, analysis and transmission of daily and emergent data reports as prescribed by a physician or other qualified health care professional) from APC 5722 (Level 2 Diagnostic Tests and Related Services) to APC 5734 (Level 4 Minor Procedures), with a proposed payment rate of $95.66.

Comment: One commenter disagreed with the proposed reassignment of CPT code 93229 to APC 5734, and stated that the proposed payment rate represents a 60-percent decrease from the CY 2016 payment rate of $220.35. The commenter indicated that the proposed underpayment of $95.66 does not reflect the significant costs involved in providing the service. The commenter added that the wearable device used by the beneficiary costs over $21,000. The commenter explained that because of the significant resource costs associated with performing the service described by CPT code 93229, most hospital outpatient facilities that provide this service contract the work to a remote cardiac monitoring service company because HOPDs do not have the devices, technology, or infrastructure in place to provide the service in-house. In addition, the commenter believed that hospitals are still confused about how to code for remote cardiac diagnostic tests, and indicated that the proposed payment rate of $95.66 for CPT code 93229 is the result of hospitals

miscoding the service on claims. The commenter believed that the coding education provided in the April 2015 edition of the Coding Clinic for HCPCS will assist hospitals in coding appropriately for the service. However, until the coding education effort effectuates changes in coding practices, the commenter believed that the true cost of furnishing the service described by CPT code 93229 is more comparable to the OPPS payment rate of approximately $795 made in CY 2012, and recommended that CMS reassign this service to APC 5724 (Level 4 Diagnostic Tests and Related Services), with a proposed payment rate of $870.62. Alternatively, if CMS is unable to reassign the service to APC 5724, the commenter suggested that CMS continue the CY 2016 APC assignment for CPT code 93229 to APC 5722, with a payment rate of $220.35. The commenter further stated that when the service described by CPT code 93229 is provided under the MPFS, the payment rate for performing this service is $732.68. The commenter believed that continuing to assign CPT code 93229 to APC 5722 for CY 2017 will provide payment stability for this service while coding education efforts continue.

Response: Based on our analysis of the CY 2015 claims data used for the proposed rule, we proposed to reassign CPT code 93229 to APC 5734. Specifically, our analysis showed a geometric mean cost of approximately $77 based on 1,847 single claims (out of 3,747 total claims). Based on its clinical and resource homogeneity to the other services, we proposed to reassign the service described by CPT code 93229 to APC 5734, whose geometric mean cost was approximately $100. We did not propose to continue to assign CPT code 93229 to APC 5722 because the geometric mean cost for this APC was approximately $242, which would result in a significant overpayment for the service. However, based on our review of the updated CY 2015 claims data used for this final rule with comment period, we found the geometric mean cost for CPT code 93229 to be lower than the proposed rule geometric mean cost. We note that the proposed rule claims data were based on claims submitted from January 1, 2015, through December 31, 2015, and processed through December 31, 2015, while the final rule with comment period claims data are based on claims submitted from January 1, 2015, through December 31, 2015, and processed through June 30, 2016. Based on our analysis of the final rule with comment period claims data, we found a geometric mean cost of approximately $71 for the service described by CPT code 93229 based on 2,323 single claims (out of 4,495 total claims). The geometric mean cost for the service described by CPT code 93229 is more similar to that of APC 5733 (Level 3 Minor Procedures), which has a geometric mean cost of approximately $56, than to the geometric mean cost of approximately $103 for APC 5734. Consequently, we believe that CPT code 93229 should be reassigned to APC 5733, rather than APC 5734.

Also, as we have stated repeatedly, beyond our standard OPPS trimming methodology that we apply to those claims that have passed various types of claims processing edits, it is not our general policy to judge the accuracy of hospital coding and charging for purposes of ratesetting. (We refer readers to the CY 2011 OPPS/ASC final rule with comment period (75 FR 71838) for further discussion.) Hospitals are responsible for accurately coding the performance of procedures and services and the items furnished to beneficiaries.

In summary, after evaluating the public comment we received and our subsequent analysis of the updated claims data for this final rule with comment period, we are modifying our proposal and reassigning the service described by CPT code 93229 to APC 5733 for CY 2017. The final payment rate for this code can be found in Addendum B to this final rule with comment period (which is available via the Internet on the CMS Web site).

2. Eye-Related Services

Comment: A few commenters requested that CMS assign new CPT code 0465T (Suprachoroidal injection of a pharmacologic agent (does not include supply of medication)) to APC 5694 (Level 4 Drug Administration) instead of APC 5693 (Level 3 Drug Administration) because the commenters believed that the service is clinically similar and similar from a resource-use perspective to CPT code 67028 (Intravitreal injection of a pharmacologic agent (separate procedure), which is assigned to APC 5694.

Response: We agree with the commenters. We are modifying our proposal and assigning CPT code 0465T to APC 5694 for CY 2017. Because CPT code 0465T is new, we do not have claims data upon which to base an initial APC assignment. However, we believe that the clinical and resource similarities of the procedure described by CPT code 0465T, when compared to the procedure described by CPT code 67028, support assigning CPT code 0465T to APC 5694 at this time. When cost and claims data become available for CPT code 0465T, we will reevaluate the APC assignment.

Comment: One commenter requested that CMS pay separately for the new CPT codes 0444T (Initial placement of a drug-eluting ocular insert under one or more eyelids, including fitting, training, and insertion, unilateral or bilateral) and 0445T (Subsequent placement of a drug-eluting ocular insert under one or more eyelids, including re-training, and removal of existing insert, unilateral or bilateral) instead of unconditionally packaging the payment for these services, as proposed.

Response: We disagree with the commenters. The procedure to place one of these inserts under an eyelid (as described by these procedure codes) is a very minor service (not unlike delivering eye drops) that requires little time or effort from a nurse or technician. Any associated additional cost associated with performing these procedures are appropriately packaged with another service.

3. Gastrointestinal Procedures and Services

a. Esophageal Sphincter Augmentation (APC 5362)

For CY 2017, we proposed to assign the procedures described by new CPT code 43284 (Laparoscopy, surgical, esophageal sphincter augmentation procedure, placement of sphincter augmentation device, including cruroplasty when performed) to APC 5362 (Level 2 Laparoscopy and Related Services), with a geometric mean cost of approximately $7,183. CPT code 43284 replaces CPT code 0392T, which replaced HCPCS code C9737. HCPCS code C9737 was in effect for the first half of CY 2015, and CPT code 0392T became effective beginning in the second half of CY 2015 and will be deleted at the end of CY 2016. Based on the claims data used for the proposed rule, the geometric mean cost for the procedure described by HCPCS code C9737 was approximately $10,260 (45 single claims) and the geometric mean cost for the procedure described by CPT code 0392T was approximately $8,453 (19 single claims).

Comment: One commenter disagreed with the proposed APC assignment for procedures described by CPT code 43284 to APC 5362. The commenter stated that the proposed payment rate for APC 5362 does not accurately reflect the anticipated cost of providing the services described by CPT code 43284. The commenter suggested that CMS create a new Level 3 APC within the laparoscopy and related services APC

series that would contain the 20 most costly procedures that are currently assigned to APC 5362. According to the commenter, the creation of this new Level 3 Laparoscopy APC would be more representative of the resource costs for services described by CPT code 43284.

Response: Based on updated claims data for the final rule, we compared the geometric mean cost for procedures described by CPT code 0392T (the predecessor code for CPT code 43284) to the geometric mean cost of APC 5362. The geometric mean cost for procedures described by CPT code 0392T is $8,715 based on 24 single claims, which is $1,551 greater than the geometric mean cost for APC 5362 of $7,164. Furthermore, since CPT code 0392T replaced HCPCS code C9737, the cost of this service has decreased from $10,388 for HCPCS code C9737 to $8,715 for CPT code 0392T. The commenter identified 9,276 single claims using data published with the proposed rule that could be used to create a new Level 3 Laparoscopy and Related Services APC. However, this subgroup of procedures from APC 5362 only contains two significant procedures, and 23 percent of the 40,035 single claims from APC 5362. The services for the suggested Level 3 Laparoscopy and Related Services APC have both sufficient clinical and resource homogeneity to the other procedures assigned to APC 5362. Therefore, we do not believe that there is a need to create another APC for these services.

After consideration of the public comment we received, we are finalizing our proposal, without modification, to assign procedures described by CPT code 43284 to APC 5362, effective January 1, 2017. The final payment rate for CPT code 43284 can be found in Addendum B to this final rule with comment period, which is available via the Internet on the CMS Web site.

b. Esophagogastroduodenoscopy: Transmural Drainage of Pseudocyst (APC 5303)

For CY 2017, we proposed to assign CPT code 43240 (Esophagogastroduodenoscopy, flexible, transoral; with transmural drainage of pseudocyst (includes placement of transmural drainage catheter(s)/stent(s), when performed, and endoscopic ultrasound, when performed)) to APC 5303 (Level 3 Upper GI Procedures), for which we proposed a CY 2017 geometric mean cost of approximately $2,598.

Comment: Commenters disagreed with CMS' proposal to assign CPT code 43240 to APC 5303. The commenters believed that CPT code 43240 would be more appropriately assigned to APC 5331 (Complex GI Procedures), for which we proposed a CY 2017 geometric mean cost of approximately, based upon the procedure's clinical similarity to other endoscopy procedures involving stent placement currently assigned to APC 5331. Additionally, commenters stated that the proposed CY 2017 geometric mean cost of $2,578 may underrepresent the true costs of the procedure because of underreporting of the C-code for stents.

Response: We disagree with the commenters' assertion that CPT code 43240 would be more appropriately assigned to APC 5331. While we acknowledge that a number of endoscopy procedures involving stent placement are currently assigned to APC 5331, we continue to believe that based on our claims data available for CY 2017 ratesetting, the proposed assignment of CPT code 43240 to APC 5303 is appropriate.

After consideration of the public comments we received, we are finalizing our proposal, without modification, to assign CPT code 43240 to APC 5303, which has a final CY 2017 APC geometric mean cost of approximately $2,581. The final payment rate for this code can be found in Addendum B to this final rule with comment period (which is available via the Internet on the CMS Web site).

Comment: One commenter requested that we create a new APC and assign the following four codes to this new APC: (1) HCPCS code G0105 (Colorectal cancer screening; colonoscopy on individual at high risk); (2) HCPCS code G0121 (Colorectal cancer screening; colonoscopy on individual not meeting criteria for high risk); (3) CPT code 44388 (Colonoscopy through stoma; diagnostic, including collection of specimen(s) by brushing or washing, when performed (separate procedure)); and (4) CPT code 45378 (Colonoscopy, flexible; diagnostic, including collection of specimen(s) by brushing or washing, when performed (separate procedure)). The commenters emphasized the clinical importance of colonoscopy in the detection and treatment of colon cancer as a motivation for the creation of this new APC.

Response: We recognize the importance of colonoscopies to Medicare beneficiaries and believe that the OPPS and ASC payment policies for colonoscopies allow full access to these services. As a part of our multi-year review, which includes restructuring and reorganization and consolidation of the OPPS APCs, we have been creating larger APCs based on simpler and more intuitive clinical groupings. We believe that APC 5311 (Level 1 Lower GI Procedures) is an appropriate APC assignment for these four codes from a clinical and resource perspective. We also fail to recognize any particular advantage of creating the suggested new APC that would contain only four codes. The geometric mean cost of CPT code 45378 drives the payment rate for APC 5311 because it represents 81 percent of the single claims in this APC. As we discuss later in the section on the imaging APCs, we are reassigning HCPCS codes G0105 and G0121 to APC 5311. We believe that all four of these codes are clinically similar (all are similar colonoscopy services) and are similar in terms of resource costs based on their geometric mean costs. We are finalizing the proposal to assign HCPCS codes G0105 and G0121, and CPT codes 44388 and 45378 to APC 5311 for CY 2017.

Comment: One commenter believed that some of the tube and catheter placement procedure codes (for example, CPT code 32561 (Installation(s), via chest tube/catheter agent for fibrinolysis (*e.g.,* fibrinolytic agent for break up of multiloculated effusion); initial day) that were assigned to APC 5301 (Level 1 Upper GI Procedures) in the proposed rule are not clinically similar to the endoscopy procedures that have traditionally been grouped together in APC 5301 (or its predecessor APC). The commenter requested that CMS reassign the catheter and tube placement procedure codes to other APCs that would be more clinically suitable.

Response: Upon further review of the procedure codes assigned to APC 5301, we agree with the commenter. Table 11 below shows the final APC reassignments for the tube and catheter placement and removal procedure codes that were assigned to APC 5301 in the proposed rule.

TABLE 11—TUBE AND CATHETER CODES REASSIGNED FROM APC 5301

CPT code	Descriptor	Final CY 2017 APC	Final CY 2017 SI
32552	Removal of indwelling tunneled pleural catheter with cuff	5181	Q2
32554	Thoracentesis, needle or catheter, aspiration of the pleural space; without imaging guidance	5181	T
32555	Thoracentesis, needle or catheter, aspiration of the pleural space; with imaging guidance	5181	T
32560	Instillation, via chest tube/catheter, agent for pleurodesis (*e.g.,* talc for recurrent or persistent pneumothorax).	5181	T
32561	Installation(s), via chest tube/catheter agent for fibrinolysis (*e.g.,* fibrinolytic agent for break up of multiloculated effusion); initial day.	5181	T
32562	(Installation(s), via chest tube/catheter agent for fibrinolysis (*e.g.,* fibrinolytic agent for break up of multiloculated effusion); subsequent day.	5181	T
32960	Pneumothorax, therapeutic, intrapleural injection of air	5181	T
36575	Repair of tunneled or non-tunneled central venous access catheter, without subcutaneous port or pump, central or peripheral insertion site.	5181	T
36589	Removal of tunneled central venous catheter, without subcutaneous port or pump	5181	Q2
61070	Puncture of shunt tubing or reservoir for aspiration or injection procedure	5442	T

We are reassigning all of the procedure codes listed in the above table to APC 5181 (Level 1 Vascular Procedures), except for CPT code 61070 which we are reassigning to APC 5442. We believe that APC 5181 is the most appropriate APC assignment because it currently contains various catheter insertion and removal codes and similar procedures that use catheters. We do not believe that the nine procedures codes that we are reassigning to APC 5181 are sufficiently unique that a new APC specifically for assignment of these nine codes is warranted. We also understand that these codes are at the low end of the cost range for the procedures assigned to APC 5181, but APC 5181 is the lowest cost APC in this series. We also understand that the lung procedures that we are proposing to reassign to APC 5181 are not vascular procedures, but we believe that they are generally sufficiently similar to vascular catheter insertion procedures such that assignment to APC 5181 is clinically appropriate, and that a dedicated lung procedures APC is not necessary. However, to acknowledge that these APCs includes services that are not strictly ''vascular,'' we are renaming the Vascular Procedures APCs (5181 through 5183) Levels 1 through 3 to ''Vascular Procedures & Related Services.''

4. Musculoskeletal Procedures/Services

Consistent with CMS' statutory requirement under section 1833(t)(9)(A) of the Act to review and revise APC assignments annually and to construct the most appropriate APC groupings, as well as, to the extent desirable, correct any 2 times rule violations, we evaluated the resource costs and clinical coherence of the procedures associated with the Closed Treatment Fracture and Related Services (APCs 5111, 5112, and 5113) and Musculoskeletal Procedures APCs (APCs 5121, 5122, 5123, 5124, and 5125). For the CY 2017 OPPS update, we reviewed the procedures assigned to the Closed Treatment Fracture and Musculoskeletal Procedures APCs, and consolidated the two APC groups into the Musculoskeletal APC group, with six Levels, to improve the homogeneity of the procedures within these two APC groups. Based on our analysis of the CY 2015 hospital outpatient claims data used for the proposed rule, we proposed some modifications to these groups as reflected in Addendum B to the CY 2017 OPPS/ASC proposed rule. Specifically, we proposed to reassign certain procedures from one level within an APC to another; either from a lower-level paying APC to a higher-level paying APC, or from a higher-level paying APC to a lower-level paying APC, depending on the geometric mean cost for each procedure code. In addition, we proposed to revise the APC group title from ''Closed Treatment Fracture and Related Services'' to ''Musculoskeletal Procedures,'' and also proposed to establish a new level within the APC, specifically, Level 6, for the assignment of musculoskeletal procedures. We believe that the proposed restructuring and consolidation of the musculoskeletal APCs more appropriately group the musculoskeletal services according to their current resource costs, as well as their clinical characteristics.

Comment: Some commenters supported the reorganization and the increase in the number of musculoskeletal APC levels from five to six. One commenter expressed approval for the number of procedures assigned to Level 6 within the APC and stated that the methodology for assigning procedures to this level is logical, consistent with other APCs, and leads to more appropriate hospital payments. One commenter also stated that the change will help correct the problem associated with those musculoskeletal procedures that had previously shifted to the more costly inpatient setting because of inadequate payments under the hospital OPPS. Consequently, these commenters requested that CMS finalize the proposal.

Response: We appreciate the commenters' support.

Comment: One commenter requested that CMS reevaluate the procedure codes assigned to Level 4 within the Musculoskeletal Procedures APC to ensure that these services are paid appropriately. The commenter expressed concern with the range of costs for the procedures assigned to Level 4 and 5, and stated that the current proposal underpays for some of the procedures assigned to Level 4. To correct the variation of costs between Level 4 and 5, the commenter suggested reassigning some of the procedures from Level 4 to Level 5, or alternatively, establishing a new, intermediate level APC whose geometric mean cost is between Level 4 and 5.

Response: We appreciate the commenter's suggestion. However, we believe that the proposed structure of the musculoskeletal APCs with six levels, compared to last year's five levels, improves the homogeneity of the procedures within the musculoskeletal APC group. As we do annually, we will again review and evaluate the APC assignments for all items, procedures, and services paid under the hospital OPPS for the CY 2018 rulemaking.

We also received several public comments concerning the proposed reassignment of certain procedures assigned to the Musculoskeletal Procedures APCs. A summary of the

public comments and our responses follow.

a. Auditory Osseointegrated Implants/ Bone-Anchored Hearing Systems (APCs 5114, 5115, and 5116)

In Addendum B of the CY 2017 OPPS/ASC proposed rule, we proposed to reassign four auditory osseointegrated implant procedures. Specifically, as listed in Table 12 below, we proposed to reassign CPT code 69714 from APC 5125 (Level 5—Musculoskeletal Procedures) to APC 5115 (Level 5—Musculoskeletal Procedures), CPT code 69715 from APC 5125 to APC 5116 (Level 6—Musculoskeletal Procedures), CPT code 69717 from APC 5123 (Level 3—Musculoskeletal Procedures) to APC 5114 (Level 4—Musculoskeletal Procedures), and CPT code 69718 from APC 5124 (Level 4—Musculoskeletal Procedures) to APC 5115.

TABLE 12—PROPOSED CY 2017 STATUS INDICATOR (SI), APC ASSIGNMENTS, AND PAYMENT RATES FOR THE AUDITORY OSSEOINTEGRATED PROCEDURES

CPT code	Long descriptors	CY 2016 OPPS SI	CY 2016 OPPS APC	CY 2016 OPPS payment rate	Proposed CY 2017 OPPS SI	Proposed CY 2017 OPPS APC	Proposed CY 2017 OPPS payment rate
69714	Implantation, osseointegrated implant, temporal bone, with percutaneous attachment to external speech processor/cochlear stimulator; without mastoidectomy.	J1	5125	$10,537.90	J1	5115	$9,491.00
69715	Implantation, osseointegrated implant, temporal bone, with percutaneous attachment to external speech processor/cochlear stimulator; with mastoidectomy.	J1	5125	10,537.90	J1	5116	14,444.00
69717	Replacement (including removal of existing device), osseointegrated implant, temporal bone, with percutaneous attachment to external speech processor/cochlear stimulator; without mastoidectomy.	J1	5123	4,969.26	J1	5114	5,199.03
69718	Replacement (including removal of existing device), osseointegrated implant, temporal bone, with percutaneous attachment to external speech processor/cochlear stimulator; with mastoidectomy.	J1	5124	7,064.07	J1	5115	9,491.00

Comment: One commenter expressed appreciation for the proposed payment increase for CPT codes 69715, 69717, and 69718. However, several commenters opposed the proposed payment decrease for CPT code 69714. The commenters who disagreed with the APC reassignment indicated that the data used by CMS are flawed and do not accurately capture the cost of performing an osseointegrated implant surgery. Some commenters stated that the proposed payment rate for CPT code 69714 would be inadequate to cover the cost of the procedure. These commenters noted that the list price for a Cochlear™ Baha® Implant System ranges from $6,887 to $8,435. Consequently, several commenters requested that CMS not finalize the proposed payment reduction for CPT code 69714 pending the collection of accurate claims data.

Response: As stated above, section 1833(t)(9)(A) of the Act requires the Secretary to review certain components of the OPPS, not less often than annually, and to revise the groups, relative payment weights, and other adjustments that take into account changes in medical practices, changes in technologies, and the addition of new services, new cost data, and other relevant information and factors. As such, we review on an annual basis all APC assignments for both general appropriateness and for violations of the 2 times rule, and when necessary, reassign CPT codes to more appropriate APCs. Although there was no violation of the 2 times rule within the Closed Treatment Fracture and Related Services and Musculoskeletal Procedures APCs, based on our review of the updated CY 2015 claims data used for this CY 2017 OPPS/ASC final rule with comment period, we believe that revising the Musculoskeletal Procedure APC structure is necessary to maintain the clinical homogeneity and resource characteristics of the procedures within this APC group.

In addition, review of the latest hospital outpatient claims data used for this final rule with comment period shows the geometric mean cost for CPT code 69714 is approximately $9,407 based on 703 single claims (out of 713 total claims), which is relatively similar to and slightly less than the final rule geometric mean cost of $9,828 for APC 5115. Therefore, we continue to believe that the procedure described by CPT code 69714 is appropriately placed in APC 5115 based on resource and clinical homogeneity to other procedures currently assigned to APC 5115.

Further, as we do every year, we evaluate our claims data to determine the appropriateness of the APC assignments for all payable services and items under the hospital OPPS. For the CY 2017 OPPS update, based on our review, we proposed to revise the APC assignments for four auditory osseointegrated implant procedures, specifically, CPT codes 69714, 69715, 69717, and 69718. As a result of our APC review for the CY 2017 OPPS update, we note that, based on our review of the final rule with comment period claims data, three of the four procedures, specifically, CPT codes 69715, 69717, and 69718, will receive an increase in payment for CY 2017 under the hospital OPPS.

Comment: Some commenters believed that the proposed payment reduction for CPT code 69714 would restrict Medicare beneficiary access to the procedure.

Response: We disagree with the commenters. We do not believe that the revised payment for CPT code 69714 will affect beneficiaries' access to reasonable and appropriate care. Moreover, we believe that providers will continue to perform this procedure when medically necessary.

After consideration of the public comments we received, we are finalizing our CY 2017 proposal, without modification, to reassign CPT codes 69714, 69715, 69717 and 69718 to APCs 5115, 5116, 5114, and 5115, respectively. Table 13 below lists the final status indicator and APC assignments, and payment rates for the four auditory osseointegrated procedures.

TABLE 13—FINAL CY 2017 STATUS INDICATOR (SI), APC ASSIGNMENTS, AND PAYMENT RATES FOR THE AUDITORY OSSEOINTEGRATED PROCEDURES

CPT code	Long descriptors	CY 2016 OPPS SI	CY 2016 OPPS APC	CY 2016 OPPS payment rate	Final CY 2017 OPPS SI	Final CY 2017 OPPS APC	Final CY 2017 OPPS payment rate
69714	Implantation, osseointegrated implant, temporal bone, with percutaneous attachment to external speech processor/cochlear stimulator; without mastoidectomy.	J1	5125	$10,537.90	J1	5115	$9,557.20
69715	Implantation, osseointegrated implant, temporal bone, with percutaneous attachment to external speech processor/cochlear stimulator; with mastoidectomy.	J1	5125	10,537.90	J1	5116	14,697.92
69717	Replacement (including removal of existing device), osseointegrated implant, temporal bone, with percutaneous attachment to external speech processor/cochlear stimulator; without mastoidectomy.	J1	5123	4,969.26	J1	5114	5,219.36
69718	Replacement (including removal of existing device), osseointegrated implant, temporal bone, with percutaneous attachment to external speech processor/cochlear stimulator; with mastoidectomy.	J1	5124	7,064.07	J1	5115	9,557.20

b. Bunion Correction/Foot Fusion (APC 5114)

In Addendum B of the CY 2017 OPPS/ASC proposed rule, we proposed to reassign CPT codes 28297 (Correction, hallux valgus (bunion), with or without sesamoidectoy; lapidus-type) and 28740 (Arthrodesis, midtarsal or tarsometatarsal, single joint) to APC 5114 (Level 4—Musculoskeletal Procedures) with status indicator ''J1.'' Both CPT codes 28297 and 28740 have a CY 2016 payment rate of approximately $7,064 and a proposed CY 2017 payment rate of approximately $5,199.

Comment: One commenter expressed concern with the reassignment of CPT codes 28297 and 28740 to C–APC 5114, and stated that the proposed payment would result in a significantly lower payment rate for these services. The commenter indicated that its invoices document the total equipment cost at approximately $7,490, which is more than the proposed payment rate for C–APC 5114. The commenter also believed that CPT codes 28297 and 28740 are inappropriately assigned to C–APC 5114 because this APC does not reflect the resource or clinical complexity of these procedures. In addition, the commenter stated that the Musculoskeletal APCs are not granular enough to account for the costs associated with the broad range of orthopedic procedures performed in the hospital outpatient setting. Finally, this same commenter recommended that CMS establish an additional APC level that is not designated as a comprehensive APC for musculoskeletal procedures whose costs are in the range of $7,000 to $7,999. The commenter requested that CMS reassign CPT codes 28297 and 28740 to this new APC level, with a payment rate of approximately $7,500. If CMS is unable to establish an additional APC, the commenter recommended that CMS retain the CY 2016 Musculoskeletal APC structure and payment levels. However, if CMS finalizes the proposal, the commenter requested that CMS ensure that all hospital costs for CPT codes 28297 and 28740 are captured appropriately and that the payment rate for C–APC 5114 is adjusted to reflect the cost of providing these services.

Response: We do not believe that it is necessary to create an additional APC level for these musculoskeletal procedures. We believe that CPT codes 28297 and 28740 are clinically similar to the other procedures assigned to C–APC 5114 with similar resource costs. As the commenter observed, the musculoskeletal APCs include various orthopedic procedures representing a range of costs from $3,774 (CPT code 27385) to $7,283 (CPT code 28740). The payment for procedures assigned to C–APC 5114 is based on the weighted average geometric mean cost for all of the procedures assigned to C–APC 5114. As with most other APCs, because the payment is based on an average of the costs of all of the procedures assigned to the APC, the payment rate can be either above or below the cost of a specific procedure. We believe that the assignment of CPT codes 28297 and 28740 to C–APC 5114 satisfies both the requirement for clinical similarity and resource similarity. There are several other similar foot surgical procedures assigned to C–APC 5114. Further, our claims data do not reveal any 2 times

rule violations in C–APC 5114. We also note that certain complex multi-procedure cases, including cases involving the procedures described by both CPT code 28297 and 28740, receive a complexity adjustment and reassignment to C–APC 5115, which results in a significantly higher payment for these more costly cases. For CY 2017, the payment rate for C–APC 5115 is approximately $9,557. We remind hospitals that, as we do every year, we will again review the APC assignments for all services under the hospital OPPS for the CY 2018 rulemaking.

After consideration of the public comments received, we are finalizing our CY 2017 proposal, without modification, to reassign CPT codes 28297 and 28740 to C–APC 5114. Table 14 below lists the final CY 2017 OPPS status indicator and APC assignments, and payment rates for CPT codes 28297 and 28740. We refer readers to Addendum B of this final rule with comment period for the payment rates for all codes reportable under the OPPS. Addendum B is available via the Internet on the CMS Web site. In addition, the list of codes that qualify for complexity adjustments can be found in Addendum J to this final rule with comment period (which is available via the Internet on the CMS Web site). Addendum J to this final rule with comment period also contains the summary cost statistics for each of the code combinations that describe a complex code combination that qualify for a complexity adjustment and are reassigned to the next higher cost C–APC within the clinical family.

TABLE 14—FINAL CY 2017 STATUS INDICATOR (SI), APC ASSIGNMENTS, AND PAYMENT RATES FOR CPT CODES 28297 AND 28740

CPT code	Long descriptors	CY 2016 OPPS SI	CY 2016 OPPS APC	CY 2016 OPPS payment rate	Final CY 2017 OPPS SI	Final CY 2017 OPPS APC	Final CY 2017 OPPS payment rate
28297	Correction, hallux valgus (bunion), with or without sesamoidectomy; lapidus-type procedure.	J1	5124	$7,064.07	J1	5114	$5,219.36
28740	Arthrodesis, midtarsal or tarsometatarsal, single joint.	J1	5124	7,064.07	J1	5114	5,219.36

c. Intervertebral Biomechanical Devices

For CY 2017, the AMA CPT Editorial Panel deleted CPT code 22851 and replaced it with three new codes, effective January 1, 2017. Table 15 below lists the long descriptor for the procedure described by CPT code 22851, as well as the replacement codes, specifically, CPT codes 22853, 22854, and 22859. We note that the deleted and replacement codes were listed in Addendum B and Addendum O to the CY 2017 OPPS/ASC proposed rule. Addendum B listed the proposed status indicator assignments for the replacement codes, which are assigned to comment indicator ''NP'' (New code for the next calendar year or existing code with substantial revision to its code descriptor in the next calendar year as compared to current calendar year, proposed APC assignment; comments will be accepted on the proposed APC assignment for the new code.), while Addendum O listed the placeholder/proposed CY 2017 CPT codes and their long descriptors.

TABLE 15—CY 2017 STATUS INDICATOR (SI) ASSIGNMENTS FOR THE APPLICATION/INSERTION OF THE INTERVERTEBRAL BIOMECHANICAL DEVICES

Proposed CY 2017 CPT code	Final CY 2017 CPT code	Long descriptors	Proposed CY 2017 OPPS SI	Final CY 2017 OPPS SI
22851	22851	Application of intervertebral biomechanical device(s) (*e.g.,* synthetic cage(s), methylmethacrylate) to vertebral defect or interspace (List separately in addition to code for primary procedure).	D	D
22X81	22853	Insertion of interbody biomechanical device(s) (*e.g.,* synthetic cage, mesh) with integral anterior instrumentation for device anchoring (*e.g.,* screws, flanges), when performed, to intervertebral disc space in conjunction with interbody arthrodesis, each interspace (List separately in addition to code for primary procedure).	N	N
22X82	22854	Insertion of intervertebral biomechanical device(s) (*e.g.,* synthetic cage, mesh) with integral anterior instrumentation for device anchoring (*e.g.,* screws, flanges), when performed, to vertebral corpectomy(ies) (vertebral body resection, partial or complete) defect, in conjunction with interbody arthrodesis, each contiguous defect (List separately in addition to code for primary procedure).	N	N
22X83	22859	Insertion of intervertebral biomechanical device(s) (*e.g.,* synthetic cage, mesh, methylmethacrylate) to intervertebral disc space or vertebral body defect without interbody arthrodesis, each contiguous defect (List separately in addition to code for primary procedure).	N	N

Comment: One commenter suggested that CMS pay separately for the replacement CPT codes 22X81, 22X82, and 22X83 and assign the new codes to New Technology APCs to enable CMS to collect cost information and determine

whether to pay separately or package the procedures in the future. The commenter explained that the cost of providing the procedures associated with these new spine instrumentation codes are costly and include high-cost implants. The commenter also believed that, while CMS has a policy for packaging payment for procedures described by add-on codes under the hospital OPPS, it is not required to do so because its regulation refers only to packaging of certain services described by add-on codes.

Response: We do not agree with the commenter that the spine instrumentation procedures described by proposed CPT codes 22X81, 22X82, and 22X83 (replacement CPT codes 22853, 22854, and 22859) are new technology procedures that warrant an assignment to a new technology APC. These procedures have been performed for some time now in the hospital outpatient setting, and as evidenced by the predecessor code, CPT code 22851 which was established in 1996, these procedures are not new. In addition, we do not agree with the commenter that we should pay separately for replacement CPT codes 22853, 22854, and 22859 because these codes describe add-on services. Since January 1, 2014, payment for procedures described by add-on codes have been packaged under the hospital OPPS. Because the predecessor CPT code 22851 was assigned to a packaged status indicator under the hospital OPPS, we are assigning CPT codes 22853, 22854, and 22859 to status indicator ''N'' to indicate that payment for these services are packaged under the hospital OPPS for CY 2017.

After consideration of the public comment we received, we are finalizing our proposal, without modification, to assign CPT codes 22853, 22854, and 22859 to status indicator ''N'' for CY 2017.

d. Percutaneous Vertebral Augmentation/Kyphoplasty (APC 5114)

In Addendum B of the CY 2017 OPPS/ASC proposed rule, we proposed to reassign CPT codes 22513 (Percutaneous vertebral augmentation, including cavity creation (fracture reduction and bone biopsy included when performed) using mechanical device (*e.g.,* kyphoplasty), 1 vertebral body, unilateral or bilateral cannulation, inclusive of all imaging guidance; thoracic) and 22514 (Percutaneous vertebral augmentation, including cavity creation (fracture reduction and bone biopsy included when performed) using mechanical device (*e.g.,* kyphoplasty), 1 vertebral body, unilateral or bilateral cannulation, inclusive of all imaging guidance; lumbar) from APC 5124 (Level 4 Musculoskeletal Procedures) to APC 5114 (Level 4 Musculoskeletal Procedures). Both CPT codes have a CY 2016 payment rate of approximately $7,064 and a proposed CY 2017 payment rate of approximately $5,199. Because CPT code 22515 (Percutaneous vertebral augmentation, including cavity creation (fracture reduction and bone biopsy included when performed) using mechanical device (*e.g.,* kyphoplasty), 1 vertebral body, unilateral or bilateral cannulation, inclusive of all imaging guidance; each additional thoracic or lumbar vertebral body (list separately in addition to code for primary procedure) is an add-on code, we proposed to continue its packaged status.

Based on the CY 2015 hospital outpatient claims data available for the proposed rule, our analysis revealed a geometric mean cost of approximately $5,434 for APC 5114, while the geometric mean cost for CPT codes 22513 and 22514 is approximately $6,664 and $6,672, respectively. Because the proposed geometric mean cost for APC 5115, which is the Level 5 Musculoskeletal Procedures APC, is significantly higher at $9,920 compared to the geometric mean cost for CPT codes 22513 and 22514, we proposed to assign CPT codes 22513 and 22514 to APC 5114 for CY 2017.

At the August 22, 2016 HOP Panel meeting, a presenter requested the reassessment of the proposed revised Musculoskeletal APC groupings that result in payment reductions for CPT codes 22513 and 22514. Specifically, the commenter observed that the proposed modification to the musculoskeletal APCs reduces the payment for these procedures by 26 percent for CY 2017. During the Panel discussion, CMS indicated that, in the CY 2016 OPPS/ASC proposed rule, the Agency initially proposed to establish four levels of the musculoskeletal APCs. However, based on the comments received on the CY 2016 proposal, CMS agreed with the request to establish a new level, specifically, Level 5 Musculoskeletal Procedures APC, for the CY 2016 update. In addition, during the discussion at the August 2016 Panel meeting, CMS informed the Panel that, for the CY 2017 update, CMS proposed to establish an additional level, specifically, Level 6 Musculoskeletal Procedures APC, for the musculoskeletal procedures. At the August 2016 HOP meeting, despite the request from the presenter, the Panel made no recommendation related to this issue.

Comment: Several commenters disagreed with the proposal and stated that the proposed reassignment of these procedures to APC 5114 would result in significant underpayment for these services. Some commenters noted that the proposed CY 2017 payment rate of $5,199.03 for CPT codes 22513 and 22514 is lower than the geometric mean costs of $6,664 for CPT code 22513 and $6,672 for CPT code 22514. These commenters requested that CMS reassign CPT codes 22513 and 22514 to APC 5115 (Level 5 Musculoskeletal Procedures APC), whose proposed CY 2017 payment rate is $9,491.

Response: We do not agree with the commenters that we should reassign these procedures to APC 5115. Based on the updated CY 2015 hospital outpatient claims data used for this final rule with comment period, our analysis reveals a geometric mean cost of approximately $5,367 for APC 5114, which is lower than the geometric mean cost of approximately $6,674 for CPT code 22513 based on 8,553 single (out of 8,665 total claims), or the geometric mean cost of approximately $6,643 for CPT code 22514 based on 10,451 single claims (out of 10,609 total claims). Because the difference between the geometric mean cost for APC 5115 ($9,828) and the geometric mean costs of CPT code 22513 ($6,674) and CPT code 22514 ($6,643) is significantly greater than the difference between the geometric mean cost of CPT codes 22513 and 22514 and the geometric mean cost of APC 5114 ($5,367), we believe these procedures should be assigned to APC 5114.

In addition, we do not agree with the commenters' assertion that the current assignment of CPT codes 22513 and 22514 in APC 5114 would result in significant underpayment for these services. OPPS payments are based on the geometric mean costs of all of the services assigned to the APC. By definition the costs of some services must be below the geometric mean and others must be above the geometric mean. As we have stated in the past (72 FR 66639), in some cases, payment exceeds the average cost of the CPT code, and in other cases, payment is less than the average cost of the CPT code.

Comment: One commenter stated that procedures described by add-on codes are paid separately in physician offices. However, payment for these services are packaged under the hospital OPPS. This difference results in higher payments for percutaneous vertebral augment/kyphoplasty procedures performed in the office setting compared to the HOPD setting. The commenter further noted that this discrepancy indicates that CMS

may be using a flawed methodology, similar to the CPT Committee and RUC, in determining payment rates for services under the hospital OPPS. Finally, the commenter requested that CMS increase the payment rate for CPT codes 22513 and 22514 to equalize payment for these procedures across all settings.

Response: The hospital OPPS and the MPFS that applies to physician's office services are fundamentally different payment systems with essential differences in their payment policies and structures. Specifically, the hospital OPPS is a prospective payment system, based on the concept of payment for groups of services that share clinical and resource characteristics. Payment is made under the hospital OPPS according to prospectively established payment rates that are related to the relative costs of hospital resources for services. The MPFS is a fee schedule based on the relative value of each individual component of services. Furthermore, physician fee schedule payments include payment for physician professional work, which is not a part of the OPPS payment to hospitals.

In addition, consistent with our general add-on code packaging policy, we package payment for certain procedures described by add-on codes under the hospital OPPS. Because CPT code 22515 is an add-on code, we have assigned this code to a packaged payment status. We believe that the procedure is a service that is always furnished in addition to another procedure (in this case, either CPT code 22513 or 22514) and cannot be performed independently. Under the MPFS approach, separate payment is made for add-on procedures provided in the physician's office, but the OPPS packages payment for add-on codes into the associated procedure code payment for the APC group. We recognize that the MPFS pays separately for CPT code 22515, as it does for other add-on codes. However, the MPFS and the OPPS are very different payment systems. Each is established under a different set of statutory and regulatory principles and the policies established under the MPFS do not have bearing on the payment policies under the OPPS. Given the fundamental difference between the MPFS payment mechanism and the OPPS payment mechanism, differences in the degrees of packaged payment and separate payment between these two systems are to be expected.

After consideration of the public comments we received, we are finalizing our proposal, without modification, to reassign CPT codes 22513 and 22514 to APC 5114. Table 16 below lists the final OPPS status indicator and APC assignments and payment rates for CPT codes 22513 and 22514 for CY 2017.

TABLE 16—FINAL CY 2017 STATUS INDICATOR (SI), APC ASSIGNMENTS, AND PAYMENT RATES FOR THE PERCUTANEOUS VERTEBRAL AUGMENTATION/KYPHOPLASTY PROCEDURES

CPT code	Long descriptors	CY 2016 OPPS SI	CY 2016 OPPS APC	CY 2016 OPPS payment rate	Final CY 2017 OPPS SI	Final CY 2017 OPPS APC	Final CY 2017 OPPS payment rate
22513	Percutaneous vertebral augmentation, including cavity creation (fracture reduction and bone biopsy included when performed) using mechanical device (*e.g.,* kyphoplasty), 1 vertebral body, unilateral or bilateral cannulation, inclusive of all imaging guidance; thoracic.	J1	5124	$7,064.07	J1	5114	$5,219.36.
22514	Percutaneous vertebral augmentation, including cavity creation (fracture reduction and bone biopsy included when performed) using mechanical device (*e.g.,* kyphoplasty), 1 vertebral body, unilateral or bilateral cannulation, inclusive of all imaging guidance; lumbar.	J1	5124	7,064.07	J1	5114	5,219.36.
22515	Percutaneous vertebral augmentation, including cavity creation (fracture reduction and bone biopsy included when performed) using mechanical device (*e.g.,* kyphoplasty), 1 vertebral body, unilateral or bilateral cannulation, inclusive of all imaging guidance; each additional thoracic or lumbar vertebral body (list separately in addition to code for primary procedure).	N	N/A	Packaged	N	N/A	Packaged.

e. Strapping and Casting Applications (APCs 5101 and 5102)

For the CY 2016 update, APCs 5101 (Level 1 Strapping and Cast Application) and 5102 (Level 2 Strapping and Cast Application) are assigned to OPPS status indicator ''S'' (Procedure or Service, Not Discounted When Multiple; Paid under OPPS; separate APC payment) to indicate that the procedures and/or services assigned to these APCs are not discounted when two or more services are billed on the same date of service.

For the CY 2017 update, based on our analysis of the procedures assigned to APCs 5101 and 5102, in the CY 2017 OPPS/ASC proposed rule (81 FR 45648), we proposed to revise the status indicator assignment for these procedures from ''S'' to ''T'' (Procedure or Service, Multiple Procedure

Reduction Applies; Paid under OPPS; separate APC payment) to indicate that the services are paid separately under the OPPS, but a multiple procedure payment reduction applies when two or more services assigned to status indicator ''T'' are billed on the same date of service. Because the procedures assigned to APCs 5101 and 5102 are often associated with surgical treatments, we stated that we believe that the proposed reassignment of these procedures to status indicator ''T'' is appropriate and ensures adequate payment for the procedures, even when the multiple procedure discounting policy applies. Also, there is no payment reduction unless there is another status indicator ''T'' procedure reported on the claim describing cast/splint/strap services. Consequently, we also proposed to revise the status indicator assignment for APCs 5101 and 5102 from ''S'' to ''T'' for the CY 2017 OPPS update to appropriately categorize the procedures assigned to these two APCs.

Comment: Several commenters opposed the status indicator reassignment from ''S'' to ''T'' for APCs 5101 and 5102, and stated that CMS did not provide substantive information for the proposed change, making it difficult for stakeholders to properly analyze the effects of the proposed change. Other commenters indicated that such a change contradicts current coding guidelines.

Response: As stated above, as part of our annual review, we examine the APC assignments for all items and services under the OPPS, which include review of status indicators, for appropriate placements in the context of our proposed policies for the update year. Although not every code, status indicator, or APC revision is discussed in the preamble of the proposed rule, they are nonetheless listed in Addendum B of the proposed rule. We note that Addendum B of the proposed rule is an Excel file that is arranged in CPT/HCPCS code order and shows the proposed OPPS status indicator and APC assignments, relative payment weights, and payment rates for every procedure code reported under the hospital OPPS.

Comment: Some commenters indicated that the National Correct Coding Initiative (NCCI) guidelines prevent the reporting of casting/strapping services when performed as part of a surgical procedure. Other commenters stated that the AMA CPT code instructions indicate that CPT codes 29700 through 29799 are only reported when the service is for a replacement procedure following a period of follow-up, or when the service is performed as the primary treatment without an associated restorative treatment or procedure(s). The commenters urged CMS not to finalize the proposal.

Response: We do not believe that the commenters completely understand the NCCI or CPT coding guidelines associated with the strapping and casting services. While it is true that strapping and casting services cannot be reported separately when performed as part of a surgical procedure, there are certain circumstances when strapping and casting services can be performed separate from a surgical procedure. It should be noted that Chapter IV (Surgery: Musculoskeletal System) of the 2016 NCCI Policy Manual for Medicare Services states that hospitals paid under the OPPS should report the appropriate casting, splinting, or strapping code in certain instances. Specifically, the NCCI Policy Manual specifies that for payment under the OPPS, if a hospital treats a fracture, dislocation, or injury with a cast, splint, or strap as an initial service without any other definitive procedure or treatment, the hospital should report the appropriate casting/splinting/strapping CPT code. In addition, while it is true that the procedures described by CPT codes 29700 through 29799 are only reported when the service is for a replacement procedure following a period of follow-up, or when the service is performed as the primary treatment without an associated restorative treatment or procedure(s), the CPT guidelines also elaborate that these removal/repair codes can be reported separately if the initial application of the cast, splint, or strapping was performed by a different entity.

Comment: Some commenters stated that casting and strapping services are performed in the emergency department for Medicare patients following a fall or injury, and these patients often require an extended period of observation before they are discharged. These commenters stated that revising the status indicator assignment for APCs 5101 and 5102 from ''S'' to ''T'' would no longer qualify hospitals for comprehensive observation service APC payments.

Response: We do not anticipate that this will be a significant issue because all observation services that are less than 8 hours are packaged into the payment for the emergency department visit. We do not believe that most Medicare beneficiaries would require long periods of observation after receiving cast/splint/strap services in the emergency room. Instead, we believe that physicians would appropriately assess the patient and determine whether the patient should be discharged to home or admitted as an inpatient.

After consideration of the public comments we received, we are finalizing our proposal, without modification, to revise the status indicator assignment for APCs 5101 and 5102 from ''S'' to ''T'' for CY 2017.

5. Nervous System Procedures/Services

a. Transcranial Magnetic Stimulation Therapy (TMS) (APCs 5721 and 5722)

Currently, three CPT codes exist to describe TMS therapy, specifically, CPT codes 90867, 90868, and 90869. As shown on Table 17 below, for CY 2016, we proposed to assign these codes to APC 5722 (Level 2 Diagnostic Tests and Related Services).

TABLE 17—PROPOSED CY 2017 STATUS INDICATOR (SI), APC ASSIGNMENTS, AND PAYMENT RATES FOR THE TRANSCRANIAL MAGNETIC STIMULATION THERAPY (TMS) CODES

CPT code	Long descriptors	CY 2016 OPPS SI	CY 2016 OPPS APC	CY 2016 OPPS payment rate	Proposed CY 2017 OPPS SI	Proposed CY 2017 OPPS APC	Proposed CY 2017 OPPS payment rate
90867	Therapeutic repetitive transcranial magnetic stimulation (tms) treatment; initial, including cortical mapping, motor threshold determination, delivery and management.	S	5722	$220.35	S	5722	$231.67

TABLE 17—PROPOSED CY 2017 STATUS INDICATOR (SI), APC ASSIGNMENTS, AND PAYMENT RATES FOR THE TRANSCRANIAL MAGNETIC STIMULATION THERAPY (TMS) CODES—Continued

CPT code	Long descriptors	CY 2016 OPPS SI	CY 2016 OPPS APC	CY 2016 OPPS payment rate	Proposed CY 2017 OPPS SI	Proposed CY 2017 OPPS APC	Proposed CY 2017 OPPS payment rate
90868	Therapeutic repetitive transcranial magnetic stimulation (tms) treatment; subsequent delivery and management, per session.	S	5722	220.35	S	5722	231.67
90869	Therapeutic repetitive transcranial magnetic stimulation (tms) treatment; subsequent motor threshold re-determination with delivery and management.	S	5722	220.35	S	5721	127.42

As we do every year, we review the APC assignments for all services under the hospital OPPS based on the latest claims data. For CY 2017, we did not propose to make any changes to the APC assignment for CPT codes 90867 and 90868, and proposed to continue to assign the procedures described by these procedure codes to APC 5722 because the geometric mean cost for these procedures were within the range of the geometric mean costs for procedures assigned to APC 5722. Specifically, our proposed rule claims data showed a geometric mean cost of approximately $196 based on 136 single claims (out of 136 total claims) for CPT code 90867, and approximately $187 for CPT code 90868 based on 5,239 single claims (out of 5,287 total claims). Because the geometric mean cost of $196 and $187 are relatively similar to the geometric mean cost of $242 for APC 5722, we proposed to continue to assign CPT codes 90867 and 90868 to APC 5722. However, for CPT code 90869, we proposed to reassign CPT code 90869 to APC 5721 (Level 1 Diagnostic Tests and Related Services) based on the latest claims data used for the proposed rule. Specifically, our claims data showed a geometric mean cost of approximately $119 based on 47 single claims (out of 47 total claims). Because the geometric mean cost of $133 for APC 5721 is relatively similar to the geometric mean cost of $119 for CPT code 90869, we proposed to reassign the procedure code to APC 5721.

Comment: One commenter disagreed with the proposal to reassign CPT code 90869 to APC 5721, and requested that CMS continue to assign the procedure to APC 5722. The commenter believed that the proposed CY 2017 payment rate of $127.42 is the result of low-volume and incorrect revenue code reporting. The commenter noted that, based on its analysis of the claims data, one hospital's inappropriate revenue code assignment resulted in a low cost-to-charge ratio, thereby decreasing the proposed payment rate. In addition, the commenter believed that the proposed payment rate for CPT code 90869, which involves a redetermination and TMS delivery and management services, should be higher than the proposed payment rate for CPT code 90868, which involves only TMS delivery and management services.

Response: As we have stated in section 20.5 (Clarification of HCPCS Code to Revenue Code Reporting) of Chapter 4 of the Medicare Claims Processing Manual, hospitals are responsible for reporting the correct revenue code on the claim form. Specifically, we state that we do not instruct hospitals on how to report the assignment of HCPCS codes to revenue codes for services provided under OPPS because hospitals' costs vary. Where explicit instructions are not provided, providers should report their charges under the revenue code that will result in the charges being assigned to the same cost center to which the cost of those services are assigned in the cost report. We note that the Medicare cost report form allows hospitals to report in a manner that is consistent with their own financial accounting systems and, therefore, should be accurate for each individual hospital. Moreover, we believe that the cost report data and their use in the OPPS cost estimation and payment rate development process, combined with potential penalties for inaccurate reporting, provide financial incentive for hospitals to report costs accurately. Furthermore, as we have stated repeatedly, beyond our standard OPPS trimming methodology that we apply to those claims that have passed various types of claims processing edits, it is not our general policy to judge the accuracy of hospital coding and charging for purposes of ratesetting. (We refer readers to the CY 2011 OPPS/ASC final rule with comment period (75 FR 71838) for further discussion.) Therefore, we will not question the accuracy of the coding and charging practices in this case.

In addition, based on the latest hospital outpatient claims data used for the final rule with comment period, we believe that APC 5721 is the most appropriate APC assignment for CPT code 90869. Specifically, our claims data show a geometric mean cost of approximately $107 for CPT code 90869 based on 54 single claims (out of 54 total claims), which is similar to the geometric mean cost of approximately $131 for APC 5721. We do not agree with the commenter that maintaining the assignment for CPT code 90869 to APC 5722 is appropriate because its geometric mean cost of approximately $239 is significantly higher than the geometric mean cost of $107 for CPT code 90869. Compared to the geometric mean cost of approximately $239 for APC 5722, we believe that APC 5721 is the most appropriate assignment for CPT code 90869 based on clinical and resource homogeneity with other procedures and services in the APC.

After consideration of the public comment we received, we are finalizing our proposal, without modification, to assign CPT code 90869 to APC 5721 for CY 2017. In addition, we are adopting as final, without modification, the proposed APC assignments for CPT codes 90867 and 90868 for CY 2017. Table 18 below lists the final status indicator and APC assignments and payment rates for the three TMS CPT codes for CY 2017. We refer readers to Addendum B of this final rule with comment period for the payment rates for all codes reportable under the OPPS. Addendum B is available via the Internet on the CMS Web site.

TABLE 18—FINAL CY 2017 STATUS INDICATOR (SI), APC ASSIGNMENTS, AND PAYMENT RATES FOR THE TRANSCRANIAL MAGNETIC STIMULATION THERAPY (TMS) CODES

CPT code	Long descriptors	CY 2016 OPPS SI	CY 2016 OPPS APC	CY 2016 OPPS payment rate	Final CY 2017 OPPS SI	Final CY 2017 OPPS APC	Final CY 2017 OPPS payment rate
90867	Therapeutic repetitive transcranial magnetic stimulation (tms) treatment; initial, including cortical mapping, motor threshold determination, delivery and management.	S	5722	$220.35	S	5722	$232.21
90868	Therapeutic repetitive transcranial magnetic stimulation (tms) treatment; subsequent delivery and management, per session.	S	5722	220.35	S	5722	232.21
90869	Therapeutic repetitive transcranial magnetic stimulation (tms) treatment; subsequent motor threshold re-determination with delivery and management.	S	5722	220.35	S	5721	127.05

b. Percutaneous Epidural Adhesiolysis (APC 5443)

As listed in Addendum B of the CY 2017 OPPS/ASC proposed rule, we proposed to continue to assign CPT codes 62263 (Percutaneous lysis of epidural adhesions using solution injection (*e.g.,* hypertonic saline, enzyme) or mechanical means (*e.g.,* catheter) including radiologic localization (includes contrast when administered), multiple adhesiolysis sessions; 2 or more days) and 62264 (Percutaneous lysis of epidural adhesions using solution injection (*e.g.,* hypertonic saline, enzyme) or mechanical means (*e.g.,* catheter) including radiologic localization (includes contrast when administered), multiple adhesiolysis sessions; 1 day) to APC 5443 (Level 3 Nerve Injections), with a proposed CY 2017 payment rate of approximately $711.

Comment: One commenter expressed concern with the proposed payment rate for CPT codes 62263 and 62264. The commenter stated that these codes were paid for appropriately in CY 2014 and CY 2015. However, the commenter believed that the payment for these procedures has declined beginning in CY 2016. The commenter also suggested that CMS reevaluate the APC structure and consider reinstating the APC classification that was in place during CY 2014 and CY 2015 in which the percutaneous adhesiolysis and radiofrequency neurotomy procedures were combined in the same APC. The commenter stated that the payment rate for the percutaneous adhesiolysis procedures should be the same as the radiofrequency neurotomy procedures, which are assigned to APC 5431 (Level 1 Nerve Procedures), with a proposed payment rate of approximately $1,557.

Response: Based on our analysis of the claims data used for the proposed rule, APC 5443 is the most appropriate APC assignment for CPT codes 62263 and 62264 based on its clinical and resource similarity to the procedures within this APC. Specifically, our analysis revealed a geometric mean cost of approximately $1,149 for CPT code 62263 based on 97 single claims (out of 107 total claims), and a geometric mean cost of approximately $839 for CPT code 62264 based on 2,188 single claims (out of 3,726 total claims). We believe that the geometric mean costs of CPT codes 62263 and 62264 are more similar to the geometric mean cost of approximately $743 for APC 5443. We believe that APC 5431 is not a more appropriate APC for CPT codes 62263 and 62264 because the geometric mean cost for this APC is approximately $1,627.

We also note that we reviewed the updated CY 2015 claims data used for this final rule with comment period. The proposed rule claims data were based on claims submitted from January 1, 2015 through December 31, 2015 and processed through December 31, 2015, while the final rule with comment period claims data are based on claims submitted from January 1, 2015 through December 31, 2015 and processed through June 30, 2016. Based on our analysis of the final rule with comment period claims data, we found a similar pattern for CPT codes 62263 and 62264. Specifically, we found a geometric mean cost of approximately $1,138 for CPT code 62263 based on 109 single claims (out of 121 total claims), and a geometric mean cost of approximately $842 for CPT code 62264 based on 2,243 single claims (out of 3,972 total claims). We note that the geometric mean costs for the significant procedures within APC 5443 range between $603 (CPT code 62310) and $1,083 (CPT code 64640). Because the geometric mean cost for APC 5431 is approximately $1,607, which is greater than the geometric mean cost for either CPT code 62263 or 62264, we believe that APC 5443 is the more appropriate APC assignment for these procedures.

After consideration of the public comment we received, we are adopting as final, without modification, the APC assignment to APC 5443 for CPT codes 62263 and 62264 for CY 2017. The final payment rates for these codes can be found in Addendum B to this final rule with comment period (which is available via the Internet on the CMS Web site).

c. Neurostimulator (APC 5463)

For CY 2017, we proposed to assign CPT code 0268T (Implantation or replacement of a carotid sinus baroreflex activation device; pulse generator only (includes intraoperative interrogation, programming, and repositioning when performed)) to APC 5463 (Level 3 Neurostimulator and Related Procedures), for which we proposed a CY 2017 geometric mean cost of approximately $18,325.

Comment: Commenters disagreed with CMS' proposal to assign CPT code 0268T to APC 5463. The commenters believed that CPT code 0268T would be more appropriately assigned to APC 5464 (Level 4 Neurostimulator and Related Procedures), for which we proposed a CY 2017 geometric mean cost of approximately $27,907. The commenters stated that the relatively

few claims submitted to CMS that are eligible for CY 2017 ratesetting do not accurately reflect the cost of performing this procedure.

Response: We disagree with commenters' assertion that CPT code 0268T would be more appropriately assigned to APC 5464, which has a final CY 2017 APC geometric mean cost of approximately $27,802. Based on available claims data used for CY 2017 ratesetting, the proposed assignment of CPT code 0268T, which has a final CY 2017 geometric mean cost of approximately $21,794, to APC 5463 is appropriate. After consideration of the public comments we received, we are finalizing our proposal, without modification, to assign CPT code 0268T to APC 5463, which has a final CY 2017 APC geometric mean cost of approximately$18,300. The final payment rate for CPT code 0268T can be found in Addendum B to this final rule with comment period (which is available via the Internet on the CMS Web site).

6. Radiologic Procedures and Services

a. Imaging APCs

As a part of our CY 2016 comprehensive review of the structure of the APCs and procedure code assignments, we restructured the APCs that contain imaging services (80 FR 70392). The purpose of this restructuring of the OPPS APC groupings for imaging services was to improve the clinical and resource homogeneity of the services classified within the imaging APCs. Recently some stakeholders that provide imaging services in hospitals recommended some further restructuring of the OPPS imaging APCs, again for the purpose of improving the clinical and resource homogeneity of the services classified within these APCs. After reviewing the stakeholder recommendations, we agreed that further improvements can be achieved by making further changes to the structure of the APC groupings of the imaging services classified within the imaging APCs. Therefore, in the CY 2017 OPPS/ASC proposed rule (81 FR 45647), for CY 2017, we proposed to make further changes to the structure of the imaging APCs. In Table 11 of the proposed rule, we listed the CY 2016 imaging APCs, and in Table 12 of the proposed rule we listed our proposed CY 2017 changes to the imaging APCs. This proposal would consolidate the imaging APCs from 17 APCs in CY 2016 to 8 in CY 2017. The specific APC assignments for each service grouping were listed in Addendum B to the proposed rule, which is available via the Internet on the CMS Web site. We noted in the proposed rule that some of the imaging procedures are assigned to APCs that are not listed in the tables of the proposed rule (for example, the vascular procedures APCs). Also, the nuclear medicine services APCs were not included in this proposed APC restructuring. We invited public comments on our proposal to consolidate the imaging APCs from 17 APCs in CY 2016 to 8 in CY 2017.

Comment: One of the stakeholders mentioned above who suggested further restructuring of the OPPS imaging services earlier this year expressed concern with CMS' proposed restructured imaging APCs. In particular, the stakeholder was disappointed that the proposed restructured imaging APCs differed from its specific recommendations. The stakeholder supported, in part, CMS' proposal; in particular, the reassignment of the interventional radiology procedures from imaging APCs to vascular procedure APCs and the maintenance of separate APCs for nuclear medicine procedures. In addition, several other commenters also agreed with CMS' proposal to not change the nuclear medicine APCs. Further, the stakeholder and other commenters requested that CMS provide additional explanation regarding the clinical similarity of the services assigned to the proposed restructured APCs. These commenters also were displeased that CMS assigned procedures that are primarily performed by cardiologists (for example, echocardiography) to APCs that also include imaging tests that are primarily interpreted by radiologists. They requested that CMS separate echocardiography services from other imaging tests. They also pointed out that the proposed groupings are broader than the APC title (that use the term ''Diagnostic Radiology'') descriptions because the proposed APC groupings include imaging tests that are interpreted by physicians other than radiologists. They also suggested additional APC and HCPCS code-specific assignments that are addressed below. The stakeholder and other commenters asked that CMS not adopt the proposed restructuring, and instead adopt their suggested APC structure, which would consolidate the imaging APCs, but would maintain separate APCs for echocardiography services that do not include x-ray, CT, and MRI services. Other commenters also requested that CMS not adopt the restructured imaging APCs. Some of these commenters suggested alternatives, such as maintaining separate APCs for ultrasound tests, but the commenters' primary focus was the payment rates and APC assignments of specific codes, which we discuss in detail below.

Response: We appreciate the stakeholder's and the commenters' support. We agree with the stakeholder that the term ''Imaging'' is more accurate for the titles for this series of APCs instead of the term ''Diagnostic Radiology.'' Therefore, we are modifying our proposal and changing the titles of this diagnostic radiology series of APCs to ''Level X Imaging'' (either without contrast or with contrast). Regarding the commenters' request for further explanation on the clinical similarity of the services assigned to the imaging APCs, we remind commenters that we proposed to reassign the interventional radiology procedures to vascular procedure APCs (APCs 5181, 5182, 5183), recognizing the greater clinical similarity of the reassigned interventional services to the vascular/catheterization procedures that are currently assigned to the vascular procedure APCs. The remaining services that are assigned to the restructured imaging APCs are all diagnostic imaging services that almost all belong to one of the following four primary, well-established imaging modalities: x-ray, ultrasound, computed tomography (CT), or magnetic resonance (MR). When these services are performed in the hospital outpatient department, a technician (sometimes aided by a physician) captures the images by operating one of the types of equipment used for x-ray, ultrasound, CT, or MR. These imaging services are assigned to an APC in either the ''without contrast'' imaging series or the ''with contrast'' imaging series, as required by section 1833(t)(2)(G) of the Act. Assignment of an imaging service to a specific APC within each of these two imaging series (with or without contrast) depends upon the use (or non-use) of a contrast agent and the geometric mean cost of the service, with the range of geometric mean costs within an APC governed by the 2 times rule. It is not relevant to the structure of the APC groupings that physicians of different specialties interpret certain tests (for example, cardiologists generally interpret imaging of the heart, radiologists interpret most other imaging tests, orthopedic surgeons interpret extremity images, and neurologists interpret brain images, among others). Furthermore, APC groupings in general do not necessarily correspond to groupings of procedures that are performed by a given physician

specialty. Some of the APC groupings resemble to some extent traditional physician specialty classifications (for example, the urology series of APCs), but many others do not. We believe that imaging services, which are diagnostic tests including x-rays, ultrasounds (including echocardiography), CT scans, and MRIs are sufficiently clinically similar for APC grouping purposes. We also believe that there is no special advantage to the current CY 2016 scheme that subdivides imaging services into subclasses for x-rays, ultrasounds, etc. The commenters believed that their suggested restructured APCs that were presented to CMS included APCs that grouped these four modalities together (except echocardiography). We believe that the proposed structure of the imaging services APCs satisfies the requirements of section 1833(t)(2)(B) of the Act with greater flexibility (versus the current structure) and without unnecessarily restrictive groupings limited to clinically insignificant traditional modality classifications (for example, CT and x-ray, among others). We see no compelling reason to separate echocardiography procedures, an imaging test of the heart, from other imaging tests in the APC groupings. Furthermore, all other nonimaging diagnostic tests are grouped in APCs (APCs 5721 through 5724) that are separate and distinct from the imaging services APCs because we believe that these nonimaging diagnostic tests are sufficiently clinically dissimilar to imaging tests to warrant separate APCs.

Comment: One commenter objected to the proposed exception to the 2 times rule for APC 5521 (Level 1 Diagnostic Radiology without Contrast), and requested that we explain the basis for the exception further. The commenter also requested that CMS reassign CPT code 75571 from APC 5521 to a higher paying APC for CY 2017.

Response: We explain the basis for the 2 times rule and the proposed exceptions in the CY 2017 OPPS/ASC of the proposed rule (81 FR 45644 through 45645). Table 9 of the CY 2017 OPPS/ASC of the proposed rule listed the proposed APC exceptions to the 2 times rule for CY 2017 (81 FR 45645). The proposal to grant an exception to the 2 times rule for APC 5521 followed from a request made prior to the proposed rule. At that time, the request was that CMS reassign CPT code 75571 from APC 5731 (Level 1 Minor Procedures) to an imaging APC based on greater clinical similarity to other CT services assigned to the imaging APCs. We agreed with the request and proposed to reassign CPT code 75571 to APC 5521, which is the lowest cost imaging APC in the series. Because CPT code 75571 has such a low geometric mean cost ($22.87), its assignment to any imaging APC, even the lowest cost imaging APC 5521 (with a geometric mean cost of $61.53), results in a 2 times rule violation. We proposed to make an exception to the 2 times rule for APC 5521 for CY 2017 because we believed that, for clinical reasons, CPT code 75571 should be assigned to an imaging APC with the other CT services. Therefore, we are finalizing our proposal, without modification, to reassign CPT code 75571 to APC 5521 as a result of the low geometric mean cost of the procedure. The payment rate for CPT code 75571 increases from $12.70 in CY 2016 to $59.84 in CY 2017.

Comment: Several commenters objected to the proposed assignment of CPT code 77080 (Dual-energy X-ray absorptiometry (DXA), bone density study, 1 or more sites; axial skeleton (*e.g.,* hips, pelvis, spine)) to APC 5521. The proposed assignment would reduce the payment rate for this procedure from its current CY 2016 payment rate of $100.69 to $63.33 in CY 2017. The commenters believed that the payment reduction could impair access to this valuable preventive service. The commenters requested that CMS assign CPT code 77080 to a higher paying imaging APC, along with other services that have greater resource similarity to the procedure described by CPT code 77080.

Response: We agree with the commenters. Therefore, we are modifying our proposal, and assigning CPT code 77080 to APC 5522 (Level 2 Diagnostic Radiology without Contrast) for CY 2017. CPT code 77080 has a geometric mean cost of $91.08, which increases the probability of a 2 times rule violation when compared to the second lowest-cost significant procedure assigned to APC 5521, the procedure described by CPT code 71010, which has a geometric mean cost of $46.11. We note that we are not comparing the geometric mean cost of CPT code 77080 to that of CPT code 75571, which is a significant procedure assigned to APC 5521 and that has a geometric mean cost of $22.87, for a 2 times rule violation because as described above, this procedure code assignment was the basis for the exception from the 2 times rule for APC 5521 in the proposed rule. In summary, we are assigning CPT code 77080 to APC 5522, with a final payment rate of $112.69 for CY 2017.

Comment: Several commenters objected to the proposed assignment of HCPCS code G0297 (Low dose CT scan (LDCT) for lung cancer screening) to APC 5521 because it would reduce the payment rate for this procedure from $112.49 in CY 2016 to $63.33 in CY 2017. The commenters expressed concern that such a payment reduction could result in fewer Medicare beneficiaries receiving this service. The commenters also expressed concern about the APC assignment of HCPCS code G0296 (Counseling visit to discuss need for lung cancer screening (LDCT) using low dose CT scan (service is for eligibility determination and shared decision making)) to APC 5821 (Level 1 Health and Behavior Services). The commenters believed that the proposed assignment also would result in a payment reduction from $69.65 in CY 2016 to $25.09 in CY 2017, and could impair access to this cancer screening service. The commenters requested that CMS assign these services to higher paying APCs in the CY 2017 final rule with comment period.

Response: We agree, in part, with the commenters. There were no claims data for these services in CY 2016. Therefore, the CY 2016 APC assignments reflected our best estimate at an appropriate APC assignment in the absence of cost information. For CY 2017, we have cost information for each of these services from the CY 2015 claims data. For HCPCS code G0296, the final rule geometric mean cost is $130.44, but with only 21 single claims. Therefore, we believe that this service should be assigned to APC 5822 (Level 2 Health and Behavior Services), with a payment rate of $70.23. We believe that the services in APC 5822 have greater resource similarity to the procedure described by HCPCS code G0296 than the services assigned to APC 5821. We will reevaluate the APC assignment of this procedure for the CY 2018 rulemaking. For HCPCS code G0297, the CY 2017 final rule geometric mean cost is $49.38. APC 5521, to which we proposed to assign HCPCS code G0297, has a geometric mean cost of $65.16. The next higher level APC in the imaging without contrast APC series, APC 5522, has a geometric mean cost of $119.56. Because the geometric mean cost of HCPCS code G0297 is more comparable to the geometric mean cost of APC 5521 than APC 5522, we believe that resource homogeneity is better supported by the assignment of HCPCS code G0297 to APC 5521. Therefore, in summary, we are modifying our proposal and assigning HCPCS code G0296 to APC 5822. However, we are finalizing our proposal, without modification, to assign HCPCS code G0297 to APC 5521 for CY 2017.

Comment: One commenter requested that CMS not reassign CPT code 78811

(Positron emission tomography (PET) imaging; limited area (*e.g.,* chest, head/neck) from APC 5594 (Level 4 Nuclear Medicine and Related Services) to APC 5593 (Level 3 Nuclear Medicine and Related Services) for CY 2017. The commenter believed that the reassignment is premature because of the lack of sufficient claims data to support the reassignment from the CY 2016 assignment to APC 5594.

Response: We disagree with the commenter. Although there are only 117 single claims for this service in the final rule data, we believe that this is a sufficient number upon which to base an APC assignment. The geometric mean cost of CPT code 78811 has been consistent for the past 2 years. In CY 2016 the geometric mean cost was $912.62 (based on 112 single claims), and the geometric mean cost for CY 2017 is $918.39 (based on 117 single claims). Furthermore, the geometric mean cost of CPT code 78811 is significantly lower than the geometric mean cost of APC 5593 ($1,170.73). Therefore, we believe that APC 5593 is the most appropriate APC assignment for CPT code 78811.

Comment: A few commenters requested that CMS maintain the CY 2016 APC assignment for CPT code 75563 (Cardiac magnetic resonance imaging for morphology and function without contrast material(s), followed by contrast material(s) and further sequences; with stress imaging) to APC 5593 (Level 3 Nuclear Medicine and Related Services), instead of its proposed assignment to APC 5573 (Level 3 Diagnostic Radiology with Contrast). The commenters expressed concern that the proposed payment reduction from $1,108 to $777 could reduce access to this imaging test. The commenters believed that CPT code 75563 has greater clinical and resource similarity to the services in APC 5593 than the services in APC 5573. In particular, the commenters asserted that CPT code 75563 is similar to CPT code 78452 (Myocardial perfusion imaging, tomographic (SPECT) (including attenuation correction, qualitative or quantitative wall motion, ejection fraction by first pass or gated technique, additional quantification, when performed); multiple studies, at rest and/or stress (exercise or pharmacologic) and/or redistribution and/or rest reinjection) because both tests are performed under a stress protocol. The commenter also requested that CMS reassign CPT code 75557 (Cardiac magnetic resonance imaging for morphology and function without contrast material) from APC 5523 (Level 3 Imaging without Contrast) to APC 5591 (Level 1 Nuclear Medicine and Related Services). The commenter believed that such a reassignment would improve clinical and resource similarity with regard to CPT code 75557. Another commenter requested that CMS not assign any non-nuclear medicine services to the nuclear medicine APC series.

Response: We agree with the commenter that requested that we not assign any of these magnetic resonance procedure codes to nuclear medicine APCs. For instance, APC 5593 contains procedures that describe nuclear medicine tests, and CPT code 75563 is a specific type of MRI and not a nuclear medicine test. Also, the geometric mean cost of CPT code 75563 is $745 and the geometric mean cost of the APC to which it is assigned, APC 5573, is $781. These geometric mean costs are very similar. However, the geometric mean cost of APC 5593 is $1,171, which is significantly higher than the geometric mean cost of CPT code 75563. Therefore, assigning CPT code 75563 to APC 5593 would assign the procedure to an APC with clinically dissimilar nuclear medicine tests and resource dissimilar tests that have a geometric mean cost of $1,171 (as compared to the $745 geometric mean cost of CPT code 75563). Therefore, we are finalizing our proposal, without modification, to assign CPT code 75563 to APC 5573. Similarly, the procedure described by CPT code 75557 is not a nuclear medicine test and, therefore, should not be assigned to a nuclear medicine APC such as APC 5591. The geometric mean cost of CPT code 75557 is $266, and the geometric mean cost of the APC to which it is assigned (APC 5523) is $223. Therefore, we believe that APC 5523 is an appropriate APC assignment for CPT code 75557 from a resource perspective. Also, there are many other MRI procedure codes, like CPT code 75557, assigned to APC 5523. In addition, we are reassigning a related code, CPT code 75559 (Cardiac magnetic resonance imaging for morphology and function without contrast material; with stress imaging), from APC 5592 (Level 2 Nuclear Medicine and Related Services) to APC 5523 (Level 3 Imaging without Contrast). The geometric mean costs of these two APCs are comparable, but because the procedure described by CPT code 75559 is not a nuclear medicine test, we believe that APC 5523 is a more appropriate APC assignment than APC 5592 for reasons of clinical similarity.

Comment: One commenter requested that CMS reassign CPT code 70559 (Magnetic resonance (*e.g.,* proton) imaging, brain (including brain stem and skull base), during open intracranial procedure (*e.g.,* to assess for residual tumor or residual vascular malformation); without contrast material(s), followed by contrast material(s) and further sequences) from APC 5181 (Level 1 Vascular Procedures) to an imaging APC because the commenter believed that an imaging APC would be more clinically appropriate than a vascular procedures APC.

Response: We agree with the commenter that CPT code 70559 should be assigned to an imaging APC because this service is more similar to other imaging services than to the procedures assigned to APC 5181. Therefore, we are modifying our proposal, and reassigning CPT code 70559 to APC 5571 (Level 1 Imaging with Contrast).

Comment: A few commenters requested that CMS reassign four HCPCS/CPT codes from APC 5572 (Level 2 Diagnostic Radiology with Contrast) to APC 5573 (Level 3 Diagnostic Radiology with Contrast):

- HCPCS code C8929 (Transthoracic echocardiography, with contrast, or without contrast followed by with contrast, real-time with image documentation (2D), includes M-mode recording, when performed, complete, with spectral Doppler echocardiography, and with color flow Doppler echocardiography);
- CPT code 73722 (Magnetic resonance (*e.g.,* proton) imaging, any joint of lower extremity; with contrast material(s));
- CPT code 73222 (Magnetic resonance (*e.g.,* proton) imaging, any joint of upper extremity; with contrast material(s)); and
- CPT code 72126 (Computed tomography, cervical spine; with contrast material).

These commenters believed that the procedures described by these four codes have greater clinical and resource similarity to the procedures assigned to APC 5573.

Response: We agree, in part, with the commenters. In particular, we believe that HCPCS code C8929 belongs in the same APC with the other echocardiography with contrast services, which is APC 5573, based on clinical and resource similarity resulting from the use of contrast. We also believe that the geometric mean costs of CPT code 73722 ($559.13) and CPT code 73222 ($606.13) support the assignment of these procedures to APC 5573, which has a geometric mean cost of $675.23. However, the final rule geometric mean cost for CPT code 72126 is $363.15. Therefore, we believe that APC 5572 is the more appropriate APC assignment for this procedure.

Comment: A few commenters requested that CMS reassign HCPCS codes G0105 (Colorectal cancer screening; colonoscopy on individual at high risk) and G0121 (Colorectal cancer screening; colonoscopy on individual not meeting criteria for high risk) from APC 5525 (Level 5 Diagnostic Radiology without Contrast) to a more clinically appropriate gastroenterology APC.

Response: We agree with the commenters that a gastroenterology APC would be more clinically appropriate for these colonoscopy services. Therefore, we are modifying our proposal, and reassigning HCPCS codes G0105 and G0121 to APC 5311 (Level 1 Lower GI Procedures). With the reassignment of HCPCS codes G0105 and G0121 from APC 5525 to APC 5311, only five procedures remain in APC 5525. We believe that these remaining five procedures (four of which are non-contrast echocardiography services) can be grouped into APC 5524 (Level 4 Diagnostic Radiology without Contrast), which will be renamed Level 4 Imaging without Contrast. APC 5524 contains other clinically similar non-contrast echocardiography services and the reassignment of these five procedures comports with the provision of the 2 times rule. Therefore, we also are reassigning CPT codes 75984, 93312, 93313, 93315, and 93318 from APC 5525 to APC 5524, and deleting APC 5525.

Comment: Some commenters requested that several procedures be reassigned to the next higher level imaging APC within the APC series. The commenters believed that reassignment of these procedures would improve resource homogeneity within these APCs. These procedures and our responses to this request are listed in Table 19 below.

TABLE 19—SERVICES REQUESTED TO BE REASSIGNED TO THE NEXT HIGHER LEVEL IMAGING APC

CPT code	Long descriptor	Proposed CY 2017 SI	Proposed CY 2017 APC	CMS response (agree or disagree with commenter)	Final CY 2017 SI	Final CY 2017 APC
70545	Magnetic resonance angiography, head; with contrast material(s).	S	5571	Disagree	S	5571
70548	Magnetic resonance angiography, head; with contrast material(s).	S	5571	Disagree	S	5571
70557	Magnetic resonance (*e.g.,* proton) imaging, brain (including brain stem and skull base), during open intracranial procedure (*e.g.,* to assess for residual tumor or residual vascular malformation); without contrast material.	S	5523	Disagree	S	5523
71270	Computed tomography, thorax; without contrast material, followed by contrast material(s) and further sections.	Q3	5571	Disagree	Q3	5571
76010	Radiologic examination from nose to rectum for foreign body, single view, child.	Q1	5521	Disagree	Q1	5521
76498	Unlisted magnetic resonance procedure (*e.g.,* diagnostic, interventional).	S	5521	Disagree	S	5521
76641	Ultrasound, breast, unilateral, real time with image documentation, including axilla when performed; complete.	Q1	5521	Agree	Q1	5522
76642	Ultrasound, breast, unilateral, real time with image documentation, including axilla when performed; limited.	Q1	5521	Disagree	Q1	5521
76816	Ultrasound, pregnant uterus, real time with image documentation, follow-up (*e.g.,* re-evaluation of fetal size by measuring standard growth parameters and amniotic fluid volume, re-evaluation of organ system(s) suspected or confirmed to be abnormal on a previous scan), transabdominal approach, per fetus.	Q1	5521	Agree	Q1	5522
76821	Doppler velocimetry, fetal; middle cerebral artery.	Q1	5521	Agree	Q1	5522
76857	Ultrasound, pelvic (nonobstetric), real time with image documentation; limited or follow-up (*e.g.,* for follicles).	Q3	5521	Agree	Q3	5522
C8903	Magnetic resonance imaging with contrast, breast; unilateral.	Q3	5571	Disagree	Q3	5571
C8918	Magnetic resonance angiography with contrast, pelvis.	Q3	5571	Disagree	Q3	5571

Response: For the procedures in the above table that we disagreed with the commenter regarding the most appropriate APC assignment, the geometric mean cost of each of these procedure codes is very similar to the geometric mean cost of the APC to which we proposed to reassign the procedure in the proposed rule. Therefore, we are finalizing our proposal, without modification, to reassign these proposed procedures to the proposed APCs indicated. For the procedure codes in the table above that we are modifying our proposal to reassign to a different APC than that which was proposed, the geometric mean cost of the procedure is more consistent with the next higher level APC to which we agree supports a more appropriate APC assignment.

Comment: One commenter requested that CMS reassign several procedures to APCs other than any of the imaging APCs. The commenter believed that these procedures are not clinically similar to the other imaging services assigned to the imaging APCs. These procedure codes and our responses are listed in Table 20 below.

Response: We refer readers to the table below for the final CY 2017 APC assignments for the suggested procedure codes. We agree with the commenter that all of the suggested procedures should be reassigned to a different APC, except for the procedures described by CPT code 62303 and HCPCS code C9733. We believe that these two procedure codes describe imaging tests and, therefore, are properly assigned to an APC in the imaging APC series.

TABLE 20—ADDITIONAL SERVICES REQUESTED TO BE REASSIGNED TO NON-IMAGING APCS

CPT/ HCPCS code	Long descriptor	Proposed CY 2017 SI	Proposed CY 2017 APC	CMS response (agree or disagree with commenter)	Final CY 2017 SI	Final CY 2017 APC
36002	Injection procedures (*e.g.,* thrombin) for percutaneous treatment of extremity pseudoaneurysm.	S	5524	Agree	T	5181
43752	Naso- or oro-gastric tube placement, requiring physician's skill and fluoroscopic guidance (includes fluoroscopy, image documentation and report).	Q3	5523	Agree	Q1	5735
43756	Duodenal intubation and aspiration, diagnostic, includes image guidance; single specimen (*e.g.,* bile study for crystals or afferent loop culture).	Q1	5524	Agree	Q1	5301
47531	Injection procedure for cholangiography, percutaneous, complete diagnostic procedure including imaging guidance (*e.g.,* ultrasound and/or fluoroscopy) and all associated radiological supervision and interpretation; existing access.	Q2	5524	Agree	Q2	5341
62303	Myelography via lumbar injection, including radiological supervision and interpretation; thoracic.	Q2	5524	Disagree	Q2	5524
75801	Lymphangiography, extremity only, unilateral, radiological supervision and interpretation.	Q2	5524	Agree	Q2	5181
91200	Liver elastography, mechanically induced shear wave (*e.g.,* vibration), without imaging, with interpretation and report.	Q1	5521	Agree	Q1	5721
93982	Noninvasive physiologic study of implanted wireless pressure sensor in aneurysmal sac following endovascular repair, complete study including recording, analysis of pressure and waveform tracings, interpretation and report.	Q1	5521	Agree	Q1	5721
C9733	Non-ophthalmic fluorescent vascular angiography.	Q2	5523	Disagree	Q2	5523

Comment: One commenter requested that CMS reassign CPT code 91200 from APC 5521 to APC 5721, and modify the proposed status indicator assignment from ''Q1'' (conditionally packaged) to ''S'' (Paid under OPPS; separate APC payment.) in order to separately pay for the test under all circumstances.

Response: Although we agree with the commenter regarding the APC assignment for clinical similarity purposes, we disagree with the commenter regarding the status indicator assignment. The procedure described by CPT code 91200 is an ancillary ultrasound diagnostic test, not unlike the ultrasound tests that were packaged as a part of our ancillary services packaging policy in CY 2015. (We refer readers to the CY 2015 OPPS/ASC final rule with comment period (79 FR 66819) for a further discussion of the ancillary services packaging policy.) Therefore, we are finalizing our proposal, without modification, to assign CPT code 91200 to APC 5721, with a status indicator of assignment of ''Q1'' for CY 2017.

Comment: A few commenters requested that CMS modify the status indicator assignment for HCPCS code C9733 from ''Q2'' to a separately payable status indicator (for example, status indicator ''S''). The commenters noted that status indicator ''Q2'' indicates that payment for the procedure described by HCPCS code C9733 is conditionally packaged when provided in conjunction with other procedures assigned to status indicator ''T,'' which are primarily surgical procedures.

Response: We have responded to this comment in past rules. The service described by HCPCS code C9733 is primarily an intraoperative imaging service. Therefore, it is conditionally packaged under § 419.2(b)(14), which packages intraoperative items and services. When the procedure described by HCPCS code C9733 is not furnished in conjunction with a surgical procedure, then the service is paid separately. We believe that the OPPS payments, separate or packaged, for surgical procedures in which this test is performed in conjunction with (for example, breast reconstruction) are more than adequate to cover the cost of the service described by HCPCS code C9733 for Medicare beneficiaries in need of this service.

Comment: One commenter requested that CMS assign three procedures from APC 5181 (Level 1 Vascular Procedures) to APC 5182 (Level 2 Vascular Procedures) because the geometric mean costs of these procedures are more

comparable to the geometric mean cost of APC 5182 than that of APC 5181:

- CPT code 75731 (Angiography, adrenal, unilateral, selective, radiological supervision and interpretation);
- CPT code 75746 (Angiography, pulmonary, by nonselective catheter or venous injection, radiological supervision and interpretation); and
- CPT code 75810 (Splenoportography, radiological supervision and interpretation).

Response: We disagree with the commenter. Based on the CY 2017 final rule updated claims data, CPT code 75731 only has one single claim, CPT code 75746 only has 5 single claims, and CPT code 75810 only has 2 single claims. The number of claims for these services is too low upon which to base an APC reassignment for better resource homogeneity. Therefore, we are finalizing our proposal, without modification, to assign these three procedures to APC 5181.

After consideration of the public comments we received, we are finalizing the proposals, with the modifications as described above in the responses to the comments on the restructuring and reorganization of the imaging APCs. Table 21 below lists the final seven CY 2017 imaging APCs (not including the four nuclear medicine APCs). All of these APCs are assigned to status indicator ''S,'' although payment for some of the procedures assigned to these APCs are conditionally packaged and are instead assigned to status indicator ''Q1'' or ''Q2.''

TABLE 21—FINAL CY 2017 IMAGING APCS

CY 2017 APC	CY 2017 APC title
5521	Level 1 Imaging without Contrast.
5522	Level 2 Imaging without Contrast.
5523	Level 3 Imaging without Contrast.
5524	Level 4 Imaging without Contrast.
5571	Level 1 Imaging with Contrast.
5572	Level 2 Imaging with Contrast.
5573	Level 3 Imaging with Contrast.

b. Radiation Oncology (APCs 5092, 5611, and 5627)

Comment: A few commenters disagreed with CMS' proposed reassignment of CPT code 19298 (Placement of radiotherapy afterloading brachytherapy catheters (multiple tube and button type) into the breast for interstitial radioelement application following (at the time of or subsequent to) partial mastectomy, includes imaging guidance) to APC 5092 (Level 2 Breast/Lymphatic Surgery and Related Procedures), with a payment rate of approximately $4,395 for CY 2017. In CY 2016, this code is assigned to APC 5093 (Level 3 Breast/Lymphatic Surgery and Related Procedures), with a payment rate of approximately $7,558. The commenters believed that the previous APC assignment to APC 5093 is appropriate and requested that CMS continue to assign CPT code 19298 to APC 5093 for CY 2017.

Response: The geometric mean cost for CPT code 19298 decreased from approximately $6,269 in CY 2016 to approximately $5,128 for CY 2017. This change prompted the proposed reassignment of this code from the Level 3 APC to Level 2. We do not believe that the CY 2017 geometric mean cost supports continued assignment to APC 5093. After consideration of the public comment we received, we are finalizing our proposal, without modification, and reassigning CPT code 19298 to APC 5092 for CY 2017.

Comment: A few commenters suggested that CMS reassign CPT codes 77424 (Intraoperative radiation treatment delivery, x-ray, single treatment session) and 77425 (Intraoperative radiation treatment delivery, electrons, single treatment session) to an APC in the radiation therapy series other than APC 5093 (Level 3 Breast/Lymphatic Surgery and Related Procedures) because these radiation treatment services are not clinically similar to the breast procedures that are assigned to APC 5093.

Response: We agree with the commenters. The assignment of these codes to APC 5093 was intended to be temporary until more claims data for these codes was available. Based on these codes being radiation treatment delivery codes and their geometric mean costs for CPT codes 77424 (approximately $8,701) and 77425 (approximately $7,172), we are reassigning these services to APC 5627 (Level 7 Radiation Therapy), with a geometric mean cost of approximately$7,664. We note that if planning and preparation and imaging services are repackaged into the single session cranial SRS codes (that are assigned to APC 5627) in the future, this could cause the geometric mean cost for the single session cranial SRS codes to increase such that it may no longer be appropriate to group CPT codes 77424 and 77425 with the single session SRS codes in the same APC. However, for CY 2017, APC 5627 is the most appropriate APC for CPT codes 77424 and 77425, both clinically and from a resource-cost perspective. The final payment rate for these codes can be found in Addendum B to this final rule with comment period (which is available via the Internet on the CMS Web site).

Comment: A few commenters requested that CMS create a fourth level in the Therapeutic Radiation Treatment Preparation APC series and assign CPT code 77301 (Intensity modulated radiotherapy plan, including dose-volume histograms for target and critical structure partial tolerance specifications) to this new APC. The commenters believed that the costs from the claims data for CPT code 77301 are lower than the actual current costs because the AMA CPT Editorial Panel bundled simulation services (that used to be separately coded) into the payment for CPT code 77301.

Response: We prefer to wait for the actual claims data before reassigning a code because the cost of a new bundled code is often difficult to predict and often the cost of the new bundled code is significantly less than the sum of the costs of the individual codes that contribute to the bundle. For CY 2017, we are finalizing our proposal to reassign CPT code 77301 to APC 5613.

Comment: A few commenters requested that CMS not reassign CPT codes 77370, 77280, and 77333 to APC 5611 (Level 1 Therapeutic Radiation Treatment Preparation) for CY 2017. These codes are currently assigned to the Level 2 Therapeutic Radiation Treatment Preparation APC (APC 5612) in CY 2016. The payment would decrease from $167 in CY 2016 to $117 in CY 2017.

Response: As we do annually, we examined the APCs in this series. We noticed that the difference in the geometric mean costs between Level 1 and 2 was not significant. Therefore, we proposed to consolidate these two APCs into a single APC and reduce the number of levels in the Therapeutic Radiation Treatment Preparation APC series from four to three. We believe that this change promotes resource homogeneity without excessive granularity with consecutive levels having almost the same mean cost. The range of geometric mean costs for significant services in the proposed CY 2017 APC 5611 (Level 1 Therapeutic Radiation Treatment Preparation) is $101 to $197, which comports with the 2 times rule. Therefore, we are finalizing this proposed APC structure and CPT codes 77370, 77280, and 77333 are assigned to APC 5611 for CY 2017.

7. Skin Substitutes (APCs 5053 through 5055)

For CY 2017, we proposed to assign skin substitute procedures to APCs 5053 through 5055 (Level 3 through 5 Skin Procedures). The cost of the procedures is affected by whether the skin substitute product is low cost or high cost, the surface area of the wound, and the location of the wound.

Comment: Commenters disagreed with the proposed APC assignments for procedures described by HCPCS code C5277 (Application of low cost skin substitute graft to face, scalp, eyelids, mouth, neck, ears, orbits, genitalia, hands, feet, and/or multiple digits, total wound surface area greater than or equal to 100 cm^2; First 100 cm^2 wound surface area, or 1% of body area of infants and children) to APC 5053 (Level 3 Skin Procedures) and procedures described by CPT code 15277 (Application of skin substitute graft to face, scalp, eyelids, mouth, neck, ears, orbits, genitalia, hands, feet, and/or multiple digits, total wound surface area greater than or equal to 100 cm^2; First 100 cm^2 wound surface area, or 1% of body area of infants and children) to APC 5054 (Level 4 Skin Procedures). The commenters stated that the proposed payment rates for APC 5053 and APC 5054 do not accurately reflect the cost of providing the services described by HCPCS code C5277 and CPT code 15277. The commenters further stated that the cost of applying a skin substitute product to a larger wound (surface area greater than or equal to 100 cm^2) should be similar, irrespective of whether the product is applied to the head, genitalia, hands, or feet as compared to the trunk, legs, or arms. The commenters compared the differences between procedures described by HCPCS code C5277 and procedures described by HCPCS code C5273 (Application of low cost skin substitute graft to trunk, arms, legs, total wound surface area greater than or equal to 100 cm^2; First 100 cm^2 wound surface area, or 1% of body area of infants and children). Procedures described by HCPCS code C5273 are assigned to APC 5054, which has a higher geometric mean cost than APC 5053. The commenters did a similar comparison between procedures described by CPT code 15277 and procedures described by CPT code 15273 (Application of skin substitute graft to trunk, arms, legs, total wound surface area greater than or equal to 100 cm^2; First 100 cm^2 wound surface area, or 1% of body area of infants and children). Procedures described by CPT code 15273 are assigned to APC 5055 (Level 5 Skin Procedures), which has a higher geometric mean cost than APC 5054. One commenter believed that the low volume of single claims for procedures described by HCPCS code C5277 and CPT code 15277 may have resulted in inaccurately low geometric mean costs.

Response: We disagree with the commenters. We reviewed the services in both APC 5053 and APC 5054 and found that procedures described by HCPCS code C5277 and CPT code 15277 have both clinical and resource homogeneity to the other 11 procedures assigned to these two APCs. Therefore, there is no justification to assign these procedures to APCs with higher geometric mean costs. The final geometric mean cost of procedures described by HCPCS code C5277 is approximately $810 (based on 26 single claims), which is more comparable to the final geometric mean cost of APC 5053 ($466) than the geometric mean cost of APC 5054 ($1,468). Also, regarding the accuracy of the cost data for these codes, we again note our longstanding policy provides that, beyond our standard OPPS trimming methodology that we apply to those claims that have passed various types of claims processing edits, it is not our general policy to judge the accuracy of hospital coding and charging for purposes of ratesetting. (We refer readers to 75 FR 71838 for a detailed discussion.) Therefore, after consideration of the public comments we received, we are finalizing our proposal, without modification, to assign HCPCS code C5277 to APC 5053 and CPT code 15277 to APC 5054.

Comment: Commenters requested that APC 5053 (Level 3 Skin Procedures) be divided into two APCs in order to separate more resource intensive services using skin substitute products (procedures described by HCPCS codes C5271, C5275, and C5277) from other, less resource intensive skin procedures. The commenters believed an additional APC level within the skin procedures APC series between the current level 3 and level 4 would more closely reflect the cost of the low cost skin substitute application procedures. The commenters also believed that the current APC structure incentivizes hospitals to prefer high cost skin substitutes over low cost skin substitutes.

Response: We disagree with the commenters. We do not believe that it is necessary to expand the skin procedures APC series to six levels. We reviewed the services assigned to APC 5053 and found that all of the procedures assigned to the APC have both sufficient clinical and resource homogeneity. The highest volume low cost skin substitute application procedure, described by HCPCS code C5271 (Application of low cost skin substitute graft to trunk, arms, legs, total wound surface area up to 100 sq cm; first 25 sq cm or less wound surface area), had a final geometric mean cost of $596 (11,256 single claims), and the final geometric mean cost of APC 5053 was $466. While the geometric mean cost of procedures described by HCPCS code C5271 is higher than the geometric mean cost of APC 5053, the difference is well within the span of the two times rule.

In conclusion, we do not believe that there is justification to create another level within the skin procedures APC series by dividing APC 5053 into two APCs. Therefore, after consideration of the public comments we received, we are finalizing our proposal, without modification, to maintain the current five levels of skin procedures APCs.

8. Urology System Procedures and Services

a. Chemodenervation of the Bladder (APC 5373)

As listed in Addendum B of the CY 2017 OPPS/ASC proposed rule, we proposed to continue to assign CPT code 52287 (Cystourethroscopy, with injection(s) for chemodenervation of the bladder) to APC 5373 (Level 3 Urology and Related Services), with a payment rate of approximately $1,642. In addition, we proposed to reassign its status indicator from ''T'' (Procedure or Service, Multiple Procedure Reduction Applies. Paid under OPPS; separate APC payment.) to ''J1'' (Hospital Part B services paid through a comprehensive APC) to indicate that all covered Part B services on the claim are packaged with the primary ''J1'' service for the claim, except for services with OPPS status indicators ''F,'' ''G,'' ''H,'' ''L,'' and ''U''; ambulance services; diagnostic and screening mammography; all preventive services; and certain Part B inpatient services.

We proposed to continue to assign CPT code 52287 to APC 5373 based on the claims data used for the proposed rule. Specifically, our analysis of the claims data showed a geometric mean cost of approximately $2,219 for CPT code 52287 based on 7,464 single claims (out of 7,609 total claims), which fits more appropriately in APC 5373, whose geometric mean cost is approximately $1,716. We did not propose to assign CPT code 52287 to APC 5374 (Level 4 Urology and Related Services) because we would have overpaid for the procedure because the geometric mean

cost for this APC is approximately $2,642.

Comment: One commenter disagreed with the proposed APC assignment for CPT code 52287, and requested that CMS reassign the procedure to APC 5374. The commenter explained that CPT code 52287 describes a procedure that involves the use of the BOTOX® drug for the treatment of overactive bladder (OAB) and detrusor overactivity associated with a neurologic condition (NDO). The commenter also stated that because of the proposed revision to the code's status indicator from ''T'' to ''J1,'' the BOTOX® used in the procedure would no longer be paid separately, whereas in CY 2016 the drug is paid separately under HCPCS code J0585 (Injection, onabotulinumtoxin a, 1 unit). According to the commenter, the resource cost of performing the procedure with 200 units of the drug is significantly greater than that of furnishing 100 units. Consequently, the commenter stated that the payment rate for APC 5373 is inadequate to cover the resource costs associated with performing the procedure and furnishing the drug. The commenter recommended that CMS reconfigure APCs 5373 and 5374 so that all procedures with a geometric mean cost greater than $2,150 are assigned to APC 5374, and to reassign CPT code 52287 to APC 5374. Alternatively, if CMS does not reassign CPT code 52287 to APC 5374, the commenter suggested that CMS establish a complexity adjustment for those procedures that involve a dose of 200 units of BOTOX®.

Response: We believe that APC 5373 is the most appropriate APC assignment for CPT code 52287 based on its resource and clinical homogeneity to the other procedures within the APC. Based on updated CY 2015 claims data for this final rule with comment period, the range of geometric mean costs for significant procedures assigned to APC 5373 is between $1,175 and $2,275. The geometric mean cost of $2,196 for CPT code 52287 is within this range. We do not believe that it would be appropriate to assign CPT code 52287 to APC 5374, whose geometric mean cost is approximately $2,613.

With respect to the issue of the drug cost, the payment for the BOTOX® drug is included in the payment for the procedure described by CPT code 52287. As stated in section II.A.2.c. of this final rule with comment period, the payment for procedures assigned to a ''J1'' status indicator include all drugs, biologicals, and radiopharmaceuticals, regardless of cost, except those drugs with pass-through payment status and those drugs that are usually self-administered (SADs), unless they function as packaged supplies (78 FR 74868 through 74869, 74909, and 79 FR 66800).

On the issue of a complexity adjustment, as listed in Addendum J of the CY 2017 OPPS/ASC proposed rule, specifically, in the ''Complexity Adjustments'' tab of the Excel file, we proposed to reassign CPT code 52287 to a complexity adjustment APC. In particular, we proposed to assign CPT code 52287 to APC 5374 when the procedure is performed in conjunction with other procedures during the same hospital stay that meet the complexity adjustment criteria discussed in section II.A.2.c. of this final rule with comment period.

After consideration of the public comment we received, we are finalizing our proposal, without modification, to assign CPT code 52287 to APC 5373 for CY 2017. The final status indicator and APC assignments and payment rate for this code, where applicable, can be found in Addendum B to this final rule with comment period (which is available via the Internet on the CMS Web site). The list of the complexity adjustments for add-on code combinations for CY 2017, along with all of the other complexity adjustments, can be found in Addendum J to this final rule with comment period (which is available via the Internet on the CMS Web site). Addendum J to this final rule with comment period also contains the summary cost statistics for each of the code combinations that describe a complex code combination that will qualify for a complexity adjustment and will be reassigned to the next higher cost C–APC within the clinical family.

b. Temporary Prostatic Urethral Stent (APC 5373)

As listed in Addendum B of the CY 2017 OPPS/ASC proposed rule, we proposed to continue to assign CPT code 53855 (Insertion of a temporary prostatic urethral stent, including urethral measurement) to APC 5372 (Level 2 Urology and Related Services), with a payment rate of approximately $561.

Comment: One commenter disagreed with the proposed assignment of CPT code 53855 to APC 5372. The commenter believed that the proposed payment rate of approximately $561 for APC 5372 is inadequate to cover the cost of providing the service. The commenter stated that the payment rate of approximately $1,642 for APC 5373 better supports the resource costs and clinical characteristics associated with the procedure described by CPT code 53855 and recommended that CMS reassign the CPT code to this APC for CY 2017.

Response: Based on our analysis of the updated CY 2015 hospital outpatient claims used for this final rule with comment period, we agree with the commenter. Our claims data showed a geometric mean cost of approximately $1,860 for CPT code 53855 based on 31 single claims (out of 31 total claims), which is similar to the geometric mean cost of approximately $1,691 for APC 5373.

After consideration of the public comment we received, we are modifying our proposal and assigning CPT code 53855 to APC 5373 for CY 2017. The final CY 2017 payment rate for this procedure can be found in Addendum B to this CY 2017 OPPS/ASC final rule with comment period (which is available via the Internet on the CMS Web site).

c. Transprostatic Urethral Implant Procedure (TUIP) (APCs 5375 and 5376)

Currently, there are four procedure codes that describe transprostatic urethral implant procedures, specifically, HCPCS codes C9739 and C9740, and CPT codes 52441 and 52442. As shown in Table 22 below, and as listed in Addendum B of the CY 2017 OPPS/ASC proposed rule, we proposed to continue to assign HCPCS code C9739 to APC 5375 (Level 5 Urology and Related Services). We also proposed to reassign HCPCS code C9740 from New Technology APC 1565 (New Technology—Level 28 ($5001-$5500)) to APC 5376 (Level 6 Urology and Related Services), and to reassign the status indicator for HCPCS code C9740 from ''T'' to ''J1.'' In addition, we proposed to continue to assign CPT codes 52441 and 52442 to status indicator ''B'' to indicate that these codes are not recognized by OPPS when submitted on a hospital outpatient Part B bill type (12x and 13x). As we discussed in the CY 2015 OPPS/ASC final rule with comment period (79 FR 66853 through 66854), we do not recognize CPT codes 52441 and 52442 because the code descriptors do not accurately capture the number of implants typically provided in a hospital outpatient or ASC setting.

TABLE 22—PROPOSED CY 2017 STATUS INDICATOR (SI), APC ASSIGNMENTS, AND PAYMENT RATES FOR THE TRANSPROSTATIC URETHRAL IMPLANT PROCEDURES

CPT/HCPCS code	Long descriptors	CY 2016 OPPS SI	CY 2016 OPPS APC	CY 2016 OPPS payment rate	Proposed CY 2017 OPPS SI	Proposed CY 2017 OPPS APC	Proposed CY 2017 OPPS payment rate
C9739	Cystourethroscopy, with insertion of transprostatic implant; 1 to 3 implants.	J1	5375	$3,393.73	J1	5375	$3,460.41
C9740	Cystourethroscopy, with insertion of transprostatic implant; 4 or more implants.	T	1565	5,250.00	J1	5376	7,389.67
52441	Cystourethroscopy, with insertion of permanent adjustable transprostatic implant; single implant.	B	N/A	N/A	B	N/A	N/A
52442	Cystourethroscopy, with insertion of permanent adjustable transprostatic implant; each additional permanent adjustable transprostatic implant (list separately in addition to code for primary procedure).	B	N/A	N/A	B	N/A	N/A

Comment: One commenter expressed concern with the proposed reassignment of HCPCS code C9740 to APC 5376. The commenter stated that the reassignment may not be aligned with the current clinical homogeneity of other procedures assigned to APC 5376 because the procedure described by HCPCS code C9740 is performed through a natural orifice (urethra) and can be performed with local anesthesia. To ensure clinical homogeneity within APC 5376, the commenter requested that CMS reevaluate the appropriate APC assignment for HCPCS code C9740.

Response: As we do every year, we review the APC assignments for all services and items paid under the OPPS. Based on resource and clinical homogeneity, we believe that HCPCS code C9740 is more appropriately assigned to the Urology and Related Services APC series. We reviewed the procedures assigned to the Urology and Related Services APCs and, based on its resource cost and clinical homogeneity, we determined that HCPCS code C9740 most appropriately aligns with the other procedures in the Level 6 APC within the Urology and Related Services APC grouping.

For the proposed rule, our claims data showed a geometric mean cost of approximately $6,312 for HCPCS code C9740 based on 585 single claims (out of 606 total claims), which is relatively similar to the geometric mean cost of approximately $7,723 for APC 5376. We believe that neither APC 5375 (Level 5 Urology and Related Services), whose geometric mean cost is approximately $3,617 or APC 5377 (Level 7 Urology and Related Services), whose geometric mean cost is approximately $15,377, would have been appropriate APC assignments. When compared to the geometric mean cost of $6,312 for HCPCS code C9740, an APC assignment to APC 5375 would underpay for the procedure, while an APC assignment to APC 5377 would overpay for the service. For the final rule with comment period, our updated claims data showed a similar pattern. Specifically, our analysis showed a geometric mean cost of approximately $6,167 for HCPCS code C9740 based on 691 single claims (out of 701 total claims), which is comparable to the geometric mean cost of approximately $7,661 for APC 5376. We believe that an APC assignment to either APC 5375, whose geometric mean cost is approximately $3,581 or APC 5377, whose geometric mean cost is approximately $14,764, would be inappropriate. Based on the updated claims data for the final rule with comment period, we believe that APC 5376 is the most appropriate APC assignment for HCPCS code C9740 based on its clinical homogeneity and resource cost compared to the other procedures within this APC.

Comment: Several commenters agreed with CMS' proposal to continue to assign HCPCS code C9739 to APC 5375 and to reassign HCPCS code C9740 to APC 5376 for CY 2017. The commenters requested that CMS finalize the proposal.

Response: We appreciate the commenters' support. After consideration of the public comments we received, we are adopting as final, without modification, the proposed APC and status indicator assignments for HCPCS codes C9739 and C9740, and CPT codes 52441 and 52442 for CY 2017. Table 23 below lists the final status indicator and APC assignments and payment rates for the transprostatic urethral implant procedures for CY 2017. We refer readers to Addendum B of this final rule with comment period for the payment rates for all codes reportable under the OPPS. Addendum B is available via the Internet on the CMS Web site.

9. Other Procedures and Services

a. Cryoablation Procedures (APCs 5114, 5361, 5362, and 5432)

As part of our standard annual OPPS update process, we review each APC assignment for the clinical similarity and resource homogeneity of the procedures assigned to each APC. Based on our analysis of the hospital outpatient claims data used for the proposed rule, we made some modifications to the APC assignments of certain cryoablation procedures. Specifically, for the CY 2017 OPPS update, we proposed to delete APC 5352 (Level 2 Percutaneous Abdominal/Biliary Procedures and Related Procedures), and reassign the cryoablation procedures that were previously assigned to this APC to APC 5361 (Level 1 Laparoscopy and Related Services). As shown in Table 24 below, and as listed in Addendum B of the CY 2017 OPPS/ASC proposed rule, we proposed to reassign CPT codes 20983, 47383, 50593, and 0340T from APC 5352 to APC 5361. Through our continuing efforts to simplify the APCs through consolidation and to improve clinical and resource homogeneity for the APCs, we believe that these cryoablation procedures that were previously assigned to APC 5352 would be more appropriately assigned to APC 5361 based on their geometric mean costs for the CY 2017 OPPS update. Further, we believe that the proposed revision appropriately categorized these cryoablation procedures in APC 5361 based on clinical coherence and resource costs compared to the other procedures in the same APC.

TABLE 24—PROPOSED CY 2017 STATUS INDICATORS (SI), APC ASSIGNMENTS, AND PAYMENT RATES FOR CERTAIN CRYOABLATION PROCEDURES

CPT/HCPCS code	Long descriptors	CY 2016 OPPS SI	CY 2016 OPPS APC	CY 2016 OPPS payment rate	Proposed CY 2017 OPPS SI	Proposed CY 2017 OPPS APC	Proposed CY 2017 OPPS payment rate
20983	Ablation therapy for reduction or eradication of 1 or more bone tumors (*e.g.,* metastasis) including adjacent soft tissue when involved by tumor extension, percutaneous, including imaging guidance when performed; cryoablation.	T	5352	$4,118.23	J1	5361	$4,178.33
47383	Ablation, 1 or more liver tumor(s), percutaneous, cryoablation.	T	5352	4,118.23	J1	5361	4,178.33
50593	Ablation, renal tumor(s), unilateral, percutaneous, cryotherapy.	T	5352	4,118.23	J1	5361	4,178.33
0340T	Ablation, pulmonary tumor(s), including pleura or chest wall when involved by tumor extension, percutaneous, cryoablation, unilateral, includes imaging guidance.	T	5352	4,118.23	J1	5361	4,178.33
0440T	Ablation, percutaneous, cryoablation, includes imaging guidance; upper extremity distal/peripheral nerve.	J1	5361	4,001.15	J1	5361	4,178.33
0441T	Ablation, percutaneous, cryoablation, includes imaging guidance; lower extremity distal/peripheral nerve.	J1	5361	4,001.15	J1	5361	4,178.33

TABLE 24—PROPOSED CY 2017 STATUS INDICATORS (SI), APC ASSIGNMENTS, AND PAYMENT RATES FOR CERTAIN CRYOABLATION PROCEDURES—Continued

CPT/HCPCS code	Long descriptors	CY 2016 OPPS SI	CY 2016 OPPS APC	CY 2016 OPPS payment rate	Proposed CY 2017 OPPS SI	Proposed CY 2017 OPPS APC	Proposed CY 2017 OPPS payment rate
0442T	Ablation, percutaneous, cryoablation, includes imaging guidance; nerve plexus or other truncal nerve (*e.g.,* brachial plexus, pudendal nerve).	T	5352	4,118.23	J1	5361	4,178.33

Comment: One commenter expressed concern with the proposed assignment of the kidney, lung, liver, bone and nerve cryoablation procedures, specifically, the procedure codes listed in Table 24, to APC 5361. The commenter stated that APC 5361 does not appropriately reflect the clinical nature of the procedures and inadequately recognizes the resources needed to perform the services. The commenter further stated that reassigning the procedures previously assigned to APC 5361 results in a lack of clinical coherence because the APC would include various diagnostic and therapeutic procedures that consist of a wide range of anatomic systems with disparate costs. Consequently, the commenter urged CMS to reevaluate the APC assignments for the cryoablation procedures listed in Table 24, and suggested that CMS either create a new APC that includes both the cryoablation and radiofrequency ablation procedures, or reassign the procedures to APCs that groups the ablation procedures with other clinically similar procedures.

Response: We reviewed the updated CY 2015 hospital outpatient claims data used for this final rule with comment period. Based on our review, we agree with the commenter that some of these procedures should be reassigned to more appropriate APCs. First, although we have no claims data for CPT codes 0440T, 0441T, and 0442T because these codes are new for CY 2016, we believe that these procedures more appropriately align, based on clinical characteristics, with the procedures in APC 5432 (Level 2 Nerve Procedures). Therefore, we are reassigning CPT codes 0440T, 0441T, and 0442T to APC 5432 for CY 2017. Secondly, based on our analysis, we found a geometric mean of approximately $5,416 for CPT code 20983 based on 98 single claims (out of 100 total claims), which is similar to the geometric mean of approximately $5,367 for APC 5114. Therefore, we are reassigning CPT code 20983 to APC 5114. In addition, we found a geometric mean cost of approximately $5,944 for CPT code 50593 based on 1,811 single claims (out of 1,823 total claims). Furthermore, a high percentage of CPT code 50593 cases were complexity adjusted to APC 5362 in the proposed rule. Given that the geometric mean cost of CPT code 50593 is at the very top of the geometric mean cost range for APC 5361 and the need for a complexity adjustment for many of the cases into APC 5362, we are reassigning CPT code 50593 to APC 5362 for CY 2017. In addition, our analysis of the final rule with comment period data showed a geometric mean costs for CPT codes 0340T (approximately $5,519) and 47383 (approximately $5,178) indicates that the proposed rule assignment to APC 5361 for these cryoablation procedures is appropriate because their geometric mean costs are closer to the geometric mean cost of APC 5361 (approximately $4,316) than to the geometric mean cost of APC 5362 (approximately $7,164).

After consideration of the public comment we received, we are adopting as final, without modification, the proposal to assign CPT codes 0340T and 47383 to APC 5361. However, we are modifying our proposal and reassigning CPT codes 0440T, 0441T, 0442T, 20983, and 50593 to the final APCs listed in Table 25 below. Table 25 shows the final status indicator, APC assignments, and payment rates for the cryoablation procedures for CY 2017. We refer readers to Addendum B of this final rule with comment period for the payment rates for all codes reportable under the OPPS. Addendum B is available via the Internet on the CMS Web site.

TABLE 25—FINAL CY 2017 STATUS INDICATOR (SI), APC ASSIGNMENTS, AND PAYMENT RATES FOR CERTAIN CRYOABLATION PROCEDURES

CPT/HCPCS code	Long descriptors	CY 2016 OPPS SI	CY 2016 OPPS APC	CY 2016 OPPS payment rate	Final CY 2017 OPPS SI	Final CY 2017 OPPS APC	Final CY 2017 OPPS payment rate
20983	Ablation therapy for reduction or eradication of 1 or more bone tumors (*e.g.,* metastasis) including adjacent soft tissue when involved by tumor extension, percutaneous, including imaging guidance when performed; cryoablation.	T	5352	$4,118.23	J1	5114	$5,219.36
47383	Ablation, 1 or more liver tumor(s), percutaneous, cryoablation.	T	5352	4,118.23	J1	5361	4,197.36
50593	Ablation, renal tumor(s), unilateral, percutaneous, cryotherapy.	T	5352	4,118.23	J1	5362	6,966.89

TABLE 25—FINAL CY 2017 STATUS INDICATOR (SI), APC ASSIGNMENTS, AND PAYMENT RATES FOR CERTAIN CRYOABLATION PROCEDURES—Continued

CPT/HCPCS code	Long descriptors	CY 2016 OPPS SI	CY 2016 OPPS APC	CY 2016 OPPS payment rate	Final CY 2017 OPPS SI	Final CY 2017 OPPS APC	Final CY 2017 OPPS payment rate
0340T	Ablation, pulmonary tumor(s), including pleura or chest wall when involved by tumor extension, percutaneous, cryoablation, unilateral, includes imaging guidance.	T	5352	4,118.23	J1	5361	4,197.36

0441T	Ablation, percutaneous, cryoablation, includes imaging guidance; lower extremity distal/peripheral nerve.	J1	5361	4,001.15	J1	5432	4,150.11
0442T	Ablation, percutaneous, cryoablation, includes imaging guidance; nerve plexus or other truncal nerve (*e.g.,* brachial plexus, pudendal nerve).	T	5352	4,118.23	J1	5432	4,150.11

b. Comprehensive Dialysis Circuit Procedures (APCs 5181, 5192, and 5193)

For CY 2017, the AMA CPT Editorial Panel deleted CPT codes 36147 and 36148 and replaced them with nine new codes, effective January 1, 2017. Table 26 below list the complete descriptors for the deleted and replacement codes. We note that the deleted and replacement codes were listed in Addendum B and Addendum O to the CY 2017 OPPS/ASC proposed rule. Addendum B listed the proposed status indicator assignments for the replacement codes and assigned them to comment indicator ''NP'' (New code for the next calendar year or existing code with substantial revision to its code descriptor in the next calendar year as compared to current calendar year, proposed APC assignment; comments will be accepted on the proposed APC assignment for the new code.), while Addendum O listed the placeholder/proposed CY 2017 CPT codes and their long descriptors.

TABLE 26—CODING CHANGES FOR THE DIALYSIS CIRCUIT PROCEDURES EFFECTIVE JANUARY 1, 2017

Placeholder/ proposed CY 2017 CPT code	Final CY 2017 CPT code	Long descriptors
36147	36147	Introduction of needle and/or catheter, arteriovenous shunt created for dialysis (graft/fistula); initial access with complete radiological evaluation of dialysis access, including fluoroscopy, image documentation and report (includes access of shunt, injection[s] of contrast, and all necessary imaging from the arterial anastomosis and adjacent artery through entire venous outflow including the inferior or superior vena cava.
36148	36148	Introduction of needle and/or catheter, arteriovenous shunt created for dialysis (graft/fistula); additional access for therapeutic intervention (list separately in addition to code for primary procedure).
369X1	36901	Introduction of needle(s) and/or catheter(s), dialysis circuit, with diagnostic angiography of the dialysis circuit, including all direct puncture(s) and catheter placement(s), injection(s) of contrast, all necessary imaging from the arterial anastomosis and adjacent artery through entire venous outflow including the inferior or superior vena cava, fluoroscopic guidance, radiological supervision and interpretation and image documentation and report.
369X2	36902	Introduction of needle(s) and/or catheter(s), dialysis circuit, with diagnostic angiography of the dialysis circuit, including all direct puncture(s) and catheter placement(s), injection(s) of contrast, all necessary imaging from the arterial anastomosis and adjacent artery through entire venous outflow including the inferior or superior vena cava, fluoroscopic guidance, radiological supervision and interpretation and image documentation and report; with transluminal balloon angioplasty, peripheral dialysis segment, including all imaging and radiological supervision and interpretation necessary to perform the angioplasty.
369X3	36903	Introduction of needle(s) and/or catheter(s), dialysis circuit, with diagnostic angiography of the dialysis circuit, including all direct puncture(s) and catheter placement(s), injection(s) of contrast, all necessary imaging from the arterial anastomosis and adjacent artery through entire venous outflow including the inferior or superior vena cava, fluoroscopic guidance, radiological supervision and interpretation and image documentation and report; with transcatheter placement of intravascular stent(s) peripheral dialysis segment, including all imaging and radiological supervision and interpretation necessary to perform the stenting, and all angioplasty within the peripheral dialysis segment.
369X4	36904	Percutaneous transluminal mechanical thrombectomy and/or infusion for thrombolysis, dialysis circuit, any method, including all imaging and radiological supervision and interpretation, diagnostic angiography, fluoroscopic guidance, catheter placement(s), and intraprocedural pharmacological thrombolytic injection(s).

TABLE 26—CODING CHANGES FOR THE DIALYSIS CIRCUIT PROCEDURES EFFECTIVE JANUARY 1, 2017—Continued

Placeholder/ proposed CY 2017 CPT code	Final CY 2017 CPT code	Long descriptors
369X5	36905	Percutaneous transluminal mechanical thrombectomy and/or infusion for thrombolysis, dialysis circuit, any method, including all imaging and radiological supervision and interpretation, diagnostic angiography, fluoroscopic guidance, catheter placement(s), and intraprocedural pharmacological thrombolytic injection(s); with transluminal balloon angioplasty, peripheral dialysis segment, including all imaging and radiological supervision and interpretation necessary to perform the angioplasty.
369X6	36906	Percutaneous transluminal mechanical thrombectomy and/or infusion for thrombolysis, dialysis circuit, any method, including all imaging and radiological supervision and interpretation, diagnostic angiography, fluoroscopic guidance, catheter placement(s), and intraprocedural pharmacological thrombolytic injection(s); with transcatheter placement of an intravascular stent(s), peripheral dialysis segment, including all imaging and radiological supervision and interpretation necessary to perform the stenting, and all angioplasty within the peripheral dialysis circuit.
369X7	36907	Transluminal balloon angioplasty, central dialysis segment, performed through dialysis circuit, including all imaging and radiological supervision and interpretation required to perform the angioplasty (List separately in addition to code for primary procedure).
369X8	36908	Transcatheter placement of an intravascular stent(s), central dialysis segment, performed through dialysis circuit, including all imaging radiological supervision and interpretation required to perform the stenting, and all angioplasty in the central dialysis segment (List separately in addition to code for primary procedure).
369X9	36909	Dialysis circuit permanent vascular embolization or occlusion (including main circuit or any accessory veins), endovascular, including all imaging and radiological supervision and interpretation necessary to complete the intervention (List separately in addition to code for primary procedure).

As shown in Table 27 below, and as listed in Addendum B of the CY 2017 OPPS/ASC proposed rule, we proposed to package payment for some of these new CY 2017 CPT codes and to also assign the procedures to APC 5181 (Level 1 Vascular Procedures), 5192 (Level 2 Endovascular Procedures), 5193 (Level 3 Endovascular Procedures), or 5194 (Level 2 Endovascular Procedures). Specifically, we proposed to assign CPT code 369X1 (CY 2017 CPT code 36901) to APC 5181, CPT codes 396X2 (CY 2017 CPT code 36902) and 369X4 (CY 2017 CPT code 36904) to APC 5192, CPT codes 396X3 (CY 2017 CPT code 36903) and 369X5 (CY 2017 CPT code 36905) to APC 5193, and CPT code 369X6 (CY 2017 CPT code 36906) to APC 5194. In addition, we proposed to assign CPT codes 369X7 (CY 2017 CPT code 36907), 369X8 (CY 2017 CPT code 36908), and 369X9 (CY 2017 CPT code 36909) to status indicator ''N'' (Items and Services Packaged into APC Rates) to indicate that these service are paid under OPPS. However, their payment is packaged into the payment for other services.

369X9	36909	Dialysis circuit embolj	N/A	N/A	N/A	N	N/A	N/A

Comment: One commenter agreed with the proposed APC assignments for CPT codes 36902, 36903, 36905, and 36906, and requested that CMS finalize the proposal. However, this commenter disagreed with the proposed APC assignment for CPT code 36904 and the proposed status indicator assignment for CPT codes 36907, 36908, and 36909. In particular, the commenter believed that the proposed assignment of APC 5192 fails to reflect the clinical complexity and resource costs associated with performing the procedure described by CPT code 36904. The commenter recommended that CMS assign CPT code 36904 to APC 5193 based on its clinical and resource homogeneity to the other procedures in this APC. In addition, the commenter disagreed with the packaging of payment for services described by CPT codes 36907, 36908, and 36909 because these procedures involve substantial device costs. As an interim measure, the commenter recommended that the procedure codes be assigned to New Technology APC 1564 (New Technology—Level 27 ($4501-$5000), with a status indicator of ''S'' (Procedure or Service, Not Discounted When Multiple. Paid under OPPS; separate APC payment.), until sufficient claims data is available on which to base assignment of the new codes to a more appropriate clinical APC. If CMS continued to believe that

the New Technology APC assignment is inappropriate, the commenter urged CMS to create a composite APC for the dialysis circuit CPT codes.

Response: We appreciate the commenter's support for the proposed APC assignments for CPT codes 36902, 36903, 36905, and 36906. We are finalizing our proposal for these codes. However, with respect to the proposed assignment of CPT code 36904, we believe that, based on its similarity to the other procedures in APC 5192, and a comparison to other codes in this series we believe that APC 5192 is the most appropriate APC for this procedure. In addition, because CPT codes 36907, 36908, and 36909 are add-on codes, we assigned these codes to a status indicator that indicates packaged payment status. Because of our packaging policy for add-on codes, we would not consider these codes for a composite APC. We note that since January 1, 2014, payment for services described by add-on codes have been packaged under the hospital OPPS. As we do every year for all items and services under OPPS, we will reevaluate the APC assignments for these services in the CY 2018 OPPS rulemaking.

In summary, after consideration of the public comment received, we are finalizing our proposal, without modification, to assign the dialysis circuit procedures to the APC and status indicators listed in Table 28 below. Table 28 shows the final status indicator, APC assignments, and payment rates for the dialysis circuit services for CY 2017. We refer readers to Addendum B of this final rule with comment period for the payment rates for all codes reportable under the OPPS. Addendum B is available via the Internet on the CMS Web site.

TABLE 28—FINAL CY 2017 STATUS INDICATOR (SI), APC ASSIGNMENTS, AND PAYMENT RATES FOR THE DIALYSIS CIRCUIT PROCEDURES

Proposed CY 2017 CPT code	Final CY 2017 CPT code	Short descriptors	CY 2016 OPPS SI	CY 2016 OPPS APC	CY 2016 OPPS payment rate	Final CY 2017 OPPS SI	Final CY 2017 OPPS APC	Final CY 2017 OPPS payment rate

c. Blood Product Exchange and Related Services (APCs 5241 and 5242)

For CY 2017, we proposed to assign CPT code 36456 (Partial exchange transfusion, blood, plasma or crystalloid necessitating the skill of a physician or other qualified health care professional, newborn) (described as code 364X1 in the proposed rule) to APC 5241 (Level 1 Blood Product Exchange and Related Services), with a proposed mean geometric mean cost of approximately $364.

Comment: One commenter disagreed with the CMS proposal to assign CPT code 36456 to APC 5241. The commenter stated that APC 5182 (Level 2 Vascular Procedures) is a more appropriate APC assignment because of the clinical similarity and similar resource intensity to other services assigned to APC 5182.

Response: We disagree with the commenter's statement. We do not believe that the procedure described by CPT code 36456 is comparable to the services in APC 5182 in terms of resource intensity or clinical similarity. We do believe that CPT code 36456 is similar to the other services assigned to APC 5241, such as CPT code 36450 (Exchange transfusion, blood; newborn). When claims data become available for this new code, we will consider if assignment to another APC is appropriate. After consideration of the public comment we received, we are finalizing our proposal to assign CPT code 36456 to APC 5241.

Comment: For CY 2017, we proposed to assign CPT codes 38230 (Bone marrow harvesting for transplantation; allogeneic), 38241 (Hematopoietic progenitor cell (HPC); autologous transplantation, 38242 (Allogeneic lymphocyte infusions) and 38243 (HPC Boost) to APC 5242 (Level 2 Blood Product Exchange and Related Services). This APC has a proposed CY 2017 geometric mean cost of approximately $1,129. One commenter stated that the proposed payment rate of approximately $1,078 for this APC was a 66 percent decrease in payment from the final CY 2016 payment rate. The commenter also noted that the services in this APC were not likely to be submitted on a single procedure claim and, as a result, the CMS ratesetting methodology may be based on incorrectly coded claims. In addition, the commenter requested that CMS consider the use of C–APCs to provide for payment for low-volume, clinically significant services.

Response: The commenter is correct that each of these services represent a low volume in the OPPS. The geometric mean cost for each of the codes is within the geometric mean cost range ($1,111 to $1,518) for significant services assigned to APC 5242. We will monitor these claims and determine if any future adjustment to the methodology (such as the C–APC methodology) would be more appropriate.

d. Magnetic Resonance-Guided Focused Ultrasound Surgery (MRgFUS) (APCs 1537, 5114, and 5414)

Currently, there are four CPT/HCPCS codes that describe magnetic resonance image guided high intensity focused ultrasound (MRgFUS) procedures. These codes include CPT codes 0071T, 0072T, and 0398T, and HCPCS code C9734. CPT codes 0071T and 0072T are used for the treatment of uterine fibroids, CPT code 0398T is used for the treatment of essential tremor, and HCPCS code C9734 is used for pain palliation for metastatic bone cancer.

As shown in Table 29 below, and as listed in Addendum B of the CY 2017 OPPS/ASC proposed rule, we proposed to continue to assign CPT codes 0071T and 0072T to APC 5414, with a payment

rate of approximately $2,074. We also proposed to reassign the APC's status indicator to ''J1'' (Hospital Part B services paid through a comprehensive APC) to indicate that all covered Part B services on the claim are packaged with the payment for the primary ''J1'' service for the claim, except for services assigned to OPPS status indicator ''F,'' ''G,'' ''H,'' ''L'' and ''U''; ambulance services; diagnostic and screening mammography; all preventive services; and certain Part B inpatient services. In addition, we proposed to reassign HCPCS code C9734 from APC 5122 (Level 2 Musculoskeletal Procedures) to APC 5114 (Level 4 Musculoskeletal Procedures), with a payment rate of approximately $5,199. We also proposed to reassign the HCPCS code's status indicator from ''T'' to ''J1.''

Further, we proposed to reassign CPT code 0398T from a nonpayable status indicator, specifically, ''E'' (Not paid by Medicare when submitted on outpatient claims (any outpatient bill type)) to a separately payable APC, specifically, APC 5462 (Level 2 Neurostimulator and Related Procedures), with a payment rate of approximately $5,840. We note that APC 5462 is assigned to status indicator ''J1.'' This APC assignment was based on a comparison to a similar procedure, specifically, HCPCS code C9734, with a geometric mean cost of approximately $8,565 based on 9 single claims (out of 9 total claims). The MRgFUS equipment used in the performance of the procedure described by CPT code 0398T is very similar to the MRgFUS equipment used in the performance of the procedure described by HCPCS code C9734. Both machines are manufactured by the same manufacturer.

TABLE 29—PROPOSED CY 2017 STATUS INDICATOR (SI), APC ASSIGNMENTS, AND PAYMENT RATES FOR THE MAGNETIC RESONANCE IMAGE GUIDED HIGH INTENSITY FOCUSED ULTRASOUND (MRgFUS) PROCEDURES

CPT/HCPCS code	Long descriptor	CY 2016 OPPS SI	CY 2016 OPPS APC	CY 2016 OPPS payment rate	Proposed CY 2017 OPPS SI	Proposed CY 2017 OPPS APC	Proposed CY 2017 OPPS payment rate
0071T	Focused ultrasound ablation of uterine leiomyomata, including mr guidance; total leiomyomata volume less than 200 cc of tissue.	T	5414	$1,861.18	J1	5414	$2,074.22
0072T	Focused ultrasound ablation of uterine leiomyomata, including mr guidance; total leiomyomata volume greater or equal to 200 cc of tissue.	T	5414	1,861.18	J1	5414	2,074.22
0398T	Magnetic resonance image guided high intensity focused ultrasound (mrgfus), stereotactic ablation lesion, intracranial for movement disorder including stereotactic navigation and frame placement when performed.	E	N/A	N/A	J1	5462	5,839.83
C9734	Focused ultrasound ablation/therapeutic intervention, other than uterine leiomyomata, with magnetic resonance (mr) guidance.	T	5122	2,395.59	J1	5114	5,199.03

Comment: All of the commenters disagreed with the proposed assignment of CPT code 0398T to APC 5462 for CY 2017. The commenters stated that the proposed payment severely underestimates the resources required to provide the treatment. Some commenters indicated that compared to HCPCS code C9734, which requires only one physician and 3 hours of MRI time, the resources for CPT code 0398T is significantly greater and requires the services of a multidisciplinary staff (including a neurosurgeon and a radiologist), as well as 6 hours of MRI time. Several commenters indicated that MRgFUS for essential tremor is a better alternative to deep brain stimulation (DBS) because there is no risk of infection or implanted hardware, no need for multiple hospital outpatient visits or postoperative programming sessions, and lower cost because there is no battery to surgically remove and replace every few years. Some commenters pointed out that the cost of providing a DBS procedure is between $40,000 and $50,000, while the MRgFUS procedure costs approximately $20,000. One commenter stated that the capital equipment used in the performance of the procedure described by CPT code 0398T is more costly, at approximately $2 million, compared to the capital equipment used in the performance of the procedure described by HCPCS C9734, which is approximately $750,000. The commenter also stated that CPT code 0398T uses additional equipment (for example, stereotactic head frame) and supplies resulting in higher costs for the procedure. Several commenters expressed concern that the proposed payment for CPT code 0398T is inadequate to cover the hospital cost of providing the service and recommended that CMS reassign CPT code 0398T to either a more appropriate APC that reflects the cost of providing the treatment, or to APC 5463 (Level 3 Neurostimulator and Related Procedures). Some commenters suggested that a low reimbursement rate for the procedure could jeopardize Medicare access to this emerging technology.

Response: CPT code 0398T is a new code for CY 2016. Therefore, we do not have available claims data for the CY 2017 ratesetting. HCPCS code C9734 describes a similar service that uses the same MRgFUS technology, and as noted above, has a geometric mean cost of $8,565. However, the manufacturer has indicated that the essential tremor MRgFUS service uses a more costly version of the MRgFUS equipment, takes longer, and uses some additional supplies and equipment, which makes the procedure described by CPT code 0398T more costly than the procedure described by HCPCS code C9734. We believe that the procedure described by CPT code 0398T can also be compared

to the procedure described by CPT code 77371 (Radiation treatment delivery, stereotactic radiosurgery (SRS), complete course of treatment of cranial lesions(s) consisting of 1 session; multi-source Cobalt-60 based). In particular, both procedures use capital equipment of approximately equal cost, both employ a stereotactic head frame to treat intracranial lesions, and both require similar staffing. CPT code 77371 is assigned to APC 5627 (Level 7 Radiation Therapy), with a final payment rate of approximately $7,453. The final geometric mean cost of CPT code 77371 is $10,105. We believe that the geometric mean cost of CPT code 77371 provides an indication of the initial payment rate for CPT code 0398T relative to the related service described by HCPCS code C9734, for which we have some claims data. Consequently, because there is no clinical APC that contains clinically similar and resource-cost similar services, we believe that the most appropriate initial assignment for CPT code 0398T is APC 1537 (New Technology—Level 37 ($9501-$10000)), which has a final payment rate of approximately $9,751. The assignment to APC 1537 will result in a 67-percent increase in the CY 2017 payment rate compared to the $5,840 proposed payment rate. It is also significantly above the payment rate of approximately $5,219 for HCPCS code C9734, to which CPT code 0398T is comparable but according to the commenters is more costly.

Finally, we remind hospitals that, as we do every year, we review the APC assignments for all services and items paid under the OPPS. We will reevaluate the APC assignment for CPT code 0398T once we have claims data for this service.

Comment: One commenter supported CMS' proposal to reassign HCPCS code C9734 to APC 5114, and requested that CMS finalize the proposal.

Response: We appreciate the commenter's support.

After consideration of the public comments we received, we are modifying our proposal and reassigning CPT code 0398T to APC 1537 for CY 2017. In addition, we are finalizing our proposal, without modification, to reassign HCPCS code C9734 to APC 5114. Because we did not receive any public comments related to CPT codes 0071T and 0072T, we are finalizing our proposal, without modification, to continue to assign these codes to APC 5414. Table 30 below shows the final status indicator and APC assignments and payment rates for the MRgFUS procedures for CY 2017. We refer readers to Addendum B of this final rule with comment period for the payment rates for all codes reportable under the OPPS. Addendum B is available via the Internet on the CMS Web site.

TABLE 30—FINAL CY 2017 STATUS INDICATOR (SI), APC ASSIGNMENTS, AND PAYMENT RATES FOR THE MAGNETIC RESONANCE IMAGE GUIDED HIGH INTENSITY FOCUSED ULTRASOUND (MRgFUS) PROCEDURES

CPT/HCPCS code	Long descriptors	CY 2016 OPPS SI	CY 2016 OPPS APC	CY 2016 OPPS payment rate	Final CY 2017 OPPS SI	Final CY 2017 OPPS APC	Final CY 2017 OPPS payment rate
0071T	Focused ultrasound ablation of uterine leiomyomata, including mr guidance; total leiomyomata volume less than 200 cc of tissue.	T	5414	$1,861.18	J1	5414	$2,084.59
0072T	Focused ultrasound ablation of uterine leiomyomata, including mr guidance; total leiomyomata volume greater or equal to 200 cc of tissue.	T	5414	1,861.18	J1	5414	2,084.59
0398T	Magnetic resonance image guided high intensity focused ultrasound (mrgfus), stereotactic ablation lesion, intracranial for movement disorder including stereotactic navigation and frame placement when performed.	E	N/A	N/A	S	1537	9,750.50
C9734	Focused ultrasound ablation/therapeutic intervention, other than uterine leiomyomata, with magnetic resonance (mr) guidance.	T	5122	2,395.59	J1	5114	5,219.36

e. Neulasta® On-Body Injector

As listed in Addendum B of the CY 2017 OPPS/ASC proposed rule, we proposed to assign new CY 2017 CPT code 96377 (Application of on-body injector (includes cannula insertion) for timed subcutaneous injection) to status indicator ''N'' (Items and Services Packaged into APC Rates) to indicate that the service is paid under OPPS; however, its payment is packaged into the payment for other services. We note that CPT code 93677 was listed as placeholder CPT code 963XX in both Addendum B and O of the CY 2017 OPPS/ASC proposed rule. Addendum B listed the short descriptor with the proposed status indicator of ''N,'' while Addendum O listed the complete long descriptor under placeholder CPT code 963XX.

Comment: Some commenters disagreed with the proposed status indicator assignment of ''N'' for CPT code 963XX (CY 2017 CPT code 96377), and indicated that this is a primary service, not an add-on procedure, that represents a complete and unique drug administration service that a hospital performs for the subcutaneous administration of Neulasta® with the on-body injector. The commenters stated that the service is similar to the drug administration service described by CPT code 96372 (Therapeutic, prophylactic, or diagnostic injection (specify substance or drug); subcutaneous or intramuscular), which is assigned to APC 5692 (Level 2 Drug Administration) with a proposed payment rate of about $53. The commenters indicated that the difference between the procedure described by CPT code 96372 and CPT

code 96377 is the use of an on-body injector for CPT code 96377.

Response: We do not believe that the resources necessary to deliver the Neulasta® service warrants separate payment under the OPPS. Because payment for CPT code 96377 will be packaged, the payment for use of the on-body injector will be included in the payment for the primary service (for example, chemotherapy administration, clinic visit, among others) that is reported in conjunction with CPT code 96377. Furthermore, we believe that the packaged payment that includes payment for the use of the Neulasta® on-body injector adequately covers the costs of the service. After consideration of the public comments we received, we are adopting as final, without modification, the proposal to assign CPT code 96377 to status indicator ''N'' for CY 2017.

f. Smoking and Tobacco Use Cessation Counseling (APC 5821)

As shown in Table 31 below, and as listed in Addendum B of the CY 2017 OPPS/ASC proposed rule, we proposed to continue to assign CPT codes 99406 and 99407 to APC 5821 (Level 1 Health and Behavior Services), with a proposed payment rate of approximately $25. In addition, we proposed to delete HCPCS codes G0436 and G0437 because they were replaced with CPT codes 99406 and 99407. Specifically, we stated in the October 2016 Update, Change Request 9768, Transmittal 3602, dated August 26, 2016, that HCPCS codes G0436 and G0437 were deleted on September 30, 2016, because they were replaced with CPT codes 99406 and 99407, effective October 1, 2016.

TABLE 31—PROPOSED CY 2017 STATUS INDICATOR (SI), APC ASSIGNMENT, AND PAYMENT RATE FOR THE SMOKING AND TOBACCO USE CESSATION COUNSELING SERVICES

CPT/HCPCS code	Long descriptors	CY 2016 OPPS SI	CY 2016 OPPS APC	CY 2016 OPPS payment rate	Proposed CY 2017 OPPS SI	Proposed CY 2017 OPPS APC	Proposed CY 2017 OPPS payment rate
99406	Smoking and tobacco use cessation counseling visit; intermediate, greater than 3 minutes up to 10 minutes.	S	5821	$27.12	S	5821	$25.09
99407	Smoking and tobacco use cessation counseling visit; intensive, greater than 10 minutes.	S	5821	27.12	S	5821	25.09
G0436	Smoking and tobacco cessation counseling visit for the asymptomatic patient; intermediate, greater than 3 minutes, up to 10 minutes.	S	5821	27.12	D	.....	.....
G0437	Smoking and tobacco cessation counseling visit for the asymptomatic patient; intensive, greater than 10 minutes.	S	5822	69.65	D	.....	.....

Comment: One commenter expressed concern that the proposed payment rate for APC 5821 did not include the costs associated with HCPCS code G0437 because it was previously assigned to APC 5822. The commenter requested that CMS reevaluate the payment rate for APC 5821 and to include the claims data associated with HCPCS code G0437 in the calculation of the geometric mean cost for APC 5821. In addition, because the predecessor HCPCS code G0437 was previously assigned to APC 5822, the commenter believed that CPT code 99407 should also be assigned to the same APC. Moreover, the commenter urged CMS to crosswalk all deleted codes to the same APC assignment as their replacement codes when calculating APC payment rates during the transition.

Response: While we generally crosswalk the APC assignment of deleted codes to the same APC as its replacement code, we acknowledge that our calculation of the geometric mean cost for APC 5821 in the CY 2017 OPPS/ASC proposed rule did not include costs associated with HCPCS code G0437. We appreciate the commenter bringing this to our attention and have corrected this oversight in this final rule with comment period. In particular, we are assigning CPT codes 99406 and 99407, and HCPCS codes G0436 and G0437 to APC 5821 and are using the geometric mean costs of these procedures in determining the final payment rate for APC 5821. Based on our analysis of the updated claims data for this final rule with comment period, the geometric mean cost of approximately $32 for CPT code 99407 based on 2,859 single claims (out of 4,148 total claims) is relatively similar to the geometric mean cost of approximately $26 for APC 5821. We do not agree with the commenter that CPT code 99407 should be assigned to APC 5822 because its geometric mean cost of approximately $72 is more than twice the geometric mean cost of CPT code 94407. Therefore, based on the resource costs and similar characteristics to the other procedures within APC 5821, we believe that CPT code 99407 is more appropriately assigned to this APC.

Comment: One commenter expressed confusion regarding the reporting of CPT codes 99406 and 99407, and requested that CMS clarify whether these codes apply to both asymptomatic and symptomatic patients. The commenter noted that the descriptor of HCPCS codes G0436 and G0437 specifically described services for the asymptomatic patient. However, the commenter indicated that this distinction is not included in the code descriptors for CPT codes 99406 and 99407.

Response: While not explicit in their code descriptors, CPT codes 99406 and 99407 apply to both asymptomatic and symptomatic patients. We note that the more recent preventive service policy related to these codes can be found in section 210.4.1 (Counseling to Prevent Tobacco Use (Effective August 25, 2010)) of the Medicare National Coverage Determination Manual, which is can be viewed on the CMS Web site at: *https://www.cms.gov/Regulations-and-Guidance/Guidance/Manuals/downloads/ncd103c1_part4.pdf*, as well as on the Medicare Coverage Database Web site at: *https://www.cms.gov/medicare-coverage-database/details/medicare-coverage-document-details.aspx?MCDId=32*. After consideration of the public comments we received, we

are finalizing our proposal, without modification, to continue to assign CPT codes 99406 and 99407 to APC 5821 for CY 2017. Table 32 below shows the final status indicator, APC assignment, and payment rate for CPT codes 99406 and 99407 for CY 2017. We refer readers to Addendum B of this final rule with comment period for the payment rates for all codes reportable under the OPPS. Addendum B is available via the Internet on the CMS Web site.

TABLE 32—FINAL CY 2017 STATUS INDICATOR (SI), APC ASSIGNMENT, AND PAYMENT RATE FOR THE SMOKING AND TOBACCO USE CESSATION COUNSELING SERVICES

CPT/HCPCS code	Long descriptors	CY 2016 OPPS SI	CY 2016 OPPS APC	CY 2016 OPPS payment rate	Final CY 2017 OPPS SI	Final CY 2017 OPPS APC	Final CY 2017 OPPS payment rate
99406	Smoking and tobacco use cessation counseling visit; intermediate, greater than 3 minutes up to 10 minutes.	S	5821	$27.12	S	5821	$25.22
99407	Smoking and tobacco use cessation counseling visit; intensive, greater than 10 minutes.	S	5821	27.12	S	5821	25.22
G0436	Smoking and tobacco cessation counseling visit for the asymptomatic patient; intermediate, greater than 3 minutes, up to 10 minutes.	S	5821	27.12	D	.....	.....
G0437	Smoking and tobacco cessation counseling visit for the asymptomatic patient; intensive, greater than 10 minutes.	S	5822	69.65	D	.....	.....

g. Radiofrequency Ablation of Uterine Fibroids (APC 5362)

For CY 2017, the AMA CPT Editorial Panel deleted CPT code 0336T (Laparoscopy, surgical, ablation of uterine fibroid(s), including intraoperative ultrasound guidance and monitoring, radiofrequency) and replacing it with CPT code 58674 (Laparoscopy, surgical, ablation of uterine fibroid(s) including intraoperative ultrasound guidance and monitoring, radiofrequency), effective January 1, 2017. We proposed to assign CPT code 58674 to APC 5362 (Level 2 Laparoscopy and Related Services), which is the same APC assignment for the predecessor CPT code 0336T. We note that CPT code 58674 was listed as placeholder CPT code 585X1 in both Addendum B and O of the CY 2017 OPPS/ASC proposed rule. Addendum B listed the short descriptor with the proposed APC assignment and payment rate, while Addendum O listed the complete long descriptor under placeholder CPT code 585X1. We note that both Addendum B and O also assigned this code to comment indicator ''NP'' to indicate that we would be accepting comments on the proposed APC assignment for the new code.

Comment: One commenter agreed with the proposed APC assignment for new CY 2017 CPT code 58674 to APC 5362 and stated that the assignment is consistent with the APC assignment for its predecessor code (CPT code 0336T). The commenter indicated that the resources required to furnish the service described by CPT code 58674 is similar to the resources of the other procedures assigned to APC 5362. Consequently, the commenter urged CMS to finalize the proposal.

Response: We appreciate the commenter's support. As noted by the commenter, we assigned new CY 2017 CPT code 58674 to APC 5362 based on its similarity to the other procedures within this APC.

After consideration of the public comment we received, we are finalizing our proposal, without modification, to assign CPT code 58674 to APC 5362. The final status indicator, APC assignment, and payment rate for CPT code 58674 can be found in Addendum B to this final rule with comment period (which is available via the Internet on the CMS Web site).

h. Intrapulmonary Surfactant Administration (APC 5791)

As listed in Addendum B of the CY 2017 OPPS/ASC proposed rule, we proposed to continue to assign CPT code 94610 (Intrapulmonary surfactant administration by a physician or other qualified health care professional through endotracheal tube) to APC 5791 (Pulmonary Treatment), with a proposed payment rate of approximately $161. We also proposed to continue to assign CPT code 94610 to OPPS status indicator ''Q1'' (STV-Packaged Codes) to indicate that the service is conditionally packaged.

Comment: One commenter disagreed with CMS' proposal to assign CPT code 94610 to OPPS status indicator ''Q1.'' The commenter indicated that this is a primary service, not an ancillary service as designated by the status indicator, and recommended that CMS reassign the CPT code to OPPS status indicator ''T'' (Procedure or Service, Multiple Procedure Reduction Applies. Paid under OPPS; separate APC payment).

Response: We believe that the commenter may have misunderstood the meaning of OPPS status indicator ''Q1.'' Assigning a procedure to OPPS status indicator ''Q1'' indicates that payment for the service is conditionally packaged under the OPPS. A criterion under the conditional packaging policy is that payment for a service is packaged when it is provided in combination with a significant procedure on the same date of service, but the service is separately paid when it is reported on the claim without a significant procedure. Addendum D1 to the CY 2017 OPPS/ASC proposed rule (which is available via the Internet on the CMS Web site) showed the definition of status indicator ''Q1.''

In the case of the procedure described by CPT code 94610, payment for this service is included in the payment for the significant procedure when it is reported in combination with HCPCS codes that are assigned to either status indicators ''S,'' ''T,'' or ''V.'' Alternatively, the service is separately paid when performed alone, or when reported in combination with HCPCS codes that described procedures assigned to a status indicator other than ''S,'' ''T,'' or ''V.'' In addition, assignment to OPPS status indicator

''Q1'' indicates that the service or procedure is assigned a composite APC payment when billed with specific combinations of services based on OPPS composite-specific payment criteria, and payment is packaged into a single payment for specific combinations of services. We disagree with the commenter that CPT code 94610 should be reassigned to OPPS status indicator ''T.'' Based on our understanding of the service, we believe that status indicator ''Q1'' is the most appropriate status indicator assignment for CPT code 94610 because the service is often provided in combination with other services on the same day.

After consideration of the public comment we received, we are finalizing our proposal, without modification, to continue to assign CPT code 94610 to APC 5791, and to assign status indicator ''Q1'' to the code for CY 2017. The complete list of the OPPS payment status indicators and their definitions for CY 2017 is displayed in Addendum D1 to this final rule with comment period, which is available on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices.html*. Further, we refer readers to Addendum B of this final rule with comment period for the payment rates for all codes reportable under the OPPS. Addendum B is available via the Internet on the CMS Web site.

i. Non-Contact Low Frequency Ultrasound (NLFU) Therapy (APC 5051)

As listed in Addendum B of the CY 2017 OPPS/ASC proposed rule, we proposed to continue to assign CPT code 97610 (Low frequency, non-contact, non-thermal ultrasound, including topical application(s), when performed, wound assessment, and instruction(s) for ongoing care, per day) to APC 5051 (Level 1 Skin Procedures), with a proposed payment rate of approximately $154. In addition, we proposed to continue to assign CPT code 97610 to OPPS status indicator ''Q1'' (STV-Packaged Codes) to indicate that the service is conditionally packaged.

Comment: One commenter disagreed with CMS' proposal to assign CPT code 97610 to OPPS status indicator ''Q1.'' The commenter indicated that this is a primary service, not an ancillary service, and providers frequently perform NLFU therapy as a standalone, independent procedure. The commenter further stated that CMS' proposed OPPS status indicator assignment of ''Q1'' contradicts AMA's guidance in the June 2014 CPT Assistant, which clearly describes the service as a standalone procedure. The commenter recommended that CMS reassign CPT code 97610 to OPPS status indicator ''T'' (Procedure or Service, Multiple Procedure Reduction Applies. Paid under OPPS; separate APC payment.).

Response: Assigning CPT code 97610 to OPPS status indicator ''Q1'' indicates that payment for the service is conditionally packaged under the OPPS. A criterion under the conditional packaging policy is that payment for a service is packaged when it is provided in combination with a significant procedure on the same date of service, but the service is separately paid when it is reported on the claim without a significant procedure. Addendum D1 to the CY 2017 OPPS/ASC proposed rule (which is available via the Internet on the CMS Web site) showed the definition of status indicator ''Q1.''

We note that payment for the procedure described by CPT code 97610 is included in the payment for the significant procedure when it is reported in combination with HCPCS codes that are assigned to any of status indicators ''S,'' ''T,'' or ''V.'' Alternatively, the service is separately paid when performed alone, or when reported in combination with HCPCS codes that describe procedures assigned to a status indicator other than ''S,'' ''T,'' or ''V.'' In addition, assignment to OPPS status indicator ''Q1'' indicates that the service or procedure is assigned a composite APC payment if billed with specific combinations of services based on OPPS composite-specific payment criteria, and payment is packaged into a single payment for specific combinations of services. Based on our understanding of the service, we believe that ''Q1'' is the most appropriate status indicator assignment for CPT code 97610 because the service is provided in combination with other services on the same day.

After consideration of the public comment we received, we are finalizing our proposal, without modification, to continue to assign CPT code 97610 to APC 5051 and to assign CPT code 97610 to OPPS status indicator ''Q1'' for CY 2017. The complete list of the OPPS payment status indicators and their definitions for CY 2017 is displayed in Addendum D1 to this final rule with comment period, which is available on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices.html*. Further, we refer readers to Addendum B of this final rule with comment period for the payment rates for all codes reportable under the OPPS. Addendum B is available via the Internet on the CMS Web site.

j. Pulmonary Rehabilitation Services (APCs 5732 and 5733)

Currently, there are four HCPCS codes that describe pulmonary rehabilitation services, specifically, HCPCS codes G0237, G0238, G0239, and G0424. As shown in Table 33 below and as listed in Addendum B of the CY 2017 OPPS/ASC proposed rule, we proposed to reassign these services to APCs 5734 (Level 4 Minor Procedures), 5735 (Level 5 Minor Procedures), and 5791 (Pulmonary Treatment). In addition, we proposed to continue their status indicator assignment of ''Q1'' to indicate that these services are conditionally packaged.

TABLE 33—PROPOSED CY 2017 STATUS INDICATOR (SI), APC ASSIGNMENTS, AND PAYMENT RATES FOR THE PULMONARY REHABILITATION SERVICES

HCPCS code	Long descriptors	CY 2016 OPPS SI	CY 2016 OPPS APC	CY 2016 OPPS payment	Proposed CY 2017 OPPS SI	Proposed CY 2017 OPPS APC	Proposed CY 2017 OPPS payment
G0237	Therapeutic procedures to increase strength or endurance of respiratory muscles, face to face, one on one, each 15 minutes (includes monitoring).	Q1	5734	$91.18	Q1	5735	$265.56

TABLE 33—PROPOSED CY 2017 STATUS INDICATOR (SI), APC ASSIGNMENTS, AND PAYMENT RATES FOR THE PULMONARY REHABILITATION SERVICES—Continued

HCPCS code	Long descriptors	CY 2016 OPPS SI	CY 2016 OPPS APC	CY 2016 OPPS payment	Proposed CY 2017 OPPS SI	Proposed CY 2017 OPPS APC	Proposed CY 2017 OPPS payment
G0238	Therapeutic procedures to improve respiratory function, other than described by g0237, one on one, face to face, per 15 minutes (includes monitoring).	Q1	5733	55.94	Q1	5791	161.29
G0239	Therapeutic procedures to improve respiratory function or increase strength or endurance of respiratory muscles, two or more individuals (includes monitoring).	Q1	5732	30.51	Q1	5734	95.66
G0424	Pulmonary rehabilitation, including exercise (includes monitoring), one hour, per session, up to two sessions per day.	Q1	5733	55.94	Q1	5791	161.29

Comment: Several commenters expressed concern with the proposed status indicator assignment of ''Q1'' for HCPCS code G0424. The commenters stated that Medicare's benefit categories for cardiac and pulmonary rehabilitation programs were codified in section 144 of the Medicare Improvements for Patients and Providers Act of 2008, which provides for payment and coverage of pulmonary and cardiac rehabilitation services. Because the payment for this service was established under a statutory provision, the commenters believed that CMS' proposed status indicator assignment of ''Q1'' for HCPCS code G0424 is an oversight. The commenters requested that CMS reconsider the issue and revise the status indicator assignment to ''S'' (Procedure or Service, Not Discounted When Multiple. Paid under OPPS; separate APC payment), similar to the status indicator assignment for the cardiac rehabilitation codes.

Response: We appreciate the commenters' feedback and agree, in part, with the commenters' concerns. Consequently, we believe that we should reassign HCPCS code G0424 to status indicator ''S.'' In addition, we believe that we should reassign HCPCS codes G0237, G0238, and G0239 to status indictor ''S'' because these codes also describe pulmonary rehabilitation services. However, the rationale for this modification of the proposal for these codes is not related to the statutory provision of section 144 of the Medicare Improvements for Patients and Providers Act of 2008. We believe that pulmonary rehabilitation is not typically ancillary to the other HOPD services that may be furnished to beneficiaries. Pulmonary rehabilitation is typically a course of treatment that is prescribed after a diagnosis is made and often after other treatments are initiated or completed.

Comment: Several commenters supported the proposed APC reassignments for HCPCS codes G0237, G0238, G0239, and G0424. These commenters indicated that the proposed payment increase for these services appears to be driven by more accurate and complete costs reports submitted by hospitals providing the service, and recommended that CMS finalize the proposed payment rates.

Response: We appreciate the commenters' support. We note that we proposed to reassign the HCPCS codes for these services based on the claims data used for the proposed rule that reported these codes as being conditionally packaged. Specifically, our analysis revealed a geometric mean cost of approximately $293 for HCPCS code G0237, which was relatively close to the geometric mean cost of approximately $278 for APC 5735. We also found that the geometric mean costs of approximately $165 for HCPCS code G0238 and approximately $169 for HCPCS code G0424 was relatively similar to APC 5791, which had a geometric mean cost of approximately $169. In addition, we found that the geometric mean cost of approximately $121 for HCPCs code G0239 was comparable to the geometric mean cost of approximately $100 for APC 5374. However, based on our review of the updated CY 2015 claims data used for this final rule with comment period, which included the status indicator revision from ''Q1'' to ''S'' for these codes, we found the geometric mean costs for HCPCS codes G0237, G0238, G0239, and G0424 to be significantly lower than the proposed rule geometric mean costs. This is due to significantly reduced packaged costs from other services after the status indicator was changed from ''Q1'' to ''S.'' We also note that the proposed rule claims data were based on claims submitted from January 1, 2015, through December 31, 2015, and processed through December 31, 2015, while the final rule with comment period claims data are based on claims submitted from January 1, 2015, through December 31, 2015, and processed through June 30, 2016. Based on our analysis of the final rule with comment period claims data, we found a geometric mean cost of approximately $24 for HCPCS code G0237, approximately $22 for HCPCS code G0238, approximately $33 for HCPCS code G0239, and approximately $44 for HCPCS code G0424. As a result of our findings, we are revising the APC assignments for HCPCS codes G0237, G0238, and G0239. Specifically, we found the geometric mean costs for HCPCS code G0237 ($24), G0238 ($22), and G0239 ($33) to be comparable to the geometric mean cost for APC 5732 ($29), while the geometric cost of HCPCS code G0424 ($44) was similar to that of APC 5733 ($56). Based on our analysis of the updated claims data used for the final rule with comment period, we believe that the revised APC assignments for the pulmonary rehabilitation services better reflect their clinical coherence and resource costs.

In summary, after consideration of the public comments we received and our analysis of the updated claims data for this final rule with comment period, we are modifying our proposal and reassigning HCPCS codes G0237, G0238, G0239, and G0424 to status indicator ''S.'' In addition, we are modifying our

proposal and reassigning HCPCS codes G0237, G0238, and G0239 to the final APCs listed in Table 34 below. Table 34 lists the final status indicator, APC assignments, and payment rates for the pulmonary rehabilitation services for CY 2017. We refer readers to Addendum B of this final rule with comment period for the payment rates for all codes reported under the OPPS. Addendum B is available via the Internet on the CMS Web site.

TABLE 34—FINAL CY 2017 STATUS INDICATOR (SI), APC ASSIGNMENTS, AND PAYMENT RATES FOR THE PULMONARY REHABILITATION SERVICES

HCPCS code	Long descriptors	CY 2016 OPPS SI	CY 2016 OPPS APC	CY 2016 OPPS payment	Final CY 2017 OPPS SI	Final CY 2017 OPPS APC	Final CY 2017 OPPS payment
G0237	Therapeutic procedures to increase strength or endurance of respiratory muscles, face to face, one on one, each 15 minutes (includes monitoring).	Q1	5734	$91.18	S	5732	$28.37
G0238	Therapeutic procedures to improve respiratory function, other than described by g0237, one on one, face to face, per 15 minutes (includes monitoring).	Q1	5733	55.94	S	5732	28.37
G0239	Therapeutic procedures to improve respiratory function or increase strength or endurance of respiratory muscles, two or more individuals (includes monitoring).	Q1	5732	30.51	S	5732	28.37
G0424	Pulmonary rehabilitation, including exercise (includes monitoring), one hour, per session, up to two sessions per day.	Q1	5733	55.94	S	5733	54.53

IV. OPPS Payment for Devices

A. Pass-Through Payments for Devices

1. Expiration of Transitional Pass-Through Payments for Certain Devices

a. Background

Section 1833(t)(6)(B)(iii) of the Act sets forth the period for which a device category eligible for transitional pass-through payments under the OPPS may be in effect. The implementing regulation at 42 CFR 419.66(g) provides that this pass-through payment eligibility period begins on the date CMS establishes a particular transitional pass-through category of devices. The eligibility period is for at least 2 years but no more than 3 years. We may establish a new device category for pass-through payment in any quarter. Under our current policy, we base the pass-through status expiration date for a device category on the date on which pass-through payment is effective for the category; that is, the date CMS establishes a particular category of devices eligible for transitional pass-through payments. (We note that in this final rule with comment period, in accordance with section 1833(t)(6)(B)(iii)(II) of the Act, we are adopting a policy to base pass-through status expiration for a device category on the first date on which pass-through payment is made under the OPPS.) We propose and finalize the dates for expiration of pass-through status for device categories as part of the OPPS annual update. We also have an established policy to package the costs of the devices that are no longer eligible for pass-through payments into the costs of the procedures with which the devices are reported in the claims data used to set the payment rates (67 FR 66763).

b. CY 2017 Pass-Through Devices

As stated earlier, section 1833(t)(6)(B)(iii) of the Act requires that, under the OPPS, a category of devices be eligible for transitional pass-through payments for at least 2 years, but not more than 3 years. There currently are four device categories eligible for pass-through payment: (1) HCPCS code C2624 (Implantable wireless pulmonary artery pressure sensor with delivery catheter, including all system components), which was established effective January 1, 2015; (2) HCPCS code C2623 (Catheter, transluminal angioplasty, drug-coated, non-laser), which was established effective April 1, 2015; (3) HCPCS code C2613 (Lung biopsy plug with delivery system), which was established effective July 1, 2015; and (4) HCPCS code C1822 (Generator, neurostimulator (implantable), high frequency, with rechargeable battery and charging system), which was established effective January 1, 2016. The pass-through payment status of the device category for HCPCS code C2624 will end on December 31, 2016. Therefore, in accordance with our current policy, in the CY 2017 OPPS/ASC proposed rule (81 FR 45649), we proposed, beginning in CY 2017, to package the costs of the device described by HCPCS code C2624 into the costs related to the procedure with which the device is reported in the hospital claims data. We stated in the proposed rule that the other three codes listed will continue with pass-through status in CY 2017. We did not receive any public comments on this proposal. Therefore, we are finalizing our proposal to expire device pass-through payments for the device described by HCPCS code C2624, effective January 1, 2017.

2. New Device Pass-Through Applications

a. Background

Section 1833(t)(6) of the Act provides for temporary additional payments, referred to as ''transitional pass-through payments,'' for devices and section 1833(t)(6)(B) of the Act requires CMS to use categories in determining the eligibility of devices for transitional pass-through payments. As part of implementing the statute through regulations, we have continued to believe that it is important for hospitals to receive pass-through payments for

devices that offer substantial clinical improvement in the treatment of Medicare beneficiaries to facilitate access by beneficiaries to the advantages of the new technology. Conversely, we have noted that the need for additional payments for devices that offer little or no clinical improvement over previously existing devices is less apparent. In such cases, these devices can still be used by hospitals, and hospitals will be paid for them through appropriate APC payment. Moreover, a goal is to target pass-through payments for those devices where cost considerations might be most likely to interfere with patient access (66 FR 55852; 67 FR 66782; and 70 FR 68629).

As specified in regulations at 42 CFR 419.66(b)(1) through (b)(3), to be eligible for transitional pass-through payment under the OPPS, a device must meet the following criteria: (1) if required by FDA, the device must have received FDA approval or clearance (except for a device that has received an FDA investigational device exemption (IDE) and has been classified as a Category B device by the FDA), or another appropriate FDA exemption; and the pass-through payment application must be submitted within 3 years from the date of the initial FDA approval or clearance, if required, unless there is a documented, verifiable delay in U.S. market availability after FDA approval or clearance is granted, in which case CMS will consider the pass-through payment application if it is submitted within 3 years from the date of market availability; (2) the device is determined to be reasonable and necessary for the diagnosis or treatment of an illness or injury or to improve the functioning of a malformed body part, as required by section 1862(a)(1)(A) of the Act; and (3) the device is an integral part of the service furnished, is used for one patient only, comes in contact with human tissue, and is surgically implanted or inserted (either permanently or temporarily), or applied in or on a wound or other skin lesion. In addition, according to 42 CFR 419.66(b)(4), a device is not eligible to be considered for device pass-through payment if it is any of the following: (1) equipment, an instrument, apparatus, implement, or item of this type for which depreciation and financing expenses are recovered as depreciation assets as defined in Chapter 1 of the Medicare Provider Reimbursement Manual (CMS Pub. 15–1); or (2) a material or supply furnished incident to a service (for example, a suture, customized surgical kit, or clip, other than a radiological site marker).

Separately, we use the following criteria, as set forth under § 419.66(c), to determine whether a new category of pass-through devices should be established. The device to be included in the new category must—

- Not be appropriately described by an existing category or by any category previously in effect established for transitional pass-through payments, and was not being paid for as an outpatient service as of December 31, 1996;
- Have an average cost that is not ''insignificant'' relative to the payment amount for the procedure or service with which the device is associated as determined under § 419.66(d) by demonstrating: (1) the estimated average reasonable costs of devices in the category exceeds 25 percent of the applicable APC payment amount for the service related to the category of devices; (2) the estimated average reasonable cost of the devices in the category exceeds the cost of the device-related portion of the APC payment amount for the related service by at least 25 percent; and (3) the difference between the estimated average reasonable cost of the devices in the category and the portion of the APC payment amount for the device exceeds 10 percent of the APC payment amount for the related service (with the exception of brachytherapy and temperature-monitored cryoblation, which are exempt from the cost requirements as noted at §§ 419.66(c)(3) and (e); and
- Demonstrate a substantial clinical improvement, that is, substantially improve the diagnosis or treatment of an illness or injury or improve the functioning of a malformed body part compared to the benefits of a device or devices in a previously established category or other available treatment.

Beginning in CY 2016, we changed our device pass-through evaluation and determination process. Device pass-through applications are still submitted to us through the quarterly subregulatory process, but the applications will be subject to notice-and-comment rulemaking in the next applicable OPPS annual rulemaking cycle. Under this process, all applications that are preliminarily approved upon quarterly review will automatically be included in the next applicable OPPS annual rulemaking cycle, while submitters of applications that are not approved upon quarterly review will have the option of being included in the next applicable OPPS annual rulemaking cycle or withdrawing their application from consideration. Under this notice-and-comment process, applicants may submit new evidence, such as clinical trial results published in a peer-reviewed journal, or other materials for consideration during the public comment process for the proposed rule. This process allows those applications that we are able to determine meet all the criteria for device pass-through payment under the quarterly review process to receive timely pass-through payment status, while still allowing for a transparent, public review process for all applications (80 FR 70417 through 70418). More details on the requirements for device pass-through payment applications are included on the CMS Web site in the application form itself at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/passthrough_payment.html*, in the ''Downloads'' section.

In addition, CMS is amenable to meeting with applicants or potential applicants to discuss research trial design in advance of any device pass-through application or to discuss application criteria, including the substantial clinical improvement criterion.

b. Applications Received for Device Pass-Through Payment for CY 2017

We received three applications by the March 1, 2016 quarterly deadline, which was the last quarterly deadline in time to be included for the CY 2017 OPPS/ASC proposed rule. None of these three applications were approved for device pass-through payment during the quarterly review process. Applications received for the later deadlines for the remaining 2016 quarters (June 1, September 1, and December 1), if any, will be presented in the CY 2018 OPPS/ASC proposed rule. We note that the quarterly application process and requirements have not changed in light of the addition of rulemaking review. Detailed instructions on submission of a quarterly device pass-through payment application are included on the CMS Web site at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Downloads/catapp.pdf*. A discussion of the three applications received by the March 1, 2016 deadline is presented below, as detailed in the CY 2017 OPPS/ASC proposed rule (81 FR 45650 through 45653).

(1) BioBag® (Larval Debridement Therapy in a Contained Dressing)

BioMonde US, LLC submitted an application for a new device pass-through category for the BioBag® (larval debridement therapy in a contained dressing) (hereinafter referred to as the

BioBag®). According to the applicant, BioBag® is a biosurgical wound treatment (''maggot therapy'') consisting of disinfected, living larvae (Lucilia sericata) in a polyester net bag; the larvae remove dead tissue from wounds. The BioBag® is indicated for debridement of nonhealing necrotic skin and soft tissue wounds, including pressure ulcers, venous stasis ulcers, neuropathic foot ulcers, and nonhealing traumatic or postsurgical wounds. Debridement, which is the action of removing devitalized tissue and bacteria from a wound, is required to treat or prevent infection and to allow the wound to progress through the healing process. This system contains disinfected, living larvae that remove the dead tissue from wounds and leave healthy tissue undisturbed. The larvae are provided in a sterile polyester net bag, available in different sizes. The only other similar product is free-range (that is, uncontained) larvae. Free-range larvae are not widely used in the United States because application is time consuming, there is a fear of larvae escaping from the wound, and there are concerns about proper and safe handling of the larvae. The total number of treatment cycles depends on the characteristics of the wound, the response of the wound, and the aim of the therapy. Most ulcers are completely debrided within 1 to 6 treatment cycles.

With respect to the newness criterion at § 419.66(b)(1), the applicant received FDA clearance for BioBag® through the premarket notification section 510(k) process on August 28, 2013, and its March 1, 2016 application was within 3 years of FDA clearance. The applicant claims that BioBag® is an integral part of the wound debridement, is used for one patient only, comes in contact with human skin, and is applied in or on a wound. In addition, the applicant stated that BioBag® is not an instrument, apparatus, or item for which depreciation and financing expenses are recovered. We believe that BioBag could be considered to be a surgical supply similar to a surgical dressing that facilitates either mechanical or autolytic debridement (for example, hydrogel dressings), and therefore ineligible for device pass-through payments under the provisions of § 419.66(b)(4)(ii). In the CY 2017 OPPS/ASC proposed rule (81 FR 45650), we invited public comment on whether BioBag® should be eligible under § 419.66(b) to be considered for device pass-through payment.

Comment: One commenter, the manufacturer, submitted comments on whether BioBag® should be considered to be a surgical supply similar to a surgical dressing that facilitates either mechanical or autolytic debridement. The commenter stated that BioBag® is a ''treatment for active and physical wound debridement'' that does not function like an autolytic or mechanical debridement, but more like a sharp debridement, surgical debridement or water-jet. The commenter also noted that BioBag® is individualized to the patient and has a limited viability window, and that ordering, manufacturing, storage and handling are different than for a supply.

Response: For purposes of the device pass-through payment process, we are persuaded by this additional information, and we no longer consider the BioBag® product to be an ineligible supply under § 419.66(b)(4)(ii) of the regulations because the BioBag® is not ''furnished incident to a service,'' as described in § 419.66(b)(4)(ii).

With respect to the existence of a previous pass-through device category that describes the BioBag®, the applicant suggested a category descriptor of ''Larval therapy for the debridement of necrotic non-healing skin and soft tissue wounds.'' We stated in the proposed rule that we have not identified an existing pass-through payment category that describes the BioBag®, but we welcomed public comments on this issue.

We did not receive any public comments on this issue and have not identified an existing pass-through payment category that describes BioBag®.

With respect to the cost criterion, the applicant stated that BioBag® would be reported with CPT code 97602 (Removal of devitalized tissue from wound(s), non-selective debridement, without anesthesia (*e.g.,* wet-to-moist dressings, enzymatic, abrasion), including topical application(s), wound assessment, and instruction(s) for ongoing care, per session). CPT code 97602 is assigned to APC 5051 (Level 1 Skin Procedures), with a CY 2016 payment rate of $117.83, and the device offset is $1.18. The price of BioBag® varies with the size of the bag ($375 to $435 per bag), and bag size selection is based on the size of the wound. To meet the cost significance criterion, there are three cost significance subtests that must be met and calculations are noted below. The first cost significance is that the device cost needs to be at least 25 percent of the applicable APC payment rate to reach cost significance, as follows for the highest-priced BioBag®: $435/117.83 × 100 = 369 percent. Thus, BioBag® meets the first cost significance test. The second cost significance test is that the device cost needs to be at least 125 percent of the offset amount (the device-related portion of the APC found on the offset list): $435/1.18 × 100 = 36864 percent. Thus, BioBag® meets the second cost significance test. The third cost significance test is that the difference between the estimated average reasonable cost of the devices in the category and the portion of the APC payment amount determined to be associated with the device in the associated APC exceeds 10 percent of the total APC payment: ($435 − 1.18)/117.83 × 100 = 368 percent. Thus, BioBag® meets the third cost significance test and satisfies the cost significance criterion.

With respect to the substantial clinical improvement criterion, the applicant cited a total of 18 articles relating to wound debridement, and most of these articles discussed the use of larval therapy for the treatment of ulcers. One peer-reviewed journal article described a randomized controlled trial with 267 subjects who received loose larvae, bagged larvae, or hydrogel intervention.[1] Results of the study showed that the time to healing was not significantly different between the three groups, but that larval therapy significantly reduced the time to debridement (hazard ratio for the combined larvae group compared with hydrogel was 2.31 (95 percent confidence interval 1.65 to 3.24; P<0.001)); and mean ulcer related pain scores were higher in either larvae group compared with hydrogel (mean difference in pain score: loose larvae versus hydrogel 46.74 (95 percent confidence interval 32.44 to 61.04), P<0.001; bagged larvae versus hydrogel 38.58 (23.46 to 53.70), P<0.001).

Another article described a study of 88 patients (of which 64 patients completed the study) and patients either received a larval therapy dressing (BioFOAM) or hydrogel.[2] Because the study did not use BioBag® and there was a large drop-out rate that was not fully explained, we did not find this article helpful in determining whether the BioBag® provides a substantial clinical improvement compared to existing wound debridement modalities.

Another article that the applicant submitted was a meta-analysis of maggot debridement therapy compared to standard therapy for diabetic foot

[1] Dumville, et al.: Larval therapy for leg ulcers (VenUS II): randomized controlled trial).

[2] Mudge, et al.: A randomized controlled trial of larval therapy for the debridement of leg ulcers: Results of a multicenter, randomized, controlled, open, observer blind, parallel group study. *Wound Repair and Regeneration.* 2013, 1–9.

ulcers.[3] It compared four studies with a total of 356 participants and the authors concluded that maggot debridement therapy ''may be a scientific and effective therapy in treatment of diabetic foot ulcers'' but ''the evidence is too weak to routinely recommend it for treatment''.

There were some additional articles provided that included a case series of maggot therapy with no control group, a retrospective study with free-range maggot therapy, maggot therapy as treatment of last resort, in vitro studies, economic modeling for wound therapy, an informational review of maggot debridement therapy and other debridement therapies, and research on other wound therapy options. These remaining articles did not assist in assessing substantial clinical improvement of BioBag® compared to existing treatments. Based on the evidence submitted with the application, we stated in the proposed rule that we are not yet convinced that the BioBag® provides a substantial clinical improvement over other treatments for wound debridement. We invited public comments on whether the BioBag® meets the substantial clinical improvement criterion.

Comment: One commenter, the manufacturer, disagreed with CMS' review of the three cited articles from the initial application (Tian, Dumville, Mudge) and suggested that these articles prove substantial clinical improvement. Specifically, the commenter noted that the meta-analysis by Tian suggests that findings of lower amputation rates, less antibiotic use, increased healing rates and increased healing times for larval therapy over conventional treatments are statistically significant, although the conclusion states that more evidence is needed; and that the randomized controlled trial by Mudge showed that successful wound debridement was 96.9 percent with larvae compared to 34.4 percent with hydrogel. (However, the commenter noted this trial was performed with BioFoam, which is a variation of the current BioBag® product, but stated that the two were similar.) In addition, the commenter stated that larval therapy demonstrated healing 9 days faster than hydrogel, although it was not believed to be statistically significant by the authors in the Dumville trial.

Several commenters representing health care professionals who have an interest in wound management supported the BioBag® application. These commenters provided testimonials of their or their patients' favorable experience with larval therapy. However, these commenters did not provide empirical data pertaining to substantial clinical improvement.

Response: We appreciate the commenters' responses on the BioBag® application. However, none of the commenters provided new empirical evidence that demonstrates clinical superiority of the BioBag® over existing treatment options. At this time, we have not been able to determine that the BioBag® represents a substantial clinical improvement relative to existing therapies currently available for wound care.

After consideration of the public comments we received, we are not approving device pass-through payment status for the BioBag® for CY 2017.

(2) Encore™ Suspension System

Siesta Medical, Inc. submitted an application for a new device pass-through category for the Encore Suspension System (hereinafter referred to as the Encore™ System). According to the application, the Encore™ System is a kit of surgical instruments and implants that are used to perform an adjustable hyoid suspension. In this procedure, the hyoid bone (the U-shaped bone in the neck that supports the tongue) and its muscle attachments to the tongue and airway are pulled forward with the aim of increasing airway size and improving airway stability in the retrolingual and hypopharyngeal airway (airway behind and below the base of tongue). This procedure is indicated for the treatment of mild or moderate obstructive sleep apnea (OSA) and/or snoring, when the patient is unable to tolerate continuous positive airway pressure (CPAP). The current alternative to the hyoid suspension is the hyo-thyroid suspension technique (hyothyroidpexy). The Encore™ System is designed for hyoid bone suspension to the mandible bone using bone screws and suspension lines. The Encore™ System kit contains the following items:

- Integrated suture passer pre-loaded with polyester suture;
- Three bone screws and two bone screw inserters;
- Suspension line lock tool;
- Threading tool for suspension lines; and
- Four polyester suspension lines.

With regard to the newness criterion, the Encore™ System received FDA clearance through the section 510(k) process on March 26, 2014. Accordingly, it appears that the Encore™ System is new for purposes of evaluation for device pass-through payments.

Several components of the Encore™ System appear to be either instruments or supplies, which are not eligible for pass-through according to § 419.66(b)(4)(i) and (ii). For instance, the suture passer is an instrument and the suture is a supply, the bone screw inserters are instruments, the suspension line lock tool is an instrument, the threading tool for suspension lines is an instrument, and the polyester suspension lines are similar to sutures and therefore are supplies. With respect to the presence of a previously established code, the only implantable devices in the kit are the bone screws, and by the applicant's own admission the bone screws are described by the existing pass-through category HCPCS code C1713 (Anchor/screw for opposing bone-to-bone or soft tissue-to-bone (implantable)). In the CY 2017 OPPS/ASC proposed rule (81 FR 45651), we invited public comments on whether the Encore™ System bone screws are described by a previously existing category and also whether the remaining kit components are supplies or instruments.

Comment: One commenter, the manufacturer, stated that the Encore™ bone screws are designed with unique strength, profile and adjustability functions for the Encore™ System, and therefore the bone screws are not adequately described by HCPCS code C1713. In addition, the commenter stated that the remaining kit components are custom designed for the procedure, would not be available otherwise within the operating room, and, therefore, would not meet the criteria for supplies and instruments, as specified in § 419.66(b)(4)(i)(ii).

Response: We note that manufacturers frequently package a number of individual items used with a device for a particular procedure into a kit. Hospitals may not bill for transitional pass-through payments for supplies that may be contained in kits (Medicare Claims Processing Manual (Pub. 100–04, Chapter 4, Section 60.4)). We continue to believe that the suture passer, the bone screw inserters, the suspension line lock tool, and the threading tool for suspension lines are all instruments and that the sutures and polyester suspension lines are supplies, even though they may have been customized for the procedure. Regarding the bone screws, we continue to believe that the bone screws are described by HCPCS code C1713 because, although customized, the bone screws anchor/

[3] Tian et al.: Maggot debridement therapy for the treatment of diabetic foot ulcers: a meta-analysis. *Journal of Wound Care.* Vol. 22, No. 9, 2013.

screw for opposing bone-to-bone (hyoid bone to mandible bone).

With regard to the cost criterion, the applicant stated that the Encore™ System would be used in the procedure described by CPT code 21685 (Hyoid myotomy and suspension). CPT code 21685 is assigned to APC 5164 (Level 4 ENT Procedures) with a CY 2016 payment rate of $1,616.90, and the device offset is $15.85. The price of the Encore™ System as stated in the application is $2,200. To meet the cost criterion, there are three cost significance subtests that must be met and the calculations are noted below. The first cost significance is that the device cost needs to be at least 25 percent of the applicable APC payment rate to reach cost significance: $2,200/$1,616.90 × 100 percent = 136 percent. Thus, the Encore™ System meets the first cost significance test. The second cost significance test is that the device cost needs to be at least 125 percent of the offset amount (the device-related portion of the APC found on the offset list): $2,200/$15.85 × 100 percent = 13880 percent. Thus, the Encore™ System meets the second cost significance test. The third cost significance test is that the difference between the estimated average reasonable cost of the devices in the category and the portion of the APC payment amount determined to be associated with the device in the associated APC exceeds 10 percent of the total APC payment: ($2,200—$15.85)/$1,616.90 × 100 percent = 135 percent. Thus, the Encore™ System meets the third cost significance test. Based on the costs submitted by the applicant and the calculations noted earlier, the Encore™ System meets the cost criterion. However, as stated in the proposed rule, we have concerns about whether the cost criterion would be met if based only on the kit components that are not supplies, not instruments, and not described by an existing category (if any).

We did not receive any public comments related to the cost criterion of the Encore™ System application. As noted earlier in this section, the applicant stated that the Encore™ System would be used in the procedure described by CPT code 21685 (Hyoid myotomy and suspension). CPT code 21685 is assigned to APC 5164 (Level 4 ENT Procedures) with a CY 2016 payment rate of $1,616.90, and the device offset is $15.85. The applicant also stated that the price of the Encore™ System is $2,200. Based on our determination earlier in this section of this final rule with comment period, the device is described by HCPCS code C1713 and the bone screws and other kit supplies are supplies and instruments. Because of this determination, the cost of the device and the other components in the kit cannot be included in the device costs used to determine whether the device meets the cost criterion. Accordingly, the Encore™ System does not meet the cost threshold.

With regard to the substantial clinical improvement criterion, the applicant provided a thorough review of the hyoid myotomy with suspension and other surgical procedures that treat mild or moderate obstructive sleep apnea. However, specific data addressing substantial clinical improvement with the Encore™ System were lacking. The application included information on a case series of 17 obstructive apnea patients who received an Encore hyo-mandibular suspension as well as a previous or concurrent uvulopalatopharyngoplasty (UPPP). According to the application, the 17 patients studied demonstrated a 76 percent surgical success, and 73 percent median reduction in the Respiratory Disturbance Index (RDI) at 3 months, significantly reduced surgical time, and 1 infection requiring device removal. This study was a retrospective, single center study with no comparator.

In addition, the American Academy of Otolaryngology Head and Neck Surgery (AAOHNS) ''Position Statement: Tongue Based Procedures'' (accessed on 3.30.2016 and located at: *http://www.entnet.org/node/215*) considers the Hyoid myotomy and suspension ''effective and non-investigational with proven clinical results when considered as part of the comprehensive surgical management of symptomatic adult patients with mild obstructive sleep apnea (OSA) and adult patients with moderate and severe OSA assessed as having tongue base or hypopharyngeal obstruction.'' The AMA CPT Editorial Panel created CPT code 21685 (Hyoid myotomy and suspension) in 2004. The AAOHNS statement and the age of the CPT code indicate that this is an established surgical procedure. The Encore™ System is a new kit of surgical instruments and implantable materials that are used to perform this procedure. According to the Encore™ System's section 510(k) Summary, ''[t]he fundamental scientific technology and technological characteristics of the Encore™ System are the same as the predicate devices,'' which includes the Medtronic AirVance System (another surgical kit used on CPT code 21685). The applicant claimed several advantages of the Encore™ System over the AirVance System that relate to greater ease of use for the surgeon and better long-term stability. However, there are no studies comparing the Encore™ System to the AirVance System. There are no clinical data provided by the applicant to suggest that the Encore™ System kit provides a substantial clinical improvement over other instruments/implants that are used to perform Hyoid myotomy and suspension. In the proposed rule, we invited public comments on whether the Encore™ System meets the substantial clinical improvement criterion.

Comment: One commenter stated that the Encore™ System has ''provided improved and more consistent results than previous hyoid suspension techniques'' and that it is reasonable to assume that a system that provides significantly improved control of the hyoid bone suspension location and greater long-term stability of this surgically modified hyoid bone location will lead to improved and less variable clinical results for the patients treated, including reducing the mortality rate, future hospitalization, and the need for future additional interventions. Numerous commenters who used the Encore™ System supported the application and stated that, in their experience, the system provided a substantial clinical improvement for performing hyomandibular suspension and was superior to the hyo-thyroid technique. These commenters did not provide any new empirical data in support of the application.

Response: As stated in the proposed rule, there were no clinical data provided by the applicant to suggest that the Encore™ System kit provides a substantial clinical improvement over other instruments/implants that are used to perform Hyoid myotomy and suspension. While the commenters provided some suggestions that the Encore™ System kit had clinical merits, these suggestions were anecdotal and largely based on assumptions, not actual empirical clinical evidence. Because no new significant information or data were provided through the public comments, we are not able to determine that the Encore™ System represents a substantial clinical improvement relative to existing medical treatments.

After consideration of the public comments we received, we are not approving device pass-through payment status for the Encore™ System for CY 2017.

(3) Endophys Pressure Sensing System (Endophys PSS) or Endophys Pressure Sensing Kit

Endophys Holdings, LLC. submitted an application for a new device pass-

through category for the Endophys Pressure Sensing System or Endophys Pressure Sensing Kit (hereinafter referred to as the Endophys PSS). The applicant suggested a category descriptor within either the HCPCS code C18XX series or the HCPCS code C26XX series and the device was described by the applicant as a stand-alone catheterization sheath that is inserted percutaneously during intravascular diagnostic or interventional procedures. When applied intravascularly, the two separate functions delivering an improved patient outcome include: (1) Continuous intra-arterial blood pressure monitoring using a high-precision Fabry-Perot pressure sensor located within the device anterior approaching the distal tip of the system; and (2) a conduit that allows the introduction of other devices for cardiovascular or percutaneous interventional procedures.

The Endophys PSS is an introducer sheath (including a dilator and guidewire) with an integrated fiber optic pressure transducer for blood pressure monitoring. The Endophys PSS is used with the Endophys Blood Pressure Monitor to display blood pressure measurements. The sheath is inserted percutaneously during intravascular diagnostic or interventional procedures, typically at the site of the patient's femoral artery. This device facilitates the introduction of diagnostic and interventional devices into the coronary and peripheral vessels while continuously sensing and reporting blood pressure during the interventional procedure. Physicians would use this device to pass guidewires, catheters, stents, and coils, to perform the diagnostic or therapeutic treatment on the coronary or other vasculature. The Endophys PSS provides continuous blood pressure monitor information to the treating physician so that there is no need for an additional arterial access site for blood pressure monitoring.

With respect to the newness criterion, the Endophys PSS received FDA clearance through the section 510(k) process on January 7, 2015, and therefore is new. According to the applicant, the Endophys PSS is an integral part of various endovascular procedures, is used for one patient only, comes in contact with human skin, and is surgically implanted. Endophys PSS is not an instrument, apparatus, implement or item for which depreciation and financing expenses are recovered, and it is not a supply or material.

With respect to the presence of a previously established category, based on our review of the application, we believe that Endophys PSS may be described by HCPCS code C1894 (Introducer/sheath, other than guiding, other than intracardiac electrophysiological, non-laser). The FDA section 510(k) Summary Product Description Section in the application describes the Endophys PSS as an introducer sheath with an integrated fiber optic pressure transducer. Because the Endophys PSS is an introducer sheath that is not guiding, not intracardiac electrophysiological, and not a laser, we believe that it is described by the previously existing category of HCPCS code C1894 established for transitional pass-through payments. In the CY 2017 OPPS/ASC proposed rule (81 FR 45652), we invited public comment on whether Endophys PSS is described by a previously existing category.

Comment: One commenter, the manufacturer, disagreed with CMS that the Endophys PSS is described by HCPCS code C1894 and states that HCPCS code C1894 ''describes a device that does not look like the Endophys PSS, does not provide continuous intraarterial blood pressure readings equivalent to a radial arterial line, is not used or monitored by a physician in a similar manner.'' The commenter noted that the design for Endophys PSS is patented. The commenter also noted that FDA has assigned new product codes to the Endophys PSS that are not similar to devices described by HCPCS code C1894.

Response: We continue to believe that HCPCS code C1894 accurately describes the Endophys PSS because it is a type of introducer/sheath (but with a built-in pressure transducer). Also, a new product code from the FDA, which is used by the FDA to classify and track a medical device, is not relevant in CMS' consideration of whether the device is described by an existing HCPCS C-code. The FDA may provide new product codes for items that we consider to be described more broadly and with an existing HCPCS C-code.

With respect to the cost criterion, according to the applicant, the Endophys PSS would be reported with CPT code 36620 (Arterial catheterization or cannulation for sampling, monitoring or transfusion (separate procedure); percutaneous). CPT code 36620 is assigned status indicator ''N'', which means its payment is packaged under the OPPS. The applicant stated that its device can be used in many endovascular procedures that are assigned to the APCs listed below:

APC	Description
5188	Diagnostic Cardiac Catheterization.
5191	Level 1 Endovascular Procedures.
5526	Level 6 X-Ray and Related Services.
5183	Level 3 Vascular Procedures.
5181	Level 1 Vascular Procedures.
5182	Level 2 Vascular Procedures.
5291	Thrombolysis and Other Device Revisions.

To meet the cost criterion for device pass-through payment, a device must pass all three tests for cost threshold for at least one APC. For our calculations, we used APC 5291 (Thrombolysis and Other Device Revisions), which has a CY 2016 payment rate of $199.80 and the device offset of $3.38. According to the applicant, the cost of the Endophys PSS is $2,500. The first cost significance test is that the device cost needs to be at least 25 percent of the applicable APC payment rate to reach cost significance: $2,500/199.80 × 100 percent = 1251 percent. Thus, the Endophys PSS meets the first cost significance test. The second cost significance test is that the device cost needs to be at least 125 percent of the offset amount (the device-related portion of the APC found on the offset list): $2,500/3.38 × 100 percent = 73964 percent. Thus, the Endophys PSS meets the second cost significance test. The third cost significance test is that the difference between the estimated average reasonable cost of the devices in the category and the portion of the APC payment amount determined to be associated with the device in the associated APC exceeds 10 percent of the total APC payment: ($2,500 − 3.38)/199.80 × 100 percent = 1250 percent. Thus, the Endophys PSS meets the third cost significance test. Based on the costs submitted by the applicant and the above calculations, the Endophys PSS meets the cost criterion. In the proposed rule, we invited public comments on this issue.

We did not receive any public comments on whether the Endophys PSS meets the cost criterion. We continue to believe that the Endophys PSS meets the cost criterion.

With respect to the substantial clinical improvement criterion, the applicant stated that the Endophys PSS represents a substantial clinical improvement over existing medical therapies because the Endophys PSS includes a built-in pressure sensor, which eliminates the need for a second arterial line to monitor the blood pressure. The applicant stated that the Endophys PSS reduces the time to treatment for the patient (because there is no time needed to establish the second arterial line) and reduces

potential complications associated with the second arterial line. While several references were provided in support of this application, there were minimal direct clinical data provided on the Endophys PSS to support substantial clinical improvement. The application included slides with statements pertaining to cost savings, reduced morbidity and life saving for a study of 36 patients, but a published study was not submitted and additional information on study design and other details of the study were not provided. Also, the applicant provided six physician testimonials citing support for the Endophys PSS based on between one and six patient experiences with the device.

The published articles provided with the application did not provide any information based on usage of the Endophys PSS. Topics addressed in the references included: Articles on intraarterial treatment for acute ischemic stroke; references providing education on blood pressure measurement and monitoring; articles on complications during percutaneous coronary intervention; and a reference on ultrasound guided placement of arterial cannulas in the critically ill. Given the paucity of studies using the Endophys PSS, we stated in the proposed rule that we have not been persuaded that the threshold for substantial clinical improvement has been met. We invited public comments on whether the Endophys PSS meets the substantial clinical improvement criterion.

Comment: One commenter, the manufacturer, submitted a new publication [4] that compared a set of patients' radial artery catheterization (RAC) blood pressure measurements, sphygmomanometer readings, and measurements from the Endophys PSS. Study results suggested that the Endophys PSS correlated with the RAC and the blood pressure cuff. The study authors conclude that because the Endophys PSS has ''competitive functionality to that seen with a dedicated radial artery catheter for blood pressure monitoring and is available immediately on sheath insertion without the added risk of [RAC] . . . , potential complications from RAC could be avoided.'' In addition, in its comment, the commenter noted that validation of the patient benefit due to the lack of a second arterial line for blood pressure monitoring in a randomized clinical trial may not meet the criteria of a well-designed clinical investigation and cited three considerations for why this is the case. The commenter noted that the ''clinical evidence is abundant in the published literature reporting the incidence of radial arterial catheterization complications, cost, and patient morbidity. Time saved by eliminating a second RA placement while providing equivalent and continuous arterial pressure readings is obvious, and has cost benefits beyond the purely medical benefits discussed above.'' The commenter further noted that patients who received Endophys PSS ''did not require a RA catheter placement, no serious complications were reported, and that the procedure was completed achieving the therapeutic objective. Reports were received across the centers noting when using accurate continuous arterial pressures the clinician was alerted to serious changes in blood pressure requiring immediate attention. In the absence of the Endophys PSS, the variance would not have been identified causing the patient to suffer complications.''

Response: We appreciate the submission of the new study as well as the public comment. We note that the study appears to show correlation on blood pressure readings between the Endophys PSS and RAC, and we believe that a clinical trial of the Endophys PSS versus RAC examining complication rates would be necessary to validate the theory of reduction in complication rates with use of the Endophys PSS. Accordingly, we do not believe the study supports a definitive conclusion that this device provides a substantial clinical improvement over existing modalities.

After consideration of the public comments we received, we are not approving device pass-through payment status for the Endophys PSS for CY 2017.

3. Beginning Eligibility Date for Device Pass-Through Payment Status

The regulation at 42 CFR 419.66(g) currently provides that the pass-through payment eligibility period begins on the date CMS establishes a category of devices. In the CY 2017 OPPS/ASC proposed rule (81 FR 45653), we proposed to amend § 419.66(g) such that it more accurately comports with section 1833(t)(6)(B)(iii)(II) of the Act, which provides that the pass-through eligibility period begins on the first date on which pass-through payment is made. We recognize that there may be a difference between the establishment of a pass-through category and the date of first pass-through payment for a new pass-through device for various reasons. In most cases, we would not expect this proposed change in the beginning pass-through eligibility date to make any difference in the anticipated pass-through expiration date. However, in cases of significant delay from the date of establishment of a pass-through category to the date of the first pass-through payment, by using the date that the first pass-through payment was made rather than the date on which a device category was established could result in an expiration date of device pass-through eligibility that is later than it otherwise would have been had the clock began on the date the category was first established. We invited public comments on our proposal.

Comment: Many commenters supported the proposal. The commenters' statements of support included that the proposed policy recognizes that the quarterly implementation date may not be aligned with market availability and starting the device pass-through eligibility period on date of first payment would allow for more robust data collection for the purposes of setting future APC rates to accurately include the device costs.

Response: We appreciate the commenters' support.

After consideration of the public comments we received, we are finalizing the proposal to amend § 419.66(g) such that it provides that the pass-through eligibility period begins on the first date on which pass-through payment is made.

4. Policy To Make the Transitional Pass-Through Payment Period 3 Years for All Pass-Through Devices and Expire Pass-Through Status on a Quarterly Rather Than Annual Basis

a. Background

As required by statute, transitional pass-through payments for a device described in section 1833(t)(6)(B)(iii) of the Act can be made for a period of at least 2 years, but not more than 3 years, beginning on the first date on which pass-through payment was made for the product. Our current policy is to accept pass-through applications on a quarterly basis and to begin pass-through payments for new pass-through devices on a quarterly basis through the next available OPPS quarterly update after the approval of a device's pass-through status. However, we expire pass-through status for devices on a calendar-year basis through notice-and-comment rulemaking rather than on a quarterly basis. Device pass-through status currently expires at the end of a

[4] Purdy PD, South C. Klucznik RP et al. *J NeuroIntervent Surg.* Published online first July 16, 2016 doi:10.1136/neurintsurg-2016–012536).

calendar year when at least 2 years of pass-through payments have been made, regardless of the quarter in which it was initially approved. This means that the duration of the pass-through eligibility for a particular device will depend upon when during a year the applicant applies and is approved for pass-through payment. For example, a new pass-through device with pass-through payment status effective on April 1 would receive 2 years and 3 quarters of pass-through payment status, while a pass-through device with pass-through payment status effective on October 1 would receive 2 years and 1 quarter of pass-through payment status.

b. CY 2017 Policy

In the CY 2017 OPPS/ASC proposed rule (81 FR 45653), we proposed, beginning with pass-through devices newly approved in CY 2017 and subsequent calendar years, to allow for a quarterly expiration of pass-through payment status for devices to afford a pass-through payment period that is as close to a full 3 years as possible for all pass-through payment devices. This proposed change would eliminate the variability of the pass-through eligibility period, which currently varies based on the timing of the particular application. For example, under this proposal, for a device with pass-through first effective on October 1, 2017, pass-through payment status would expire on September 30, 2020. As stated in the proposed rule, we believe that the payment adjustment for transitional pass-through payments for devices under the OPPS is intended to provide adequate payment for new innovative technology while we collect the necessary data to incorporate the costs for these devices into the calculation of the associated procedure payment rate (66 FR 55861). We believe that the 3-year maximum pass-through payment period for all pass-through devices would better insure robust data collection and more representative procedure payments once the pass-through payment devices are packaged. We invited public comments on this proposal.

Comment: Many commenters, including MedPAC, supported the proposal. Some commenters suggested that, by maximizing the timeframe for receipt of device pass-through payment, there would be more robust cost data that can be utilized for setting future APC rates to accurately include the device costs.

Response: We appreciate the commenters' support.

Comment: One commenter asked whether CMS intends to adjust payment rates mid-year to include the costs of newly packaged devices upon expiration of device pass-through payments, when a device pass-through payment status expires mid-year. The commenter was concerned that hospitals might not receive adequate payment for the costs of a device, unless the payment was also adjusted, when the device pass-through payment status expired.

Response: We do not generally adjust payment rates mid-year and do not anticipate doing so for this proposal. Under our final policy, we will continue to include all device costs in the associated procedure(s) for ratesetting purposes. The final CY 2017 OPPS policy represents an extension of the timeframe for which device pass-through payment policy applies but does not affect the claims available for ratesetting purposes. We note that our not adjusting rates mid-year will not result in double payment for devices. While the device maintains pass-through payment status, we will reduce APC payment by the device offset and add the device pass-through payment; once the device pass-through payment status expires, hospitals will bill for and receive the full APC payment, which includes packaged device costs.

Comment: Several commenters requested that CMS consider amending the proposal in order to implement the proposed policy retroactively to previously approved devices that were proposed to continue receiving device pass-through payments in CY 2017. The commenters stated that this recommended change would extend the timeframe for receipt of device pass-through payments to current applicants that have already been awarded device pass-through payment status and anticipate receipt of device pass-through payments in CY 2017.

Response: As proposed, the policy begins with pass-through devices newly approved in CY 2017, and we are not going to this policy for devices that received pass-through payment approval prior to CY 2017.

After consideration of the public comments we received, we are finalizing, without modification, our proposal to allow for quarterly expiration of pass-through payment status for devices, beginning with newly approved pass-through payment devices in CY 2017 and subsequent calendar years, to afford a pass-through payment period that is as close to a full 3 years as possible for all pass-through payment devices.

5. Changes to Cost-to-Charge Ratios (CCRs) That Are Used To Determine Device Pass-Through Payments

a. Background

Section 1833(t)(6)(D)(ii) of the Act and 42 CFR 419.66(h) describe how payment will be determined for pass-through payment devices. Currently, transitional pass-through payments for devices are calculated by taking the hospital charges for each billed device, reducing them to cost by use of the hospital's average CCR across all outpatient departments, and subtracting an amount representing the device cost contained in the APC payments for procedures involving that device (65 FR 18481 and 65 FR 67809). In the original CY 2000 OPPS final rule, we stated that we would examine claims in order to determine if a revenue center-specific set of CCRs should be used instead of the average CCR across all outpatient departments (65 FR 18481).

In the FY 2009 IPPS final rule (73 FR 48458 through 48467), CMS created a cost center for ''Medical Supplies Charged to Patients,'' which are generally low cost supplies, and another cost center for ''Implantable Devices Charged to Patients,'' which are generally high-cost implantable devices. This change was in response to a Research Triangle Institute, International (RTI) study that was discussed in the FY 2009 IPPS final rule and which determined that there was charge compression in both the IPPS and the OPPS cost estimation of expensive and inexpensive medical supplies. Charge compression can result in undervaluing high-cost items and overvaluing low-cost items when an estimate of average markup, embodied in a single CCR (such as the hospital-wide CCR) is applied to items of widely varying costs in the same cost center. By splitting medical supplies and implantable devices into two cost centers, some of the effects of charge compression were mitigated. The cost center for ''Implantable Devices Charged to Patients'' has been available for use for OPPS cost reporting periods beginning on or after May 1, 2009.

In CY 2013, we began using data from the ''Implantable Devices Charged to Patients'' cost center to create a distinct CCR for use in calculating the OPPS relative payment weights for CY 2013 (77 FR 68225). Hospitals have adapted their cost reporting and coding practices in order to report usage to the ''Implantable Devices Charged to Patients'' cost center, resulting in sufficient data to perform a meaningful analysis. However, we have continued to use the hospital-wide CCR in our

calculation of device pass-through payments. We have received a request to consider using the ''Implantable Devices Charged to Patients'' CCR in the calculation of device pass-through payment and have evaluated this request. An analysis of the CCR data for the CY 2017 OPPS/ASC proposed rule indicated that about two-thirds of providers have an ''Implantable Devices Charged to Patients'' CCR. At the time of our analysis for the proposed rule, for the hospitals that have an ''Implantable Devices Charged to Patients'' CCR, the median was 0.3911, compared with a median hospital-wide CCR of 0.2035.

b. CY 2017 Policy

In the CY 2017 OPPS/ASC proposed rule (81 FR 45654), we proposed to use the more specific ''Implantable Devices Charged to Patients'' CCR instead of the less specific average hospital-wide CCR to calculate transitional pass-through payments for devices, beginning with device pass-through payments in CY 2017. When the CCR for the ''Implantable Devices Charged to Patients'' CCR is not available for a particular hospital, we would continue to use the average CCR across all outpatient departments to calculate pass-through payments. We believe using the ''Implantable Devices Charged to Patients'' CCR will provide more accurate pass-through payments for most device pass-through payment recipients and will further mitigate the effects of charge compression. We invited public comments on this proposal.

Comment: Many commenters, including MedPAC, supported the proposal. Commenters generally agreed that use of the ''Implantable Devices Charged to Patients'' CCR would result in more accurate measurement of costs for pass-through medical devices, by reducing the effects of charge compression when applying the hospital-wide CCR.

Response: We appreciate the commenters' support.

Comment: One commenter suggested that CMS modify the proposal to allow use of the ''Medical Supplies Charged to Patients'' CCR, if the hospital does not have an ''Implantable Devices Charged to Patients'' CCR. The commenter stated that this CCR would be a more accurate cost calculation than the hospital-wide CCR.

Response: In the FY 2009 IPPS final rule (73 FR 48458 through 48467), we created a cost center for ''Medical Supplies Charged to Patients,'' which generally includes low cost supplies, and another cost center for ''Implantable Devices Charged to Patients,'' which generally includes high-cost implantable devices. This change was in response to a Research Triangle Institute, International (RTI) study that was discussed in the FY 2009 IPPS final rule and which determined that there was charge compression in both the IPPS and the OPPS cost estimation of expensive and inexpensive medical supplies. By splitting medical supplies and implantable devices into two cost centers, some of the effects of charge compression were mitigated. We note that the intent of the ''Medical Supplies Charged to Patients'' CCR is to capture the costs and charges for low cost supplies which would not include implantable devices. Accordingly, in the absence of an ''Implantable Devices Charged to Patients'' CCR, we believe that the hospital-wide CCR would be an appropriate alternative since the hospital-wide CCR should reflect any implantable device costs that were incurred.

Comment: One commenter stated that providers who have not complied with the requirement to create an ''Implantable Devices Charged to Patients'' cost center should not receive any indirect payment benefits from their noncompliance.

Response: We note that we provide some flexibility in how hospitals address their cost reporting. As noted in the CY 2010 OPPS/ASC final rule with comment period (74 FR 60344), ''We typically do not specify a revenue-code-to-cost center crosswalk that hospitals must adopt to prepare their cost reporting, recognizing hospitals' need to interpret . . . cost reporting requirements within the context of their own financial systems.''

After consideration of the public comments we received, we are finalizing, without modification, our proposal to use the ''Implantable Devices Charged to Patients'' CCR instead of the average hospital-wide CCR to calculate transitional pass-through payments for devices, beginning with device pass-through payments in CY 2017. If the CCR for the ''Implantable Devices Charged to Patients'' CCR is not available for a particular hospital, we will instead use the average hospital-wide CCR to calculate pass-through payments.

6. Provisions for Reducing Transitional Pass-Through Payments To Offset Costs Packaged Into APC Groups

a. Background

Section 1833(t)(6)(D)(ii) of the Act sets the amount of additional pass-through payment for an eligible device as the amount by which the hospital's charges for a device, adjusted to cost (the cost of the device), exceeds the portion of the otherwise applicable Medicare outpatient department fee schedule amount (the APC payment amount) associated with the device. We have an established policy to estimate the portion of each APC payment rate that could reasonably be attributed to the cost of the associated devices that are eligible for pass-through payments (66 FR 59904) for purposes of estimating the portion of the otherwise applicable APC payment amount associated with pass-through devices. For eligible device categories, we deduct an amount that reflects the portion of the APC payment amount that we determine is associated with the cost of the device, defined as the device APC offset amount, from the charges adjusted to cost for the device, as provided by section 1833(t)(6)(D)(ii) of the Act, to determine the pass-through payment amount for the eligible device. We have an established methodology to estimate the portion of each APC payment rate that could reasonably be attributed to the cost of an associated device eligible for pass-through payment, using claims data from the period used for the most recent recalibration of the APC rates (72 FR 66751 through 66752). In the unusual case where the device offset amount exceeds the device pass-through payment amount, the regular APC rate would be paid and the pass-through payment would be $0.

b. CY 2017 Policy

In the CY 2017 OPPS/ASC proposed rule (81 FR 45654), for CY 2017, we proposed to calculate the portion of the otherwise applicable Medicare OPD fee schedule amount, for each device-intensive procedure payment rate that can reasonably be attributed to (that is, reflect) the cost of an associated device (the device offset amount) at the HCPCS code level rather than at the APC level (which is an average of all codes assigned to an APC). We refer readers to section IV.B. of the proposed rule and of this final rule with comment period for a discussion of this proposal. Otherwise, as stated in the proposed rule, we will continue our established practice of reviewing each new pass-through device category to determine whether device costs associated with the new category replace device costs that are already packaged into the device implantation procedure. If device costs that are packaged into the procedure are related to the new category, then according to our established practice we will deduct the device offset amount from the pass-through payment for the device

category. The list of device offsets for all device procedures is posted on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html*.

We are finalizing, without modification, our proposal to calculate the portion of the otherwise applicable Medicare OPD fee schedule amount for each device-intensive procedure payment rate that can be reasonably attributed to (that is, reflect) the cost of an associated device at the HCPCS code level rather than at the APC level. We refer readers to section IV.B. of this final rule with comment period for a discussion of the proposal to calculate device offsets at the HCPCS level. Otherwise, we will continue our established practice of reviewing each new pass-through device category to determine whether device costs associated with the new category replace device costs that are already packaged into the device implantation procedure. If device costs that are packaged into the procedure are related to the new category, then according to our established practice, we will deduct the device offset amount from the pass-through payment for the device category. The list of device offsets for all device procedures will be posted on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html*.

B. Device-Intensive Procedures

1. Background

Under the OPPS, device-intensive APCs are defined as those APCs with a device offset greater than 40 percent (79 FR 66795). In assigning device-intensive status to an APC, the device costs of all of the procedures within the APC are calculated and the geometric mean device offset of all of the procedures must exceed 40 percent. Almost all of the procedures assigned to device-intensive APCs utilize devices, and the device costs for the associated HCPCS codes exceed the 40-percent threshold. The no cost/full credit and partial credit device policy (79 FR 66872 through 66873) applies to device-intensive APCs and is discussed in detail in section IV.B.4. of this final rule with comment period. A related device policy is the requirement that certain procedures assigned to device-intensive APCs require the reporting of a device code on the claim (80 FR 70422). For further background information on the device-intensive APC policy, we refer readers to the CY 2016 OPPS/ASC final rule with comment period (80 FR 70421 through 70426).

2. HCPCS Code-Level Device-Intensive Determination

As stated above, currently the device-intensive methodology assigns device-intensive status to all procedures requiring the implantation of a device, which are assigned to an APC with a device offset greater than 40 percent. Historically, the device-intensive designation has been at the APC level and applied to the applicable procedures within that given APC. In the CY 2017 OPPS/ASC proposed rule (81 FR 45654), for CY 2017, we proposed to modify the methodology for assigning device-intensive status. Specifically, for CY 2017, we proposed to assign device-intensive status to all procedures that require the implantation of a device and have an individual HCPCS code-level device offset of greater than 40 percent, regardless of the APC assignment, as we no longer believe that device-intensive status should be based on APC assignment because APC groupings of clinically similar procedures do not necessarily factor in device cost similarity. In 2016, we restructured many of the APCs, and this resulted in some procedures with significant device costs not being assigned device-intensive status because they were not assigned to a device-intensive APC. Under our proposal, all procedures with significant device costs (defined as a device offset of more than 40 percent) would be assigned device-intensive status, regardless of their APC placement. Also, we believe that a HCPCS code-level device offset would, in most cases, be a better representation of a procedure's device cost than an APC-wide average device offset based on the average device offset of all of the procedures assigned to an APC. Unlike a device offset calculated at the APC level, which is a weighted average offset for all devices used in all of the procedures assigned to an APC, a HCPCS code-level device offset is calculated using only claims for a single HCPCS code. We believe that such a methodological change would result in a more accurate representation of the cost attributable to implantation of a high-cost device, which would ensure consistent device-intensive designation of procedures with a significant device cost. Further, we believe a HCPCS code-level device offset would remove inappropriate device-intensive status to procedures without a significant device cost but which are granted such status because of APC assignment.

Under our proposal, procedures that have an individual HCPCS code-level device offset of greater than 40 percent would be identified as device-intensive procedures and would be subject to all the CY 2017 policies applicable to procedures assigned device-intensive status under our established methodology, including our policies on device edits and device credits. Therefore, under our proposal, all procedures requiring the implantation of a medical device and that have an individual HCPCS code-level device offset of greater than 40 percent would be subject to the device edit and no cost/full credit and partial credit device policies, discussed in sections IV.B.3. and IV.B.4. of the proposed rule, respectively. We proposed to amend the regulation at § 419.44(b)(2) to reflect that we would no longer be designating APCs as device-intensive, and instead would be designating procedures as device-intensive.

Comment: The majority of commenters supported the proposal to revise the device-intensive calculation methodology and calculate at the HCPCS code level rather than at the APC level. One commenter believed that device-intensive procedures should not be assigned to an APC that includes procedures that are not device-intensive. A few commenters asked that CMS provide further detail into how device offsets are calculated, and provide examples of how this proposed change might impact existing APCs for both OPPS and ASC payment prior to implementing. One commenter requested that CMS make further refinements to the methodology if needed to ensure the full breadth of implantable device and supply costs are being captured and recommended moving forward that CMS routinely release the device offset calculations with each year's OPPS/ASC proposed rule. Another commenter requested that CMS create two different device offsets based on differing calculations, with the proposed device offset methodology used to calculate a ''device offset for device intensive policies'' (which would be used to determine if a procedure is device intensive or not) and an alternate methodology used to calculate a ''device offset for pass-through payment policy'' (which would be used to calculate the portion of the otherwise applicable Medicare OPD fee schedule amount for device pass-through status).

Response: We appreciate the commenters' support. We disagree with the commenter's belief that device-intensive procedures should not be assigned to an APC that includes procedures that are not device-intensive. Under our proposed policy, the APC placement of a device-intensive

procedure will have no bearing on the procedure's device-intensive designation. The device offset is the estimated portion of the payment for a procedure that is attributable to the device. We remind commenters that the list of device offsets for all device procedures is posted on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html*. In response to the request to create an additional device offset for pass-through payment policy, in addition to a device offset based on the proposed device offset methodology, we do not see the need for the creation of a second device offset. We believe that a device offset calculated based on the proposed device offset methodology is appropriate and an accurate proxy for a procedure's device costs when calculating the portion of the otherwise applicable Medicare OPD fee schedule amount.

After consideration of the public comments we received, we are finalizing our proposal, without modification, for CY 2017, to assign device-intensive status to all procedures that require the implantation of a device and have an individual HCPCS code-level device offset of greater than 40 percent, regardless of the APC assignment.

In addition, for new HCPCS codes describing procedures requiring the implantation of medical devices that do not yet have associated claims data, we proposed to apply device-intensive status with a default device offset set at 41 percent until claims data are available to establish the HCPCS code-level device offset for the procedures. This default device offset amount of 41 percent would not be calculated from claims data; instead it would be applied as a default until claims data are available upon which to calculate an actual device offset for the new code. The purpose of applying the 41 percent default device offset to new codes that describe procedures that implant medical devices would be to ensure ASC access for new procedures until claims data become available. However, as stated in the proposed rule (81 FR 45655), in certain rare instances, for example, in the case of a very expensive implantable device, we may temporarily assign a higher offset percentage if warranted by additional information such as pricing data from a device manufacturer. Once claims data are available for a new procedure requiring the implantation of a medical device, device-intensive status would be applied to the code if the HCPCS code-level device offset is greater than 40 percent, according to our proposed policy of determining device-intensive status by calculating the HCPCS code-level device offset. The full listing of proposed device-intensive procedures was included in a new Addendum P to the proposed rule (which is available via the Internet on the CMS Web site).

Comment: A number of commenters supported CMS' proposal to apply a default device offset of at least 41 percent to new implant procedures with the possibility for higher device offset if supported by device costs. Some commenters in support of the proposal asked that CMS specify how additional information can be submitted, including the deadline for submission, the type of information that can be submitted and who it can be submitted by to have CMS consider a higher offset percentage for a new implant procedure. One commenter did not support the proposal under which every new HCPCS code that describes procedures requiring implantation of a device should be assigned a default device offset of 41 percent. This commenter stated that CMS should ensure that all new procedures requiring implantation of a device require use of a device that is described by a device HCPCS code that satisfies the device edit for device intensive procedures, before assigning a default device offset of 41 percent and recognizing the new implantation procedure as a device intensive procedure.

Response: We appreciate the commenters' support. Additional information for our consideration of an offset percentage higher than the default of 41 percent for new HCPCS codes describing procedures requiring the implantation (or in some cases the insertion) of a medical device that do not yet have associated claims data, such as pricing data or invoices from a device manufacturer, should be directed to the Division of Outpatient Care, Mail Stop C4–01–26, Centers for Medicare and Medicaid Services, 7500 Security Boulevard, Baltimore, MD 21244–1850, or electronically at *outpatientpps@cms.hhs.gov*. Additional information can be submitted prior to issuance of an OPPS/ASC proposed rule or as a public comment in response to an issued OPPS/ASC proposed rule. Device offset percentages will be set in each year's final rule. In response to the commenter who did not support this proposal, we note that we are creating a new category HCPCS C-code (described in section IV.B.3. of this final rule with comment period) for providers to report when a device implantation or insertion procedure uses a device that is not described by a specific Level II HCPCS C-code so that these device intensive procedures can satisfy the device edit policy.

After consideration of the public comments we received, we are finalizing our proposal, without modification, for CY 2017 to apply device-intensive status with a default device offset set at 41 percent for new HCPCS codes describing procedures requiring the implantation of a medical device that do not yet have associated claims data until claims data are available to establish the HCPCS code-level device offset for the procedures. For CY 2017, we also are finalizing our proposal, without modification, that in certain rare instances, we may temporarily assign a higher offset percentage if warranted by additional information.

3. Changes to the Device Edit Policy

In the CY 2015 OPPS/ASC final rule with comment period (79 FR 66795), we finalized a policy and implemented claims processing edits that require any of the device codes used in the previous device-to-procedure edits to be present on the claim whenever a procedure code assigned to any of the APCs listed in Table 5 of the CY 2015 OPPS/ASC final rule with comment period (the CY 2015 device-dependent APCs) is reported on the claim. In addition, in the CY 2016 OPPS/ASC final rule with comment period (80 FR 70422), we modified our previously existing policy and applied the device coding requirements exclusively to procedures that require the implantation of a device that are assigned to a device-intensive APC. In the CY 2016 OPPS/ASC final rule with comment period, we also finalized our policy that the claims processing edits are such that any device code, when reported on a claim with a procedure assigned to a device-intensive APC (listed in Table 42 of the CY 2016 OPPS/ASC final rule with comment period (80 FR 70422)) will satisfy the edit.

As discussed in the CY 2017 OPPS/ASC proposed rule (81 FR 45655), as part of our proposal described in section IV.B.2. of the proposed rule to no longer recognize device-intensive APCs and instead recognize device-intensive procedures based on their individual HCPCS code-level device offset being greater than 40 percent, for CY 2017, we proposed to modify our existing device edit policy. Specifically, for CY 2017 and subsequent years, we proposed to apply the CY 2016 device coding requirements to the newly defined (individual HCPCS code-level device offset greater than 40 percent) device-intensive procedures. In addition, we proposed that any device code, when reported on a claim with a device-

intensive procedure, would satisfy the edit.

Comment: A number of commenters urged CMS to restore the specific device-to-procedure and procedure-to-device edits that CMS used to apply and not keep the current ''any device'' code policy. One commenter asked that CMS require hospitals to report all devices, not just those associated with procedures that CMS has already determined to be device intensive. Another commenter requested that CMS create a miscellaneous C-code for providers to report when a device used does not have a specific Level II HCPCS Category C-code.

Response: As we stated in the CY 2015 OPPS/ASC final rule with comment period (79 FR 66794), we continue to believe that the elimination of device-to-procedure edits and procedure-to-device edits is appropriate due to the experience hospitals now have in coding and reporting these claims fully. More specifically, for the more costly devices, we believe the C–APCs will reliably reflect the cost of the device if charges for the device are included anywhere on the claim. We remind commenters that, under our current policy, hospitals are still expected to adhere to the guidelines of correct coding and append the correct device code to the claim when applicable. We also remind commenters that, as with all other items and services recognized under the OPPS, we expect hospitals to code and report their costs appropriately, regardless of whether there are claims processing edits in place. We agree with the commenter that we should create a miscellaneous HCPCS C-code for providers to report when a device used does not have a specific Level II HCPCS C-code. Therefore, effective January 1, 2017, we are creating HCPCS code C1889 (Implantable/insertable device for device intensive procedure, not otherwise classified) to recognize devices implanted or inserted during a device-intensive procedure that are not described by a specific Level II HCPCS Category C-code.

After consideration of the public comments we received, we are finalizing our proposal for CY 2017 and subsequent years to apply the CY 2016 device coding requirements to the newly defined (individual HCPCS code-level device offset greater than 40 percent) device-intensive procedures. For CY 2017 and subsequent years, we also are finalizing our proposal that any device code, when reported on a claim with a device-intensive procedure, will satisfy the edit. In addition, we are creating HCPCS code C1889 to recognize devices furnished during a device intensive procedure that are not described by a specific Level II HCPCS Category C-code. Reporting HCPCS code C1889 with a device intensive procedure will satisfy the edit requiring a device code to be reported on a claim with a device-intensive procedure.

4. Adjustment to OPPS Payment for No Cost/Full Credit and Partial Credit Devices

a. Background

To ensure equitable OPPS payment when a hospital receives a device without cost or with full credit, in CY 2007, we implemented a policy to reduce the payment for specified device-dependent APCs by the estimated portion of the APC payment attributable to device costs (that is, the device offset) when the hospital receives a specified device at no cost or with full credit (71 FR 68071 through 68077). Hospitals were instructed to report no cost/full credit device cases on the claim using the ''FB'' modifier on the line with the procedure code in which the no cost/full credit device is used. In cases in which the device is furnished without cost or with full credit, hospitals were instructed to report a token device charge of less than $1.01. In cases in which the device being inserted is an upgrade (either of the same type of device or to a different type of device) with a full credit for the device being replaced, hospitals were instructed to report as the device charge the difference between the hospital's usual charge for the device being implanted and the hospital's usual charge for the device for which it received full credit. In CY 2008, we expanded this payment adjustment policy to include cases in which hospitals receive partial credit of 50 percent or more of the cost of a specified device. Hospitals were instructed to append the ''FC'' modifier to the procedure code that reports the service provided to furnish the device when they receive a partial credit of 50 percent or more of the cost of the new device. We refer readers to the CY 2008 OPPS/ASC final rule with comment period for more background information on the ''FB'' and ''FC'' modifiers payment adjustment policies (72 FR 66743 through 66749).

In the CY 2014 OPPS/ASC final rule with comment period (78 FR 75005 through 75007), beginning in CY 2014, we modified our policy of reducing OPPS payment for specified APCs when a hospital furnishes a specified device without cost or with a full or partial credit. For CY 2013 and prior years, our policy had been to reduce OPPS payment by 100 percent of the device offset amount when a hospital furnishes a specified device without cost or with a full credit and by 50 percent of the device offset amount when the hospital receives partial credit in the amount of 50 percent or more of the cost for the specified device. For CY 2014, we reduced OPPS payment, for the applicable APCs, by the full or partial credit a hospital receives for a replaced device. Specifically, under this modified policy, hospitals are required to report on the claim the amount of the credit in the amount portion for value code ''FD'' (Credit Received from the Manufacturer for a Replaced Medical Device) when the hospital receives a credit for a replaced device that is 50 percent or greater than the cost of the device. For CY 2014, we also limited the OPPS payment deduction for the applicable APCs to the total amount of the device offset when the ''FD'' value code appears on a claim. For CY 2015, we continued our existing policy of reducing OPPS payment for specified APCs when a hospital furnishes a specified device without cost or with a full or partial credit and to use the three criteria established in the CY 2007 OPPS/ASC final rule with comment period (71 FR 68072 through 68077) for determining the APCs to which our CY 2015 policy will apply (79 FR 66872 through 66873). In the CY 2016 OPPS/ASC final rule with comment period (80 FR 70424), we finalized our policy to no longer specify a list of devices to which the OPPS payment adjustment for no cost/full credit and partial credit devices would apply and instead apply this APC payment adjustment to all replaced devices furnished in conjunction with a procedure assigned to a device-intensive APC when the hospital receives a credit for a replaced specified device that is 50 percent or greater than the cost of the device.

b. Policy for CY 2017

In the CY 2017 OPPS/ASC proposed rule (81 FR 45656), for CY 2017, we proposed modifications to our current policy for reducing OPPS payment by the full or partial credit a provider receives for a replaced device, in conjunction with our proposal above to recognize the newly defined (individual HCPCS level device offset greater than 40 percent) device-intensive procedures. For CY 2017 and subsequent years, we proposed to reduce OPPS payment for specified procedures when a hospital furnishes a specified device without cost or with a full or partial credit. Specifically, for CY 2017, we proposed to continue to reduce the OPPS

payment, for the device-intensive procedures, by the full or partial credit a provider receives for a replaced device. Under this proposed policy, hospitals would continue to be required to report on the claim the amount of the credit in the amount portion for value code ''FD'' when the hospital receives a credit for a replaced device that is 50 percent or greater than the cost of the device.

For CY 2017 and subsequent years, we also proposed to determine which procedures our proposed policy would apply to using three criteria analogous to the three criteria established in the CY 2007 OPPS/ASC final rule with comment period for determining the APCs to which our existing policy applies (71 FR 68072 through 68077).

Specifically, for CY 2017 and subsequent years, we proposed to use the following three criteria for determining the procedures to which our proposed policy would apply: (1) All procedures must involve implantable devices that would be reported if device insertion procedures were performed; (2) the required devices must be surgically inserted or implanted devices that remain in the patient's body after the conclusion of the procedure (at least temporarily); and (3) the procedure must be device-intensive; that is, the device offset amount must be significant, which is defined as exceeding 40 percent of the procedure's mean cost. We continue to believe these criteria are appropriate because no-cost devices and device credits are likely to be associated with particular cases only when the device must be reported on the claim and is of a type that is implanted and remains in the body when the beneficiary leaves the hospital. We believe that the reduction in payment is appropriate only when the cost of the device is a significant part of the total cost of the procedure into which the device cost is packaged, and that the 40-percent threshold is a reasonable definition of a significant cost. As noted earlier in this section, procedures with a device offset that exceed the 40-percent threshold are called device-intensive procedures.

Comment: One commenter recommended that CMS reinstate the procedure code list that is subject to the no cost/full credit and partial credit devices.

Response: As stated in the CY 2016 OPPS/ASC final rule with comment period (80 FR 70424), we no longer believe it is necessary to restrict the application of our policy to reduce the OPPS payment by the full or partial credit a provider receives for a replaced device to a specific list of devices. Therefore, we no longer believe it is necessary to specify a list of devices to which the OPPS payment adjustment for no cost/full credit and partial credit devices would apply.

After consideration of the public comments we received, for CY 2017, we are finalizing our proposed modifications to our current policy for reducing OPPS payment by the full or partial credit a provider receives for a replaced device, in conjunction with our finalized policy to recognize the newly defined (individual HCPCS level device offset greater than 40 percent) device-intensive procedures. Specifically, for CY 2017, we are finalizing our proposal to continue to reduce the OPPS payment, for the device-intensive procedures, by the full or partial credit a provider receives for a replaced device. In addition, for CY 2017 and subsequent years, we are finalizing our proposal to use the following three criteria for determining the procedures to which our final policy will apply: (1) All procedures must involve implantable devices that would be reported if device insertion procedures were performed; (2) the required devices must be surgically inserted or implanted devices that remain in the patient's body after the conclusion of the procedure (at least temporarily); and (3) the procedure must be device intensive; that is, the device offset amount must be significant, which is defined as exceeding 40 percent of the procedure's mean cost.

5. Payment Policy for Low-Volume Device-Intensive Procedures

For CY 2016, we used our equitable adjustment authority under section 1833(t)(2)(E) of the Act and used the median cost (instead of the geometric mean cost per our standard methodology) to calculate the payment rate for the implantable miniature telescope procedure described by CPT code 0308T (Insertion of ocular telescope prosthesis including removal of crystalline lens or intraocular lens prosthesis), which is the only code assigned to APC 5494 (Level 4 Intraocular Procedures) (80 FR 70388). We note that, as stated in the CY 2017 OPPS/ASC proposed rule (81 FR 45656), we proposed to reassign the procedure described by CPT code 0308T to APC 5495 (Level 5 Intraocular Procedures) for CY 2017, but it would be the only procedure code assigned to APC 5495. The payment rates for a procedure described by CPT code 0308T (including the predecessor HCPCS code C9732) were $15,551 in CY 2014, $23,084 in CY 2015, and $17,551 in CY 2016. The procedure described by CPT code 0308T is a high-cost device-intensive surgical procedure that has a very low volume of claims (in part because most of the procedures described by CPT code 0308T are performed in ASCs), and we believe that the median cost is a more appropriate measure of the central tendency for purposes of calculating the cost and the payment rate for this procedure because the median cost is impacted to a lesser degree than the geometric mean cost by more extreme observations. We stated that, in future rulemaking, we would consider proposing a general policy for the payment rate calculation for very low-volume device-intensive APCs (80 FR 70389).

For CY 2017, we proposed a payment policy for low-volume device-intensive procedures that is similar to the policy applied to the procedure described by CPT code 0308T in CY 2016. In particular, we proposed that the payment rate for any device-intensive procedure that is assigned to a clinical APC with fewer than 100 total claims for all procedures in the APC be calculated using the median cost instead of the geometric mean cost, for the reasons described above for the policy applied to the procedure described by CPT code 0308T in CY 2016. We believe that this approach will help to mitigate to some extent significant year-to-year payment rate fluctuations while preserving accurate claims data-based payment rates for low-volume device-intensive procedures. For CY 2017, this policy would only apply to a procedure described by CPT code 0308T in APC 5495 because this APC is the only APC containing a device-intensive procedure with less than 100 total claims in the APC. The CY 2017 proposed rule median cost for the procedure described by CPT code 0308T was approximately $17,965 (the median cost was incorrectly stated in the proposed rule as $15,567). The proposed CY 2017 payment rate (calculated using the median cost and the claims that reported the device consistent with our device edit policy for device intensive procedures) was approximately $17,189. We invited public comments on this proposal.

Comment: The majority of commenters supported the proposal to base payment on the median cost instead of the geometric mean cost for any device-intensive procedure that is assigned to an APC with fewer than 100 total claims (for all of the services assigned to the APC). One commenter recommended that CMS consider whether refinements to the low-volume, device-intensive procedure policy are

appropriate in future rulemaking, such as using the claims volume at the HCPCS level rather than the APC level.

Response: We appreciate the commenters' support. At this time, we believe it is only appropriate to calculate the payment rate using median cost instead of the geometric mean for a device-intensive procedure that is assigned to a clinical APC with fewer than 100 total claims for all procedures in the APC.

After consideration of the public comments we received, we are finalizing our proposal, without modification, that the payment rate for any device-intensive procedure that is assigned to a clinical APC with fewer than 100 total claims for all procedures in the APC be calculated using the median cost instead of the geometric mean cost. The CY 2017 final rule geometric mean cost for the procedure described by CPT code 0308T (based on 19 claims containing the device HCPCS C-code in accordance with the device-intensive edit policy) is approximately $21,302, and the median cost is approximately $19,521. The final CY 2017 payment rate (calculated using the median cost) is approximately $18,984.

V. OPPS Payment Changes for Drugs, Biologicals, and Radiopharmaceuticals

A. OPPS Transitional Pass-Through Payment for Additional Costs of Drugs, Biologicals, and Radiopharmaceuticals

1. Background

Section 1833(t)(6) of the Act provides for temporary additional payments or ''transitional pass-through payments'' for certain drugs and biologicals. Throughout this final rule with comment period, the term ''biological'' is used because this is the term that appears in section 1861(t) of the Act. ''Biological'' as used in this final rule with comment period includes (but is not necessarily limited to) ''biological product'' or ''biologic'' as defined in the Public Health Service Act. As enacted by the Medicare, Medicaid, and SCHIP Balanced Budget Refinement Act of 1999 (BBRA) (Pub. L. 106–113), this pass-through payment provision requires the Secretary to make additional payments to hospitals for: Current orphan drugs, as designated under section 526 of the Federal Food, Drug, and Cosmetic Act; current drugs and biologicals and brachytherapy sources used in cancer therapy; and current radiopharmaceutical drugs and biologicals. ''Current'' refers to drugs or biologicals that are hospital outpatient services under Medicare Part B for which payment was made on the first date the hospital OPPS was implemented.

Transitional pass-through payments also are provided for certain ''new'' drugs and biologicals that were not being paid for as an HOPD service as of December 31, 1996 and whose cost is ''not insignificant'' in relation to the OPPS payments for the procedures or services associated with the new drug or biological. For pass-through payment purposes, radiopharmaceuticals are included as ''drugs.'' As required by statute, transitional pass-through payments for a drug or biological described in section 1833(t)(6)(C)(i)(II) of the Act can be made for a period of at least 2 years, but not more than 3 years, after the payment was first made for the product as a hospital outpatient service under Medicare Part B. CY 2017 pass-through drugs and biologicals and their designated APCs are assigned status indicator ''G'' in Addenda A and B to this final rule with comment period (which are available via the Internet on the CMS Web site).

Section 1833(t)(6)(D)(i) of the Act specifies that the pass-through payment amount, in the case of a drug or biological, is the amount by which the amount determined under section 1842(o) of the Act for the drug or biological exceeds the portion of the otherwise applicable Medicare OPD fee schedule that the Secretary determines is associated with the drug or biological. The methodology for determining the pass-through payment amount is set forth in regulations at 42 CFR 419.64. These regulations specify that the pass-through payment equals the amount determined under section 1842(o) of the Act minus the portion of the APC payment that CMS determines is associated with the drug or biological. Section 1847A of the Act establishes the average sales price (ASP) methodology, which is used for payment for drugs and biologicals described in section 1842(o)(1)(C) of the Act furnished on or after January 1, 2005. The ASP methodology, as applied under the OPPS, uses several sources of data as a basis for payment, including the ASP, the wholesale acquisition cost (WAC), and the average wholesale price (AWP). In this final rule with comment period, the term ''ASP methodology'' and ''ASP-based'' are inclusive of all data sources and methodologies described therein. Additional information on the ASP methodology can be found on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Part-B-Drugs/McrPartBDrugAvgSalesPrice/index.html*.

The pass-through application and review process for drugs and biologicals is explained on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/passthrough_payment.html*.

2. Policy Change To Make the Transitional Pass-Through Payment Period 3 Years for All Pass-Through Drugs, Biologicals, and Radiopharmaceuticals and Expire Pass-Through Status on a Quarterly Rather Than Annual Basis

As required by statute, transitional pass-through payments for a drug or biological described in section 1833(t)(6)(C)(i)(II) of the Act can be made for a period of at least 2 years, but not more than 3 years, after the payment was first made for the product as a hospital outpatient service under Medicare Part B. Our current policy is to accept pass-through applications on a quarterly basis and to begin pass-through payments for new pass-through drugs and biologicals on a quarterly basis through the next available OPPS quarterly update after the approval of a product's pass-through status. However, we expire pass-through status for drugs and biologicals on an annual basis through notice-and-comment rulemaking (74 FR 60480). This means that because the 2-year to 3-year pass-through payment eligibility period starts on the date of first pass-through payment under 42 CFR 419.64(c)(2), the duration of pass-through eligibility for a particular drug or biological will depend upon when during a year the applicant applies for pass-through status. Under the current policy, a new pass-through drug or biological with pass-through status effective on January 1 would receive 3 years of pass-through status; a pass-through drug with pass-through status effective on April 1 would receive 2 years and 3 quarters of pass-through status; a pass-through drug with pass-through status effective on July 1 would receive 2 and ½ years of pass-through status; and a pass-through drug with pass-through status effective on October 1 would receive 2 years and 3 months (a quarter) of pass-through status.

In the CY 2017 OPPS/ASC proposed rule (81 FR 45657), we proposed, beginning with pass-through drugs and biologicals newly approved in CY 2017 and subsequent calendar years, to allow for a quarterly expiration of pass-through payment status for drugs and biologicals to afford a pass-through period that is as close to a full 3 years as possible for all pass-through payment drugs, biologicals, and radiopharmaceuticals. This proposed change would eliminate the variability

of the pass-through payment eligibility period, which currently varies based on the timing of the particular application, as we now believe that the timing of a pass-through payment application should not determine the duration of pass-through payment status. For example, for a drug with pass-through status first effective on April 1, 2017, pass-through status would expire on March 31, 2020. This approach would allow for the maximum pass-through period for each pass-through drug without exceeding the statutory limit of 3 years. We invited public comments on this proposal.

Comment: Several commenters supported CMS' proposal to expire pass-through status and payment for pass-through drugs on a quarterly basis rather than an annual basis such that pass-through status would be as close as possible to 3 years for all pass-through drugs and biologicals. Some commenters recommended that CMS apply the proposed policy to all drugs with pass-through payment status in CY 2017 to prevent disparate treatment of such drugs based on their pass-through approval date.

Response: We appreciate commenters' support. In response to commenters' recommendation to expire pass-through status and payment for pass-through drugs on a quarterly basis rather than an annual basis for all drugs with pass-through payment status in CY 2017, we note that the annual expiration of pass-through payment status for all drugs currently assigned pass-through payment status under the OPPS was finalized in previous years' OPPS/ASC rulemaking and was not proposed to be altered in our CY 2017 proposal.

After consideration of the public comments we received, we are finalizing our proposal, without modification, beginning with pass-through drugs and biologicals newly approved in CY 2017 and subsequent calendar years, to allow for a quarterly expiration of pass-through payment status for drugs and biologicals to afford a pass-through period that is as close to a full 3 years as possible for all pass-through drugs, biologicals, and radiopharmaceuticals.

3. Drugs and Biologicals With Expiring Pass-Through Payment Status in CY 2016

In the CY 2017 OPPS/ASC proposed rule (81 FR 45657), we proposed that the pass-through status of 15 drugs and biologicals would expire on December 31, 2016, as listed in Table 13 of the proposed rule (81 FR 45658). All of these drugs and biologicals will have received OPPS pass-through payment for at least 2 years and no more than 3 years by December 31, 2016. These drugs and biologicals were approved for pass-through payment status on or before January 1, 2015. With the exception of those groups of drugs and biologicals that are always packaged when they do not have pass-through payment status (specifically, anesthesia drugs; drugs, biologicals, and radiopharmaceuticals that function as supplies when used in a diagnostic test or procedure (including diagnostic radiopharmaceuticals, contrast agents, and stress agents); and drugs and biologicals that function as supplies when used in a surgical procedure), our standard methodology for providing payment for drugs and biologicals with expiring pass-through payment status in an upcoming calendar year is to determine the product's estimated per day cost and compare it with the OPPS drug packaging threshold for that calendar year (which is $110 for CY 2017), as discussed further in section V.B.2. of this final rule with comment period. In the CY 2017 OPPS/ASC proposed rule (81 FR 45658), we proposed that if the estimated per day cost for the drug or biological is less than or equal to the applicable OPPS drug packaging threshold, to package payment for the drug or biological into the payment for the associated procedure in the upcoming calendar year. If the estimated per day cost of the drug or biological is greater than the OPPS drug packaging threshold, we proposed to provide separate payment at the applicable relative ASP-based payment amount (which was proposed at ASP+6 percent for CY 2017, and is finalized at ASP+6 percent for CY 2017, as discussed further in section V.B.3. of this final rule with comment period).

We did not receive any public comments on this proposal. Therefore, we are finalizing our proposal, without modification, to expire the pass-through payment status of the 15 drugs and biologicals listed below in Table 35 on December 31, 2016.

TABLE 35—DRUGS AND BIOLOGICALS FOR WHICH PASS-THROUGH PAYMENT STATUS EXPIRES DECEMBER 31, 2016

CY 2017 HCPCS code	CY 2017 long descriptor	Final CY 2017 status indicator	Final CY 2017 APC
C9497	Loxapine, inhalation powder, 10 mg	K	9497
J1322	Injection, elosulfase alfa, 1 mg	K	1480
J1439	Injection, ferric carboxymaltose, 1 mg	N	N/A
J1447	Injection, TBO-Filgrastim, 1 microgram	N	N/A
J3145	Injection, testosterone undecanoate, 1 mg	N	N/A
J3380	Injection, vedolizumab, 1 mg	K	1489
J7181	Injection, factor xiii a-subunit, (recombinant), per iu	N	N/A
J7200	Factor ix (antihemophilic factor, recombinant), Rixubus, per i.u	N	N/A
J7201	Injection, factor ix, fc fusion protein (recombinant), per iu	N	N/A
J7205	Injection, factor viii fc fusion (recombinant), per iu	K	1656
J7508	Tacrolimus, extended release, (astagraf xl), oral, 0.1 mg	N	N/A
J9301	Injection, obinutuzumab, 10 mg	N	N/A
J9308	Injection, ramucirumab, 5 mg	K	1488
J9371	Injection, Vincristine Sulfate Liposome, 1 mg	K	1466
Q4121	Theraskin, per square centimeter	N	N/A

The final packaged or separately payable status of each of these drugs or biologicals is listed in Addendum B to this final rule with comment period (which is available via the Internet on the CMS Web site).

4. Drugs, Biologicals, and Radiopharmaceuticals With New or Continuing Pass-Through Payment Status in CY 2017

In the CY 2017 OPPS/ASC proposed rule (81 FR 45658), we proposed to continue pass-through payment status in CY 2017 for 38 drugs and biologicals. None of these drugs and biologicals will have received OPPS pass-through payment for at least 2 years and no more than 3 years by December 31, 2016. These drugs and biologicals, which were approved for pass-through status between January 1, 2015, and July 1, 2016, were listed in Table 14 of the proposed rule (81 FR 45659). The APCs and HCPCS codes for these drugs and biologicals approved for pass-through payment status through July 1, 2016 were assigned status indicator ''G'' in Addenda A and B to the proposed rule (which are available via the Internet on the CMS Web site).

Section 1833(t)(6)(D)(i) of the Act sets the amount of pass-through payment for pass-through drugs and biologicals (the pass-through payment amount) as the difference between the amount authorized under section 1842(o) of the Act and the portion of the otherwise applicable OPD fee schedule that the Secretary determines is associated with the drug or biological. For CY 2017, we proposed to continue to pay for pass-through drugs and biologicals at ASP+6 percent, equivalent to the payment rate these drugs and biologicals would receive in the physician's office setting in CY 2017. We proposed that a $0 pass-through payment amount would be paid for pass-through drugs and biologicals under the CY 2017 OPPS because the difference between the amount authorized under section 1842(o) of the Act, which was proposed at ASP+6 percent, and the portion of the otherwise applicable OPD fee schedule that the Secretary determines is appropriate, which was proposed at ASP+6 percent, is $0.

In the case of policy-packaged drugs (which include the following: Anesthesia drugs; drugs, biologicals, and radiopharmaceuticals that function as supplies when used in a diagnostic test or procedure (including contrast agents; diagnostic radiopharmaceuticals, and stress agents); and drugs and biologicals that function as supplies when used in a surgical procedure), we proposed that their pass-through payment amount would be equal to ASP+6 percent for CY 2017 because, if not for their pass-through status, payment for these products would be packaged into the associated procedure.

In addition, we proposed to continue to update pass-through payment rates on a quarterly basis on the CMS Web site during CY 2017 if later quarter ASP submissions (or more recent WAC or AWP information, as applicable) indicate that adjustments to the payment rates for these pass-through drugs or biologicals are necessary. For a full description of this policy, we refer readers to the CY 2006 OPPS/ASC final rule with comment period (70 FR 68632 through 68635).

In CY 2017, as is consistent with our CY 2016 policy for diagnostic and therapeutic radiopharmaceuticals, we proposed to provide payment for both diagnostic and therapeutic radiopharmaceuticals that are granted pass-through payment status based on the ASP methodology. As stated earlier, for purposes of pass-through payment, we consider radiopharmaceuticals to be drugs under the OPPS. Therefore, if a diagnostic or therapeutic radiopharmaceutical receives pass-through payment status during CY 2017, we proposed to follow the standard ASP methodology to determine the pass-through payment rate that drugs receive under section 1842(o) of the Act, which was proposed at ASP+6 percent. If ASP data are not available for a radiopharmaceutical, we proposed to provide pass-through payment at WAC+6 percent, the equivalent payment provided to pass-through drugs and biologicals without ASP information. If WAC information also is not available, we proposed to provide payment for the pass-through radiopharmaceutical at 95 percent of its most recent AWP.

Comment: Several commenters supported CMS' proposal to continue to provide payment at ASP+6 percent for drugs, biologicals, contrast agents, and radiopharmaceuticals that are granted pass-through payment status. Some commenters requested that CMS provide an additional payment for radiopharmaceuticals that are granted pass-through payment status.

Response: We appreciate the commenters' support. Regarding the commenters' request that CMS provide an additional payment for radiopharmaceuticals that are granted pass-through payment status, we note that, for CY 2017, consistent with our CY 2016 payment policy for diagnostic and therapeutic radiopharmaceuticals, we proposed to provide payment for both diagnostic and therapeutic radiopharmaceuticals with pass-through payment status based on the ASP methodology. As stated earlier, the ASP methodology, as applied under the OPPS, uses several sources of data as a basis for payment, including the ASP, the WAC if the ASP is unavailable, and 95 percent of the radiopharmaceutical's most recent AWP if both the ASP and WAC are unavailable. For purposes of pass-through payment, we consider radiopharmaceuticals to be drugs under the OPPS. Therefore, if a diagnostic or therapeutic radiopharmaceutical receives pass-through payment status during CY 2017, we proposed to follow the standard ASP methodology to determine its pass-through payment rate under the OPPS to account for the acquisition and pharmacy overhead costs. We continue to believe that a single payment is appropriate for diagnostic radiopharmaceuticals with pass-through payment status in CY 2017, and that the payment rate of ASP+6 percent (or WAC or AWP if ASP is not available) is appropriate to provide payment for both a radiopharmaceutical's acquisition and pharmacy overhead costs. We refer readers to section V.B.3. of this final rule with comment period for further discussion of payment for therapeutic radiopharmaceuticals based on ASP information submitted by manufacturers. We also refer readers to the CMS Web site at: *https://www.cms.gov/Medicare/Medicare-Feefor-ServicePayment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices-Items/CMS-1656-FC.html.*

After consideration of the public comments we received, we are finalizing our proposal to provide payment for drugs, biologicals, diagnostic and therapeutic radiopharmaceuticals, and contrast agents that are granted pass-through payment status based on the ASP methodology. If a diagnostic or therapeutic radiopharmaceutical receives pass-through payment status during CY 2017, we will follow the standard ASP methodology to determine the pass-through payment rate that drugs receive under section 1842(o) of the Act, which is ASP+6 percent. If ASP data are not available for a radiopharmaceutical, we will provide pass-through payment at WAC+6 percent, the equivalent payment provided to pass-through drugs and biologicals without ASP information. If WAC information also is not available, we will provide payment for the pass-through radiopharmaceutical at 95 percent of its most recent AWP. The 47

drugs and biologicals that continue to have pass-through payment status for CY 2017 or have been granted pass-through payment status as of January 2017 are shown in Table 36 below.

TABLE 36—DRUGS AND BIOLOGICALS WITH PASS-THROUGH PAYMENT STATUS IN CY 2017

CY 2016 HCPCS code	CY 2017 HCPCS code	CY 2017 long descriptor	CY 2017 status indicator	CY 2017 APC
A9586	A9586	Florbetapir f18, diagnostic, per study dose, up to 10 millicuries	G	1664
N/A	A9588	Fluciclovine f-18, diagnostic, 0.1 mCi	G	9052
N/A	A9587	Gallium Ga-68, dotatate, diagnostic, 1 mCi	G	9056
N/A	C9140	Injection, Factor VIII (antihemophilic factor, recombinant) (Afstyla), 1 I.U	G	9043
C9137	J7207	Injection, Factor VIII (antihemophilic factor, recombinant) PEGylated, 1 I.U	G	1844
C9138	J7209	Injection, Factor VIII (antihemophilic factor, recombinant) (Nuwiq), per i.u	G	1846
C9139	J7202	Injection, Factor IX, albumin fusion protein (recombinant), Idelvion, 1 i.u	G	9171
C9349	Q4172	PuraPly, and PuraPly Antimicrobial, any type, per square centimeter	G	1657
C9447	C9447	Injection, phenylephrine and ketorolac, 4 ml vial	G	1663
C9460	C9460	Injection, cangrelor, 1 mg	G	9460
C9461	A9515	Choline C 11, diagnostic, per study dose	G	9461
C9470	J1942	Injection, aripiprazole lauroxil, 1 mg	G	9470

N/A	J7179	Injection, von willebrand factor (recombinant), (Vonvendi), 1 i.u. vwf:rco	G	9059
J7313	J7313	Injection, fluocinolone acetonide intravitreal implant, 0.01 mg	G	9450
J7503	J7503	Tacrolimus, extended release, (envarsus xr), oral, 0.25 mg	G	1845
J8655	J8655	Netupitant (300 mg) and palonosetron (0.5 mg)	G	9448
J9032	J9032	Injection, belinostat, 10 mg	G	1658
J9039	J9039	Injection, blinatumomab, 1 mcg	G	9449
J9271	J9271	Injection, pembrolizumab, 1 mg	G	1490
J9299	J9299	Injection, nivolumab, 1 mg	G	9453
Q5101	Q5101	Injection, Filgrastim (G–CSF), Biosimilar, 1 microgram	G	1822
Q9950	Q9950	Injection, sulfur hexafluoride lipid microsphere, per ml	G	9457
C9459	Q9982	Flutemetamol F18, diagnostic, per study dose, up to 5 millicuries	G	9459
C9458	Q9983	Florbetaben F18, diagnostic, per study dose, up to 8.1 millicuries	G	9458

5. Provisions for Reducing Transitional Pass-Through Payments for Policy-Packaged Drugs, Biologicals, and Radiopharmaceuticals To Offset Costs Packaged Into APC Groups

Under 42 CFR 419.2(b), nonpass-through drugs, biologicals, and radiopharmaceuticals that function as supplies when used in a diagnostic test or procedure are packaged in the OPPS. This category includes diagnostic radiopharmaceuticals, contrast agents, stress agents, and other diagnostic drugs. Also under 42 CFR 419.2(b), nonpass-through drugs and biologicals that function as supplies in a surgical procedure are packaged in the OPPS. This category includes skin substitutes and other surgical-supply drugs and biologicals. As described earlier, section 1833(t)(6)(D)(i) of the Act specifies that the transitional pass-through payment amount for pass-through drugs and biologicals is the difference between the amount paid under section 1842(o) of the Act and the otherwise applicable OPD fee schedule amount. Because a payment offset is necessary in order to provide an appropriate transitional pass-through payment, we deduct from the pass-through payment for policy packaged drugs, biologicals, and radiopharmaceuticals an amount reflecting the portion of the APC payment associated with predecessor products in order to ensure no duplicate payment is made. This amount reflecting the portion of the APC payment associated with predecessor products is called the payment offset. The payment offset policy applies to all policy packaged drugs, biologicals, and

radiopharmaceuticals. For a full description of the payment offset policy as applied to diagnostic radiopharmaceuticals, contrast agents, stress agents, and skin substitutes, we refer readers to the discussion in the CY 2016 OPPS/ASC final rule with comment period (80 FR 70430 through 70432). In the CY 2017 OPPS/ASC proposed rule (81 FR 45660), for CY 2017, as we did in CY 2016, we proposed to continue to apply the same policy packaged offset policy to payment for pass-through diagnostic radiopharmaceuticals, pass-through contrast agents, pass-through stress agents, and pass-through skin substitutes. The proposed APCs to which a diagnostic radiopharmaceutical payment offset may be applicable were the same as for CY 2016 (80 FR 70430). Also, the proposed APCs to which a stress agent payment offset or a skin substitute payment offset were also the same as for CY 2016 (80 FR 70431 through 70432). The proposed APCs to which a contrast agent payment offset may be applicable are APCs 5571 through 5573 (Levels 1–3 Diagnostic Radiology with Contrast), which were listed in Addendum A to the proposed rule (which is available via the Internet on the CMS Web site).

We proposed to continue to post annually on the CMS Web site at *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html* a file that contains the APC offset amounts that will be used for that year for purposes of both evaluating cost significance for candidate pass-through device categories and drugs and biologicals and establishing any appropriate APC offset amounts. Specifically, the file will continue to provide the amounts and percentages of APC payment associated with packaged implantable devices, policy-packaged drugs, and threshold packaged drugs and biologicals for every OPPS clinical APC.

Comment: One commenter recommended that CMS consider the drug offset amount at the HCPCS level to improve accuracy in isolating potentially duplicative packaged payments.

Response: We thank the commenter for this recommendation. We do not believe that the suggested change is necessary at this time. However, we may consider it in future rulemaking.

After consideration of the public comments we received, we are finalizing our proposal, without modification, for CY 2017 to continue to apply the same policy packaged offset policy to payment for pass-through diagnostic radiopharmaceuticals, pass-through contrast agents, pass-through stress agents, and pass-through skin substitutes as we did in CY 2016. We also are finalizing our proposal to continue to post annually on the CMS Web site at *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html* a file that contains the APC offset amounts that will be used for that year for purposes of both evaluating cost significance for candidate pass-through device categories and drugs and biologicals and establishing any appropriate APC offset amounts.

B. OPPS Payment for Drugs, Biologicals, and Radiopharmaceuticals Without Pass-Through Payment Status

1. Criteria for Packaging Payment for Drugs, Biologicals, and Radiopharmaceuticals

a. Packaging Threshold

In accordance with section 1833(t)(16)(B) of the Act, the threshold for establishing separate APCs for payment of drugs and biologicals was set to $50 per administration during CYs 2005 and 2006. In CY 2007, we used the four quarter moving average Producer Price Index (PPI) levels for Pharmaceutical Preparations (Prescription) to trend the $50 threshold forward from the third quarter of CY 2005 (when the Pub. L. 108–173 mandated threshold became effective) to the third quarter of CY 2007. We then rounded the resulting dollar amount to the nearest $5 increment in order to determine the CY 2007 threshold amount of $55. Using the same methodology as that used in CY 2007 (which is discussed in more detail in the CY 2007 OPPS/ASC final rule with comment period (71 FR 68085 through 68086)), we set the packaging threshold for establishing separate APCs for drugs and biologicals at $100 for CY 2016 (80 FR 70433).

Following the CY 2007 methodology, for the CY 2017 OPPS/ASC proposed rule (81 FR 45660), we used the most recently available four quarter moving average PPI levels to trend the $50 threshold forward from the third quarter of CY 2005 to the third quarter of CY 2017 and rounded the resulting dollar amount ($109.03) to the nearest $5 increment, which yielded a figure of $110. In performing this calculation, we used the most recent forecast of the quarterly index levels for the PPI for Pharmaceuticals for Human Use (Prescription) (Bureau of Labor Statistics (BLS) series code WPUSI07003) from CMS' Office of the Actuary (OACT). We refer below to this series generally as the PPI for Prescription Drugs. Based on these calculations, we proposed a packaging threshold for CY 2017 of $110.

Following the finalized CY 2007 methodology, for this CY 2017 OPPS/ASC final rule with comment period, we used the most recently available four quarter moving average PPI levels to trend the $50 threshold forward from the third quarter of CY 2005 to the third quarter of CY 2017 and rounded the resulting dollar amount ($111.65) to the nearest $5 increment, which yielded a figure of $110. In performing this calculation, we used the most recent forecast of the quarterly index levels for the PPI for Pharmaceuticals for Human Use (Prescription) (Bureau of Labor Statistics series code WPUSI07003) from CMS' Office of the Actuary (OACT). Therefore, for this CY 2017 OPPS/ASC final rule with comment period, using the CY 2007 OPPS methodology, we are establishing a packaging threshold for CY 2017 of $110.

b. Packaging of Payment for HCPCS Codes That Describe Certain Drugs, Certain Biologicals, and Therapeutic Radiopharmaceuticals Under the Cost Threshold (''Threshold-Packaged Drugs'')

In the CY 2017 OPPS/ASC proposed rule (81 FR 45660), to determine the proposed CY 2017 packaging status for all nonpass-through drugs and biologicals that are not policy packaged, we calculated, on a HCPCS code-specific basis, the per day cost of all drugs, biologicals, and therapeutic radiopharmaceuticals (collectively called ''threshold-packaged'' drugs) that had a HCPCS code in CY 2015 and were paid (via packaged or separate payment) under the OPPS. We used data from CY 2015 claims processed before January 1, 2016 for this calculation. However, we did not perform this calculation for those drugs and biologicals with multiple HCPCS codes that include different dosages, as described in section V.B.1.d. of the proposed rule, or for the following policy-packaged items that we proposed to continue to package in CY 2017: Anesthesia drugs; drugs, biologicals, and radiopharmaceuticals that function as supplies when used in a diagnostic test or procedure; and drugs and biologicals that function as supplies when used in a surgical procedure.

In order to calculate the per day costs for drugs, biologicals, and therapeutic radiopharmaceuticals to determine their proposed packaging status in CY 2017, we used the methodology that was described in detail in the CY 2006 OPPS proposed rule (70 FR 42723 through 42724) and finalized in the CY 2006 OPPS final rule with comment period

(70 FR 68636 through 68638). For each drug and biological HCPCS code, we used an estimated payment rate of ASP+6 percent (which is the payment rate we proposed for separately payable drugs and biologicals for CY 2017, as discussed in more detail in section V.B.2.b. of the proposed rule) to calculate the CY 2017 proposed rule per day costs. We used the manufacturer submitted ASP data from the fourth quarter of CY 2015 (data that were used for payment purposes in the physician's office setting, effective April 1, 2016) to determine the proposed rule per day cost.

As is our standard methodology, for CY 2017, we proposed to use payment rates based on the ASP data from the first quarter of CY 2016 for budget neutrality estimates, packaging determinations, impact analyses, and completion of Addenda A and B to the proposed rule (which are available via the Internet on the CMS Web site) because these were the most recent data available for use at the time of development of the proposed rule. These data also were the basis for drug payments in the physician's office setting, effective April 1, 2016. For items that did not have an ASP-based payment rate, such as some therapeutic radiopharmaceuticals, we used their mean unit cost derived from the CY 2015 hospital claims data to determine their per day cost.

We proposed to package items with a per day cost less than or equal to $110, and identify items with a per day cost greater than $110 as separately payable. Consistent with our past practice, we cross-walked historical OPPS claims data from the CY 2015 HCPCS codes that were reported to the CY 2016 HCPCS codes that we displayed in Addendum B to the proposed rule (which is available via the Internet on the CMS Web site) for proposed payment in CY 2017.

Comment: A few commenters opposed the proposed OPPS packaging threshold of $110 for CY 2017. These commenters recommended that CMS freeze the packaging threshold at the current level ($100) or eliminate the packaging threshold and provide separate payment for all drugs with HCPCS codes.

Response: We have received and addressed a similar comment in numerous OPPS/ASC rulemakings in the past. As we stated in the CY 2007 OPPS/ASC final rule with comment period (71 FR 68086), we believe that packaging certain items is a fundamental component of a prospective payment system, that updating the packaging threshold of $50 for the CY 2005 OPPS is consistent with industry and government practices, and that the PPI for Prescription Drugs is an appropriate mechanism to gauge Part B drug inflation. Therefore, because packaging is a fundamental component of a prospective payment system that continues to provide important flexibility and efficiency in the delivery of high quality hospital outpatient services, we are not adopting the commenters' recommendations to pay separately for all drugs, biologicals, and radiopharmaceuticals for CY 2017, or to eliminate the packaging threshold, or to freeze the packaging threshold at $100.

After consideration of the public comments we received, and consistent with our methodology for establishing the packaging threshold using the most recent PPI forecast data, we are adopting a CY 2017 packaging threshold of $110. Our policy during previous cycles of the OPPS has been to use updated ASP and claims data to make final determinations of the packaging status of HCPCS codes for drugs, biologicals, and therapeutic radiopharmaceuticals for the OPPS/ASC final rule with comment period. We note that it is also our policy to make an annual packaging determination for a HCPCS code only when we develop the OPPS/ASC final rule with comment period for the update year. Only HCPCS codes that are identified as separately payable in the final rule with comment period are subject to quarterly updates. For our calculation of per day costs of HCPCS codes for drugs and biologicals in this CY 2017 OPPS/ASC final rule with comment period, we used ASP data from the first quarter of CY 2016, which is the basis for calculating payment rates for drugs and biologicals in the physician's office setting using the ASP methodology, effective July 1, 2016, along with updated hospital claims data from CY 2015. We note that we also used these data for budget neutrality estimates and impact analyses for this CY 2017 OPPS/ASC final rule with comment period.

Payment rates for HCPCS codes for separately payable drugs and biologicals included in Addenda A and B for this final rule with comment period are based on ASP data from the third quarter of CY 2016. These data are the basis for calculating payment rates for drugs and biologicals in the physician's office setting using the ASP methodology, effective October 1, 2016. These payment rates will then be updated in the January 2017 OPPS update, based on the most recent ASP data to be used for physician's office and OPPS payment as of January 1, 2017. For items that do not currently have an ASP-based payment rate, we proposed to recalculate their mean unit cost from all of the CY 2015 claims data and updated cost report information available for this CY 2017 final rule with comment period to determine their final per day cost.

Consequently, as stated in the CY 2017 OPPS/ASC proposed rule (81 FR 45661), the packaging status of some HCPCS codes for drugs, biologicals, and therapeutic radiopharmaceuticals in the proposed rule may be different from the same drug HCPCS code's packaging status determined based on the data used for the final rule with comment period. Under such circumstances, in the CY 2017 OPPS/ASC proposed rule, we proposed to continue to follow the established policies initially adopted for the CY 2005 OPPS (69 FR 65780) in order to more equitably pay for those drugs whose cost fluctuates relative to the proposed CY 2017 OPPS drug packaging threshold and the drug's payment status (packaged or separately payable) in CY 2016. These established policies have not changed for many years and are the same as described in the CY 2016 OPPS/ASC final rule with comment period (80 FR 70434).

We did not receive any public comments on our proposal to recalculate the mean unit cost for items that do not currently have an ASP-based payment rate from all of the CY 2015 claims data and updated cost report information available for this CY 2017 final rule with comment period to determine their final per day cost. We also did not receive any public comments on our proposal to continue to follow the established policies initially adopted for the CY 2005 OPPS (69 FR 65780), when the packaging status of some HCPCS codes for drugs, biologicals, and therapeutic radiopharmaceuticals in the proposed rule may be different from the same drug HCPCS code's packaging status determined based on the data used for the final rule with comment period. Therefore, for CY 2017, we are finalizing these two CY 2017 proposals without modification.

c. Policy Packaged Drugs, Biologicals, and Radiopharmaceuticals

As mentioned briefly earlier, in the OPPS we package several categories of drugs, biologicals, and radiopharmaceuticals regardless of the cost of the products. Because the products are packaged according to the policies in 42 CFR 419.2(b), we refer to these packaged drugs, biologicals, and radiopharmaceuticals as ''policy-packaged'' drugs, biologicals, and radiopharmaceuticals. Each of these

policies are either longstanding or based on longstanding principles and inherent to the OPPS and are as follows:

- Anesthesia, certain drugs, biologicals, and other pharmaceuticals; medical and surgical supplies and equipment; surgical dressings; and devices used for external reduction of fractures and dislocations (§ 419.2(b)(4));
- Intraoperative items and services (§ 419.2(b)(14));
- Drugs, biologicals, and radiopharmaceuticals that function as supplies when used in a diagnostic test or procedure (including but not limited to, diagnostic radiopharmaceuticals, contrast agents, and pharmacologic stress agents (§ 419.2(b)(15)); and
- Drugs and biologicals that function as supplies when used in a surgical procedure (including, but not limited to, skin substitutes and similar products that aid wound healing and implantable biologicals) (§ 419.2(b)(16)).

The policy at § 419.2(b)(16) is broader than that at § 419.2(b)(14). As we stated in the CY 2015 OPPS/ASC final rule with comment period: ''We consider all items related to the surgical outcome and provided during the hospital stay in which the surgery is performed, including postsurgical pain management drugs, to be part of the surgery for purposes of our drug and biological surgical supply packaging policy'' (79 FR 66875). The category described by § 419.2(b)(15) is large and includes diagnostic radiopharmaceuticals, contrast agents, stress agents, and some other products. The category described by § 419.2(b)(16) includes skin substitutes and some other products. We believe it is important to reiterate that cost consideration is not a factor when determining whether an item is a surgical supply (79 FR 66875).

Comment: A few commenters objected to the packaging of diagnostic radiopharmaceuticals and contrast agents under § 419.2(b)(15). They argued that the service payments that include the payment for the radiopharmaceutical or contrast agent do not cover the cost of expensive diagnostic radiopharmaceuticals or contrast agents. The commenters believed that separate payment should be made for these products.

Response: The packaging policy for these products has been in effect since CY 2008. We refer readers to the CY 2008 OPPS final rule (72 FR 66635 through 66646) for an extensive discussion of the original packaging policy for diagnostic radiopharmaceuticals and contrast agents, and to the CY 2014 OPPS/ASC final rule with comment period (78 FR 74927 through 74930) for a discussion of the packaging of diagnostic radiopharmaceuticals and contrast agents under § 419.2(b)(15); that is, the broader packaging policy for drugs and biologicals that function as supplies when used in a diagnostic test or procedure. We are not changing this packaging policy for CY 2017.

Comment: One commenter, the manufacturer of the stress agent Lexiscan® (regadenoson), disagreed with CMS' policy of packaging stress agents under § 419.2(b)(15). The commenter reiterated comments that it has made in the past since CMS packaged stress agents in CY 2014 (78 FR 74927 through 74930). The commenter believed that this packaging policy may create a financial incentive for hospitals to utilize a low-cost stress agent instead of a high-cost stress agent and/or encourage hospitals to reduce appropriate patient care. The commenter requested that CMS create separate APCs for diagnostic tests that use high cost drugs.

Response: We have responded to this comment in previous final rules (for example, the CY 2014 OPPS/ASC final rule with comment period (78 FR 74928 through 74929) and the CY 2016 OPPS/ASC final rule with comment period (80 FR 70347)). We have no reason to believe that any stress agent that a hospital chooses, regardless of the cost, will not be entirely medically appropriate for the patient. The commenter did not provide any specific information to suggest that a high-cost stress agent (for example, regadenoson) is more clinically appropriate than a low-cost stress agent (for example, adenosine) in certain patients. In fact, we are aware of some evidence that may suggest that the opposite is true (Brink, H.L., Dickerson, J.A., Stephens, J.A. and Pickworth, K.K. (2015), Comparison of the Safety of Adenosine and Regadenoson in Patients Undergoing Outpatient Cardiac Stress Testing. *Pharmacotherapy,* 35: 1117–1123. Available at: American College of Cardiology Web site at: *https://www.acc.org/latest-in-cardiology/journal-scans/2016/01/15/13/40/adenosine-versus-regadenoson-in-cardiac-stress*).

To the extent that this stress agent packaging policy encourages hospitals to utilize the cheaper stress agent—adenosine—instead of regadenoson (as the commenter speculated that it has), we believe that this is a positive effect of the stress agent packaging policy. One important purpose of these packaging policies is to provide hospitals with the financial incentive to choose less expensive alternative drugs, devices, and supplies, as clinically appropriate. In the preambles of our past rulemakings, we have repeatedly stated the following axiom: ''Where there are a variety of devices, drugs, items, supplies, etc. that could be used to furnish a service, some of which are more expensive than others, packaging encourages hospitals to use the most cost-efficient item that meets the patient's needs, rather than to routinely use a more expensive item, which often results if separate payment is provided for the items'' (78 FR 74925). The potential effect of this policy that the commenter is concerned about (hospitals choosing a lower cost stress agent) is precisely the outcome that we hope to encourage through this packaging policy. Therefore, we believe that this packaging policy supports medically necessary and efficient patient care. We believe that creating separate APCs for diagnostic tests that use high-cost stress agents could undermine this goal and, therefore, is not warranted at this time.

Comment: One commenter, the manufacturer of the drug Omidria®, did not want CMS to package the drug Omidria® (described by HCPCS code C9447, with status indicator ''N'') under § 419.2(b)(14) or (b)(16), after pass-through payment status expires at the end of CY 2017 (80 FR 70347). Specifically, the commenter opposed packaging this drug with cataract surgery effective beginning in CY 2018 and subsequent years. The commenter believed that the surgical supply packaging policy inadvertently conflicts with CMS' broader policies targeting therapeutic products, unintentionally creates financial disincentives for hospitals and ASCs to use Omidria®, and is overly broad. The commenter pointed out that studies have shown that the use of Omidria® can reduce complications during cataract surgery, and therefore Omidria® provides a distinct therapeutic benefit independent of the procedural benefits achieved without Omidria®. The commenter recommended that CMS exclude from the surgical supply packaging policy all drugs and biologicals that have ''a therapeutic indication that provides a benefit independent of the procedure performed without the drug or biological and that may substitute for one or more other subsequent interventions that would otherwise be separately paid by CMS.'' Presumably, according to the commenter, if CMS adopted such an exclusion, it would result in the continued separate

payment for Omidria® after pass-through payment status expires.

Response: We appreciate the commenters' concerns and believe that some additional explanation might be of use. We believe that this comment reflects a misunderstanding of our OPPS packaging policy that packages drugs and biologicals that function as supplies when used in a surgical procedure. We have reviewed Omidria®'s indications and, based on those indications, it is unclear what the commenter means when it requested that CMS exclude drugs from the packaging policy that have ''a therapeutic indication that provides a benefit independent of the procedure performed without the drug or biological and that may substitute for one or more other subsequent interventions that would otherwise be separately paid by CMS.'' Omidria® supplements the drugs delivered as preoperative eye drops to dilate the pupil to either improve or prolong dilation in certain cases. The benefit of Omidria® is the facilitation of cataract surgery. The surgical supply packaging policy for drugs and biologicals that function as surgical supplies is intended to apply broadly to drugs and biologicals that are used in surgery or that are used to achieve the surgical objective. In the CY 2014 OPPS/ASC final rule with comment period, in discussing the surgical supplies packaging policy as it applies to another drug used in an eye surgery, we stated that ''we believe packaging is appropriate for items and services that are integral or ancillary or supportive or dependent or adjunctive to the primary procedure. Therefore, items and services that fall within any of these categories may be properly packaged in the OPPS'' (78 FR 74938). Any and all of these descriptive terms apply to Omidria®, which is integral and ancillary and supportive and dependent and adjunctive to cataract surgery. The commenter believes that the packaging policy unintentionally creates financial disincentives for hospitals and ASCs to use Omidria®. We view the financial effect of the packaging policy differently. We believe this approach promotes efficient resource use in hospitals and ASCs. We believe that once its pass-through payment status expires, Omidria® should be packaged as are all of these other surgical supplies. In summary, in the CY 2016 OPPS/ASC final rule with comment period, we finalized a policy to package the drug Omidria® (described by HCPCS code C9447) after pass-through payment status expires under our policy that packages drugs and biologicals that function as supplies when used in a surgical procedure. This policy will take effect on January 1, 2018.

Comment: One commenter, the manufacturer of the drug Cysview (described by HCPCS code C9275) requested that CMS withdraw the packaging policy described by 42 CFR 419.2(b)(15), which packages drugs, biologicals, and radiopharmaceuticals that function as supplies in a diagnostic test or procedure, and pay separately for its drug, Cysview. The commenter pointed out that CMS acknowledged in the CY 2004 OPPS proposed rule that ''. . . packaging payments adversely affect beneficiary access to medically necessary services'' (68 FR 47995). The commenter also asserted that this packaging policy has had a negative effect on the quality of patient care because it has created a significant financial disincentive for hospitals to purchase Cysview. In addition, the commenter stated that Cysview costs $810, but because the APC payment amount for the cystoscopy procedures in which Cysview is used is based on the average costs of many different procedures (most of which do not use Cysview), the cost of Cysview is highly diluted and therefore the cystoscopy procedure payments do not fully reflect the cost of Cysview.

Response: We begin with the complete quote from the CY 2004 OPPS proposed rule from which the commenter extracted its partial quote described earlier. The full quote is as follows: ''*Packaging costs into a single aggregate payment for a service, procedure, or episode of care is a fundamental principle that distinguishes a prospective payment system from a fee schedule.* In general, packaging the costs of items and services into the payment for the primary procedure or service with which they are associated encourages hospital efficiencies and also enables hospitals to manage their resources with maximum flexibility. Notwithstanding our commitment to package as many costs as possible, we are aware that packaging payments for certain drugs and radiopharmaceuticals, especially those that are particularly expensive or rarely used, might result in insufficient payments to hospitals, which could adversely affect beneficiary access to medically necessary services'' (68 FR 47995) (emphasis added). Separate payment for all products, items, devices, among others, that are the components of a primary service furnished to a patient in the hospital would be inconsistent with a prospective payment system—doing so would make the OPPS essentially a fee schedule in which every coded item resulted in additional payment. Furthermore, the latter part of the quoted statement refers only to particularly expensive or rarely used drugs, and Cysview is neither. Cysview has a fairly broad indication as an adjunct to white light cystoscopy, and $810 is not ''particularly expensive'' for an OPPS drug (many of which cost several thousands of dollars). However, we do note that the price of Cysview has increased 38 percent in the last 5 years (from approximately $588 in 2012). Finally, the commenter stated that the relevant bladder cancer APCs are APC 5373 (Level 3 Urology and Related Services) and APC 5374 (Level 4 Urology and Related Services), and that these APCs contain the procedure codes that primarily use Cysview when blue light cystoscopy is performed. Both of these APCs are being finalized as C–APCs for CY 2017. Part of the C–APC methodology is to package all drugs except for those in pass-through payment status, and this methodology would apply to Cysview because it is not in drug pass-through payment status. Therefore, aside from the diagnostic test supplies packaging policy, Cysview would be packaged when used with any procedure assigned to a C–APC.

In summary, We are not adopting any changes based on the comments received on these three policy-packaged drugs—Lexiscan®, Omidria®, and Cysview—for CY 2017.

d. High Cost/Low Cost Threshold for Packaged Skin Substitutes

In the CY 2014 OPPS/ASC final rule with comment period (78 FR 74938), we unconditionally packaged skin substitute products into their associated surgical procedures as part of a broader policy to package all drugs and biologicals that function as supplies when used in a surgical procedure. As part of the policy to finalize the packaging of skin substitutes, we also finalized a methodology that divides the skin substitutes into a high cost group and a low cost group, in order to ensure adequate resource homogeneity among APC assignments for the skin substitute application procedures (78 FR 74933). We continued the high cost/low cost categories policy in CY 2015 and CY 2016, and in the CY 2017 OPPS/ASC proposed rule (81 FR 45661 through 45662), we proposed to continue it for CY 2017. Under this current policy, skin substitutes in the high cost category are reported with the skin substitute application CPT codes and skin substitutes in the low cost category are reported with the analogous skin substitute HCPCS C-codes. For a

discussion of the CY 2014 and CY 2015 methodologies for assigning skin substitutes to either the high cost group or the low cost group, we refer readers to the CY 2014 OPPS/ASC final rule with comment period (78 FR 74932 through 74935) and the CY 2015 OPPS/ASC final rule with comment period (79 FR 66882 through 66885).

For CY 2017, as in CY 2016, we proposed to determine the high/low cost status for each skin substitute product based on either a product's geometric mean unit cost (MUC) exceeding the geometric MUC threshold or the product's per day cost (PDC) (the total units of a skin substitute multiplied by the mean unit cost and divided by the total number of days) exceeding the PDC threshold. For a discussion of the CY 2016 high cost/low cost methodology, we refer readers to the CY 2016 OPPS/ASC final rule with comment period (80 FR 70434 through 70435). We proposed to assign skin substitutes that exceed either the MUC threshold or the PDC threshold to the high cost group. We proposed to assign skin substitutes with a MUC or a PDC that does not exceed either the MUC threshold or the PDC threshold to the low cost group. For this CY 2017 OPPS/ASC final rule with comment period, we analyzed updated CY 2015 claims data to calculate the MUC threshold (a weighted average of all skin substitutes' MUCs) and the PDC threshold (a weighted average of all skin substitutes' PDCs). The final CY 2017 MUC threshold is $33 per cm^2 (rounded to the nearest $1) (proposed at $25 per cm^2) and the final CY 2017 PDC threshold is $716 (rounded to the nearest $1) (proposed at $729).

For CY 2017, as in CY 2016, we proposed to continue to assign skin substitutes with pass-through payment status to the high cost category, and to assign skin substitutes with pricing information but without claims data to calculate a geometric MUC or PDC to either the high cost or low cost category based on the product's ASP+6 percent payment rate as compared to the MUC threshold. If ASP is not available, we stated in the proposed rule that we would use WAC+6 percent or 95 percent of AWP to assign a product to either the high cost or low cost category. We also stated in the proposed rule that new skin substitutes without pricing information would be assigned to the low cost category until pricing information is available to compare to the CY 2017 MUC threshold. For a discussion of our existing policy under which we assign skin substitutes without pricing information to the low cost category until pricing information is available, we refer readers to the CY 2016 OPPS/ASC final rule with comment period (80 FR 70436). In addition, as in CY 2016, we proposed for CY 2017 that a skin substitute that is both assigned to the high cost group in CY 2016 and also exceeds either the MUC or PDC in the proposed rule for CY 2017 would be assigned to the high cost group for CY 2017, even if it no longer exceeds the MUC or PDC CY 2017 thresholds based on updated claims data and pricing information used in this CY 2017 final rule with comment period. Table 15 of the CY 2017 OPPS/ASC proposed rule (81 FR 45661 through 45662) displayed the proposed CY 2017 high cost or low cost category assignment for each skin substitute product.

Comment: One commenter notified CMS of an error in the calculation of the MUC threshold reported in the CY 2017 OPPS/ASC proposed rule (81 FR 45661), and stated that the values for the MUC threshold are different from the values for the PDC threshold. The commenter also requested that skin substitute products that were assigned to the high cost group because of the incorrect lower MUC threshold in the proposed rule, and that would have been classified in the low cost group if the corrected higher MUC threshold had been used in the proposed rule, be reassigned to the low cost group in the final rule.

Response: We reviewed our calculations and agreed with the commenter that the MUC threshold was incorrect in the proposed rule. We also found a calculation error with the PDC threshold. We have corrected our calculations and used more recent claims data from CY 2015 to revise the MUC threshold and the PDC threshold for this final rule with comment period.

We disagree with the request of the commenter to move skin substitute products back to the low cost group because of the erroneous calculation of a lower MUC threshold in the proposed rule. The policy we proposed to continue from CY 2016, and which we are finalizing for CY 2017, retains a skin substitute product in the high cost group if the product was assigned to the high cost group in CY 2016 and exceeded either the MUC threshold or the PDC threshold of the proposed rule for CY 2017. The policy does not make exceptions due to calculation errors or revisions by CMS. We will follow this policy and retain all skin substitute products in the high cost group that were assigned to the high cost group in CY 2016 and exceeded either the MUC threshold or the PDC threshold of the proposed rule for CY 2017.

Comment: One commenter provided information to support that HCPCS code Q4163 (Amnion bio and woundex sq cm) should be assigned to the high cost skin substitute group. The commenter stated that HCPCS code Q4163 is a relatively new skin substitute product and there was not sufficient claims data or pricing information available for the product when the CY 2017 OPPS/ASC proposed rule was released. The commenter stated that regulatory guidance requires CMS to assign a nonpass-through skin substitute product to the low cost group when there are no available cost data. The commenter supplied wholesale acquisition cost (WAC) and average wholesale price (AWP) data for HCPCS code Q4163 showing that HCPCS code Q4163 should be assigned to the high cost group.

Response: We reviewed WAC and ASP data for HCPCS code Q4163, and we agree with the findings of the commenter. After consideration of the public comment we received about HCPCS code Q4163, in this final rule with comment period, we are assigning HCPCS code Q4163 to the high cost skin substitute group for CY 2017.

Comment: One commenter requested that PuraPly (described by HCPCS code Q4172; previously HCPCS code C9349) have its pass-through payment status end as of December 31, 2016, and not continue through CY 2017. The commenter stated that PuraPly received its pass-through payment status in January 2015 and will have 2 full years of pass-through payment status by December 2016. The commenter also asserted that PuraPly was not a new skin substitute product when approved for pass-through payment status in the CY 2015 OPPS/ASC final rule with comment period. The commenter provided evidence that PuraPly, called by its previous name, FortaDerm, was introduced to the market as early as 2002.

Response: We disagree with the commenter. PuraPly (described by HCPCS code Q4172; previously HCPCS code C9349) was given pass-through payment status under the pass-through payment policy and process for drugs and biologicals that was in effect prior to CY 2015. Pass-through payment status products covered by the policy receive pass-through payments for at least 2 years but for no more than 3 years from the date the first OPPS payment for the product is generated. The assertion by the commenter that PuraPly will have reached 2 years of pass-through payment status by the end of December 2016 is incorrect. PuraPly will not achieve 2 years of pass-through

payment status until at least January 2017. The pass-through payment policy for drugs and biologicals that was in effect at the beginning of CY 2015 only allows changes to a pass-through payment designation for a product at the beginning of a calendar year. Therefore, PuraPly must continue to have pass-through status for all of CY 2017. The evidence presented by the commenter that PuraPly was available commercially in 2002 is not relevant, as the product (under any name) did not have pass-through payment status prior to 2015, and there was no newness criterion for drug and biological pass-through payment status eligibility at the time of the PuraPly (formerly FortaDerm) pass-through payment application evaluation.

After consideration of the public comment we received, we are finalizing our proposal, without modification, to continue pass-through status for PuraPly (HCPCS code Q4172; previously HCPCS code C9349) for CY 2017.

Comment: A few commenters supported the current methodology used by CMS to assign skin substitute products into high cost and low cost categories. Commenters appreciated that either the MUC threshold or the PDC threshold could be used to qualify skin substitute products as high cost. The commenter stated that including the PDC threshold reduces the risk that products with larger sizes would be assigned to the low cost category because of a low MUC. One commenter suggested that using the PDC threshold alone may improve on the current methodology. Another commenter supported the policy assigning skin substitute products to the high cost group that exceeded the MUC threshold or the PDC threshold in the CY 2016 final rule and in the CY 2017 proposed rule, even if analysis for the CY 2017 final rule indicate a product should be assigned to the low cost group.

Response: We appreciate the commenters' support. We agree that using either a MUC methodology or a PDC methodology along with the policy of automatically assigning skin substitute products to the high cost group if they were identified as high cost for both the CY 2016 final rule and the CY 2017 proposed rule stabilizes cost group assignments.

Comment: Several commenters expressed concerns about aspects of the current CMS methodology for payment for the use of skin substitute products. The commenters stated that one issue is the accurate reporting of the cost of skin substitute products. The commenters believed that many providers report lower utilization of skin substitutes than what providers are actually using, which leads to lower payment rates. Some commenters were generally opposed to packaging or bundling skin substitute products with other services because of concerns that the cost of skin substitute products is not accurately accounted for in the packaged or bundled rates. Commenters continued to have concerns about the payment for wounds larger than 100 cm^2 that they believed are too low even after the addition of PDC methodology to determine if a skin substitute product should be in the high cost group.

Several commenters also suggested changes to the system of assigning skin substitutes to either a high cost or low cost category. Suggestions included creating a three-tiered system to more accurately reflect the prices of individual products, monitoring the current methodology to determine if it was leading to lower reimbursements, and improving transparency by making available MUC and PDC calculations and claims data by product.

Some commenters made a more general request for overall stability with skin substitute methodology and alternate ways to calculate the cost of products to compare to the MUC and PDC thresholds without using OPPS claims data. The most common suggestion was to use average sales price (ASP) + 6 percent as a primary source of cost data instead of using ASP + 6 percent when no claims data are available for a product.

Response: We appreciate the feedback we received from the commenters. However, we believe the current cost estimation and payment policies for skin substitutes reasonably reflect the costs incurred to administer these products. Therefore, after consideration of the public comments we received, we are finalizing our proposal to maintain current policies regarding the payment of skin substitute products for CY 2017 without additional modifications.

Comment: One commenter requested that CMS alter CPT coding instructions that prohibits wound healing products in the form of a gel, liquid, foam, ointment, powder, among others (a form other than a graft-type sheet) from using the skin substitute application CPT codes or that CMS pay separately for these products in the OPPS.

Response: Skin substitutes and all of their variations and related wound products, regardless of the form or physical state, are packaged in the OPPS as surgical supplies under 42 CFR 419.2(b)(16). Skin substitutes is a broad class of wound products that includes all of the products in the HCPCS skin substitute Q code series and all related products. We cannot change AMA CPT coding guidance. We can (if we choose to do so) provide coding instructions or guidance specifically for Medicare coding and payment purposes. We believe that the AMA coding guidance for the skin substitute codes is sufficient as currently written. The skin substitute graft materials are applied to a wound in a manner that is different from how a liquid or particulate material is applied. In general, there are not very many codes for the application of topical medications such as liquids, creams or ointments because what the applier has to do to put the medication or other medical product on a patient's skin does not typically rise to the level of a service that would need to be described by a code depicting the professional services of a health care provider. In other words, it is generally a very minor activity that requires little time, effort or skill, and often such products are self-administered. Regarding the request that we pay separately for liquid, gel, particulate, powder, or other forms of skin substitutes, we do not agree with this request. It is common in the OPPS that the use of a surgical supply (whether expensive or not) does not correspond to a specific procedure code with a payment that covers the full cost of the supply. In this case, access to particular skin substitute products is generally not our concern because there are so many different skin substitute products available to Medicare beneficiaries in the HOPD that adequate treatment for wounds under the current payment scheme should always be available.

After consideration of the public comments we received, we are finalizing as proposed our high cost/low cost skin substitute methodology as described above. Table 37 below displays the CY 2017 high cost or low cost category assignment for each skin substitute product.

TABLE 37—SKIN SUBSTITUTE ASSIGNMENTS TO HIGH COST AND LOW COST GROUPS FOR CY 2017

CY 2017 HCPCS code	CY 2017 short descriptor	CY 2017 High/low assignment

Q4173	Palingen or palingen xplus, per sq cm	Low.
Q4175	Miroderm, per square cm	Low.

* Pass-through payment status in CY 2017.

e. Packaging Determination for HCPCS Codes That Describe the Same Drug or Biological but Different Dosages

In the CY 2010 OPPS/ASC final rule with comment period (74 FR 60490 through 60491), we finalized a policy to make a single packaging determination for a drug, rather than an individual HCPCS code, when a drug has multiple HCPCS codes describing different dosages because we believed that adopting the standard HCPCS code-specific packaging determinations for these codes could lead to inappropriate payment incentives for hospitals to report certain HCPCS codes instead of others. We continue to believe that making packaging determinations on a drug-specific basis eliminates payment incentives for hospitals to report certain HCPCS codes for drugs and allows hospitals flexibility in choosing to report all HCPCS codes for different dosages of the same drug or only the lowest dosage HCPCS code. Therefore, in the CY 2017 OPPS/ASC proposed rule (81 FR 45662), we proposed to continue our policy to make packaging determinations on a drug-specific basis, rather than a HCPCS code-specific basis, for those HCPCS codes that describe the same drug or biological but different dosages in CY 2017.

For CY 2017, in order to propose a packaging determination that is consistent across all HCPCS codes that describe different dosages of the same drug or biological, we aggregated both our CY 2015 claims data and our pricing information at ASP+6 percent across all of the HCPCS codes that describe each distinct drug or biological in order to determine the mean units per day of the drug or biological in terms of the HCPCS code with the lowest dosage descriptor. The following drugs did not have pricing information available for the ASP methodology for the CY 2017 OPPS/ASC proposed rule, and as is our current policy for determining the packaging status of other drugs, we used the mean unit cost available from the CY 2015 claims data to make the proposed packaging determinations for these drugs: HCPCS code J1840 (Injection, kanamycin sulfate, up to 500 mg), J1850 (Injection, kanamycin sulfate, up to 75 mg) and HCPCS code J3472 (Injection, hyaluronidase, ovine, preservative free, per 1000 usp units).

For all other drugs and biologicals that have HCPCS codes describing different doses, we then multiplied the proposed weighted average ASP+6 percent per unit payment amount across all dosage levels of a specific drug or biological by the estimated units per day for all HCPCS codes that describe each drug or biological from our claims data to determine the estimated per day cost of each drug or biological at less than or equal to the proposed CY 2017 drug packaging threshold of $110 (so that all HCPCS codes for the same drug or biological would be packaged) or greater than the proposed CY 2017 drug packaging threshold of $110 (so that all HCPCS codes for the same drug or biological would be separately payable). The proposed packaging status of each drug and biological HCPCS code to which this methodology would apply in CY 2017 was displayed in Table 16 of the CY 2017 OPPS/ASC proposed rule (81 FR 45663).

We did not receive any public comments on this proposal. Therefore, for CY 2017, we are finalizing our CY 2017 proposal, without modification, to continue our policy to make packaging determinations on a drug-specific basis, rather than a HCPCS code-specific basis, for those HCPCS codes that describe the same drug or biological but different dosages. Table 38 below displays the final packaging status of each drug and biological HCPCS code to which the finalized methodology applies for CY 2017.

TABLE 38—HCPCS CODES TO WHICH THE CY 2017 DRUG-SPECIFIC PACKAGING DETERMINATION METHODOLOGY APPLIES

CY 2017 HCPCS code	CY 2017 long descriptor	CY 2017 SI
C9257	Injection, bevacizumab, 0.25 mg	K
J9035	Injection, bevacizumab, 10 mg	K
J1460	Injection, gamma globulin, intramuscular, 1 cc	K
J1560	Injection, gamma globulin, intramuscular over 10 cc	K
J2788	Injection, rho d immune globulin, human, minidose, 50 micrograms (250 i.u.)	N
J2790	Injection, rho d immune globulin, human, full dose, 300 micrograms (1500 i.u.)	N
J8520	Capecitabine, oral, 150 mg	N
J8521	Capecitabine, oral, 500 mg	N
J7515	Cyclosporine, oral, 25 mg	N
J7502	Cyclosporine, oral, 100 mg	N
J2920	Injection, methylprednisolone sodium succinate, up to 40 mg	N
J2930	Injection, methylprednisolone sodium succinate, up to 125 mg	N
J3471	Injection, hyaluronidase, ovine, preservative free, per 1 usp unit (up to 999 usp units)	N
J3472	Injection, hyaluronidase, ovine, preservative free, per 1000 usp units	N
J1642	Injection, heparin sodium, (heparin lock flush), per 10 units	N
J1644	Injection, heparin sodium, per 1000 units	N
J1850	Injection, kanamycin sulfate, up to 75 mg	N
J1840	Injection, kanamycin sulfate, up to 500 mg	N
J7050	Infusion, normal saline solution, 250 cc	N
J7040	Infusion, normal saline solution, sterile (500 ml=1 unit)	N
J7030	Infusion, normal saline solution, 1000 cc	N
J1020	Injection, methylprednisolone acetate, 20 mg	N
J1030	Injection, methylprednisolone acetate, 40 mg	N
J1040	Injection, methylprednisolone acetate, 80 mg	N
J9250	Methotrexate sodium, 5 mg	N
J9260	Methotrexate sodium, 50 mg	N

2. Payment for Drugs and Biologicals Without Pass-Through Status That Are Not Packaged

a. Payment for Specified Covered Outpatient Drugs (SCODs) and Other Separately Payable and Packaged Drugs and Biologicals

Section 1833(t)(14) of the Act defines certain separately payable radiopharmaceuticals, drugs, and biologicals and mandates specific payments for these items. Under section 1833(t)(14)(B)(i) of the Act, a ''specified covered outpatient drug'' (known as a SCOD) is defined as a covered outpatient drug, as defined in section 1927(k)(2) of the Act, for which a separate APC has been established and that either is a radiopharmaceutical agent or is a drug or biological for which payment was made on a pass-through basis on or before December 31, 2002.

Under section 1833(t)(14)(B)(ii) of the Act, certain drugs and biologicals are designated as exceptions and are not included in the definition of SCODs. These exceptions are—

- A drug or biological for which payment is first made on or after January 1, 2003, under the transitional pass-through payment provision in section 1833(t)(6) of the Act.
- A drug or biological for which a temporary HCPCS code has not been assigned.
- During CYs 2004 and 2005, an orphan drug (as designated by the Secretary).

Section 1833(t)(14)(A)(iii) of the Act requires that payment for SCODs in CY 2006 and subsequent years be equal to the average acquisition cost for the drug for that year as determined by the Secretary, subject to any adjustment for overhead costs and taking into account the hospital acquisition cost survey data collected by the Government Accountability Office (GAO) in CYs 2004 and 2005, and later periodic surveys conducted by the Secretary as set forth in the statute. If hospital acquisition cost data are not available, the law requires that payment be equal to payment rates established under the methodology described in section 1842(o), section 1847A, or section 1847B of the Act, as calculated and adjusted by the Secretary as necessary. We refer to this alternative methodology as the ''statutory default.'' Most physician Part B drugs are paid at ASP+6 percent in accordance with section 1842(o) and section 1847A of the Act.

Section 1833(t)(14)(E)(ii) of the Act provides for an adjustment in OPPS payment rates for SCODs to take into account overhead and related expenses, such as pharmacy services and handling costs. Section 1833(t)(14)(E)(i) of the Act required MedPAC to study pharmacy overhead and related expenses and to make recommendations to the Secretary regarding whether, and if so how, a payment adjustment should be made to compensate hospitals for overhead and related expenses. Section 1833(t)(14)(E)(ii) of the Act authorizes the Secretary to adjust the weights for ambulatory procedure classifications for SCODs to take into account the findings of the MedPAC study.

It has been our longstanding policy to apply the same treatment to all separately payable drugs and biologicals, which include SCODs, and drugs and biologicals that are not SCODs. Therefore, we apply the payment methodology in section 1833(t)(14)(A)(iii) of the Act to SCODs, as required by statute, but we also apply it to separately payable drugs and biologicals that are not SCODs, which is a policy determination rather than a statutory requirement. In the CY 2017 OPPS/ASC proposed rule (81 FR 45664), we proposed to apply section 1833(t)(14)(A)(iii)(II) of the Act to all separately payable drugs and biologicals, including SCODs. Although we do not distinguish SCODs in this discussion, we note that we are required to apply section 1833(t)(14)(A)(iii)(II) of the Act to SCODs, but we also are applying this provision to other separately payable drugs and biologicals, consistent with our history of using the same payment methodology for all separately payable drugs and biologicals.

For a detailed discussion of our OPPS drug payment policies from CY 2006 to CY 2012, we refer readers to the CY 2013 OPPS/ASC final rule with comment period (77 FR 68383 through 68385). In the CY 2013 OPPS/ASC final rule with comment period (77 FR 68386 through 68389), we first adopted the statutory default policy to pay for separately payable drugs and biologicals at ASP+6 percent based on section 1833(t)(14)(A)(iii)(II) of the Act. We continued this policy of paying for separately payable drugs and biologicals at the statutory default for CY 2014, CY 2015, and CY 2016 (80 FR 70440).

b. CY 2017 Payment Policy

In the CY 2017 OPPS/ASC proposed rule (81 FR 45664), for CY 2017 and subsequent years, we proposed to continue our payment policy that has been in effect from CY 2013 to present and pay for separately payable drugs and biologicals at ASP+6 percent in accordance with section 1833(t)(14)(A)(iii)(II) of the Act (the statutory default). We proposed that the ASP+6 percent payment amount for separately payable drugs and biologicals requires no further adjustment and represents the combined acquisition and pharmacy overhead payment for drugs and biologicals. We also proposed that payments for separately payable drugs and biologicals are included in the budget neutrality adjustments, under the requirements in section 1833(t)(9)(B) of the Act, and that the budget neutral weight scaler is not applied in determining payments for these separately paid drugs and biologicals.

Comment: The majority of commenters supported CMS' proposal to continue to pay for separately payable drugs and biologicals based on the statutory default rate of ASP+6 percent. One commenter recommended that CMS increase payment for separately payable drugs and biologicals without pass-through payment status to adequately cover providers' acquisition and pharmacy overhead costs.

Response: We thank commenters for their support. We continue to believe that ASP+6 percent based on the statutory default is appropriate for payment of separately payable drugs and biologicals for CY 2017 and that this percentage amount adequately covers acquisition and overhead cost. We see no evidence that an additional payment for overhead is required for separately payable drugs, biologicals, and therapeutic radiopharmaceuticals for CY 2017.

After consideration of the public comments we received, we are finalizing our proposal, without modification, to pay for separately payable drugs and biologicals at ASP+6 percent based on section 1833(t)(14)(A)(iii)(II) of the Act (the statutory default). The ASP+6 percent payment amount for separately payable drugs and biologicals requires no further adjustment and represents the combined acquisition and pharmacy overhead payment for drugs and biologicals for CY 2017. In addition, we are finalizing our proposal that payment for separately payable drugs and biologicals be included in the budget neutrality adjustments, under the requirements of section 1833(t)(9)(B) of the Act, and that the budget neutral weight scaler is not applied in determining payment of these separately paid drugs and biologicals.

We note that separately payable drug and biological payment rates listed in Addenda A and B to this final rule with comment period (available via the Internet on the CMS Web site), which illustrate the final CY 2017 payment of ASP+6 percent for separately payable

nonpass-through drugs and biologicals and ASP+6 percent for pass-through drugs and biologicals, reflect either ASP information that is the basis for calculating payment rates for drugs and biologicals in the physician's office setting effective October 1, 2016, or WAC, AWP, or mean unit cost from CY 2015 claims data and updated cost report information available for this final rule with comment period. In general, these published payment rates are not the same as the actual January 2017 payment rates. This is because payment rates for drugs and biologicals with ASP information for January 2017 will be determined through the standard quarterly process where ASP data submitted by manufacturers for the third quarter of 2016 (July 1, 2016 through September 30, 2016) will be used to set the payment rates that are released for the quarter beginning in January 2017 near the end of December 2016. In addition, payment rates for drugs and biologicals in Addenda A and B to this final rule with comment period for which there was no ASP information available for October 2016 are based on mean unit cost in the available CY 2015 claims data. If ASP information becomes available for payment for the quarter beginning in January 2017, we will price payment for these drugs and biologicals based on their newly available ASP information. Finally, there may be drugs and biologicals that have ASP information available for this final rule with comment period (reflecting October 2016 ASP data) that do not have ASP information available for the quarter beginning in January 2017. As stated in the CY 2017 OPPS/ASC proposed rule (81 FR 45664), these drugs and biologicals will then be paid based on mean unit cost data derived from CY 2015 hospital claims. Therefore, the payment rates listed in Addenda A and B to this final rule with comment period are not for January 2017 payment purposes and are only illustrative of the CY 2017 OPPS payment methodology using the most recently available information at the time of issuance of this final rule with comment period.

c. Biosimilar Biological Products

For CY 2016, we finalized a policy to pay for biosimilar biological products based on the payment allowance of the product as determined under section 1847A of the Act and to subject nonpass-through biosimilar biological products to our annual threshold-packaged policy (80 FR 70445 through 70446). In the CY 2017 OPPS/ASC proposed rule (81 FR 45664), for CY 2017, we proposed to continue this same payment policy for biosimilar biological products.

We received several public comments on the proposed HCPCS coding and modifiers for biosimilar biological products. As proposed, under the OPPS, we will use the HCPCS codes and modifiers for biosimilar biological products based on the policy established under the CY 2016 MPFS final rule with comment period. Therefore, we are considering the public comments received on biosimilar biological product HCPCS coding and modifiers in response to the CY 2017 OPPS/ASC proposed rule to be outside the scope to the proposed rule and we are not addressing them in this CY 2017 OPPS/ASC final rule with comment period. We refer readers to the CY 2017 MPFS final rule with comment period.

We are finalizing our proposal, without modification, to pay for biosimilar biological products based on the payment allowance of the product as determined under section 1847A of the Act. In addition, we are finalizing our proposal, without modification, to subject nonpass-through biosimilar biological products to our annual threshold-packaged policy.

3. Payment Policy for Therapeutic Radiopharmaceuticals

In the CY 2017 OPPS/ASC proposed rule (81 FR 45664), for CY 2017, we proposed to continue the payment policy for therapeutic radiopharmaceuticals that began in CY 2010. We pay for separately paid therapeutic radiopharmaceuticals under the ASP methodology adopted for separately payable drugs and biologicals. If ASP information is unavailable for a therapeutic radiopharmaceutical, we base therapeutic radiopharmaceutical payment on mean unit cost data derived from hospital claims. We believe that the rationale outlined in the CY 2010 OPPS/ASC final rule with comment period (74 FR 60524 through 60525) for applying the principles of separately payable drug pricing to therapeutic radiopharmaceuticals continues to be appropriate for nonpass-through, separately payable therapeutic radiopharmaceuticals in CY 2017. Therefore, we proposed for CY 2017 to pay all nonpass-through, separately payable therapeutic radiopharmaceuticals at ASP+6 percent, based on the statutory default described in section 1833(t)(14)(A)(iii)(II) of the Act. For a full discussion of ASP-based payment for therapeutic radiopharmaceuticals, we refer readers to the CY 2010 OPPS/ASC final rule with comment period (74 FR 60520 through 60521). We also proposed to rely on CY 2015 mean unit cost data derived from hospital claims data for payment rates for therapeutic radiopharmaceuticals for which ASP data are unavailable and to update the payment rates for separately payable therapeutic radiopharmaceuticals according to our usual process for updating the payment rates for separately payable drugs and biologicals on a quarterly basis if updated ASP information is available. For a complete history of the OPPS payment policy for therapeutic radiopharmaceuticals, we refer readers to the CY 2005 OPPS final rule with comment period (69 FR 65811), the CY 2006 OPPS final rule with comment period (70 FR 68655), and the CY 2010 OPPS/ASC final rule with comment period (74 FR 60524). The proposed CY 2017 payment rates for nonpass-through, separately payable therapeutic radiopharmaceuticals were in Addenda A and B to the proposed rule (which are available via the Internet on the CMS Web site).

Comment: Commenters supported CMS' proposal to pay for separately payable therapeutic radiopharmaceuticals under the statutory default payment rate of ASP+6 percent if ASP data are submitted to CMS.

Response: We appreciate the commenters' support. We continue to believe that providing payment for therapeutic radiopharmaceuticals based on ASP or mean unit cost if ASP information is not available would provide appropriate payment for these products. When ASP data are not available, we believe that paying for therapeutic radiopharmaceuticals using mean unit cost will appropriately pay for the average hospital acquisition and associated handling costs of non-pass-through separately payable therapeutic radiopharmaceuticals. As we stated in the CY 2010 OPPS/ASC final rule with comment period (74 FR 60523), although using mean unit cost for payment for therapeutic radiopharmaceuticals when ASP data are not available is not the usual OPPS process (the usual process relies on alternative data sources such as WAC or AWP when ASP information is temporarily unavailable, prior to defaulting to the mean unit cost from hospital claims data), we continue to believe that WAC or AWP is not an appropriate proxy to provide OPPS payment for average therapeutic radiopharmaceutical acquisition cost and associated handling costs when manufacturers are not required to submit ASP data. Payment based on WAC or AWP under the established

OPPS methodology for payment of separately payable drugs and biologicals is usually temporary for a calendar quarter until a manufacturer is able to submit the required ASP data in accordance with the quarterly ASP submission timeframes for reporting under section 1847A of the Act. Because ASP reporting for OPPS payment of separately payable therapeutic radiopharmaceuticals is not required, a manufacturer's choice to not submit ASP could result in payment for a separately payable therapeutic radiopharmaceutical based on WAC or AWP for a full year, a result that we believe would be inappropriate.

After consideration of the public comments we received, we are finalizing our proposal, without modification, to continue to pay all non-pass-through, separately payable therapeutic radiopharmaceuticals at ASP+6 percent. We also are finalizing our proposal to continue to rely on CY 2015 mean unit cost data derived from hospital claims data for payment rates for therapeutic radiopharmaceuticals for which ASP data are unavailable. The CY 2017 final rule payment rates for nonpass-through separately payable therapeutic radiopharmaceuticals are included in Addenda A and B to this final rule with comment period (which are available via the Internet on the CMS Web site).

4. Payment Adjustment Policy for Radioisotopes Derived From Non-Highly Enriched Uranium Sources

Radioisotopes are widely used in modern medical imaging, particularly for cardiac imaging and predominantly for the Medicare population. Some of the Technetium-99 (Tc-99m), the radioisotope used in the majority of such diagnostic imaging services, is produced in legacy reactors outside of the United States using highly enriched uranium (HEU).

The United States would like to eliminate domestic reliance on these reactors, and is promoting the conversion of all medical radioisotope production to non-HEU sources. Alternative methods for producing Tc-99m without HEU are technologically and economically viable, and conversion to such production has begun. We expect that this change in the supply source for the radioisotope used for modern medical imaging will introduce new costs into the payment system that are not accounted for in the historical claims data.

Therefore, beginning in CY 2013, we finalized a policy to provide an additional payment of $10 for the marginal cost for radioisotopes produced by non-HEU sources (77 FR 68323). Under this policy, hospitals report HCPCS code Q9969 (Tc-99m from non-highly enriched uranium source, full cost recovery add-on per study dose) once per dose along with any diagnostic scan or scans furnished using Tc-99m as long as the Tc-99m doses used can be certified by the hospital to be at least 95 percent derived from non-HEU sources (77 FR 68321).

We stated in the CY 2013 OPPS/ASC final rule with comment period (77 FR 68321) that our expectation is that this additional payment will be needed for the duration of the industry's conversion to alternative methods to producing Tc-99m without HEU. We also stated that we would reassess, and propose if necessary, on an annual basis whether such an adjustment continued to be necessary and whether any changes to the adjustment were warranted (77 FR 68316). We have reassessed this payment for CY 2017 and did not identify any new information that would cause us to modify payment. Therefore, in the CY 2017 OPPS/ASC proposed rule (81 FR 45665), for CY 2017, we proposed to continue to provide an additional $10 payment for radioisotopes produced by non-HEU sources.

Comment: Some commenters supported CMS' proposal to provide an additional $10 payment for radioisotopes produced by non-HEU sources and asked that CMS work with stakeholders regarding a phase-out plan based on utilization and adoption of non-HEU technetium by the radiopharmaceutical manufacturers. Another commenter requested that CMS provide an explanation for not applying an annual inflation update to the $10 payment for radioisotopes produced by non-HEU sources, provide details on plans to offset nuclear medicine procedures by the amount of cost paid through the non-HEU policy, and make available to the public data regarding claims submitted to date under this policy. The commenter also stated that CMS should assess whether the beneficiary copayment policy is adversely impacting patient access.

Response: We appreciate commenters' support. As stated earlier, we support efforts by all of the involved stakeholders to convert all medical radioisotope production to non-HEU sources. Regarding the comment requesting that we increase the $10 payment for HCPCS code Q9969 (by an inflation update or some other amount) for CY 2017, we currently lack sufficient additional information to suggest that an add-on payment greater than $10 would be more appropriate. Regarding the request for payment information for services described by HCPCS code Q9969, the following are the most currently available total Medicare payments for services described by HCPCS code Q9969 for each year in which it has been in effect: CY 2013 ($17,164); CY 2014 ($66,609); and CY 2015 ($106,584). Also, we do not believe that beneficiary copayments for services described by HCPCS code Q9969 are adversely impacting beneficiary access to any medically necessary services. The 20-percent copayment amount on the $10 total payment for HCPCS code Q9969 is only $2. Any Medicare beneficiary who is unable to afford this $2 copayment would almost certainly have some form of government assistance that would cover this copayment amount. Therefore, we do not believe that the copayment requirements for services described by HCPCS code Q9969 are negatively impacting access to medical care for Medicare beneficiaries.

After consideration of the public comments we received, we are finalizing our proposal, without modification, to continue the policy of providing an additional $10 payment for radioisotopes produced by non-HEU sources for CY 2017, which will be the fifth year in which this policy is in effect in the OPPS. We will continue to reassess this policy annually, consistent with the original policy in the CY 2013 OPPS/ASC final rule with comment period (77 FR 68321).

5. Payment for Blood Clotting Factors

For CY 2016, we provided payment for blood clotting factors under the same methodology as other nonpass-through separately payable drugs and biologicals under the OPPS and continued paying an updated furnishing fee (80 FR 70441). That is, for CY 2016, we provided payment for blood clotting factors under the OPPS at ASP+6 percent, plus an additional payment for the furnishing fee. We note that when blood clotting factors are provided in physicians' offices under Medicare Part B and in other Medicare settings, a furnishing fee is also applied to the payment. The CY 2016 updated furnishing fee was $0.202 per unit.

In the CY 2017 OPPS/ASC proposed rule (81 FR 45665), for CY 2017, we proposed to pay for blood clotting factors at ASP+6 percent, consistent with our proposed payment policy for other nonpass-through, separately payable drugs and biologicals, and to continue our policy for payment of the furnishing fee using an updated amount. Our policy to pay for a furnishing fee for blood clotting factors under the OPPS is

consistent with the methodology applied in the physician's office and in the inpatient hospital setting. These methodologies were first articulated in the CY 2006 OPPS final rule with comment period (70 FR 68661) and later discussed in the CY 2008 OPPS/ASC final rule with comment period (72 FR 66765). The proposed furnishing fee update was based on the percentage increase in the Consumer Price Index (CPI) for medical care for the 12-month period ending with June of the previous year. Because the Bureau of Labor Statistics releases the applicable CPI data after the MPFS and OPPS/ASC proposed rules are published, we were not able to include the actual updated furnishing fee in the proposed rules. Therefore, in accordance with our policy, as finalized in the CY 2008 OPPS/ASC final rule with comment period (72 FR 66765), we proposed to announce the actual figure for the percent change in the applicable CPI and the updated furnishing fee calculated based on that figure through applicable program instructions and posting on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Part-B-Drugs/McrPartBDrugAvgSalesPrice/index.html*.

Comment: One commenter supported CMS' proposal to continue its longstanding policy for payment of the furnishing fee for blood clotting factors administered or dispensed in the hospital outpatient department at the same level as in the physician office setting.

Response: We appreciate the commenter's support.

After consideration of the public comments we received, we are finalizing our proposal, without modification, to provide payment for blood clotting factors under the same methodology as other separately payable drugs and biologicals under the OPPS and to continue payment of an updated furnishing fee. We will announce the actual figure of the percent change in the applicable CPI and the updated furnishing fee calculation based on that figure through the applicable program instructions and posting on the CMS Web site.

6. Payment for Nonpass-Through Drugs, Biologicals, and Radiopharmaceuticals With HCPCS Codes But Without OPPS Hospital Claims Data

In the CY 2017 OPPS/ASC proposed rule (81 FR 45665), for CY 2017, we proposed to continue to use the same payment policy as in CY 2016 for nonpass-through drugs, biologicals, and radiopharmaceuticals with HCPCS codes but without OPPS hospital claims data (80 FR 70443). The proposed CY 2017 payment status of each of the nonpass-through drugs, biologicals, and radiopharmaceuticals with HCPCS codes but without OPPS hospital claims data was listed in Addendum B to the proposed rule, which is available via the Internet on the CMS Web site.

We did not receive any specific public comments regarding our proposed payment for nonpass-through drugs, biologicals, and radiopharmaceuticals with HCPCS codes, but without OPPS hospital claims data. Therefore, we are finalizing our CY 2017 proposal without modification, including our proposal to assign drug or biological products status indicator ''K'' and pay for them separately for the remainder of CY 2017 if pricing information becomes available. The CY 2017 payment status of each of the nonpass-through drugs, biologicals, and radiopharmaceuticals with HCPCS codes but without OPPS hospital claims data is listed in Addendum B to this final rule with comment period, which is available via the Internet on the CMS Web site.

VI. Estimate of OPPS Transitional Pass-Through Spending for Drugs, Biologicals, Radiopharmaceuticals, and Devices

A. Background

Section 1833(t)(6)(E) of the Act limits the total projected amount of transitional pass-through payments for drugs, biologicals, radiopharmaceuticals, and categories of devices for a given year to an ''applicable percentage,'' currently not to exceed 2.0 percent of total program payments estimated to be made for all covered services under the OPPS furnished for that year. If we estimate before the beginning of the calendar year that the total amount of pass-through payments in that year would exceed the applicable percentage, section 1833(t)(6)(E)(iii) of the Act requires a uniform prospective reduction in the amount of each of the transitional pass-through payments made in that year to ensure that the limit is not exceeded. We estimate the pass-through spending to determine whether payments exceed the applicable percentage and the appropriate prorata reduction to the conversion factor for the projected level of pass-through spending in the following year to ensure that total estimated pass-through spending for the prospective payment year is budget neutral, as required by section 1833(t)(6)(E) of the Act.

For devices, developing an estimate of pass-through spending in CY 2017 entails estimating spending for two groups of items. The first group of items consists of device categories that are currently eligible for pass-through payment and that will continue to be eligible for pass-through payment in CY 2017. The CY 2008 OPPS/ASC final rule with comment period (72 FR 66778) describes the methodology we have used in previous years to develop the pass-through spending estimate for known device categories continuing into the applicable update year. The second group of items consists of items that we know are newly eligible, or project may be newly eligible, for device pass-through payment in the remaining quarters of CY 2016 or beginning in CY 2017. The sum of the CY 2017 pass-through spending estimates for these two groups of device categories equals the total CY 2017 pass-through spending estimate for device categories with pass-through payment status. We base the device pass-through estimated payments for each device category on the amount of payment as established in section 1833(t)(6)(D)(ii) of the Act, and as outlined in previous rules, including the CY 2014 OPPS/ASC final rule with comment period (78 FR 75034 through 75036). We note that, beginning in CY 2010, the pass-through evaluation process and pass-through payment for implantable biologicals newly approved for pass-through payment beginning on or after January 1, 2010, that are surgically inserted or implanted (through a surgical incision or a natural orifice) use the device pass-through process and payment methodology (74 FR 60476). As has been our past practice (76 FR 74335), in the CY 2017 OPPS/ASC proposed rule (81 FR 45666), for CY 2017, we proposed to include an estimate of any implantable biologicals eligible for pass-through payment in our estimate of pass-through spending for devices. Similarly, we finalized a policy in CY 2015 that applications for pass-through payment for skin substitutes and similar products be evaluated using the medical device pass-through process and payment methodology (76 FR 66885 through 66888). Therefore, as we did beginning in CY 2015, for CY 2017, we also proposed to include an estimate of any skin substitutes and similar products in our estimate of pass-through spending for devices.

For drugs and biologicals eligible for pass-through payment, section 1833(t)(6)(D)(i) of the Act establishes the pass-through payment amount as the amount by which the amount authorized under section 1842(o) of the

Act (or, if the drug or biological is covered under a competitive acquisition contract under section 1847B of the Act, an amount determined by the Secretary equal to the average price for the drug or biological for all competitive acquisition areas and year established under such section as calculated and adjusted by the Secretary) exceeds the portion of the otherwise applicable fee schedule amount that the Secretary determines is associated with the drug or biological. Because we proposed to pay for most nonpass-through separately payable drugs and biologicals under the CY 2017 OPPS at ASP+6 percent, and because we proposed to pay for CY 2017 pass-through drugs and biologicals at ASP+6 percent, as we discussed in section V.A. of the proposed rule, our estimate of drug and biological pass-through payment for CY 2017 for this group of items was $0, as discussed below.

Furthermore, payment for certain drugs, specifically diagnostic radiopharmaceuticals and contrast agents without pass-through payment status, is packaged into payment for the associated procedures, and these products will not be separately paid. In addition, we policy-package all nonpass-through drugs, biologicals, and radiopharmaceuticals that function as supplies when used in a diagnostic test or procedure and drugs and biologicals that function as supplies when used in a surgical procedure, as discussed in section II.A.3. of the proposed rule and this final rule with comment period. In the CY 2017 OPPS/ASC proposed rule (81 FR 45666), we proposed that all of these policy-packaged drugs and biologicals with pass-through payment status would be paid at ASP+6 percent, like other pass-through drugs and biologicals, for CY 2017. Therefore, our estimate of pass-through payment for policy-packaged drugs and biologicals with pass-through payment status approved prior to CY 2017 was not $0, as discussed below. In section V.A.5. of the proposed rule, we discussed our policy to determine if the costs of certain policy-packaged drugs or biologicals are already packaged into the existing APC structure. If we determine that a policy-packaged drug or biological approved for pass-through payment resembles predecessor drugs or biologicals already included in the costs of the APCs that are associated with the drug receiving pass-through payment, we proposed to offset the amount of pass-through payment for the policy-packaged drug or biological. For these drugs or biologicals, the APC offset amount is the portion of the APC payment for the specific procedure performed with the pass-through drug or biological, which we refer to as the policy-packaged drug APC offset amount. If we determine that an offset is appropriate for a specific policy-packaged drug or biological receiving pass-through payment, we proposed to reduce our estimate of pass-through payments for these drugs or biologicals by this amount.

Similar to pass-through estimates for devices, the first group of drugs and biologicals requiring a pass-through payment estimate consists of those products that were recently made eligible for pass-through payment and that will continue to be eligible for pass-through payment in CY 2017. The second group contains drugs and biologicals that we know are newly eligible, or project will be newly eligible in the remaining quarters of CY 2016 or beginning in CY 2017. The sum of the CY 2017 pass-through spending estimates for these two groups of drugs and biologicals equals the total CY 2017 pass-through spending estimate for drugs and biologicals with pass-through payment status.

B. Estimate of Pass-Through Spending

In the CY 2017 OPPS/ASC proposed rule (81 FR 45666), we proposed to set the applicable pass-through payment percentage limit at 2.0 percent of the total projected OPPS payments for CY 2017, consistent with section 1833(t)(6)(E)(ii)(II) of the Act and our OPPS policy from CY 2004 through CY 2016 (80 FR 70446 through 70448).

For the first group, consisting of device categories that are currently eligible for pass–through payment and will continue to be eligible for pass-through payment in CY 2017, there are three active categories for CY 2017. For CY 2016, we established one new device category subsequent to the publication of the CY 2016 OPPS/ASC proposed rule, HCPCS code C1822 (Generator, neurostimulator (implantable), high frequency, with rechargeable battery and charging system), that was effective January 1, 2016. We estimated that the device described by HCPCS code C1822 will cost $1 million in pass-through expenditures in CY 2017. Effective April 1, 2015, we established that the device described by HCPCS code C2623 (Catheter, transluminal angioplasty, drug-coated, non-laser) will be eligible for pass-through payment. We estimated that the device described by HCPCS code C2623 will cost $97 million in pass-through expenditures in CY 2017. Effective July 1, 2015, we established that the device described by HCPCS code C2613 (Lung biopsy plug with delivery system) will be eligible for pass-through payment. We estimated that the device described by HCPCS code C2613 will cost $4.7 million in pass-through expenditures in CY 2017. Based on the three device categories of HCPCS codes C1822, C2623, and C2613, we proposed an estimate for the first group of devices of $102.7 million.

We did not receive any public comments on our proposed estimate for the first group of devices that included HCPCS codes C1822, C2623 and C2613. Therefore, we are finalizing the proposed estimate for this first group of devices of $102.7 million for CY 2017.

In estimating our proposed CY 2017 pass-through spending for device categories in the second group, we included: device categories that we knew at the time of the development of the proposed rule will be newly eligible for pass-through payment in CY 2017; additional device categories that we estimated could be approved for pass-through status subsequent to the development of the proposed rule and before January 1, 2017; and contingent projections for new device categories established in the second through fourth quarters of CY 2017. In the CY 2017 OPPS/ASC proposed rule (81 FR 45667), we proposed to use the general methodology described in the CY 2008 OPPS/ASC final rule with comment period (72 FR 66778), while also taking into account recent OPPS experience in approving new pass-through device categories. For the proposed rule, the estimate of CY 2017 pass-through spending for this second group of device categories was $10 million.

We did not receive any public comments on our proposed estimate for the second group of devices. Therefore, we are finalizing the proposed estimate for this second group of devices of $10 million for CY 2017.

To estimate proposed CY 2017 pass-through spending for drugs and biologicals in the first group, specifically those drugs and biologicals recently made eligible for pass-through payment and continuing on pass-through payment status for CY 2017, we proposed to use the most recent Medicare physician claims data regarding their utilization, information provided in the respective pass-through applications, historical hospital claims data, pharmaceutical industry information, and clinical information regarding those drugs or biologicals to project the CY 2017 OPPS utilization of the products.

For the known drugs and biologicals (excluding policy-packaged diagnostic radiopharmaceuticals, contrast agents, drugs, biologicals, and

radiopharmaceuticals that function as supplies when used in a diagnostic test or procedure, and drugs and biologicals that function as supplies when used in a surgical procedure) that will be continuing on pass-through payment status in CY 2017, we estimated the pass-through payment amount as the difference between ASP+6 percent and the payment rate for nonpass-through drugs and biologicals that will be separately paid at ASP+6 percent, which is zero for this group of drugs. Because payment for policy-packaged drugs and biologicals is packaged if the product was not paid separately due to its pass-through payment status, we proposed to include in the CY 2017 pass-through estimate the difference between payment for the policy-packaged drug or biological at ASP+6 percent (or WAC+6 percent, or 95 percent of AWP, if ASP or WAC information is not available) and the policy-packaged drug APC offset amount, if we determine that the policy-packaged drug or biological approved for pass-through payment resembles a predecessor drug or biological already included in the costs of the APCs that are associated with the drug receiving pass-through payment. For the proposed rule, using the proposed methodology described above, we calculated a CY 2017 proposed spending estimate for this first group of drugs and biologicals of approximately $19.0 million.

We did not receive any public comments on our proposed spending estimate for this first group of drugs and biologicals. For this final rule with comment period, we calculated a CY 2017 spending estimate for this first group of drugs and biologicals of approximately $20.2 million.

To estimate proposed CY 2017 pass-through spending for drugs and biologicals in the second group (that is, drugs and biologicals that we knew at the time of development of the proposed rule were newly eligible for pass-through payment in CY 2017, additional drugs and biologicals that we estimated could be approved for pass-through status subsequent to the development of the proposed rule and before January 1, 2016, and projections for new drugs and biologicals that could be initially eligible for pass-through payment in the second through fourth quarters of CY 2017), we proposed to use utilization estimates from pass-through applicants, pharmaceutical industry data, clinical information, recent trends in the per unit ASPs of hospital outpatient drugs, and projected annual changes in service volume and intensity as our basis for making the CY 2017 pass-through payment estimate. We also proposed to consider the most recent OPPS experience in approving new pass-through drugs and biologicals. Using our proposed methodology for estimating CY 2017 pass-through payments for this second group of drugs, we calculated a proposed spending estimate for this second group of drugs and biologicals of approximately $16.6 million.

We did not receive any public comments on our proposed methodology or the proposed spending estimate for this second group of drugs. Therefore, for CY 2017, we are continuing to use the general methodology described above. For this final rule with comment period, we calculated a CY 2017 spending estimate for this second group of drugs and biologicals of approximately $17.7 million.

In summary, in accordance with the methodology described earlier in this section, for this final rule with comment period, we estimate that total pass-through spending for the device categories and the drugs and biologicals that are continuing to receive pass-through payment in CY 2017 and those device categories, drugs, and biologicals that first become eligible for pass-through payment during CY 2017 is approximately $150.6 million (approximately $112.7 million for device categories and approximately $37.9 million for drugs and biologicals), which represents 0.24 percent of total projected OPPS payments for CY 2017. Therefore, we estimate that pass-through spending in CY 2017 will not amount to 2.0 percent of total projected OPPS CY 2017 program spending.

VII. OPPS Payment for Hospital Outpatient Visits and Critical Care Services

In the CY 2017 OPPS/ASC proposed rule (81 FR 45667), for CY 2017, we proposed to continue with and did not propose any changes to our current clinic and emergency department (ED) hospital outpatient visits payment policies. For a description of the current clinic and ED hospital outpatient visits policies, we refer readers to the CY 2016 OPPS/ASC final rule with comment period (80 FR 70448). We also proposed to continue with and did not propose any change to our payment policy for critical care services for CY 2017. For a description of the current payment policy for critical care services, we refer readers to the CY 2016 OPPS/ASC final rule with comment period (80 FR 70449), and for the history of the payment policy for critical care services, we refer readers to the CY 2014 OPPS/ASC final rule with comment period (78 FR 75043). In the proposed rule, we sought public comments on any changes to these codes that we should consider for future rulemaking cycles. We encouraged those parties who comment to provide the data and analysis necessary to justify any proposed changes.

We did not receive any public comments on this proposal. Therefore we are finalizing our CY 2017 proposal, without modification, to continue our current clinic and ED hospital outpatient visits and critical care services payment policies.

VIII. Payment for Partial Hospitalization Services

A. Background

A partial hospitalization program (PHP) is an intensive outpatient program of psychiatric services provided as an alternative to inpatient psychiatric care for individuals who have an acute mental illness. Section 1861(ff)(1) of the Act defines partial hospitalization services as the items and services described in paragraph (2) prescribed by a physician and provided under a program described in paragraph (3) under the supervision of a physician pursuant to an individualized, written plan of treatment established and periodically reviewed by a physician (in consultation with appropriate staff participating in such program), which sets forth the physician's diagnosis, the type, amount, frequency, and duration of the items and services provided under the plan, and the goals for treatment under the plan. Section 1861(ff)(2) of the Act describes the items and services included in partial hospitalization services. Section 1861(ff)(3)(A) of the Act specifies that a PHP is a program furnished by a hospital to its outpatients or by a community mental health center (CMHC) (as defined in subparagraph (B)), and which is a distinct and organized intensive ambulatory treatment service offering less than 24-hour-daily care other than in an individual's home or in an inpatient or residential setting. Section 1861(ff)(3)(B) of the Act defines a CMHC for purposes of this benefit.

Section 1833(t)(1)(B)(i) of the Act provides the Secretary with the authority to designate the OPD services to be covered under the OPPS. The Medicare regulations that implement this provision specify, under 42 CFR 419.21, that payments under the OPPS will be made for partial hospitalization services furnished by CMHCs as well as Medicare Part B services furnished to hospital outpatients designated by the

Secretary, which include partial hospitalization services (65 FR 18444 through 18445).

Section 1833(t)(2)(C) of the Act requires the Secretary to establish relative payment weights for covered OPD services (and any groups of such services described in section 1833(t)(2)(B) of the Act) based on median (or, at the election of the Secretary, mean) hospital costs using data on claims from 1996 and data from the most recent available cost reports. In pertinent part, section 1833(t)(2)(B) of the Act provides that the Secretary may establish groups of covered OPD services, within a classification system developed by the Secretary for covered OPD services, so that services classified within each group are comparable clinically and with respect to the use of resources. In accordance with these provisions, we have developed the PHP APCs. Because a day of care is the unit that defines the structure and scheduling of partial hospitalization services, we established a per diem payment methodology for the PHP APCs, effective for services furnished on or after July 1, 2000 (65 FR 18452 through 18455). Under this methodology, the median per diem costs were used to calculate the relative payment weights for the PHP APCs. Section 1833(t)(9)(A) of the Act requires the Secretary to review, not less often than annually, and revise the groups, the relative payment weights, and the wage and other adjustments described in section 1833(t)(2) of the Act to take into account changes in medical practice, changes in technology, the addition of new services, new cost data, and other relevant information and factors.

We began efforts to strengthen the PHP benefit through extensive data analysis and policy and payment changes finalized in the CY 2008 OPPS/ASC final rule with comment period (72 FR 66670 through 66676). In that final rule, we made two refinements to the methodology for computing the PHP median: The first remapped 10 revenue codes that are common among hospital-based PHP claims to the most appropriate cost centers; and the second refined our methodology for computing the PHP median per diem cost by computing a separate per diem cost for each day rather than for each bill.

In CY 2009, we implemented several regulatory, policy, and payment changes, including a two-tiered payment approach for partial hospitalization services under which we paid one amount for days with 3 services under PHP APC 0172 (Level 1 Partial Hospitalization) and a higher amount for days with 4 or more services under PHP APC 0173 (Level 2 Partial Hospitalization) (73 FR 68688 through 68693). We also finalized our policy to deny payment for any PHP claims submitted for days when fewer than 3 units of therapeutic services are provided (73 FR 68694). Furthermore, for CY 2009, we revised the regulations at 42 CFR 410.43 to codify existing basic PHP patient eligibility criteria and to add a reference to current physician certification requirements under 42 CFR 424.24 to conform our regulations to our longstanding policy (73 FR 68694 through 68695). We also revised the partial hospitalization benefit to include several coding updates (73 FR 68695 through 68697).

For CY 2010, we retained the two-tiered payment approach for partial hospitalization services and used only hospital-based PHP data in computing the PHP APC per diem costs, upon which PHP APC per diem payment rates are based. We used only hospital-based PHP data because we were concerned about further reducing both PHP APC per diem payment rates without knowing the impact of the policy and payment changes we made in CY 2009. Because of the 2-year lag between data collection and rulemaking, the changes we made in CY 2009 were reflected for the first time in the claims data that we used to determine payment rates for the CY 2011 rulemaking (74 FR 60556 through 60559).

In the CY 2011 OPPS/ASC final rule with comment period (75 FR 71994), we established four separate PHP APC per diem payment rates: Two for CMHCs (APC 0172 (for Level 1 services) and APC 0173 (for Level 2 services)) and two for hospital-based PHPs (APC 0175 (for Level 1 services) and 0176 (for Level 2 services)), based on each provider type's own unique data. In addition, in accordance with section 1301(b) of the Health Care and Education Reconciliation Act of 2010 (HCERA 2010), we amended the description of a PHP in our regulations to specify that a PHP must be a distinct and organized intensive ambulatory treatment program offering less than 24-hour daily care other than in an individual's home or in an inpatient or residential setting. In accordance with section 1301(a) of HCERA 2010, we revised the definition of a CMHC in the regulations to conform to the revised definition now set forth under section 1861(ff)(3)(B) of the Act (75 FR 71990). For CY 2011, we also instituted a 2-year transition period for CMHCs to the CMHC APC per diem payment rates based solely on CMHC data. Under the transition methodology, CMHC APCs Level 1 and Level 2 per diem costs were calculated by taking 50 percent of the difference between the CY 2010 final hospital-based PHP median costs and the CY 2011 final CMHC median costs and then adding that number to the CY 2011 final CMHC median costs. A 2-year transition under this methodology moved us in the direction of our goal, which is to pay appropriately for partial hospitalization services based on each provider type's data, while at the same time allowing providers time to adjust their business operations and protect access to care for Medicare beneficiaries. We also stated that we would review and analyze the data during the CY 2012 rulemaking cycle and, based on these analyses, we might further refine the payment mechanism. We refer readers to section X.B. of the CY 2011 OPPS/ASC final rule with comment period (75 FR 71991 through 71994) for a full discussion.

For CY 2012, as discussed in the CY 2012 OPPS/ASC final rule with comment period (76 FR 74348 through 74352), we determined the relative payment weights for partial hospitalization services provided by CMHCs based on data derived solely from CMHCs and the relative payment weights for partial hospitalization services provided by hospital-based PHPs based exclusively on hospital data.

In the CY 2013 OPPS/ASC final rule with comment period, we finalized our proposal to base the relative payment weights that underpin the OPPS APCs, including the four PHP APCs (APCs 0172, 0173, 0175, and 0176), on geometric mean costs rather than on the median costs. We established these four PHP APC per diem payment rates based on geometric mean cost levels calculated using the most recent claims and cost data for each provider type. For a detailed discussion on this policy, we refer readers to the CY 2013 OPPS/ASC final rule with comment period (77 FR 68406 through 68412).

In the CY 2014 OPPS/ASC proposed rule (78 FR 43621 through 43622), we solicited comments on possible future initiatives that may help to ensure the long-term stability of PHPs and further improve the accuracy of payment for PHP services, but proposed no changes. In the CY 2014 OPPS/ASC final rule with comment period (78 FR 75050 through 75053), we summarized the comments received on those possible future initiatives. We also continued to apply our established policies to calculate the four PHP APC per diem payment rates based on geometric mean per diem costs using the most recent claims data for each provider type. For a detailed discussion on this policy, we

refer readers to the CY 2014 OPPS/ASC final rule with comment period (78 FR 75050 through 75053).

In the CY 2015 OPPS/ASC final rule with comment period (79 FR 66902 through 66908), we continued to apply our established policies to calculate the four PHP APC per diem payment rates based on PHP APC geometric mean per diem costs, using the most recent claims and cost data for each provider type.

In the CY 2016 OPPS/ASC final rule with comment period (80 FR 70455 through 70465), we again continued to apply our established policies to calculate the four PHP APC per diem payment rates based on PHP APC geometric mean per diem costs, using the most recent claims and cost data for each provider type. We also implemented a trim to remove hospital-based PHP service days that use a CCR that was greater than 5 (CCR>5) to calculate costs for at least one of their component services, and a trim on CMHCs with an average cost per day that is above or below 2 (±2) standard deviations from the mean. We also renumbered the PHP APCs which were previously 0172, 0173, 0175, and 0176, to 5851, 5852, 5861, and 5862, respectively. For a detailed discussion of the PHP ratesetting process, we refer readers to the CY 2016 OPPS/ASC final rule with comment period (80 FR 70462 through 70467).

In the effort to increase the accuracy of the PHP per diem costs, in the CY 2016 OPPS/ASC final rule with comment period (80 FR 70455 through 70461), we completed an extensive analysis of the claims and cost data, which included provider service usage, coding practices, and the ratesetting methodology. This extensive analysis identified provider coding errors that were inappropriately removing costs from ratesetting, and aberrant data from several providers that were affecting the calculation of the proposed PHP geometric mean per diem costs. Aberrant data are claims and/or cost data that are so abnormal that they skew the resulting geometric mean per diem costs. For example, we found claims with excessive CMHC charges resulting in CMHC geometric mean costs per day that were approximately the same as or more than the daily payment for inpatient psychiatric facility services. For an outpatient program like the PHP, which does not incur room and board costs such as an inpatient stay would, these costs per day were excessive. In addition, we found some CMHCs had very low costs per day (less than $25 per day). We stated in the CY 2016 OPPS/ASC final rule with comment period (80 FR 70456) that, without using a trimming process, the data from these providers would inappropriately skew the geometric mean per diem cost for Level 2 CMHC services. Further analysis of the data confirmed that there were a few providers with extreme cost per day values, which led us to propose and finalize a ±2 standard deviation trim on CMHC costs per day.

During our claims and cost data analysis, we also found aberrant data from some hospital-based PHP providers. The existing OPPS ±3 standard deviation trim removed very extreme CCRs by defaulting two providers that failed this trim to their overall hospital ancillary CCR. However, the calculation of the ±3 standard deviations used to define the trim was influenced by these two providers, which had extreme CCRs greater than 175. Because these two hospital-based PHP providers remained in the data when we calculated the boundaries of the OPPS ±3 standard deviation trim in the CY 2016 ratesetting, the upper limit of the trim boundaries was fairly high, at 28.3446. As such, some aberrant CCRs were not trimmed out, and still had high values ranging from 6.3840 to 19.996. We note that, as stated in the CY 2016 OPPS/ASC proposed rule (80 FR 39242 and 39293) and reiterated in the CY 2016 OPPS/ASC final rule with comment period (80 FR 70456), OPPS defines a biased CCR as one that falls outside the predetermined ceiling threshold for a valid CCR; using CY 2014 cost report data, that threshold is 1.5.

In order to reduce or eliminate the impact of aberrant data received from a few CMHCs and hospital-based PHP providers in the claims data used for ratesetting, we finalized the application of a ±2 standard deviation trim on cost per day for CMHCs and a CCR>5 hospital service day trim for hospital-based PHP providers for CY 2016 and subsequent years (80 FR 70456 through 70459). In addition, in the CY 2016 OPPS/ASC final rule with comment period (80 FR 70459 through 70460), a cost inversion occurred in the final rule data with respect to hospital-based PHP providers. A cost inversion exists when the Level 1 PHP APC geometric mean per diem cost for providing exactly 3 services per day exceeds the Level 2 PHP APC geometric mean per diem cost for providing 4 or more services per day. We corrected the cost inversion with an equitable adjustment to the actual geometric mean per diem costs by increasing the Level 2 hospital-based PHP APC geometric mean per diem costs and decreasing the Level 1 hospital-based PHP APC geometric mean per diem costs by the same factor, to result in a percentage difference equal to the average percent difference between the hospital-based Level 1 PHP APC and the Level 2 PHP APC for partial hospitalization services from CY 2013 through CY 2015.

For a comprehensive description on the background of PHP payment policy, we refer readers to the CY 2016 OPPS/ASC final rule with comment period (80 FR 70453 through 70455).

B. PHP APC Update for CY 2017

1. PHP APC Changes and Effects on Geometric Mean Per Diem Costs

For CY 2017, in the CY 2017 OPPS/ASC proposed rule (81 FR 45669 through 45673), we proposed to continue to apply our established policies to calculate the PHP APC per diem payment rates based on geometric mean per diem costs using the most recent claims and cost data for each provider type. However, as explained in greater detail below, we proposed to combine the Level 1 and Level 2 PHP APCs for CMHCs and to combine the Level 1 and Level 2 APCs for hospital-based PHPs because we believe this would best reflect actual geometric mean per diem costs going forward, provide more predictable per diem costs, particularly given the small number of CMHCs, and generate more appropriate payments for these services by avoiding the cost inversions that hospital-based PHPs experienced in the CY 2016 OPPS/ASC final rule with comment period (80 FR 70459).

a. Changes to PHP APCs

In the CY 2017 OPPS/ASC proposed rule (81 FR 45669 through 45673), we proposed to combine the existing two-tiered PHP APCs for CMHCs into a single PHP APC and the existing two-tiered hospital-based PHP APCs into a single PHP APC. Specifically, we proposed to replace existing CMHC APCs 5851 (Level 1 Partial Hospitalization (3 services) for CMHCs) and 5852 (Level 2 Partial Hospitalization (4 or more services) for CMHCs) with proposed new CMHC APC 5853 (Partial Hospitalization (3 or More Services Per Day)), and to replace existing hospital-based PHP APCs 5861 (Level 1 Partial Hospitalization (3 services) for Hospital-based PHPs) and 5862 (Level 2 Partial Hospitalization (4 or more services) for Hospital-based PHPs) with proposed new hospital-based PHP APC 5863 (Partial Hospitalization (3 or More Services Per Day)). In conjunction with this proposal, we proposed to combine the geometric mean per diem costs for the existing Level 1 and Level 2 PHP APCs for

CMHCs (APC 5851 and APC 5852, respectively) to calculate the proposed geometric mean per diem costs for proposed new PHP APC 5853 for CMHCs using only CY 2015 CMHC claims data and the most recent cost data, and to combine the geometric mean per diem costs for the existing Level 1 and Level 2 PHP APCs for hospital-based PHPs (APC 5861 and APC 5862, respectively) to calculate the proposed geometric mean per diem costs for proposed new PHP APC 5863 for hospital-based PHPs using only CY 2015 hospital-based PHP claims data and the most recent cost data, for CY 2017 and subsequent years. We discuss these computations in section VIII.B.2 of this preamble. The proposed geometric mean per diem costs were shown in Table 19 in section VIII.B.2. of the proposed rule.

Comment: MedPAC supported the proposal to combine the existing Level 1 and Level 2 APCs into a single new APC for providing 3 or more services. MedPAC stated that the logic in payment rates is vital to having a meaningful payment system, and further added that payment rates that are higher for an APC that provides fewer of the same types of services as another APC is not reasonable. However, several commenters opposed the proposal.

One commenter stated that the proposal would violate the Mental Health Parity and Addiction Equity Act of 2008 (MHPAEA, Pub. L. 110–343) because it limits mental health care to a cap of 3 or fewer treatment groups per day and reduces payments to below payments for comparable acute care services.

One commenter urged CMS to monitor the effects of combining the existing two-tiered APCs into a single PHP APC, by provider type, to ensure that these changes do not cause or contribute to any unintended consequences such as reducing access to PHP services, or incentivizing reductions in services provided under the single APC.

Response: We appreciate the commenters' support. We agree that it is reasonable to combine similar costs and services into the same APC payment. It is also worth noting that in CY 2014, when we requested public comments on possible future initiatives, we received several public comments requesting a single APC payment for PHP services (78 FR 75051).

We also agree that it is possible that the combined PHP APCs could incentivize a reduction in services under a single APC, with PHP providers providing more days with only 3 services per day, but receiving an APC payment that is heavily weighted toward providing 4 or more services. We have monitored utilization of 3-service days over the years, and found that 3-service days are appropriately infrequent. In the updated CY 2015 claims data reviewed for this final rule with comment period, we found that 5 percent of CMHC paid days and 12 percent of hospital-based PHP paid days indicated that exactly 3 services were provided. In addition, given the intensive nature of partial hospitalization services and that PHP services are provided in lieu of inpatient hospitalization, we have a longstanding eligibility requirement that PHP beneficiaries require at least 20 hours per week in services, as evidenced in their plan of care. We discuss this requirement more fully in section VIII.B.1.b. of this final rule with comment period. We will be monitoring PHP claims beginning in January 2017, to determine whether PHP participants are receiving at least 20 hours per week in partial hospitalization services. In particular, we will monitor whether the frequency of providing 3-service days increases now that the payment incentive to provide 4 or more services per day, as opposed to 3 services per day, has been removed through combining the two PHP APCs. Payments for claims will not be affected at this time. Rather, our goal is to implement claims edits in the future to ensure that eligible Medicare beneficiaries are receiving the intense level of services that the statute and regulations require PHPs to provide. We are soliciting public comments on what facility types, treatment patterns, and other indicators are most important to monitor to ensure adequate provision of services.

We disagree with the commenter who believed that combining the existing two-tiered PHP APCs would violate the provisions of the MHPAEA. The MHPAEA generally prevents group health plans and health insurance issuers that provide mental health or substance use disorder benefits from imposing less favorable benefit limitations on those benefits than on medical/surgical benefits. The mental health parity requirements of MHPAEA do not apply to Medicare. More information is available about the MHPAEA on the CMS Web site at: *https://www.cms.gov/cciio/programs-and-initiatives/other-insurance-protections/mhpaea_factsheet.html*.

In addition, we believe that the commenter is misinterpreting the proposal in stating that combining the two-tiered PHP APCs, by provider type, limits outpatient mental health care to a cap of 3 or fewer group therapy treatments per day. The combined PHP APCs will generate payments for 3 or *more* services per day, not for 3 or fewer services provided per day. A different policy, the outpatient mental health treatment cap, limits the maximum payment for a day of individually billed outpatient mental health services to the highest hospital-based PHP APC per diem, and is derived from the most recent provider claims and cost data. It does not cap the number of services that can be provided to a beneficiary. Beneficiaries may receive as many services as are reasonable and necessary for their treatment. As noted in the April 7, 2000 OPPS final rule (65 FR 18454 through 18455), our rationale for implementing the mental health treatment cap was that the costs associated with administering a PHP represent the most resource-intensive of all outpatient mental health treatment services. Therefore, we do not believe it would be appropriate to pay more for a day of individually billed outpatient mental health services than what is paid for a day providing 3 or more partial hospitalization services. We also are concerned that a provider may disregard a patient's need for the intensive active treatment offered by a PHP and opt to bill for individual services. The geometric mean per diem payment amount represents the cost of an average day of partial hospitalization services (the data used to calculate the geometric mean per diem costs were derived from all of the PHP data and include the most and least intensive days). It would not be appropriate for a provider to obtain more payment through component billing.

For CY 2017, the outpatient mental health treatment cap will be equal to the combined PHP APC 5863 geometric mean per diem rate for hospital-based PHPs. Because 88 percent of hospital-based PHP service days provide 4 or more services, the mental health cap is heavily weighted toward the cost of providing 4 or more services per day. This cap is applied to each day of outpatient mental health treatment provided outside of the PHP benefit.

After consideration of the public comments we received, we are finalizing our proposal to replace existing CMHC APCs 5851 (Level 1 Partial Hospitalization (3 services) for CMHCs) and 5852 (Level 2 Partial Hospitalization (4 or more services) for CMHCs) with new CMHC APC 5853 (Partial Hospitalization (3 or More Services Per Day)), and to replace existing hospital-based PHP APCs 5861 (Level 1 Partial Hospitalization (3 services) for Hospital-Based PHPs) and 5862 (Level 2 Partial Hospitalization (4

or more services) for Hospital-Based PHPs) with new hospital-based PHP APC 5863 (Partial Hospitalization (3 or More Services Per Day)). We also are finalizing our proposal to combine the geometric mean per diem costs for the existing Level 1 and Level 2 PHP APCs for CMHCs (APC 5851 and APC 5852, respectively) to calculate the final geometric mean per diem costs for new PHP APC 5853 for CMHCs using only CY 2015 CMHC claims data and the most recent cost data, and to combine the geometric mean per diem costs for the existing Level 1 and Level 2 PHP APCs for hospital-based PHPs (APC 5861 and APC 5862, respectively) to calculate the final geometric mean per diem costs for new PHP APC 5863 for hospital-based PHPs using only CY 2015 hospital-based PHP claims data and the most recent cost data, for CY 2017 and subsequent years.

As we previously noted, we believe that these finalized policies will best reflect actual geometric mean per diem costs in the future; provide more predictable geometric mean per diem costs, particularly given the small number of CMHCs; simplify and reduce administrative burden by only having one APC for each provider type; and generate more appropriate payments for these services by avoiding the cost inversions that hospital-based PHPs experienced in the CY 2016 OPPS/ASC final rule with comment period (80 FR 70459), and which were noted in the CY 2017 OPPS/ASC proposed rule (81 FR 45670 through 45672), and occurred again in geometric mean per diem cost calculations for this final rule with comment period as described in section VIII.B.1.b. of this final rule with comment period. The CY 2017 final geometric mean per diem costs are shown in Table 41 in section VIII.B.2. of this final rule with comment period. As noted earlier, we are soliciting public comments on how we can best target monitoring efforts to ensure adequate provision of services by hospital-based PHPs and CMHC.

b. Rationale for Changes in PHP APCs

One of the primary reasons for our decision to replace the existing Level 1 and Level 2 PHP APCs with a single PHP APC, by provider type, is because the new PHP APCs will avoid any further issues with cost inversions and, therefore, generate more appropriate payment for the services provided by specific provider types. As previously stated, a cost inversion exists when the Level 1 PHP APC geometric mean per diem cost for providing exactly 3 services per day exceeds the Level 2 PHP APC geometric mean per diem cost for providing 4 or more services per day, and, as we noted in last year's final rule with comment period, we do not believe that it is reasonable or appropriate to pay more for fewer services provided per day and to pay less for more services provided per day (80 FR 70459 through 70460).

To determine if the issue with hospital-based cost inversions that occurred in the data used for the CY 2016 OPPS/ASC final rule with comment period (80 FR 70459) would continue, we calculated the CY 2017 hospital-based PHP APC geometric mean per diem costs separately for Level 1 and Level 2 partial hospitalization services provided by hospital-based PHPs. After applying our established trims and exclusions, we determined that the CY 2017 Level 1 hospital-based PHP APC geometric mean per diem cost is $281.35 (proposed at $241.08) and the CY 2017 Level 2 hospital-based PHP APC geometric mean per diem cost is $210.50 (proposed at $187.06), which again demonstrates an inversion.

For the CY 2017 OPPS/ASC proposed rule, we analyzed the CY 2015 hospital-based PHP claims data used for the CY 2017 proposed rule to determine the source of the inversion between the Level 1 and Level 2 hospital-based PHP APCs geometric mean per diem costs, and found that 13 hospital-based PHPs had high geometric mean per diem costs per day. Two of those providers account for 11.5 percent of Level 1 hospital-based PHP service days, but only 1.9 percent of Level 2 hospital-based PHP service days. Eleven of those 13 providers only reported costs for Level 1 hospital-based PHP service days, which increased the geometric mean per diem costs for the Level 1 hospital-based PHP APC. There also were 3 hospital-based PHP providers with very low geometric mean costs per day that accounted for approximately 28 percent of the Level 2 hospital-based PHP service days, which decreased the geometric mean per diem costs for the Level 2 hospital-based PHP APC.

For this CY 2017 final rule with comment period, we found that the inversion of the Level 1 and Level 2 hospital-based PHP geometric mean per diem costs was caused by 3 providers with high-cost Level 1 service days, accounting for 16 percent of all Level 1 service days, and 1 low-cost provider accounting for 15 percent of all Level 2 service days. High volume providers heavily influence the cost data, and we believe that the high volume providers with very low Level 2 hospital-based PHP geometric mean per diem costs per day and high volume providers with very high Level 1 hospital-based PHP geometric mean per diem costs per day contributed to the inversion between the hospital-based PHP APCs Level 1 and Level 2 geometric mean per diem costs. In developing the policy to combine the Level 1 and Level 2 PHP APCs into one APC each for CMHCs and hospital-based providers, we reviewed the reasons why we structured the existing PHP APCs into a two-tiered payment distinguished by Level 1 and Level 2 services for both provider types in the CY 2009 OPPS/ASC final rule with comment period (73 FR 68688 through 68693), to determine whether the rationales continued to be applicable. In the CY 2009 OPPS/ASC final rule with comment period, we referenced the CY 2008 OPPS/ASC final rule with comment period (72 FR 66672), which noted that a significant portion of PHP service days actually provided fewer than 3 services to Medicare beneficiaries. In our CY 2009 OPPS/ASC final rule with comment period, we noted that PHP service days that provide exactly 3 services should only occur in limited circumstances. We were concerned about paying providers a single per diem payment rate when a significant portion of the PHP service days provided 3 services, and believed it was appropriate to pay a higher rate for more intensive service days.

We evaluated the frequency of claims reporting Level 1 and Level 2 PHP service days in Table 17 of the proposed rule to determine if a significant portion of PHP service days only provided exactly 3 services (81 FR 45671). Table 17 showed that the frequency of claims reporting PHP service days providing exactly 3 services (Level 1 services) has decreased greatly from 73 percent of CMHC service days in the CY 2009 rulemaking to 4 percent of CMHC service days in the CY 2017 proposed rule, and from 29 percent of hospital-based PHP service days in the CY 2009 rulemaking to 12 percent of hospital-based PHP service days in the CY 2017 proposed rule. We have updated this table, as shown below, to reflect updated CY 2015 claims data used for this final rule with comment period, and found that 5 percent of CMHC service days and 12 percent of hospital-based PHP service days have exactly 3 services provided. Level 1 PHP service days represent a small portion of PHP service days, particularly for CMHCs, as shown in Table 39 below. Based on this decline in the frequency of claims reporting Level 1 service days, we believe that the need for the PHP APC Level 1 and Level 2 payment tiers that was present in CY 2009 no longer exists.

The utilization data in Table 39 indicate that for the CY 2017 rulemaking year, the Level 2 CMHC service days and the hospital-based PHP Level 2 service days are 95 percent and 88 percent, respectively. Because Level 1 service days are now less common for both provider types, we believe it is no longer necessary to pay a separate rate when 4 or more services are provided compared to when only 3 services are provided. Our new PHP APCs 5853 and 5863 are based on cost data for 3 or more services per day (by provider type). Therefore, the combined cost data used to derive new PHP APCs 5853 and 5863 result in appropriate per diems based on costs for providing 3 or more services per day. We are sensitive to the fact that our payment policy may have influenced this change in service provision because providers were able to obtain higher payment for providing 4 or more services than for providing only 3 services. Therefore, as discussed earlier, we remain concerned that providers may inappropriately provide too few services to beneficiaries enrolled in PHPs, and we are working expeditiously to implement coding edits that will better monitor whether PHP providers are furnishing at least 20 hours of services per week, which eligible beneficiaries require.

Table 39 below reflects the utilization data used for this CY 2017 final rule with comment period, using the updated CY 2015 claims data.

TABLE 39—UTILIZATION OF PHP LEVEL 1 DAYS (PROVIDING EXACTLY 3 SERVICES PER DAY) AND PHP LEVEL 2 DAYS (PROVIDING 4 OR MORE SERVICES PER DAY), FROM CY 2007 THROUGH FINAL CY 2015 CLAIMS DATA

Rulemaking year	Claims year	CMHC Level 1 days (%)	CMHC Level 2 days (%)	Hospital-based PHP Level 1 days (%)	Hospital-based PHP Level 2 days (%)
CY 2009	CY 2007	73	27	29	71
CY 2010	CY 2008	66	34	25	75
CY 2011	CY 2009	2	98	18	82
CY 2012	CY 2010	2	98	19	81
CY 2013	CY 2011	3	97	11	89
CY 2014	CY 2012	4	96	11	89
CY 2015	CY 2013	6	94	11	89
CY 2016	CY 2014	5	95	11	89
CY 2017	CY 2015	5	95	12	88

When we implemented the PHP APCs Level 1 and Level 2 payment tiers in our CY 2009 rulemaking, we noted that we wanted to provide PHPs with flexibility in scheduling patients. Both the industry and CMS recognized that there may be limited circumstances when it is appropriate for PHPs to receive payment for days when exactly 3 units of service are provided (73 FR 68688 through 68689). Allowing PHPs to receive payment for a Level 1 service day where exactly 3 services are provided gives PHPs some flexibility in scheduling their patients. Our decision to replace the existing two-tiered PHP APCs with new PHP APCs 5853 and 5863 will provide payment for providing 3 or more services per day by CMHCs and hospital-based PHPs, respectively. Therefore, this flexibility in scheduling will remain.

Another primary reason for our decision to replace the Level 1 and Level 2 PHP APCs with a single PHP APC, by provider type, is the decrease in the number of PHPs, particularly CMHCs. With a small number of providers, data from large providers with a high percentage of all PHP service days and unusually high or low geometric mean costs per day will have a more pronounced effect on the PHP APCs geometric mean per diem costs, skewing the costs up or down. That effect would be magnified by continuing to split the geometric mean per diem costs further by distinguishing Level 1 and Level 2 PHP services. Creating a single PHP APC for each provider type providing 3 or more partial hospitalization services per day will reduce these cost fluctuations and provide more stability in the PHP APC geometric mean per diem costs.

We also note that our decision to replace the existing Level 1 and Level 2 PHP APCs, by provider type, with a single PHP APC for each provider type is permissible under the applicable statute and regulatory provisions. Section 1833(t)(2)(B) of the Act provides that the Secretary may establish groups of covered OPD services, within a classification system developed by the Secretary for covered OPD services, so that services classified within each group are comparable clinically and with respect to the use of resources. Moreover, the language that follows paragraph (t)(2) of section 1833 of the Act provides that, for purposes of subparagraph (B), items and services within a group shall not be treated as comparable with respect to use of resources if the highest mean cost for an item or service is more than two times greater than the lowest mean cost for an item or service within the group, with some exceptions. Section 419.31 of our regulations implements this statutory provision, providing that CMS classify outpatient services and procedures that are comparable clinically and in terms of resource use into APC groups. We believe our policy to replace the existing Level 1 and Level 2 PHP APCs for both provider types with a single PHP APC, by provider type, is supported by the statute and regulations and will continue to pay for partial hospitalization services appropriately based upon actual provider costs.

Both of the existing Level 1 and Level 2 PHP APCs are comprised of services described by the same HCPCS codes. Therefore, the types of services provided under the two payment tiers are the same. The difference is in the quantity of the services provided, where the Level 1 PHP APCs provide for payment for providing exactly 3 services per day, while the Level 2 PHP APCs provide for payment for providing 4 or more services per day. Because the difference in the Level 1 and the Level 2 PHP APCs is in the quantity of the services provided, we expect that the resource use (that is, the geometric mean per diem cost) for providing partial hospitalization services under Level 1 will represent approximately 75 percent or less of the resource use for providing partial hospitalization services under Level 2, by provider type. Table 18 of the proposed rule showed a clear trend for hospital-based PHPs, where the geometric mean per diem costs for providing Level 1 partial hospitalization services have approached the geometric mean per

diem costs for providing Level 2 partial hospitalization services, until they exceed the geometric mean per diem costs for providing Level 2 partial hospitalization services beginning in CY 2016. As the percentages in Table 18 of the proposed rule approach 100 percent, the Level 1 and the Level 2 PHP APC geometric mean per diem costs become closer to each other, demonstrating similar resource use. The trend is less clear for CMHCs, but the data still show the cost difference between the two tiers narrowing, except in CY 2016. We are not sure why the cost difference is wider among CMHCs in CY 2016. In the CY 2017 OPPS/ASC proposed rule, we welcomed public comments that could help explain the difference. However, we did not receive any public comments on this issue.

The data trends reflected in Table 40 below, which is an update of Table 18 in the proposed rule based on final CY 2015 claims data for this final rule with comment period, continue to support the proposals we made, and our decision to change from a two-tiered APC system for CMHCs and for hospital-based PHPs to a combined APC for providing 3 or more services per day for each provider type.

TABLE 40—TRENDS IN LEVEL 1 PER DIEM COSTS AS A PERCENTAGE OF LEVEL 2 PER DIEM COSTS

	CY 2013 (%)	CY 2014 (%)	CY 2015 (%)	CY 2016 (%)	CY 2017 * (%)
CMHCs; Level 1 PHP APC per diem costs/Level 2 PHP APC per diem costs	77.5	88.6	84.4	66.1	94.4
Hospital-based PHPs; Level 1 PHP APC per diem costs/ Level 2 PHP APC per diem costs	79.2	89.0	91.6	* 110.0	** 133.7

* Based on CY 2015 final claims data.
** Cost inversions occurred with the Level 1 PHP APC per diem costs exceeding the Level 2 PHP APC per diem costs.

We evaluated the provision of more costly individual therapy in our CY 2017 analyses to determine if there were differences in its provision for PHP APC Level 1 service days compared to PHP APC Level 2 service days, by provider type, because this could affect our expected difference in resource use (that is, geometric mean per diem costs) between the two payment tiers. Using the updated CY 2015 claims data for this final rule with comment period, we found that individual therapy was provided less frequently on days where exactly 3 services were provided by hospital-based PHPs (in 4.0 percent of PHP APC Level 1 service days and in 6.2 percent of PHP APC Level 2 service days). However, we found that individual therapy was provided more frequently under the Level 1 CMHC service days than under the Level 2 CMHC service days (7.9 percent versus 4.4 percent). The greater frequency of CMHCs' providing more costly individual therapy under Level 1 PHP service days should increase resource use for these service days, narrowing the cost difference between Level 1 and Level 2 CMHC service days. This result reflects the updated claims data used for this final rule with comment period.

As we described earlier, the services provided under the Level 1 and Level 2 PHP APC payment tiers are comparable clinically and in terms of resource use. Therefore, based on the authority provided under section 1833(t)(2)(B) of the Act and our regulations at § 419.31(a)(1), and to mitigate the policy concerns noted above, as we proposed, we are replacing the Level 1 and Level 2 PHP APCs, for each provider type, with a single PHP APC by provider type for CY 2017 and subsequent years.

Our decision to replace the existing Level 1 and Level 2 PHP APCs for both provider types with a single PHP APC, by provider type, is designed to continue to pay for partial hospitalization services appropriately based upon actual provider costs. We believe that section 1833(t)(2)(B) of the Act and our regulations at § 419.31(a)(1) provide the Secretary with the authority to classify services that are comparable clinically and in terms of resource use under a single APC grouping, which is the basis for our decision to replace the existing Level 1 and Level 2 PHP APCs for CMHCs and hospital-based PHPs for providing partial hospitalization services with a single PHP APC for each specific provider type. In addition, we believe that our decision to combine the PHP APCs two-tiered payment structure by provider type will more appropriately pay providers for partial hospitalization services provided to Medicare beneficiaries and avoid cost inversions in the future. Our decision to combine the PHP APC payment tiers, by provider type, also will provide more predictable geometric mean per diem costs, particularly given the small number of CMHCs and the cost inversions that hospital-based PHPs have experienced. The cost inversions between PHP APC Level 1 and Level 2 service days in the hospital-based PHP claims data and the small number of CMHCs are the two primary reasons for our policy to replace the two-tiered PHP APCs with a single PHP APC for each provider type. The small percentage of all PHP service days for partial hospitalization services provided under the Level 1 PHP APCs further supports our policy to replace the two-tiered PHP APCs with a single PHP APC for each provider type. As noted previously, we believe that the need for the PHP APC Level 1 and Level 2 payment tiers that was present in CY 2009 no longer exists.

In summary, we are creating new CMHC APC 5853 to pay CMHCs for partial hospitalization services provided to Medicare beneficiaries for providing 3 or more services per PHP service day to replace existing CMHC APCs 5851 and 5852 for CY 2017 and subsequent years. We also are creating new hospital-based PHP APC 5863 to pay hospital-based PHPs for partial hospitalization services provided to Medicare beneficiaries for providing 3 or more services per PHP service day to replace existing hospital-based PHP APCs 5861 and 5862 for CY 2017 and subsequent years. We discuss the final geometric mean per diem cost for new CMHC APC 5853 and the final geometric mean per diem cost for new hospital-based PHP APC 5863 in section VIII.B.2. of this final rule with comment period.

By finalizing these proposals, we will pay both CMHCs and hospital-based PHP providers the same payment rate for providing 3 partial hospitalization services in a single service day as is paid for providing 4 or more services in a single service day, by the specific provider type. We remind providers that because partial hospitalization services are intensive outpatient services, our regulations at §§ 410.43(a)(3) and (c)(1) require that PHP beneficiaries need at least 20 hours of services each week and that PHPs furnish services in accordance with the plan of care

reflecting that need. We reiterate that this 20 hour per week requirement is a minimum requirement, and have noted in multiple prior OPPS/ASC final rules with comment periods that a typical PHP would include 5 to 6 hours per day (70 FR 68548, 71 FR 67999, 72 FR 66671, and 73 FR 68687). We want providers to continue to have flexibility in providing PHP services, and we will continue to monitor the utilization of providing 3 services per service day for those limited circumstances when a 3-service day is appropriate. We are considering multiple options for enhancing monitoring of providers to ensure that they furnish appropriate services under PHPs which, according to our regulations at § 410.43(c), are intended for patients who require a minimum of 20 hours per week of therapeutic services as evidenced in their plan of care, and which, according to our regulations at § 424.24(e), require that the services be furnished in accordance with a plan of care that sets forth the frequency and duration of the services, taking into account a reasonable expectation of improvement in the patient's condition. We will communicate how we intend to undertake such enhanced monitoring in subregulatory guidance within the next year.

Finally, we are concerned about the low frequency of providing individual therapy, which we noted earlier in this section, and we will be monitoring its provision. The PHP is intensive by nature, and PHP services are provided in lieu of inpatient hospitalization. Furthermore, section 1861(ff) of the Act describes the items and services to be included in a PHP, including individual and group therapy. Therefore, we believe that appropriate treatment for PHP patients includes individual therapy. We encourage providers to examine their provision of individual therapy to PHP patients to ensure that patients are receiving all of the services that they may need.

Comment: One commenter believed that the combined PHP APCs do not appear to have included all of the data from the original Level 1 and Level 2 PHP APCs, and would result in a payment reduction because of implementation of the new policy.

Response: As described earlier, the combined PHP APCs' geometric mean costs used available CY 2015 claims data and were calculated by following the existing methodology for ratesetting, except that the geometric mean per diem costs for each provider type were calculated for days providing 3 or more partial hospitalization services, rather than calculated separately for days with exactly 3 services, and for days with 4 or more services. The combined PHP APCs' geometric mean costs are similar to a weighted average of actual provider costs. Therefore, the total payments resulting from the combined PHP APC geometric mean per diem cost, by provider type, would be roughly equal to the total payments resulting from the two-tiered PHP APC per diem costs, by provider type. As such, combining the PHP APCs geometric mean per diem costs does not reduce total costs or total payments by provider type. We refer readers to section VIII.B.2. for more detailed specifics on the CY 2017 PHP geometric mean per diem cost calculations.

Comment: A few commenters stated that the current two-tiered payment structure fostered a continuum of care, and contended that CMS' current policy of distinguishing 3 services per day and 4 or more services per day offers the flexibility of intermediate levels of care between outpatient, office-based visits, and inpatient psychiatric care, and further are differentiated from each other by the provider community as ''Intensive Outpatient Programs'' (IOPs) and PHPs, respectively. The commenters believed that, consequently, replacing the two-tiered payment methodology with a single APC and calculating the geometric mean per diem costs for 3 or more services per day would not recognize the importance and need for the continuum of care.

Response: We are concerned about the potential misuse of the PHP benefit. A few commenters indicated that some in the provider community recognize an IOP level of care. However, there is no Medicare benefit category for IOPs. Therefore, we cannot recognize or pay for what providers term ''IOPs'' using the PHP benefit. If the individual services that make up these IOPs meet all applicable requirements for non-PHP outpatient services, including coding definitions, and are reasonable and necessary, then conceivably these services could be billed individually under the OPPS. IOPs are typically not only less intensive than PHPs, but, as previously noted, are also a nonexistent Medicare category. In equating IOPs with the statutorily mandated PHP benefit, we believe commenters misunderstood the purpose of the PHP benefit. Specifically, a PHP requires physician certification that the individual would need inpatient psychiatric care if the partial hospitalization services were not provided, as described in § 424.24(e) of the regulations. Furthermore, as required by section 1861(ff) of the Act and by § 424.24(e) of the regulations, a PHP must be prescribed by a physician, and the services provided under the physician's care must be certified and recertified as being reasonable and necessary and under a plan of treatment that sets forth the duration and frequency of services, taking into account a reasonable expectation of improvement in the patient's condition. If a beneficiary is certified for PHP but provided services that meet some lesser level of care, this action could be some indication of fraud. We plan to work with the MACs in order to better educate providers on PHP requirements.

Finally, combining the PHP APCs does not affect the continuum of care available to Medicare beneficiaries seeking treatment for mental health issues. Our decision to combine the PHP APCs for Level 1 and Level 2 services into a single APC for 3 or more services per day, by provider type, is simply a change in how we pay for PHP services, and does not affect access to mental health care or the ways that non-PHP patients may receive mental health services.

Comment: One commenter stated that the requirement for a minimum of 20 hours per week of therapeutic services conflicts with accepted treatment parameters and other managed care options, where attendance and minimum hours are not required. The commenter believed that the 20 hour per week minimum imposes a burden on older patients, is not necessary to receive a positive outcome, provides no flexibility, would result in a patient attending the program 5 days a week and, therefore, creates a barrier to providing the most appropriate treatment for a patient's needs.

Response: When Congress established the PHP benefit in statute, it described a PHP as an *intensive* program that is provided *in lieu of inpatient treatment* (we refer readers to sections 1835(a)(2)(F), 1861(ff)(2), and 1861(ff)(3)(A) of the Act). Congress provided discretion to the Secretary to determine the frequency of PHP services. In our CY 2009 rulemaking, we promulgated regulations to establish an eligibility requirement at 42 CFR 410.43(c)(1), which states that PHPs are intended for patients who require a minimum of 20 hours per week of therapeutic services as evidenced in their plan of care. Under § 410.43(a)(3), we also require PHP services to be furnished in accordance with the plan of care and a physician certification.

Because a PHP is intended for patients who would otherwise be in an inpatient psychiatric setting, and who require an intensive level of services of at least 20 hours per week, it is not an

appropriate program for patients who need less intensive mental health services. Medicare provides a number of ways in which patients can receive covered mental health services, which range from inpatient psychiatric care, to PHPs, to other outpatient care provided by physicians or other health professionals in a variety of settings. Our Medicare Benefit Policy Manual (IOM 100–02, Chapter 6) states that PHP patients must be able to cognitively and emotionally participate in the active treatment process, and to tolerate the intensity of a PHP program (we refer readers to section 70.3, Chapter 6 of IOM 100–02, which is available via the Internet on the CMS Web site at: *https://www.cms.gov/Regulations-and-Guidance/Guidance/Manuals/Downloads/bp102c06.pdf*). It is possible that mental health treatment provided outside of the PHP benefit may be a more appropriate venue for some patients for whom the 20 hour per week minimum requirement is deemed to be burdensome.

We are concerned that some PHPs are admitting patients who do not meet the eligibility requirements required by the statute. Many of these PHPs are not providing at least 20 hours per week of services to their patients. As such, in March 2016, we issued a MedLearn Special Edition article to notify PHPs of edits to the claims processing system, which would begin July 1, 2016, and would systematically enforce our existing regulations related to the 20-hour per week minimum requirement. However, in early July 2016, we inactivated the edits, effective July 1, 2016, so that we could consider adding more flexibility to the editing process. (We refer readers to MedLearn Matters SE1607, which is available via the Internet on the CMS Web site at: *https://www.cms.gov/Outreach-and-Education/Medicare-Learning-Network-MLN/MLNMattersArticles/Downloads/SE1607.pdf*.)

In addition, we are considering proposing clarifications to our regulations in our CY 2018 rulemaking to more strongly tie a beneficiary's receipt of at least 20 hours per week of partial hospitalization services under a PHP to payment for those services. We are informing hospital-based PHPs and CMHCs so that they can review their admission procedures, and ensure that the patients they serve are truly eligible for the PHP benefit. In this final rule with comment period, we are requesting public comments on the advantages, disadvantages, and potential challenges of strengthening the tie between payment and furnishing at least 20 hours of services per week to eligible beneficiaries, for consideration in our development of the CY 2018 rulemaking. Individuals should submit their comments as indicated under the **DATES** section of this final rule with comment period. Finally, as noted previously in this section, we will monitor PHP claims, beginning in January 2017, to determine whether PHP beneficiaries are receiving at least 20 hours per week of partial hospitalization services.

PHP services can be extremely beneficial to eligible patients and, at the same time, can provide a more cost-effective method for providing care outside of an inpatient setting. We are working to protect vulnerable beneficiaries with mental health conditions by helping to ensure that eligible beneficiaries receive the level of care that is appropriate to the PHP setting.

c. Alternatives Considered

As we discussed in the CY 2017 OPPS/ASC proposed rule (81 FR 45672 through 45673), we considered several alternatives to replacing the Level 1 and Level 2 PHP APCs with a single new APC for each PHP provider type. We investigated whether we could maintain the Level 1 and Level 2 PHP APCs if the PHP APC per diem costs were based upon unit costs. However, the same data issues that affected per diem costs also affected unit costs. The hospital-based unit cost data also were inverted such that a Level 1 service day would be more costly than a Level 2 service day. As we have previously noted, we do not believe that it is appropriate to pay more for providing Level 1 services than for providing Level 2 services because only 3 services are provided during Level 1 service days and 4 or more services are provided during Level 2 service days.

We also considered continuing the two-tiered PHP APC payment structure by provider type, and addressing future cost inversions as they arise. Under this alternative, we could have proposed to use a default methodology for handling cost inversions by only combining the two-tiered PHP APC structure for the provider type with inverted data, and only for the affected calendar year. However, we believe that it could be confusing if one provider type was paid for PHP services based on a two-tiered payment structure, while the other provider type was paid based on a single APC grouping. We also believe that providers would prefer the predictability of knowing whether they would be paid using a single PHP APC or using two-tiered PHP APCs for Level 1 and Level 2 services.

Another alternative for handling cost inversions could be to apply an equitable adjustment. However, the level of adjustment required would vary depending on the degree of the inversion, which also could fluctuate from year to year. Again, we believe, and providers and their representative associations have informed us, that providers would prefer the predictability afforded by avoiding cost inversions altogether, rather than being subject to an *ad hoc* adjustment as cost inversions arise.

We considered whether we should adjust our data trims, but we determined that the cause of the cost inversion was not due to providers with aberrantly high CCRs or costs per day. Rather, we believe that the cause of the cost inversion was largely the influence of high volume providers with high (but not inappropriately high) Level 1 service day costs and low (but not inappropriately low) Level 2 service day costs in the CY 2015 hospital-based PHP claims data used for the CY 2017 rulemaking. This suggested that adjusting data trims may not be an effective method for resolving the inversion. Nevertheless, we reconsidered our analysis of the preliminary CY 2015 claims data for hospital-based PHPs by testing a stricter trim on hospital-based PHP data using the published upper limit CCR that hospitals use for calculating outliers rather than the existing CCR>5 trim. This test of a stricter CCR trim did not remove the inversion, and as a result, we did not propose to change the existing CCR>5 trim on hospital-based PHP service days for our CY 2017 ratesetting.

Comment: One commenter recommended that CMS maintain the two-tiered system, but combine the APCs for CMHCs and hospital-based PHPs. The commenter noted that CMHCs and hospital-based PHPs provide the exact same services, but are paid differently, although the commenter acknowledged that hospital-based PHPs have higher costs, largely due to overhead allocation. The commenter believed that the APCs distinguished by provider type ''punish'' rather than reward CMHCs for being more cost-effective than hospital-based PHPs. The commenter believed that freestanding CMHCs should not be paid less than hospital-based PHPs, and noted that, in 2015, MedPAC recommended that Congress decrease or eliminate the payment differences between hospital outpatient departments and physician offices. The commenter stated that setting CMHCs' payment rates based on the small

number of remaining CMHCs does not reflect the actual cost of providing these services.

Response: The OPPS system pays for outpatient services, including partial hospitalization services. This system bases payment on the geometric mean per diem costs of providing services using provider data from claims and cost reports. We calculate the PHP APC geometric mean per diem costs based on the data provided for each type of provider to determine payment for these services. We believe that this system provides appropriate payment for partial hospitalization services based on actual provider costs. The final PHP APC geometric mean per diem costs for CY 2017 reflect the costs of what providers expend to maintain such programs, as reported on their claims and cost reports.

We believe the commenter has misunderstood MedPAC's recommendation in its March 2015 Report to Congress. MedPAC recommended that payment rates be adjusted for more costly hospital outpatient departments so that they more closely align with those of less costly freestanding physician offices providing the same services (Medicare Payment Advisory Commission Report to the Congress: Medicare Payment Policy, Chapter 3, ''Hospital Inpatient and Outpatient Services,'' page 51, March 2015). Congress has since addressed a portion of this recommendation in section 603 of the Bipartisan Budget Act of 2015. We refer readers to section X.A. of this final rule with comment period for a full discussion of the provisions of section 603. The provisions of section 603 do not apply to CMHCs because CMHCs are not a department of a hospital. The difference in payment between CMHCs and hospital-based PHPs is based upon differences in resource use (or costs). When Congress required the Secretary to implement an outpatient prospective payment system, it required that this payment system group clinically similar covered services with respect to resource use (section 1833(t)(2) of the Act). Because CMHCs and hospital-based PHPs resource uses are different, these two provider types are paid under different APCs, based on their actual resource use.

Because the cost of providing partial hospitalization services differs significantly by site of service, we established different PHP payment rates for hospital-based PHPs and CMHCs in the CY 2011 OPPS/ASC final rule with comment period (75 FR 71991 through 71994). However, we allowed a 2-year transition to CMHC payment rates based solely on CMHC data. With respect to the continued use of PHP APC geometric mean per diem costs for determining payment rates by provider type (rather than median costs, which commenters mistakenly referenced), we refer readers to the CY 2013 OPPS/ASC final rule with comment period (77 FR 68406 through 68412) for a discussion of the implementation of this policy. The resulting payment rates reflect the geometric mean cost of what providers expend to maintain such programs, based on data provided by CMHCs and hospital-based PHPs, which we believe is an improvement over the two-tiered methodology calculated based on median costs using only hospital-based data.

Comment: One commenter suggested that CMS consider paying PHPs using a quality-based payment system, and that CMS use value-based purchasing.

Response: We responded to a similar public comment in the CY 2016 OPPS/ASC final rule with comment period (80 FR 70462) and refer readers to a summary of that comment and our response. To reiterate, sections 1833(t)(2) and 1833(t)(9) of the Act set forth the requirements for establishing and adjusting OPPS payment rates, which include PHP payment rates. Section 1833(t)(17) of the Act authorizes the Hospital OQR Program, which applies a payment reduction to subsection (d) hospitals that fail to meet program requirements. In the CY 2015 OPPS/ASC proposed rule (79 FR 41040), we considered future inclusion of, and requested comments on, the following quality measures addressing PHP issues that would apply in the hospital outpatient setting: (1) 30-day Readmission; (2) Group Therapy; and (3) No Individual Therapy. We also refer readers to the CY 2015 OPPS/ASC final rule with comment period (79 FR 66957 through 66958) for a more detailed discussion of PHP measures considered for inclusion in the Hospital OQR Program in future years. The Hospital OQR Program does not apply to CMHCs. Further, currently, there is no statutory language explicitly authorizing a value-based purchasing program for PHPs.

2. Development of the PHP APC Geometric Mean Per Diem Costs and Payment Rates

In the CY 2017 OPPS/ASC proposed rule (81 FR 45667 through 45678), for CY 2017 and subsequent years, we proposed to follow the detailed PHP ratesetting methodology described in section VIII.B.2. of the CY 2016 OPPS/ASC final rule with comment period (80 FR 70462 through 70466) to determine the PHP APCs' geometric mean per diem costs and to calculate the payment rates for the new single hospital-based PHP APC and CMHC APC. However, as discussed in section VIII.B.1. of this CY 2017 final rule with comment period, in support of our CY 2017 policies to establish single PHP APCs for hospital-based PHPs and CMHCs, we also are combining the geometric mean per diem costs for the two existing hospital-based PHP APCs to calculate a geometric mean per diem cost for new hospital-based PHP APC 5863. Currently, hospital-based PHP service days with exactly 3 service units (based on allowable PHP HCPCS codes) are assigned to Level 1 PHP APC 5861, and hospital-based PHP service days with 4 or more service units (based on allowable PHP HCPCS codes) are assigned to Level 2 PHP APC 5862. Under our CY 2017 proposal, instead of separating the service days between these two APCs, we proposed to combine the service days so that hospital-based PHP service days that provide 3 or more service units per day (based on allowable PHP HCPCS codes) are assigned to new hospital-based PHP APC 5863. We then proposed to continue to follow the existing methodology described in section VIII.B.2.e. of the CY 2016 OPPS/ASC final rule with comment period (80 FR 70465 through 70466) to its end to calculate the geometric mean per diem cost for new hospital-based PHP APC 5863. Therefore, the geometric mean per diem cost for new hospital-based PHP APC 5863 would be based upon actual hospital-based PHP claims and costs for PHP service days providing 3 or more services.

Similarly, we proposed to combine the geometric mean per diem costs for the two existing CMHC APCs to calculate a geometric mean per diem cost for new CMHC APC 5853. Currently, CMHC service days with exactly 3 service units (based on allowable PHP HCPCS codes) are assigned to Level 1 CMHC APC 5851, and CMHC service days with 4 or more service units (based on allowable PHP HCPCS codes) are assigned to Level 2 CMHC APC 5852. Under our CY 2017 proposal, instead of separating the service days between these two APCs, we proposed to combine the service days so that CMHC service days that provide 3 or more service units (based on allowable PHP HCPCS codes) are assigned to proposed new CMHC APC 5853. We then proposed to continue to follow the existing PHP ratesetting methodology described in section VIII.B.2.e. of the CY 2016 OPPS/ASC final rule with comment period (80 FR 70465 through 70466) to its end to

calculate the geometric mean per diem cost for new CMHC APC 5853. Therefore, the geometric mean per diem cost for new CMHC APC 5853 would be based upon actual CMHC claims and costs for CMHC service days providing 3 or more services.

To prevent confusion, we referred to the per diem costs listed in Table 19 of the proposed rule as the proposed CMHC or hospital-based PHP APC per diem costs or the proposed CMHC or hospital-based PHP APC geometric mean per diem costs. We referred to the CMHC or hospital-based PHP per diem payment rates listed in Addendum A to the proposed rule (which is available via the Internet on the CMS Web site) as the proposed CMHC or hospital-based PHP APC per diem payment rates or the proposed CMHC or hospital-based PHP APC geometric mean per diem payment rates. The CMHC or hospital-based PHP APC per diem costs are the provider-specific costs derived from the most recent claims and cost data. The CMHC or hospital-based PHP APC per diem payment rates are the national unadjusted payment rates calculated from the CMHC or hospital-based PHP APC per diem costs, after applying the OPPS budget neutrality adjustments described in section II.A.4. of this final rule with comment period.

We proposed to apply our established methodologies in developing the geometric mean per diem costs and payment rates under this proposal, including the application of a ±2 standard deviation trim on costs per day for CMHCs and a CCR>5 hospital service day trim for hospital-based PHP providers. These two trims were finalized in our CY 2016 OPPS/ASC final rule with comment period (80 FR 70455 through 70462) for CY 2016 and subsequent years.

a. CMHC Data Preparation: Data Trims, Exclusions, and CCR Adjustments

For the proposed rule, prior to calculating the proposed geometric mean per diem cost for new CMHC APC 5853, we prepared the data by first applying trims and data exclusions, and assessing CCRs as described in the CY 2016 OPPS/ASC final rule with comment period (80 FR 70463 through 70465), so that ratesetting is not skewed by providers with extreme data. Under the ±2 standard deviation trim policy, we excluded any data from a CMHC for ratesetting purposes when the CMHC's geometric mean cost per day is more than ±2 standard deviations from the geometric mean cost per day for all CMHCs. By applying this trim for CY 2017 ratesetting, in the proposed rule, three CMHCs with geometric mean per diem costs per day below the trim's lower limit of $42.83 were excluded from the proposed ratesetting for CY 2017 (81 FR 45674). We also applied the OPPS ±3 standard deviation trim on CCRs to exclude any data from CMHCs with CCRs above or below this range. This trim resulted in the exclusion of one CMHC with a very low CCR of 0.001. Both of these standard deviation trims removed four providers from ratesetting whose data would have skewed the calculated proposed geometric mean per diem cost downward.

In accordance with our PHP ratesetting methodology, in the proposed rule, we also removed service days with no wage index values because we use the wage index data to remove the effects of geographic variation in costs prior to APC geometric mean per diem cost calculation (80 FR 70465). In our CY 2017 proposed rule ratesetting, one CMHC was excluded because it was missing wage index data for all of its service days.

In addition to our trims and data exclusions, before determining the PHP APC geometric mean per diem costs, we also assess CCRs (80 FR 70463). Our longstanding PHP OPPS ratesetting methodology defaults any CMHC CCR>1 to the statewide hospital ancillary CCR (80 FR 70457). In our CY 2017 proposed rule ratesetting, we identified one CMHC that had a CCR>1. This CMHC's CCR was 1.185 and was defaulted to its appropriate statewide hospital ancillary CCR for CY 2017 ratesetting purposes.

These data preparation steps adjusted the CCR for 1 CMHC and excluded 5 CMHCs, resulting in the inclusion of a total of 46 CMHCs in our CY 2017 proposed rule ratesetting modeling, and the removal of 643 CMHC claims from the 17,033 total CMHC claims used. We believe that excluding providers with extremely low geometric mean costs per day or extremely low CCRs protects CMHCs from having that data inappropriately skew the calculation of the CMHC APC geometric mean per diem cost. Moreover, we believe that these trims, exclusions, and adjustments help prevent inappropriate fluctuations in the PHP APC geometric mean per diem payment rates.

For the CMHC final rule results, we used updated CY 2015 final claims data. The final CY 2015 Outpatient Standard Analytic File used for CY 2017 ratesetting showed that 52 CMHCs had claims in CY 2015. As described in the discussion of the PHP ratesetting process in the CY 2016 final rule (80 FR 70462 through 70467), in section II.A. of this final rule with comment period, and in the OPPS Claims Accounting Document under supporting documentation ''Downloads'' for the CY 2017 OPPS/ASC final rule with comment period (available online at *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices.html*), in developing the claims eligible for ratesetting we excluded CMHCs with outlier overall CCRs (1 CMHC). After making this exclusion, our updated CY 2015 claims data showed 51 CMHCs with claims that were eligible for ratesetting. We then applied our ratesetting trims and exclusions. Our ±2 standard deviation trim policy excluded 3 CMHCs with geometric mean per diem costs per day below the trim's lower limit of $39.77, and 1 CMHC with geometric mean per diem costs per day above the trim's upper limit of $403.50. This ±2 standard deviation trim removed 4 CMHCs from our final rule ratesetting whose data would have skewed the calculation of the final geometric mean per diem cost. For this final rule with comment period, we also applied the OPPS ±3 standard deviation trim on CCRs to exclude any data from CMHCs with CCRs above or below this range, but no CMHCs were excluded as a result.

In accordance with our PHP ratesetting methodology, we also removed service days with no wage index values because we use the wage index data to remove the effects of geographic variation in costs prior to APC geometric mean per diem cost calculation (80 FR 70465). In this CY 2017 final rule ratesetting, 2 CMHCs were excluded because they were missing wage index data for all of their service days.
